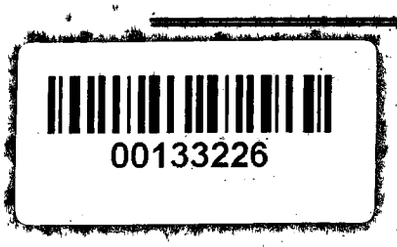
GOVERNMENT OF BOMBAY

FOR THE YEAR

1897-98
1901



Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1898.

No. $\frac{S.B.}{444}$ OF 1898.

From

THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 24th August 1898.

SIR,

I have the honour to submit my Annual Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1897, and to state that, in accordance with Government orders, the summaries of the annual reports of medical officers and subordinates and of those on medical schools have been omitted this year.

At the close of the year 1897 there were 197 pupils in the three Provincial Medical Schools, distributed as follows:—

Classes of Pupils.	Byramji Jijibhoy Medical School, Poona.				Byramji Jijibhoy Medical School, Ahmedabad.				Medical School, Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	3	6	3	12	4	6	5	15	...	...	...	...	7	12	8	27
Stipendiary	5	6	1	12	5	5	5	15	10	6	13	29	20	17	19	56
Native State	7	6	1	14	1	2	...	3	...	...	...	...	8	8	1	17
Paying	1	2	5	8	11	7	13	31	...	1	8	9	12	10	26	48
Civil Medical	8	17	5	30	2	4	4	10	3	2	3	8	13	23	12	48
Free	...	...	...	...	1	...	...	1	...	...	...	...	1	...	..	1
Total ...	24	37	15	76	24	24	27	75	13	9	24	46	61	70	66	197

The following figures show the present prospects of recruiting the Civil Hospital Assistants:—

Sanctioned strength	...	...	...	283
20 per cent. reserve	...	...	...	56
				339
Present strength (on 31st March 1898)			...	319
			Deficiency ...	20

This deficiency will be made up by the civil medical pupils who will pass this year, and possibly also from the Hospital Assistants employed temporarily for plague duty.

Owing to the prevalence of plague, the Byramji Jijibhoy Medical Schools at Poona and Ahmedabad were closed, and some of the pupils were employed on plague duty from September 1897. These schools were re-opened on the 20th June 1898.

At Poona, Surgeon-Lieutenant-Colonel Greany, M.D., acted as Superintendent up to the 14th February 1897 during the absence on furlough of Brigade-Surgeon-Lieutenant-Colonel McConaghy, M.D., who resumed charge on the 15th February 1897. Surgeon-Captain Heath, M.B., and Assistant Surgeon D. G. Sabnis were present throughout the year, and discharged their duties as teachers most satisfactorily. Assistant Surgeon E. S. Bharucha was a teacher up to the middle of September 1897, when he was deputed to plague duty in charge of Plague Flying Columns at Kalidhon and Karád. Surgeon-Captain J. Gallagher, I.S.M.D., was a teacher up to the 30th April 1897, when he was pensioned. He was succeeded by Assistant Surgeon J. M. Dias, I.S.M.D., up to 10th August 1897, when Surgeon-Captain C. Easdon, I.S.M.D., replaced him. All these officers worked with zeal and intelligence during the period they were attached to the school. The conduct of the pupils has also been reported to be satisfactory.

At Ahmedabad, Assistant Surgeons A. M. Dotivala and M. G. Desái acted during the absence of Assistant Surgeon B. H. Nanavatty on sick leave and furlough. The teaching staff is reported by the Superintendent to have worked satisfactorily.

At Hyderabad the Superintendentship was held by Surgeon-Major Baker, M.A., M.D., up to the 16th March 1897, and since then by Surgeon-Lieutenant-Colonel Henderson, F.R.C.S.I. Assistant Surgeon M. G. Thadani was senior teacher up to the 11th March 1897, when, on his transfer to act as Civil Surgeon, Shikárpur, he was succeeded by Assistant Surgeon Jivatram Alimchand. The Superintendent speaks in very high terms of Assistant Surgeons Jivatram Alimchand and R. S. Poredi as regards their teaching duties in the class room and in the wards.

On the statistical tables which form Appendix I, I beg to make the following remarks:—

Statement No. I shows the classification of the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency. On the 1st January 1897 there were 314 institutions open. During the year under review one new institution was added, *viz.*, Shahdádpur in the Hyderabad (Sind) District, and three were closed, *viz.*, Nánas Peith, Kasba Peith and Shukarwár Peith Dispensaries, in Poona. Thus at the end of the year 312 institutions were open.

Statement No. II is a return of the number of patients treated, both in-door and out-door. The total number treated was 1,742,804 against 2,319,346 in the previous year. Of these, 32,585 were in-door and 1,710,219 out-door patients, as compared with 30,857 in-door and 2,288,489 out-door in 1896. The in-patients were, therefore, more numerous by 1,728 and the out-patients fewer by 578,270, the net decrease being 576,542.

Of the in-door patients, 22,228 were cured, 1,932 relieved, 2,255 discharged otherwise and 4,762 died, giving a death ratio of 14·6 per cent. to the total treated, against 7·2 in 1896. The increase appears to be due to deaths from plague, of which 4,194 cases were treated. The daily average sick was 1,341·0 (men 1,063·2, women 196·3 and children 81·5) as compared with 1,410·4 (men 1,133·5, women 194·6 and children 82·3) in the previous year. The total number of beds available was 3,107 (male 2,188 and female 919) against 3,087 (male 2,152 and female 935) in 1896.

Of the out-door patients, 1,540,008 attended personally and 170,211 were represented by friends, the corresponding figures for the preceding year being 2,109,172 and 179,317. The decrease in the attendance was due partly to the temporary closure of several dispensaries in the Presidency owing to Hospital Assistants attached to them being withdrawn for plague duty, and partly to the scare caused by the plague epidemic among the people who generally resort for treatment to hospitals and dispensaries. The daily average attendance was 16,617·6 as compared with 20,613·6 in 1896.

Statement No. III shows the diseases for which the patients were treated. There were 495 cases of small-pox as compared with 480 in 1896. Of these, the Deccan institutions returned 168 cases, Foreign 149, Sind 121, Gujarát 44 and Konkan 13; the corresponding figures for the previous year being 176, *nil*, 139, 149 and 16. Cholera is credited with 5,741 cases against 5,879 in 1896. Of these, 4,915 were treated in the Deccan, 512 in the Konkan and 314 in the Gujarát institutions, as compared with 3,896, 264 and 1,719 in the preceding year. Malarial fevers, as usual, gave the largest number of admissions, *viz.*, 281,641, or a percentage of 16·2 to the total treated, against 386,551 and 16·7 per cent. in 1896. Venereal diseases accounted for 24,580 cases (primary syphilis 5,390, secondary syphilis 8,619, gonorrhœa 8,953 and other venereal affections 1,618), as compared with 33,482 (primary syphilis 7,414, secondary syphilis 11,678, gonorrhœa 11,659 and other venereal affections 2,731) in the previous year. The percentage to the total treated was the same as in 1896, *viz.*, 1·4. Intestinal worms caused 206,051 admissions, or 11·8 per cent. of the total treated as compared with 250,883 and 10·8 per cent. in the year 1896. There were 34,765 cases of dysentery or 2·0 per cent. of the total treated, against 37,106 and 1·6

per cent. in the previous year. The admissions from diarrhœa show a decrease of 11,832 cases as compared with the previous year, *viz.*, 45,713 against 57,545; and the percentage to the total treated was 2·6 as compared with 2·5 in 1896. Rheumatic affections are credited with 42,809 cases or 2·5 per cent of the total treated, against 60,561 and 2·6 per cent. in the preceding year. Excepting small-pox and plague, the only general diseases the admissions for which increased were debility and tubercular affections, their totals being larger by 1,328 and 286, respectively, than in the previous year.

It will be observed that practically no change occurred in the ratios of cases of each of the general diseases above noted to the total admissions, showing that the decrease in attendance is owing to causes other than a subsidence of particular diseases. It was doubtless the result of the unsettled state of the people, whose routine of life was interfered with, and their minds disturbed by, the prevalence of plague and by the regulations which it necessitated. But that the reduced attendance was due solely, or specially, to a fear of detention appears to be disproved by the figures given above, and by the fact that it occurred also in the case of all local diseases and, even in that of injuries, among which a large decrease from this cause could not have been expected. The total of general diseases, the chief of which are specified above, was 713,029, a reduction of 137,546, or 16 per cent. on the total of the same class in 1896; but in "all other general diseases" there was an increase of 39,881, of which 4,194 are accounted for as plague cases. The latter figure represents mainly the number reported from permanent hospitals; for the cases treated in special plague hospitals (not directly under my control) being returned in special reports, have not yet been collated. There remains an excess of 35,687 admissions for general diseases which, without minute enquiry and further delay of this report, I cannot explain. Possibly some were due to plague, but it is very likely that, in order to avoid suspicion of plague, cases of fever were registered under various other general diseases.

The number of plague cases reported to me by medical officers and subordinates as coming to their knowledge during the year 1897 was 40,712 with 31,808 deaths, whereas the total cases of plague reported to Government was as under* :—

	Cases.	Deaths.
Konkan	7,396	5,813
Deccan	34,211	24,705
Gujarát	13,557	10,542
Sind	6,058	4,759
Total ...	61,222	45,819

With reference to sub-paragraph 3 of paragraph 2 of Government Resolution No. 3195, dated the 8th September 1893, General Department, I beg to attach, for the information of Government, a table showing the number of cases of malarial fevers treated in each registration district, as compared with the previous year :—

	1897.	1896.
Konkan	41,796	60,011
Deccan	105,244	158,177
Gujarát	70,289	106,950
Sind	58,314	53,458
Foreign	5,998	7,955
Total ...	281,641	386,551

The total decrease in the cases of malarial fevers treated was, therefore, 104,910, Sind being the only district in which there was not a large diminution in the numbers. The ratio (16·2) of these fevers per cent. of total treated is almost identical with that (16·7) of the previous year, and lower than in either of the three preceding four years 1892—95, in which the mean was 19·6. The decrease in the total of malarial fevers is not disproportionate to that in other diseases, being correlated with the general diminution in attendance.

* *Note.*—The Sanitary Commissioner, in his Annual Report, gives the deaths from plague at 46,944.

Excepting in the Kárwár and Dhárwár Collectorates, in which the numbers increased by 1,390 and 393 respectively, the reduction of attendance on account of these diseases was general, and, on the whole, directly proportionate to the severity of plague in each district or in those adjacent to it. Thus the decrease of admissions for malarial fevers per cent. for each district, as compared with the year 1896, was as under :—

	Decrease per cent.		Decrease per cent.
Khándesh	15	Thána	31
Belgaum	21	Ahmedabad	31
Kolhápur and Southern Mahrátta Agency	23	Cutch	31
Ahmednagar	24	Sholápur	33
Bijápur	26	Surat	48
Násik	28	Kolába	59
Kaira	28	Ratnágiri...	61
Broach	30	Poona	62
		Sátára	65

On comparing these figures with the mortality recorded by the Sanitary Commissioner in his report for 1897, it appears that the deaths from fever, in which those due to plague (46,944) are included, only exceeded those of the previous year by 40,367. Therefore the deaths reported as due to fevers may be taken as about 6,577 less than in the year 1896.

Hence, though it is probable that some cases of fever may have been suppressed, there is reason to believe that there was no increase in the sickness and mortality from this cause.

The local diseases, including injuries and poisons, numbered 1,029,775 as compared with 1,468,771 in the previous year, a decrease of 30 per cent. So that among this class, which includes a larger proportion of the more chronic and less urgent ailments, the diminution was rather more than double that which occurred among general diseases.

The decrease in the most important of the local diseases and injuries was as under :—

Diseases of the eye	17,308
„ „ ear	26,650
„ „ lungs	8,836
Other respiratory diseases	30,258
Dyspepsia	14,262
Other diseases of digestive system	43,940
Diseases of the connective tissue	22,955
„ „ skin	176,279
Ulcers	23,277
Injuries, general and local	16,771
Poisons	2,960

These figures support the view stated above, that the diminished attendance is largely attributable to migration of the people and their unsettled state, and not to any great extent to a fear of detention for plague. The existence of scarcity during the earlier months of the year may also be regarded as a factor.

Without detailed enquiry, I am unable to explain the decrease in "General Injuries". As regards "Poisons", it is partly due to the new nomenclature, but there is an actual diminution of 1,127 admissions for bites and stings of animals and of 139 cases of poisoning by alcohol, opium and dhatura.

Statement No. IIIA shows the number of surgical operations performed, with their results. On 1st January 1898 there remained under treatment 212 cases which had been operated on, and these, with 82,352 operations (81,482 principal and 870 secondary) performed during the year, make a total of 82,564 as compared with 111,926 in 1896. The total number of patients operated on was 81,404, against 110,994 in the previous year. Of these, 70,566 were cured, 942 relieved, 795 discharged otherwise, and 122 died, leaving 118 patients under treatment at the end of the year. The number of deaths in operated cases was 190 in 1896.

The return, therefore, shows a decrease of 29,287 operations. About 6,000 of these are accounted for by the exclusion of procedures such as the application

of sutures, the administration of enemata and douches, the use of probes and specula, &c., which are not in the Appendix to the Nomenclature of Diseases and have no claim to be styled operations.* The remaining diminution is mainly under the following heads, and is consequent on the general decrease in attendance, *viz.* :—

* A considerable number of these were included under "Operations not classified," a heading which has now been expunged.

	Decrease.
Opening abscesses	10,818
Removal of foreign bodies	1,519
Amputations	144
Operations on the head and face, &c.	6,840
Operations on the eye	300
,, ,, ear	572
,, ,, urinary organs	2,467
	22,660

Owing to the adoption of the new nomenclature, a detailed comparison with the previous year would be imperfect. It will, however, be seen that this return has been much condensed by reducing the number of minor headings, and I hope that, in other respects, it will be found more accurate than that of the year 1896.

The following table shows the total number of patients operated on in the various classes of operations, with the results :—

Class.	Total number of surgical operations.	Total number of patients operated on.	Results.				Remaining on 31st December 1897.
			Cured.	Relieved.	Discharged otherwise	Died.	
Operations on Tumours	832	831	724	13	6	4	2

Statement No. IV gives the sex and caste of the patients and is summarized in the following table :—

	1897. Number.	1897. Ratio per cent.	1896. Number.	1896. Ratio per cent.
Sex.				
Men	813,604	46·7	1,027,570	44·3
Women	321,686	18·4	426,059	18·4
Children	607,514	34·9	865,717	37·3
Caste.				
Hindus	1,239,692	71·1	1,639,786	70·7
Musalmáns	422,756	24·3	580,398	25·0
Native Christians	31,420	1·8	40,580	1·8
Párs is	27,397	1·6	28,134	1·2
Europeans	5,729	0·3	5,688	0·2
Eurasians	2,621	0·1	2,545	0·1
Other Castes	13,189	0·8	22,215	1·0

In classifying the cases according to their sexes, all under ten years of age have been returned as children, in pursuance of the orders contained in sub-paragraph 3 of paragraph 3 of the Government of India, Home Department (Medical), No. 31—Medl.—1100 and No. 619, dated respectively the 19th December 1896 and 18th June 1897, embodied in the Bombay Government Resolutions Nos. 849 and 3969 of 16th February and 20th July 1897, General Department.

Statement No. V treats of the current income and expenditure of the hospitals and dispensaries during the year under review; and the following is an abstract of their cash accounts for the year 1897 as compared with the preceding year :—

Income.	1897.			1896.			Expenditure.	1897.			1896.		
	Rs.	a.	p.	Rs.	a.	p.		Rs.	a.	p.	Rs.	a.	p.

							Cost per patient	0	7	9	0	5	6
Total Income ...	8,27,248	4	4	8,88,974	4	1	Percentage of total cost paid by Government.	48·2			47·6		

The opening balance of the year under report, should correspond with the closing balance of the previous year, but it will be seen that there is a discrepancy of Rs. 216-0-0, which is accounted for as follows:—

Name of Institution.	Balance on 31st December 1896.	Balance on 1st January 1897.	Remarks.
	Rs. a. p.	Rs. a. p.	
Dápoli	.....	384 12 0	The Hospital Assistant states that there was at the end of the year 1896 a balance of Rs. 384-12-0 which, through an oversight, he had omitted to include in the return for that year.
Kavi	1,831 8 6	1,830 14 6	Neither the Treasury Officer nor the Hospital Assistant can explain how the discrepancy of annas ten has crept in.
Dehej	1,401 1 5	1,221 2 4	The discrepancy has remained unexplained owing to the dispensary being in charge of the Compounder, who could not account for it when called upon by this office in absence of the Hospital Assistant on plague duty.
Kandiáro	.....	11 14 11	The Hospital Assistant states that there was, at the close of the year 1896, a balance of Rs. 11-14-11, which was included by the Mukhtyár Munshi in the accounts rendered by him for that year, and hence the discrepancy.
Rohri	489 9 4	489 7 6	The Hospital Assistant states that Rs. 489-7-6 have been shown as balance at the end of the year 1896 in his office copy of the return for that year, whereas in the original document submitted by him through the Principal Medical Officer, Sind District, Rs. 489-7-6 were scored out and Rs. 489-9-4 substituted, probably by the latter officer.

The total income, exclusive of the cash balance, was Rs. 6,99,850-2-9 as compared with Rs. 7,55,648-2-11 in 1896. Of this sum, Rs. 3,42,657-5-9 were contributed by Government, Rs. 1,53,597-4-8 by Municipalities and Rs. 1,06,897-1-6 by Local Funds, the corresponding figures for the previous year being Rs. 3,51,337-1-9, Rs. 1,68,566-12-0 and Rs. 1,09,073-12-8. The interest on invested capital yielded Rs. 22,952-11-9, against Rs. 18,117-4-1 in 1896. The sale of securities or withdrawal of deposits amounted to Rs. 15,000-0-0 as compared with Rs. 27,000-0-0 in the preceding year. The subscriptions from Europeans and Natives were less by Rs. 760-8-0 and Rs. 19,443-2-11 than in the previous year. The receipts from paying patients amounted to Rs. 21,955-11-10, against Rs. 21,846-9-3 in 1896. The amount realized by the sale-proceeds of medicines not supplied by Government and from other miscellaneous sources, such as sale of unserviceable articles, &c., &c., was Rs. 31,318-5-2 as compared with Rs. 34,031-6-2 in the preceding year.

The total expenditure amounted to Rs. 7,00,512-4-0 as compared with Rs. 7,61,792-2-6 in 1896. Deducting from the expenditure Rs. 32,400-0-0 invested during the year, Rs. 230-7-5, an unexpended balance at the Becherdas Dispensary, Ahmedabad, which lapsed to the Ahmedabad Municipality, and Rs. 39,448-6-4 remitted into the Treasury on account of hospital stoppages, sale of unserviceable articles, &c., &c.,—in all, Rs. 72,078-13-9, the net cost was Rs. 6,28,433-6-3, against Rs. 6,52,109-4-6 in the previous year. The cost of each diet averaged Re. 0-2-6, or pies 2 more than in the year 1896. The cost per patient was Re. 0-7-9 as compared with Re. 0-5-6 in the preceding year. The net cost paid by Government was Rs. 3,03,063-11-1, or 48·2 of the actual expenditure, against Rs. 3,10,286-3-2 and 47·6 in 1896.

With reference to the concluding sentence of paragraph 8 of Government Resolution No. 4648, dated 20th October 1896, General Department, I beg to attach below Statements A and B showing the names of hospitals and dispensaries of the districts of each division, with the amount realized on account of hospital stoppages in each institution separately, as compared with the previous

year, and Statement C, giving the total amount by divisions of the Bombay Presidency :—

Total ...	13,434 3 3	8,375 5 0	8,204 5 9	8,842 9 0	21,638 9 0	17,217 14 0

The total amount of hospital stoppages realized during the year under report was Rs. 21,638-9-0 as compared with Rs. 17,217-14-0 in 1896. This increase is mainly due to the fact that the amount collected under the hospital stoppage rules at the Sassoon General Hospital, which in previous years was erroneously included under the head "Receipts from paying patients for diet," has now been shown under the proper head. By adding the amount received from paying patients for diet, which also forms a part of the hospital stoppage system, the total receipts would amount to Rs. 21,955-13-10 against Rs. 21,846-9-3 in 1896. This slight increase may be regarded as satisfactory when it is remembered that at several Municipal and endowed dispensaries these rules are not in force, and are at others unpopular, also that a number of dispensaries were temporarily closed owing to the withdrawal of hospital assistants for plague duty.

On examination, Statements A and B show indications of a general tendency to increase in those places and districts where plague did not prevail. The hospitals at which there was the greatest improvement in the receipts are

Dhulia, Dhárwár, Bijápur, Broach and Shikárpur. As regards dispensaries, the districts in which there was appreciable diminution are Thána, Kánara, Násik, Belgaum, Surat, Kaira, Panch Mahals and Sind. In Belgaum it will be seen that the falling off occurred almost entirely at the head-quarter town, which was most affected by plague. It seems fair to assume that, had it not been for the plague, a more decided, though not very large, increase in the receipts would have occurred.

The reports received from charges on the working of these rules are, for the most part, on the same lines as those previously furnished, and do not require any further comments from me.

The following table shows the pay drawn by the Civil Surgeons during the year 1897 as compared with the preceding year :—

Statement No. V, Part II, shows the account of the invested capital. On 1st January 1897, there was a balance in hand of Rs. 5,67,800-0-0, showing a discrepancy, as compared with the previous year, of Rs. 21,000-0-0, which is explained as follows:—

Name of Dispensary.	Balance in hand on 31st December 1896.	Balance in hand on 1st January 1897.	Remarks.
	Rs. a. p.	Rs. a. p.	
E. F. Allbless Leper Home, Trombay ...	27,000 0 0	28,000 0 0	The Honorary Secretary states that the balance now shown is correct, that entered in the previous years' returns being incorrect. He cannot explain how this error has crept in and been allowed to pass for so many years.
Lord Harris Travelling Dispensary, Daskroi Táluka, Ahmedabad.	.....	20,000 0 0	The present Hospital Assistant states that the balance shown in the return of the year under report is correct and that it seems his predecessor was not informed of this investment made in 1896.

This, with Rs. 32,400-0 invested during the year, makes a total of Rs. 6,00,200-0-0. Securities worth Rs. 10,000-0-0 having been sold, and deposits amounting to Rs. 5,000-0-0 withdrawn, there remained at the end of the year Rs. 5,85,200-0-0.

The following minor works were executed, and paid for, from the discretionary grant placed at my disposal during the year ending 31st December 1897:—

	Rs.
Completing the enlargement of the operation room at the Huttesing and Premabhai Civil Hospital, Ahmedabad	85
Replacing stone latrines by galvanized iron privies (Crawford's pattern), six units on stone or cement floor at the Civil Hospital, Karáchi	350
Making additions and alterations to the Hospital Assistants' quarters attached to the Civil Hospital, Belgaum	79
Providing shelves for clothing in the store room of the Huttesing and Premabhai Civil Hospital, Ahmedabad	100
Providing a door for the office of the Civil Hospital, Sátára ...	50
Providing a large window for the ward opposite the lunatic cells at the Civil Hospital, Sátára	70
Providing a large window for the female ward at the Civil Hospital, Sátára	80
Providing the windows with iron bars and some with weather-frames at the Civil Hospital, Belgaum	138
Providing fixed shelves in the Civil Hospital, Belgaum ...	96
Total ...	1,048

The Principal Medical Officer, Bombay and Aden Districts, inspected the civil medical institutions in Aden, and has reported very favourably on them and the medical officers in charge.

The greatly increased office duties caused by prevalence of plague and the fact that the appointment was held during November and December by the A. M. S. officer in charge of the Station Hospital, in addition to his own duties, prevented the Principal Medical Officer, Sind District, from inspecting any of the civil institutions under him.

All the dispensaries, excepting those mentioned below, were inspected by the Civil Surgeons of the various districts:—

Kelva Máhim	Thána.
Sháhápur	
Chinchni	
Umbargaon	
Murbád	
Váda	
Trombay	
Kalyán	
Uran	Kolába.
Supa	Kánara.
Yellápur	
Mundgod	
Sangamner	Ahmednagar.
Nevása	
Shevgaon	
Akola	
Satána	Násik.
Pimpalgaon Basvant	
Peint	
Chándor	
Yával	Khándesh.
Islámpur	Sátára.
Pusesávli	
Mhasvad	
Pátan	
Tásgaon	
Pánchgani...	
Athni	Belgaum.
Saundatti	
Ilkal	Bijápur.
Paránti]	Ahmedabad.
Shikárpur	Shikárpur.

Of the above dispensaries, those at Kelva Máhim, Chándor, Athni and Ilkal were inspected by the Deputy Sanitary Commissioners of their respective divisions, and Sangamner, Nevása and Shevgaon in the Ahmednagar District by the District Medical Officer of the Famine Relief Works.

The onerous duties in connection with the plague epidemic, both at the head-quarter stations and in the districts, which necessitated the presence of the Civil Surgeons at their head-quarters, did not permit them to complete the inspection of the remaining dispensaries. As regards Thána, it was considered desirable that Assistant Surgeon Moos, the acting Civil Surgeon, who was also in medical charge of the prison and dispensary, should not leave the station to visit the more distant places.

The Victoria Dispensary at Shikárpur is usually inspected by the Principal Medical Officer, Sind District, but it was not possible for this officer to make a tour; and apparently the Civil Surgeon, who is an Assistant Surgeon, was not instructed to inspect the institution.

The prevalence of plague, which necessitated the Surgeon-General's presence at head-quarters, almost entirely prevented his annual tour, which was further interfered with by the interval which elapsed between the death of Surgeon-Major-General Cook and my own appointment. The eight inspections made by my predecessor during January 1897 are recorded in the report for the year 1896. I took charge of the office of Surgeon-General on the 30th October.

On November 15th I inspected the Civil Hospital, Mahábaleshvar, which I found to be well managed, but in several respects defective in accommodation and structure. Without overcrowding, the contracted site will not permit of the necessary improvements and extension. On the same day I saw the dispensary at Pánchgani, the records and stores of which were well kept. The building is a poor one, but seems to meet present requirement.

November 17th.—Travelled to Sátára.

November 18th.—Inspected the Civil Hospital, Sátára, which I found in excellent order. About fifty cases of plague had then occurred in the town.

November 18th.—Travelled to Poona.

November 19th.—Inspected the Sassoon General Hospital, Poona, with the management of which I was perfectly satisfied. The building, however, has defects, the chief of which are the objectionable position and structure of the privies and lavatories and the faulty site of the dissecting room.

The House-Surgeon's quarters have been condemned as such, and bath-rooms for Europeans and improved surface drainage are greatly needed. It has already been decided that the present Maternity Hospital, which is to be rebuilt, shall be converted into a residence for the House Surgeon, whose present quarters shall be used as an out-patient dispensary and stores, *vide* Government Resolution No. 2082, dated 7th May 1896, General Department.

November 20th.—Inspected the hospital of the Yerrowda Central Prison and found everything in good order. The hospital barracks seemed to me to be colder and darker than is desirable, at that season, between the hours of 10 and 11 A.M.

December 20th.—Inspected the Prison Hospital, Thána, with the condition of which I was satisfied.

On the same morning I saw the Civil Hospital, Thána, where I found the records and stores properly kept and cared for. All appeared to be satisfactory except the building, which is of old structure and in some respects defective.

I then inspected the C. R. Wadia Dispensary, Thána, where also I found everything well managed under Assistant Surgeon Moos, the acting Civil Surgeon. This building is in a confined situation and, in my opinion, very unsuitable, owing to want of space and light.

December 27th.—Inspected the dispensary at Mátherán which was in very good order.

I attach a list of medical officers who have performed 50 or more important surgical operations of the nature detailed in the Government of India's, Home Department, letter No. 27—Medical—971, dated 30th October 1896, embodied in the Bombay Government Resolution No. 5207 of the 1st December 1896, General Department:—

Surgeon-Lieutenant-Colonel W. G. H. Henderson, F.R.C.S.I. ...	262
Surgeon-Major J. W. T. Anderson, F.R.C.S.E.	79
2nd class Hospital Assistant Sadashiv Wamon Dane	76
„ Assistant Surgeon Dhanjishaw E. Anklesaria	73
Surgeon-Captain A. J. Heath, M.B.	61
Mr. B. J. Damania...	50

It seems fair to say that about a dozen of the most zealous and competent medical officers and assistant surgeons are excluded from this nominal list, because either the duration of their appointments or want of opportunities, in several instances diminished by plague, have rendered it impossible for them to complete the specified tale of operations. Some of them have nearly done so; but I beg to submit that, although this test is a considerable measure of zeal and ability, it should be applied with due regard to the field of work in each case, and not be used as more than a partial gauge of general efficiency. In addition to those named above, Brigade-Surgeon-Lieutenant-Colonels McConaghy and Bartholomeusz, Surgeon-Lieutenant-Colonels Greany, McCloghry, Henderson and Davidson, Surgeon-Majors Lowdell, Baker, Stevenson and A. V. Anderson deserve commendation.

Many Assistant Surgeons have done most excellent service and shown special intelligence in plague work.

I have the honour to be,
Sir,
Your most obedient Servant,
G. BAINBRIDGE, M.D., Surgeon-Major-General,
Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. 1.

Showing the Classification of the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1897.

No. $\frac{S.\ B.}{596}$ OF 1899.

From

THE SURGEON-GENERAL WITH THE
GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 27th October 1899.

SIR,

I have the honour to submit my Annual Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1898. The summaries of the annual reports of medical officers and subordinates in charge of hospitals and dispensaries, as well as those of medical schools, are also appended.

2. At the close of the year 1898 there were 269 pupils in the three Provincial Medical Schools, distributed as follows :—

Classes of Pupils.	Byramji Jijibhoy Medical School, Poona.				Byramji Jijibhoy Medical School, Ahmedabad.				Medical School, Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	10	5	7	22	3	6	12	21	...	...	...	...	13	11	19	43
Stipendiary	12	3	...	15	5	5	10	20	6	10	9	25	23	18	19	60
Native State	14	4	3	21	1	1	...	2	...	...	...	...	15	5	3	23
Paying	4	5	10	19	12	7	12	31	1	9	19	29	17	21	41	79
Civil Medical	24	5	18	47	2	4	5	11	2	3	...	5	28	12	23	63
Free	...	...	...	...	1	...	...	1	...	..	...	...	1	...	...	1
Total ...	64	22	38	124	24	23	39	86	9	22	28	59	97	67	105	269

3. The following statement shows the extent to which Civil Hospital Assistants required to be recruited on 31st March 1899 :—

Sanctioned strength		284
20 per cent. reserve		56
		340
Actual strength (on 31st March 1899)		307
Deficiency ...		33

The deficiency has been made up in part by the admission into the service of Civil Medical Pupils and stipendiary Pupils from the Medical School, Hyderabad, who passed their final examination in September 1898, and those of the Byramji Jijibhoy Medical Schools at Poona and Ahmedabad, who passed in the month of May 1899; in part also by the admission of certain of the Hospital Assistants who had been entertained temporarily for famine and plague duty.

4. At Poona Lieutenant-Colonel W. McConaghy, M.D., I.M.S., was the Superintendent of the Medical School up to 3rd June 1898. He was succeeded by Lieutenant-Colonel J. P. Greany, M.D., I.M.S., on 1st July 1898, who remained in charge up to 18th November 1898, when he proceeded on leave. Captain J. B. Smith, M.B., M.Ch., I.M.S., acted as Superintendent in addition to his own duties from 4th to 30th June 1898, both days inclusive. He again acted,

as Superintendent from 19th November 1898 till the end of the year, during the absence of Lieutenant-Colonel J. P. Greany, M.D., I. M. S., on leave. Captain A. Hooton, I. M. S., succeeded Captain J. B. Smith, M.B., M.Ch., I. M. S., as Acting Assistant Civil Surgeon, on the latter being appointed Acting Superintendent on the 19th November 1898. Assistant Surgeon E. S. Bharucha returned from plague duty and resumed charge of his duties in the month of June 1898. Captain C. Easdon, I. S. M. D., Senior Assistant Surgeon, and Assistant Surgeon Ráo Sáheb D. G. Sabnis were present throughout the year. All these officers performed their several duties with zeal and ability. The conduct of the pupils has been reported satisfactory.

5. At Ahmedabad Lieutenant-Colonel K. S. Nariman, I. M. S., acted as Superintendent during the absence of Lieutenant-Colonel M. L. Bartholomeusz, M.B., C.M., I. M. S., on privilege leave.

6. At Hyderabad the Superintendentship was held by Lieutenant-Colonel W. G. H. Henderson, F.R.C.S.I., I. M. S., up to the 30th June 1898, when he was succeeded by Captain J. H. McDonald, M.B., C.M., I. M. S., who continued in charge until 17th July 1898, and subsequently by Captain A. Street, M.B., F.R.C.S., I. M. S. Assistant Surgeon Jivatram Alimchand worked throughout the year with the exception of thirteen days, from 17th to 29th March 1898, when he was at Jacobabad on temporary duty. Assistant Surgeon R. S. Poredi performed his duties uninterruptedly throughout the year.

7. As the summaries of the annual reports of all Civil Hospitals and Dispensaries for the year under review are given in Appendix I, I shall here merely note the more important points in connection with the statistical statements given in Appendix III.

Statement No. I shows the classification of hospitals and dispensaries. On 1st January 1898 there were 312 institutions open. During the year, 1 new one (at Guledgudd in the Bijápur District) was opened, and 2 (at Igatpuri in the Násik District and the Lady Dufferin Hospital at Karáchi) have been shown in the report for the first time. One (the Virámgám Branch Dispensary) was closed. Thus the total number of institutions open at the end of the year was 314.

Statement No. II is a return of patients treated, and the subjoined table gives the number of these, both in-door and out-door, as compared with those of the two previous years:—

	In-door.	Out-door.	Total.
1898	29,904	1,721,332	1,751,236
1897	32,585	1,710,219	1,742,804
1896	30,857	2,288,489	2,319,346

The results in the case of in-door patients treated during 1898, as compared with 1897 and 1896, were as follows:—

	1898.	1897.	1896.
Cured	21,834	22,228	21,758
Relieved	1,917	1,932	2,784
Discharged otherwise ...	1,891	2,255	2,943
Died	3,071	4,762	2,228
Ratio of deaths to treated ...	10·3	14·6	7·2

and the daily averages of sick were—

	Men.	Women.	Children.	Total.
1898 ...	1,088·0	231·8	83·2	1,403·0
1897 ...	1,063·2	196·3	81·5	1,341·0
1896 ...	1,133·5	194·6	82·3	1,410·4

Of the out-door patients:—

	Attended personally.	Represented by friends.	Daily average strength.
1898 ...	1,552,596	168,736	16,555·0
1897 ...	1,540,008	170,211	16,617·6
1896 ...	2,109,172	179,317	20,613·6

Of the total number of in-door and out-door patients, 260,228 were treated at the Civil Hospitals and 1,491,008 at dispensaries, as compared with 260,232 and 1,482,572, respectively, in 1897 and 339,058 and 1,980,288 in 1896.

The numbers of beds available were—

	Male.	Female.	Total.
1898	2,196	967	3,163
1897	2,188	919	3,107
1896	2,152	935	3,087

Statement No. III gives the diseases for which the patients were treated, and the following table shows the principal of these during 1898 and the two previous years :—

	1898.	1897.	1896.
Small-pox	438	495	480
Cholera	606	5,741	5,879
Dysentery	26,768	34,765	37,106
Malarial fevers	302,105	281,641	386,551
Venereal affections	27,217	24,580	33,482
Intestinal Worms	211,318	206,051	250,883
Leprosy	987	771	1,003
Rheumatic affections	46,809	42,809	60,561
Diseases of the eye	190,551	205,955	223,263
Do. ear	64,157	61,890	88,540
Diarrhœa	37,211	45,713	57,545
Skin diseases, including ulcers ...	186,501	216,854	416,410

Of venereal diseases, primary syphilis accounted for 5,305 cases, secondary syphilis 10,003, gonorrhœa 9,540 and other venereal affections 2,369, against 5,390, 8,619, 8,953 and 1,618, respectively, in 1897 and 7,414, 11,678, 11,659 and 2,731 in 1896.

The subjoined table gives the actual number and ratio per cent. of the prevailing diseases to the total treated in the different divisions :—

	Malarial Fevers.						Intestinal Worms.

From the above table it will be seen that during the year 1898 the numbers of cases of diarrhœa, dysentery, and eye and skin diseases are less than those of the previous two years, whereas the admissions from malarial fevers, intestinal worms and respiratory, ear, rheumatic and venereal affections, though less than in the year 1896, show an increase over those of 1897.

The only division in which there was a decrease in the cases of malarial fevers, as compared with each of the previous two years, is Sind. I am unable

to offer any exact information regarding the comparative prevalence of these fevers.

The number of plague cases reported to me by medical officers and subordinates in charge of Civil Hospitals and Dispensaries during the year 1898 was 12,560 with 6,977 deaths, whereas the total cases of plague reported to Government was as under :—

	Cases.	Deaths.
Konkan	6,765	4,352
Deccan	91,059	69,074
Gujarát	15,115	11,111
Sind	3,585	2,723
Total ...	116,524	87,260

Statement No. III A is a return of surgical operations performed with their results, as briefly indicated in the following table :—

	1898.	1897.	1896.
Remaining on 1st January	118	212	287
Performed during the year	83,137	82,352	111,639
Total ...	83,255	82,564	111,926
Number of patients operated on ...	82,347	81,404	110,994
Cured	68,915	70,566	97,500
Relieved	862	942	1,214
Discharged otherwise	309	795	394
Died	169	122	190
Remaining under treatment	187	118	252

The results of the operations performed on 11,905 out-door patients is unknown and consequently unrecorded. The total number of surgical operations performed in Civil Hospitals and Dispensaries was—

	Civil Hospitals.	Dispensaries.
1898	23,827	59,428
1897	22,773	59,791
1896	30,362	18,564

977 tumours and cysts were excised, as compared with 963 in 1897. Operations on bones and joints numbered 967 and 600, respectively, against 727 and 677 in 1897. Of the 333 amputations, 183 were performed for injury, 117 for disease and 33 for deformity, as compared with 201, 90 and 8, respectively, in 1897, and of the total, 18 ended fatally against 15 in 1897. The skull was trephined 9 times as compared with 3 times in 1897. Of the 1,030 operations on the eye and its appendages, 27 were iridectomies, 200 extractions of the lens, 2 for laceration of opaque capsule, and there were 16 excisions of the eyeball, the corresponding figures for the previous year being 15, 176, 1 and 22. There were 48 operations on the thorax, of which 8 were for excision of the breast against 4 in 1897. Of the operations on the abdomen, 45 were for radical cure of hernia and 14 for strangulation as compared with 48 and 22, respectively, in 1897. The operations on the urinary organs included 926 for removal of vesical calculi and 151 for the relief of urethral stricture, as compared with 606 and 100, respectively, in 1897. Among the operations on the female generative organs, there were 4 ovariotomies with 3 deaths against 6 (with 2 deaths) in 1897. Of the obstetric operations, 56 were applications of the forceps (5 deaths), 58 versions (2 deaths), 57 craniotomies (5 deaths), 2 cæsarean sections (1 death) and 1 symphyseotomy (successful).

The instructions conveyed in the Government of India, Home Department (Medical), No. 1443, dated 29th August 1899, quoted in the preamble of the Bombay Government Resolution No. 4087, dated 18th September 1899, will be given effect to in future reports.*

The selected list of surgical operations showing the number of each performed by medical officers individually, ordered by the Government of India in their letter No. 27—Medical—971, dated 30th October 1896, Home Department (Medical), embodied in the Bombay Government Resolution No. 5267 of 1st December 1896, General Department, is given below :—

* Reference to my administration reports for the year 1897 will show that I had already taken action in this direction.

Name of Operator.	Period on Duty.		Excision of Tumours (all kinds).	Excision of Joints (partial or complete).	Operations on Bones.	Amputations.		Extraction of Lens.	Abdominal Section for any purpose other than obstetrical.	Abscess of liver (any operation).	Removal of Vesical Calculi.		Obstetric operations.	Total.
	From	To				Through and above Metacarpus.	Through and above Metatarsus.				By incision.	By crushing.

Foreign	63·8	59·3	60·8	18·4	19·9	18·0	17·8	20·8	21·2

Statement No. V, Part I, treats of the current income and expenditure of the mofussil hospitals and dispensaries for the year under review.

The opening cash balance of the year under report does not correspond with the closing balance on 31st December 1897, there being a discrepancy of Rs. 11,398-0-2, which is to be explained as follows :—

(i.) There is a difference between the closing balance of 1897 as shown in the dispensary accounts and the opening balance for 1898 as verified by the Treasury Officer in the case of each of the following dispensaries :—

Súpa.	Khánápur.
Talegaon Dhamdhera.	Indi.
Chándor.	Kavi.
Pimpalner.	Dehej.
Pátan.	Kálol.

Garhi Yássin.

The actual cause of the discrepancy has not yet been explained by the respective Hospital Assistants and Treasury Officers, from whom report is still awaited. As all these dispensaries, however, were closed during a part of 1897, it is probable that the amount of the several discrepancies represents transactions concerning the dispensary, shown in the Treasury accounts, occurring during the period the dispensary was closed, which for this reason do not appear in the accounts of the dispensary.

(ii.) The following dispensaries being wholly closed, no accounts are available from them, and an opening balance is, therefore, not shown :—

Jejuri	Ilkal.

Travelling Dispensary, Broach and Vágra Tálukas.
Do. Anklesvar and Hansot Tálukas.
Do. Amod and Jambusar Tálukas.

(iii.) The explanation in the case of the dispensaries which follow is given opposite each :—

	Balance on 31st December 1897.	Balance on 1st January 1898.	Remarks.
	Rs. a. p.	Rs. a. p.	
Satána	371 15 2	196 8 0	In the accounts of the year 1897 the compounder in temporary charge of the dispensary made a mistake.
Páchora	592 10 6	589 5 6	The error in the closing balance for 1897 was owing to a bill for Rs. 3-5-0 having been erroneously debited to the Páchora Veterinary Department, instead of to the dispensary, by the Treasury.
Bai Bachubai Edalji Dinshaw Dispensary, Keamari.	426 8 4	.....	This being a municipal institution the balance lapsed to the Municipality.
Naushahro ...	1,005 11 1	455 11 1	Rs. 550, the local fund grant, though not drawn, was erroneously shown in the dispensary accounts for the year 1897.
Jacobabad ...	8,584 14 7	.....	The unexpended balance of several years of the municipal grant was erroneously shown ; it has now been omitted.
Victoria Dispensary, Sháhdádpur.	829 10 8	999 12 7	Bills to the amount of Rs. 170-1-11, actually paid during the year 1898, were erroneously included by the Hospital Assistant in the accounts for the year 1897.
Lady Dufferin Hospital, Karáchi.	.....	561 11 0	This hospital has been shown in the report for the first time.

The total income, exclusive of the cash balance, was Rs. 6,95,472-9-2 as compared with Rs. 6,99,850-2-9 in 1897 and Rs. 7,55,648-2-11 in 1896. Of this sum, Rs. 3,46,640-15-4 were received from Government, or Rs. 3,983-9-7 more than in 1897 or Rs. 4,696-2-5 less than in 1896. The Municipalities contri-

buted Rs. 1,52,202-11-2 and the Local Funds Rs. 1,23,032-6-10 against Rs. 1,53,597-4-8 and Rs. 1,06,897-1-6 in 1897 and Rs. 1,68,566-12-0 and Rs. 1,09,073-12-8 in 1896, respectively. The interest on invested capital yielded Rs. 24,171-5-4, showing an increase of Rs. 1,218-9-7 and Rs. 6,054-1-3 over the years 1897 and 1896. The sale of securities or withdrawal of deposits amounted to Rs. 3,700 against Rs. 15,000 in 1897 and Rs. 27,000 in 1896. Subscriptions from Europeans and Natives were Rs. 13,938-4-9 more than in 1897, whereas they show a decrease of Rs. 6,265-6-2 over the year 1896. The receipts from paying-patients amounted to Rs. 19,521-3-8 as compared with Rs. 21,955-13-10 in 1897 and Rs. 21,846-9-3 in 1896. Rs. 4,794 were realized by the sale-proceeds of medicines not supplied by Government and from other miscellaneous sources, such as sale of unserviceable articles, &c. &c., against Rs. 31,318-5-2 in 1897 and Rs. 34,031-6-2 in 1896. The decrease of receipts during the year 1898 under this head is owing to the amounts on account of grants from Railway Companies, Port Trust and other similar bodies having now been included under the head of Local Funds, instead of under that of "Miscellaneous Receipts," as was done in the previous years.

The total expenditure amounted to Rs. 6,89,189-3-10 against Rs. 7,00,512-4-0 in 1897 and Rs. 7,61,792-2-6 in 1896. Deducting from the expenditure Rs. 17,500 invested during the year, Rs. 1,892-8-0 and Rs. 382-1-6, the unexpended balances at the Ránder Dispensary and the Becherdas Dispensary at Ahmedabad, which lapsed to the Ránder and Ahmedabad Municipalities at the close of the official year, and Rs. 34,137-11-0 remitted into the Treasury on account of hospital stoppages, sale of unserviceable articles, &c. &c.,—in all, Rs. 53,912-4-6, the net expenditure was Rs. 6,35,276-15-4 as compared with Rs. 6,28,433-6-3 in 1897 and Rs. 6,52,109-4 6 in 1896. The cost per patient was Re. 0-7-8 against Re. 0-7-9 and Re. 0-5-6 in 1897 and 1896, respectively. The cost of each diet averaged Re. 0-2-6, being the same as in 1897, or pies 2 more than in 1896. The net amount paid by Government was Rs. 3,12,410-13-4 or 49·2 per cent. of the actual expenditure, as compared with Rs. 3,03,063-11-1 or 48·2 per cent. in 1897 and Rs 3,10,286-3-2 or 47·6 per cent. in 1896.

With reference to the concluding sentence of paragraph 8 of Government Resolution No. 4648, dated 20th October 1896, General Department, I beg to attach below Statements A and B showing the names of hospitals and dispensaries of the districts of each division, with the amount realized on account of hospital stoppages in each institution separately as compared with the previous two years, and Statement C giving the total amount by divisions of the Bombay Presidency;—

Statement A—Hospitals.

Total ...	11,574 5 3	13,434 3 3	8,375 5 0	7,271 13 0	8,204 5 9	8,842 9 0	18,846 2 3	21,638 9 0	17,217 14 0

The total amount of hospital stoppages realized during the year under report was Rs. 18,846-2-3 as compared with Rs. 21,638-9-0 in 1897 and Rs. 17,217-14-0 in 1896. By adding the amount received from paying patients for diet, which also forms a part of the hospital stoppage system, the total receipts would amount to Rs. 19,521-3-8 against Rs. 21,955-13-10 in 1897 and Rs. 21,846-9-3 in 1896; the decrease is due to a number of dispensaries being temporarily closed owing to the withdrawal of hospital assistants for plague duty for a greater portion of the year 1898 and to the reluctance on the part of the people to seek medical treatment for fear of plague. Considering the state of the country, I regard the results as satisfactory.

The reports received from charges on the working of these rules are, for the most part, on the same lines as those previously furnished, and do not require any further comments from me.

The following table shows the pay drawn by the Civil Surgeons during the year 1898 as compared with the preceding two years :—

	1898.	1897.	1896.

Statement No. V, Part II, shows the account of the invested capital. The subjoined table gives the account of investments for the three years 1898, 1897 and 1896 :—

	1898.	1897.	1896.
	Rs.	Rs.	Rs.
Balance in hand on 1st January	5,85,200	5,67,800	5,06,300
Invested during the year	17,000	32,400	67,500
Total ...	6,02,200	6,00,200	5,73,800
Securities sold	2,700	10,000	22,000
Deposits withdrawn	.....	5,000	5,000
Balance on 31st December	5,99,500	5,85,200	5,46,800

8. The following small works were executed and paid for from the "Discretionary grant" placed at my disposal during the year 1898:—

	Rs.
The Civil Hospital, Mahábaleshvar.—Constructing latrines .	314
Godhra.—Addition and alteration to the bungalow of the Civil Surgeon	172
Civil Hospital, Ratnágiri.—Paving new store-room ...	115
Civil Hospital, Ratnágiri.—Bathing place for the hospital servants	68
Civil Hospital, Ratnágiri.—Constructing a drain in connection with the existing bathing place, &c.	50
Civil Hospital, Ahmedabad,—Providing shelves in the store-room for clothing	100
Civil Hospital, Belgaum.—Making additions and alterations...	150
Civil Hospital, Karáchi.—Replacing the existing mud floors by constructing tiled pavements, for out-buildings ...	376
Civil Hospital, Sátára.—Making additions and alterations to the sweepers' quarters	209
Total ...	1,554

9. The Principal Medical Officer, Bombay and Aden Districts, inspected the Civil Medical Institutions in Aden and has reported very favourably on all of them.

10. All the dispensaries, with the exception of those noted below, were inspected during the year 1898 by the Civil Surgeons of the various districts:—

Bassein	Thána District.
Kalyán	
Gokák	Belgaum District.
Athni	
Saundatti	
Chikodi	
Khánápur	
Nipáni	
Sindgi	Bijápur District.

The heavy and onerous duties in connection with the plague epidemic prevented the inspection of the above dispensaries in the Belgaum Collectorate by the Civil Surgeon. Bassein and Kalyán dispensaries were both inspected by me. The Sindgi dispensary was closed when the Civil Surgeon was on his inspection tour.

11. The Principal Medical Officer, Sind District, inspected all the Civil and Jail hospitals and dispensaries on his route and reported favourably on the working of these institutions and on the Medical Officers in charge

12. *Inspection Tour.*

August 23rd, 1898.—Travelled to Belgaum.

August 24th.—Inspected the Civil Hospital, which was in good order. The building has defects, the chief of which are the dampness of the floors, lowness of the roof and faulty latrines. A new hospital is desirable, but I do not absolutely condemn this one. I also visited the plague wards and camp, which were well managed.

August 25th.—Inspected the municipal dispensary, which was in fair condition, and saw the town and plague arrangements with the Collector. Travelled to Dhárwár.

August 26th.—In the morning I inspected the Prison hospital, Dhárwár, with which I had no special fault to find; but the Hospital Assistant was not efficient. In the evening I saw the Civil Hospital, with the management and condition of which I was well pleased. New latrines of modern type are required.

August 27th.—I inspected the dispensary at Hubli, and found the building, stores and records in excellent order. I also visited the plague hospital and camps in charge of Captain Leumann, I. M. S., and found all the arrangements most satisfactory. I witnessed a number of inoculations by Haffkine's plague prophylactic, for which crowds of persons had assembled both at the plague camp and at the Southern Mahratta Railway Hospital.

August 28th.—I visited the town of Dhárwár and the segregation camp in company with the Collector

August 29th.—Arrived at Bijápur.

August 30th.—Inspected the Civil Hospital and Prison Hospital at Bijápur, with both of which I was well satisfied. I then travelled to Sholápur, and on the same evening I inspected the municipal dispensary at that place, which was in good order. I drew attention to the large excess of certain drugs remaining from those ordered in previous years when supplies were obtained direct from England.

August 31st.—I inspected the Civil Hospital at Sholápur, where I found the records neat and the stores in good order. The building requires a tiled roof, which is in very bad condition, and the earthen floors should be paved with stone.

In the evening I returned to Poona.

September 5th.—I inspected the Khan Bahadur Pestonji Sorabji Dispensary at Poona. and found the records, stores and instruments in good order. The management seemed excellent; but the waiting-room accommodation for patients is very inadequate. The operating and dressing table is in full view of patients and of persons in the street, a condition which is unseemly and otherwise objectionable.

There are no quarters for the medical officer or compounders.

September 29th.—I inspected the hospital of the Yeraoda Central Prison, which I found in excellent order.

October 3rd.—I inspected the David Sassoon Hospital, Poona, which is admirably managed. The stores and instruments were in good order and the records well kept. The building of a new maternity hospital and the appropriation of the existing one as a residence for the House Surgeon have been sanctioned, and these changes are most desirable. The building now occupied by the House Surgeon has an iron roof, and is hot, dark and ill-ventilated; and its floors, being of mud, are riddled with rat-holes. All the latrines of the hospital, both inside and out, are most defective in structure and design. The ventilation of the insanes' wards needs improving, and their floors should be paved or laid with cement. The floor of the operation room should be relaid with tiles. Lastly, the drainage of the compound needs improvement. I also visited the medical school buildings attached to the hospital, and examined some of the teaching appliances which were badly in need of certain renewals and additions. The students' quarters were clean and neat, and the buildings in fair order.

October 7th.—I inspected the Civil Hospital at Ahmednagar, where I found the records well kept and the instruments and stores in good condition. The building is a good one, but is closely surrounded by houses of the town.

October 11th.—I arrived at Sátára, and on the same evening and following morning inspected the Civil Hospital. The buildings were in good repair, but the earthen floors of the old wards should be relaid with stone or cement. The instruments and stores were well kept, and so also, with a few exceptions, were the records.

October 31st.—I inspected the Civil Hospital at Mahábleshvar, where I found everything in excellent order. As stated in previous reports the buildings are capable of improvement.

November 3rd.—I inspected the dispensary at Panchgani, and was satisfied with the state of the stores, instruments and records.

November 14th.—I inspected the dispensary at Wái, which is located in a small and unsuitable building in a bad state of repair. I found the stores and instruments in good order and the records well kept.

December 9th.—I inspected the dispensary at Mátherán, which was in very good order under the careful supervision of Major Collie, I. M. S.

December 14th.—Travelled to Násik.

December 15th.—I inspected the Civil Hospital at Násik where I found everything in good order. Certain additions and improvements are required, the chief of which are a new operation room, more servants' quarters, and the enlargement of one of the Hospital Assistant's houses.

December 16th.—I inspected the Prison Hospital at Dhulia, which was in good order.

December 17th.—I inspected the Civil Hospital at Dhulia. The instruments and stores were in good condition and the records well kept. The building is an excellent one; but would be better adapted to its purpose if certain alterations and additions were effected, so as to provide an operation room, quarters for the sweepers and wards for contagious diseases.

January 9th, 1899.—I inspected the Convalescent Home at Khándalla with the state of which I was much pleased. The management seems excellent, and a short residence in the institution seems to have a very beneficial effect on the inmates. I found the new children's wards completed, and partially occupied.

January 19th.—I inspected the Sir D. M. Petit Dispensary at Bassein. The building was in much need of whitewashing and other repairs, and the premises and some of the furniture were dirty and untidy. The earthen floors should be paved. The out-houses were not occupied by the establishment as they should be. The instruments and stores were only in fair order, and some of the records were badly and illegibly written and carelessly kept. There was evidently a want of discipline among the inferior establishment, and of care in selection of compounders.

Medicines are not charged for at this dispensary under the rules, consultation fees only being taken.

January 22nd.—Travelled to Pálanpur from Bombay.

January 23rd.—I inspected the Scott Memorial Hospital at Pálanpur and found it in good order. A mortuary and certain instruments and articles of furniture are required. The sweeper should be a full-time servant.

January 24th.—I inspected the Police Hospital at Ahmedabad, which I found in good order; but better furniture is wanted, and the dispensing room should be enlarged.

I then inspected the Hutteesing and Premabhai Hospital, where all the arrangements were excellent and the records and stores in good order. Cells for insane patients under observation are required, and the stone latrines should, as soon as possible, be replaced by iron ones. Quarters for an extra Hospital Assistant are needed.

In the evening, I inspected the Runchodlal Dispensary, which was in excellent order and seemed very well managed. I then visited the Victoria Jubilee Dispensary, and was well satisfied with its state, except that the building was in need of repairs.

January 25th.—I inspected the Hospital of the Central Prison at Ahmedabad. It was in good order; but, as in most other hospitals, several of the instruments are old and obsolete. The standpipe in the enclosure needed surrounding by pavement. Parts of the flooring of the hospital were in bad order, owing to erosion of bricks, although the buildings are comparatively new.

I then saw the Bechardas Dispensary where everything was in excellent order, and the attendance of patients was very large. I pointed out the necessity for a barrier and other arrangements to prevent patients from crowding upon the Medical Officer and the dispensers.

The same evening I saw the Raipur Municipal Dispensary, which was in fair order. I then visited the Leper Asylum which is attended by a Hospital Assistant from the Civil Hospital. The building is secluded and fairly suitable, and has a spacious court-yard. The establishment is paid from Local and Municipal Funds; but the patients' diets are supplied from the Civil Hospital, and their cost debited to the contingent grant of that institution. The lepers stay for considerable periods, but go away when they please, usually in order to beg at religious festivals. They are benefited by their stay at the Asylum, which is doubtless useful; but more system and supervision seem desirable, and the buildings are defective in structure.

January 27th.—I inspected the Civil Hospital at Sádra with the condition and management of which I was much pleased. A great deal of good surgical and other work is done by Assistant Surgeon Anklesaria. Certain additions to the establishment are much required.

January 30th.—I inspected the Civil Hospital at Rájkot in which I found every sign of excellent management. The buildings require certain alterations in the windows, bath-rooms and latrines. It is essential that a female sweeper should be added to the servants. The question of building in the compound a ward for Railway servants is under consideration.

February 1st.—I inspected the dispensary at Wadhwán, which I found in very good order. The records, instruments and stores were well kept and the institution seemed well managed.

February 2nd.—I inspected the Civil Hospital at Kaira, where I found the records and instruments in fair order. I was, however, very dissatisfied with the dirty and disorderly state of the quarters of the Senior Hospital Assistant, and of certain stores in his charge. This medical subordinate was unfit for the service, owing to an ailment which should have been reported by the Acting Civil Surgeon.

Certain improvements of the hospital buildings are required, the most important being the addition of a cook-room and a latrine for Police patients, and of barred doors to the Lunatic cells, and better ventilation of these and of the Medical pupils' quarters.

February 3rd.—I inspected the Civil Hospital at Godhra which I found in good order. I also visited the Plague Hospital and saw several patients in the infected part of the town.

February 4th.—I inspected the Civil Hospital at Broach which was in very good order. Cells for insane patients and latrines of a modern type are necessary, also bars to the windows of the store-rooms and better lighting of the operation room.

February 5th.—I inspected the Cowasji Jehangir Civil Hospital at Surat, the condition of which was as good as could be desired, excepting that the building has certain defects. Improvements in the bath-rooms and a sweeper's staircase are much wanted.

February 6th.—I inspected the Parekh Dispensary, which, except as regards repairs, was in good order. I then visited the Morarji Vrijbhukhandas Hospital for Women which was in fair order. The work done is comparatively unimportant.

February 27th.—I inspected the Prison Hospital at Thána, which was in good order. I then saw the Civil Hospital where I found everything in a very good state; but certain alterations and improvements in the building are required. The chief of these are paving certain of the floors and putting up a railing to one side of the compound.

The building of 2 cells for lunatics under observation had just been commenced.

I next inspected the C. R. Wadia Dispensary where I found all in a very satisfactory state, except the building which is old, small and of poor structure.

I then travelled to Kalyán where I inspected the Rukminibai Dispensary, which was in good order and well managed.

March 3rd.—I left Bombay for Kárwár where I arrived on the 5th.

March 6th.—I inspected the Civil Hospital at Kárwár, where I found the instruments and stores in good order, and the records, with a few minor exceptions, well kept. The general management seemed good. A new operation room, new latrines and quarters for a Junior Hospital Assistant are required, and certain of the floors should be paved. The mortuary is too near the Hospital Assistant's quarters, and should, when possible, be rebuilt on another site. I recommend that a matron and a female sweeper be added to the establishment.

March 7th.—I inspected the Prison Hospital at Kárwár, the records of which, owing to the inefficiency of the Hospital Assistant, were not as neat or correct as they should be.

March 9th.—I arrived at Ratnágiri, and in the evening inspected the Leper Asylum which was in good condition but somewhat in need of funds. The inmates seemed well cared for, but it would be well if juveniles could be separated from adults.

March 10th.—I inspected the Civil Hospital, which I found in good order. The operation room, which is now combined with the Civil Surgeon's office, should be distinct; and this improvement can be effected by a small extension of the building. I would observe that the Municipality contributes to the hospital no more than Rs. 100 per annum, the amount of its water-rate, and that Local Funds give nothing. Nor are there any Municipal Medical Institutions.

March 17th and 18th.—I inspected the Alibág Dispensary with the general condition of which I was by no means satisfied. The instruments and stores were neglected and some were applied to improper uses; the records were carelessly kept, and, in some instances, unsigned. Assistant Surgeon Pereira, who was in charge, has since retired.

There are no official quarters for the medical officer, the late incumbent having occupied his own house near the dispensary for 25 years. Quarters for the compounder and for the sweeper are also required.

March 21st.—I inspected the Leper Asylum at Mátoonga, which I found to be excellently managed and in very good order. The inmates were evidently well cared for. There were 9 patients in excess of the accommodation which is fixed at 300, but their names were not borne on the registers.

Children and infants are not separated from adult patients, who, in some instances, are their parents. It seems very desirable that those in whom the symptoms are very slight or doubtful should be kept apart, or, at least, allowed more space. Two men who had anæsthetic patches until two years ago, were free from symptoms; and there were 4 children aged between 4 and 8 years in whom symptoms were very slight or absent. There were also 3 infants, one of whom was born in the Asylum a year ago.

March 24th.—I inspected the Edalji Framji Allbless Leper Home at Trombay with the general state of which I was not satisfied. There were 22 inmates, all men, in 8 of whom active signs or symptoms seemed absent. It appeared to me that they were fit to live outside, or even to earn their living; and that they might give place to others with better claims on this charity. One patient had a skin disease which, in my opinion, was not leprosy.

The records were badly kept, and some of them were said to be in the office of the Secretary at Bombay. There were no medical histories or records of treatment. The premises were not as clean as they should have been, and the number and pay of the menial establishment seemed large in proportion to the number of inmates.

13. I have much pleasure in stating, for the information of Government, that the conduct of Civil Surgeons and Assistant Surgeons was uniformly good during the year under report. Excepting in the case of 3 Assistant Surgeons noted above, an excellent standard of professional work and general efficiency were also maintained during a time which, owing to the prevalence of plague, was to most of them one of much extra work and considerable anxiety. The additional duties were carried out by those upon whom they devolved with a degree of zeal, ability and tenacity deserving, in my opinion, of high commendation.

14. The following is a list of Medical Officers who have performed more than fifty important surgical operations :—

Lieutenant-Colonel W. G. H. Henderson, F.R.C.S.I., I. M. S. ...	261
Captain A. Street, M.B., F.R.C.S., I. M. S.	233
Major J. W. T. Anderson, F.R.C.S.E., I. M. S.	97
Assistant Surgeon D. E. Anklesaria	88
Assistant Surgeon Mulchand Gangaram	84
Dr. B. J. Damania (Native State)	82
Assistant Surgeon B. H. Nanavati, F.R.C.S. (Edin.)	78
Captain J. B. Smith, M.B., M.Ch., I. M. S.	67
Major W. H. Burke, M.B., I. M. S.	58
Lieutenant-Colonel K. A. Dalal, M.B.	55

15. Under the above circumstances, it seems unnecessary for me to mention here the names of individual Medical Officers or Assistant Surgeons as deserving of special commendation. I am also able to report most favourably, on the whole, regarding the conduct and work of Hospital Assistants, the great majority of whom have well maintained their reputation for intelligence and hard work. Many Hospital Assistants on plague duty have been most active and useful in the performance of their arduous duties. I regret, however, to record that I have found it necessary to punish by dismissal several instances of disobedience of orders and other misconduct.

I have the honour to be,
Sir,
Your most obedient servant,

G. BAINBRIDGE, M.D., Surgeon-General,
Surgeon-General with the Government of Bombay.

APPENDIX I.

SUMMARIES OF THE ANNUAL REPORTS

ON THE

MOFUSSIL CIVIL HOSPITALS AND DISPENSARIES

OF THE

BOMBAY PRESIDENCY

FOR THE YEAR 1898.

KONKAN.

THÁNA COLLECTORATE.

CIVIL HOSPITAL, THA'NA.—*In charge of* Assistant Surgeon Khán Bahádur F. A. Moos.

Conservancy—Is well attended to.

Water supply—From Pokran tank, ample and of good quality.

Hospital building.—Defective as reported before. The pauper and police wards are quite unsuitable. There is no proper operation room.

General health of the town.—Was fair.

Attendance of patients.—There were 448 in-door and 2,932 out-patients treated as compared with 466 and 2,911 in 1897, and 342 and 5,388 in 1896, respectively.

The prevailing diseases.—Ague quotidian, skin diseases, round worms, diseases of the respiratory system, diarrhœa and dysentery. Enlarged tonsils prevailed chiefly among children.

Epidemics.—Plague broke out in the early part of 1897. Plague cases were as follows:—

Years.	Cases.			Deaths.		
	Imported.	Local.	Total.	Imported.	Local.	Total.
1896	2	...	2	2	...	2
1897	39	154	193	23	109	132
1898	11	247	258	9	194	203
Total ...	52	401	453	34	303	337

Cholera epidemics occurred as follows:—

	Cases.	Deaths.
1896	80	29
1897	59	32
1898	1	1
Total ..	140	62

Surgical operations.—122 surgical operations were performed during the year 1898 as compared with 103 in 1897 and 253 in 1896.

Mortality.—There were 43 deaths in hospital as compared with 67 in 1897 and 39 in 1896. The chief causes were malarial fevers, diarrhœa, debility, anæmia and pneumonia. Most of the deaths occurred amongst patients admitted in a moribund state.

Vaccination.—The work is done by a municipal vaccinator.

Conduct of the Establishment.—Satisfactory on the whole.

Medico-legal cases.—There were 149 cases of more or less serious nature treated during the three years. Seven *post-mortem* examinations were made during that period at the request of the Police.

Hospital Stoppages.—Rs. 56-13-0 were realized in 1898, as compared with Rs. 53-2-0 in 1897 and Rs. 208-8-0 in 1896. The decrease in the receipts is due entirely to the exodus of rich people from Thána, owing to plague.

Cost.—The total cost was Rs. 4,366-3-8, and the cost per patient Re. 1-4-8, as compared with Rs. 4,834-4-10 and Re. 1-6-11 in 1897 and Rs. 3,869-13-0 and Re. 0-10-10 in 1896, respectively.

GRANT-IN-AID DISPENSARIES.

Sir Cowasji Jehangir Dispensary, Ba'ndra.—*In charge of* Retired Assistant Surgeon M. F. Fernandez, I. S. M. D.

There have been no additions to, or alterations in, the dispensary building. The halálkhor service is maintained by the municipality. The refuse water is collected in cesspools and carted away by municipal waggons to the seashore. Roads and streets are regularly swept, and the main roads watered during the fair seasons. A few public latrines in some of the crowded localities will be a great boon to the people. Water-supply from the Vehar lake is good and potable. A few stand-pipes are being erected, and this should prevent in a great measure the poorer classes from drinking well or tank water. The dispensary committee held three meetings during the year, but the chairman visited the dispensary frequently. There were 7,415 out-door patients treated as compared with 6,393 in 1897 and 15,513 in 1896. The prevailing diseases were respiratory affections, worms, malarial fevers, diarrhœa, dyspepsia and rheumatic affections. Plague gave 375 cases and 334 deaths as compared with 829 cases and 718 deaths in 1897 and 110 cases and 81 deaths in 1896. The plague attacks were not confined to the earlier months of the year as in 1897, but occurred throughout the year. There were 249 surgical operations performed against 152 in 1897 and 375 in 1896. The dispensary was inspected by the Civil Surgeon of Thána once in each year. Vaccination is carried on with animal or calf lymph by a joint municipal and local fund vaccinator. Opinion was given in 14 medico-legal cases as compared with 19 in 1897 and 27 in 1896. The total cost was Rs. 3,365-14-6 and the cost per patient Re. 0-7-3 against Rs. 5,012-6-8 and Re. 0-12-7 in 1897 and Rs. 4,828-12-3 and Re. 0-5-0 in 1896, respectively. The fees collected under the hospital stoppage rules amounted to Rs. 74-11-0 as compared with Rs. 188-8-6 in 1897 and Rs. 325-11-0 in 1896.

Sir Dinsha Manockji Petit Dispensary, Bassein.—*In charge of* First Class Assistant Surgeon Kassim Virji Patel.

The dispensary building requires repairs, also the stone flooring, and the work will be done when funds are available. The dispensary committee met 8 times. The sanitary condition of the town is fair. The water-supply from tanks and wells is liable to contamination. The total treated was 7,797 out-door and 4 in-door patients against 7,158 out-door and 25 in-door in 1897 and 11,808 out-door and 17 in-door in 1896. The most common diseases were malarious fevers, diarrhœa and other diseases of the digestive system. There were 416 cases of plague with 323 deaths against 533 cases with 392 deaths in 1897 and 2 cases with 1 death in 1896. There was no case of cholera in 1898, but 65 cases with 35 deaths occurred in 1897 and 36 cases with 18 deaths in 1896. There were 183 surgical operations performed as compared with 213 in 1897, and 383 in 1896. Vaccination is performed by the táluka vaccinator. Six *post-mortem* examinations were made against 7 in 1897 and in 1896, and opinion was given in 99 medico-legal cases as compared with 90 in 1897 and 128 in 1896. Vaccination is carried on by the municipal or Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon, Thána, in 1896 and 1897, by the Assistant Collector, Thána, every year, and by the Collector of Thána in 1896. The total cost was Rs. 3,504-5-10 and the cost per patient Re. 0-7-2 against Rs. 3,998-5-0 and Re. 0-8-11 in 1897 and Rs. 4,259-7-4 and Re. 0-5-9 in 1896. The amount collected under the hospital stoppage rules was Rs. 2-12-0 as compared with Rs. 62 in 1897 and Rs. 97-12-0 in 1896.

Ba'i Gulba'i Petit Dispensary, Bhiwndi.—*In charge of* Retired Assistant Surgeon A. V. Tilbury, I. S. M. D.

The dispensary building is kept in a good state of repair and several additions and alterations have been made, which provide for (*a*) *post-mortem* room, (*b*) the complete separation of the quarters of the medical officers and of the servants from the dispensary proper. The reconstruction of a privy for patients is in contemplation. The dispensary was inspected by the Civil Surgeon, Thána, once every year. The dispensary committee visited the dispensary twice through its deputies during the year. The total number of patients treated was 27 in-door and 8,442 out-door as compared with 10 in-door and 6,678 out-door in 1897 and 6 in-door and 10,859 out-door in 1896. The daily average attendance of out-patients was 85·7 as compared with 81·0 in 1897 and 109·4 in 1896. Sanitary arrangement of the town are far from satisfactory. The most common diseases were malarious fevers, worms, diseases of the respiratory

system, diarrhœa and skin diseases. The epidemic of plague prevailed in the middle of the year from April to October 1898.† There were 155 surgical operations performed during the year as compared with 130 in 1897 and 146 in 1896. Opinion was given in 24 medico-legal cases as compared with 28 in 1897 and 37 in 1896. One *post-mortem* examination was held against 2 in 1897 and 6 in 1896. Vaccination is performed from house to house by a municipal vaccinator. The total cost was Rs. 2,362-4-6 as compared with Rs. 3,684-4-10 in 1897 and Rs. 3,157-4-8 in 1896. The cost per patient averaged Re. 0-4-6 against Re. 0-8-10 in 1897 and Re. 0-4-8 in 1896. Rs. 27-10-0 were hospital stoppages as compared with Rs. 8-8-0 in 1897.

† The total number of plague cases were 1,790 and deaths 1,259 as compared with 1,135 cases and 659 deaths in 1897 and 11 cases and 10 deaths in 1896.

KELWA-MAHIM.—*In charge of* First Class Hospital Assistant CHATURJI NARAYAN, No. 74.

The dispensary building has not been repaired during the year 1898; it was only white-washed in 1897. The building is reported to be quite unsuitable for a dispensary. The dead-house, a karvi shed, is in a ruinous state. Furniture and fittings are sufficient. The committee visited the dispensary seven times during the year against 6 in 1897 and 7 in 1896. The most common diseases were malarial fevers, worms, bronchitis, indigestion, debility and anæmia. The total treated during the year was 8,059 out-door and 44 in-door patients against 4,370 out-door and 60 in-door in 1897 and 6,709 out-door and 15 in-door in 1896. There were 64 surgical operations performed as compared with 44 in 1897 and 54 in 1896. Plague appeared in two or three villages situated on the sea coast of this táluka, giving 51 cases. One plague case occurred at Pálghar before the segregation camp was established in 1897. There occurred 9 cases of cholera near Kelwa in 1897, of which 5 proved fatal. The sanitary condition of the towns of Kelwa and Máhim is not satisfactory. Stagnant water accumulates in several places on the road-side, as there are no pacca drains, also round about the wells in the locality, especially during the monsoon. Heaps of filth and rubbish are allowed to accumulate near, and on the western side of, the town on the sea-bed. The water-supply from wells, though abundant, is not wholesome. The quality of water is affected by the large quantity of oil-cake used for manuring the garden lands of Kelwa and Máhim. The vaccination work within the municipal limits is performed by a táluka vaccinator. Two *post-mortem* examinations were made during the year at the request of the Police against 4 in 1897 and 9 in 1896. Opinion was given in 27 medico-legal cases during the year against 17 in 1897 and 21 in 1896. The total cost was Rs. 1,924-12-3 and the cost per patient Re. 0-3-10, as compared with Rs. 1,938-15-4 and Re. 0-7-0 in 1897, and Rs. 1,698-7-1 and Re. 0-4-0 in 1896, respectively. Rs. 37 were realized under the hospital stoppage system against Rs. 20-4-0 in 1897 and Rs. 12-3-0 in 1896.

SHÁHÁPUR.—*In charge of* First Class Hospital Assistant BAPUJI JANARDHAN, No. 44.

The dispensary is in good repair, and furniture and fittings are sufficient and in good order. A table for surgical operations is much needed. The dispensary committee met four times. The conservancy of the town is not satisfactory. The water-supply from wells and river is good and ample. There were 32 in-door and 2,333 out-door patients treated, as compared with 8 and 2,246 in 1897 and 11 and 5,071 in 1896, respectively. The prevailing diseases were malarial fevers, worms and diseases of the skin and digestive system. There were 37 surgical operations performed against 59 in 1897 and 128 in 1896. Three *post-mortem* examinations were held as compared with 11 in 1897 and 6 in 1896. Opinion was given in 26 medico-legal cases against 39 in 1897 and 61 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Thána once in each year. There were no cases of small-pox or plague in the town, with the exception of two imported cases of the latter from Bhiwndi. In the adjacent villages small-pox gave 103 cases with 7 deaths, and plague 15 cases with 8 deaths. The total cost was Rs. 1,075-7-5 and the cost per patient Re. 0-7-3, as compared with Rs. 992-8-2 and Re. 0-7-1 in 1897 and Rs. 1,017-12-6 and Re. 0-3-2 in 1896. The amount of hospital stoppages was Rs. 7-4-0 against Rs. 20 in 1897 and Re. 0-9-0 in 1896, the decrease being due to the dispensary being closed for four months of the year 1898.

BÁI SÁKÁRBAI PETIT DISPENSARY, CHINCHNI.—*In charge of* First Class Hospital Assistant MOBESHVAR TRIMBAK SATHEY, No. 90.

The dispensary building is in a good state of repair. A cook-room for in-door patients is badly wanted. The long-felt want of a dead-house and a store-room has been supplied. The dispensary committee visited the dispensary often. The sanitary condition of the town is fair. The water-supply from wells is good and abundant, but liable to contamination. The total number of patients treated was 9,600 out-door and 58 in-door, as compared with 5,642 and 19 in 1897 and 10,365 and 30 in 1896, respectively. The prevailing diseases were malarial fevers, worms, respiratory affections and other diseases of the digestive system. There was no epidemic in 1896 and 1898. In the year 1897, plague broke out in Chinchni from 29th January to 31st May. The total cases were 314, of which 259 died. The adjacent town of Tárápur was also infected, where the disease raged till the end of May 1897. Cholera broke out in Chinchni on the 20th August 1897, but subsided by the end of the same month. 624 surgical operations were performed against 196 in 1897 against 789 in 1896. One *post-mortem* examination was held against none in 1897 and three in 1896. Vaccination was carried on by the táluka vaccinator from house to house. The dispensary was inspected by the Civil Surgeon,

Thána, in the years 1896 and 1898. The total cost was Rs. 1,965-5-6 and the cost per patient Re. 0-3-3, as compared with Rs. 1,695-14-1 and Re. 0-4-10 in the year 1897 and Rs. 1,526-15-1 and Re. 0-2-4 in 1896, respectively. The fees collected under the hospital stoppage system amounted to Rs. 32-9-0 against Rs. 26-6-0 in 1897 and Rs. 46-15-0 in 1896.

COWASJI DINSHAW PETIT DISPENSARY, UMBARGAON.—*In charge of* First Class Hospital Assistant NASARVANJI PALLONJI SETHNA, No. 76.

The dispensary buildings are in good repair. A press for keeping poisons is much needed. The want of quarters for the compounder and servants is greatly felt. The dispensary committee, the District Deputy Collector and the District Local Board members visited the dispensary often. The conservancy of the town is well attended to. The water-supply is abundant and of good quality. The number of patients treated was 22 in-door and 4,156 out-door as compared with 74 and 4,729 in 1897 and 61 and 5,450 in 1896, respectively. The most common diseases were worms, malarial fevers, dysentery, diarrhœa, and eye, skin and respiratory affections. Plague was prevalent in the town and its vicinity in January and from August to December. There were 177 surgical operations performed against 94 in 1897 and 129 in 1896. Opinion was given in 32 medico-legal cases as compared with 36 in 1897 and 31 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Thána once. The total cost was Rs. 1,274-8-10 and Re. 0-4-11 against Rs. 1,273-12-0 and Re. 0-4-3 in 1897, and Rs. 1,326-4-2 and Re. 0-3-10 in 1896, respectively. The receipts on account of hospital stoppages were Rs. 32-1-0 as compared with Rs. 38-5-0 in 1897 and Rs. 46-14-0 in 1896.

SIR DINSHAW MÁNOCKJI PETIT DISPENSARY, MURBÁD.—*In charge of* Third Class Hospital Assistant M. JOHNSTON, No. 198.

The dispensary building is in a good state of repair. A store-room is under construction. The dispensary committee met seven times. The sanitary condition of the town is fair, and the water-supply, mostly from wells, is liable to pollution and deficient in summer. A tank is being built to remedy this long-felt evil. The total treated was 30 in-door and 4,682 out-door patients against 32 in-door and 3,253 out-door in 1897 and 11 in-door and 5,240 out-door in 1896. Malarial fevers, ascaris lumbricoides, dyspepsia, dysentery and eye affections were the prevailing diseases. Small-pox, chicken-pox and measles prevailed in March, April and May 1898. There were 70 surgical operations performed as compared with 72 in 1897 and 146 in 1896. Vaccination is carried out by the táluka vaccinator. Five *post-mortem* examinations were held in 1898, 5 in 1897 and 3 in 1896. Opinion was given in 15 medico-legal cases against 16 in 1897 and 32 in 1896. The dispensary was inspected by the Civil Surgeon, Thána, annually. The fees under the hospital stoppage system amounted to Rs. 49-1-0 as compared with Rs. 39-6-0 in 1897 and Rs. 16-4-0 in 1896. The total cost was Rs. 1,019-6-1 and the cost per patient Re. 0-3-6 against Rs. 970-3-0 and Re. 0-4-9 in 1897 and Rs. 927-10-5 and Re. 0-2-10 in 1896, respectively.

JAMSETJI NASSARVANJI PETIT DISPENSARY, VA'DA.—*In charge of* Second Class Hospital Assistant JETHABHAI BABERBHAI, No. 194.

The dispensary buildings are in a good state of repairs. The committee meets when necessary. The dispensary was visited thrice by the chairman of the dispensary committee and once by the Deputy Collector and the Collector of the district. Sanitation and conservancy of the town are defective. The water-supply, mainly from wells, is insufficient and of bad quality. There was no epidemic. The total number of patients treated was 2,889 out-door and 34 in-door against 1,896 and 29 in 1897 and 2,497 and 47 in 1896, respectively. The most common diseases were malarial fevers, worms and diseases of the digestive system. The total number of surgical operations performed during the year was 81 against 59 in 1897 and 89 in 1896. Two *post-mortem* examinations were performed against 4 in 1897 and 5 in 1896. Vaccination is carried on by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon, Thána. The total cost was Rs. 1,038-10-10 and the cost per patient Re. 0-5-8 against Rs. 1,071-15-4 and Re. 0-8-11 in 1897 and Rs. 1,095-7-8 and Re. 0-6-11 in 1896. The amount realized under the hospital stoppages rules was Rs. 31-3-0 against Rs. 20-12-0 in 1897 and Rs. 17-5-0 in 1896.

EDALJ FRAMJI ALLBLESS LEPER HOME, TROMBAY.—*In charge of* Mr. P. J. CREADO.

The Medical Officer reports that the buildings are clean and in good repair. The affairs of this home are administered by the Archbishop of Bombay and by the committee of management appointed for the purpose. Meetings are held whenever necessary. The sanitary condition of the home is said to be well attended to. The water-supply is good but deficient. There were 40 lepers treated against 31 in 1897 and 27 in 1896. The home was inspected by the Civil Surgeon of Thána and by the honorary secretary. The total cost was Rs. 5,232-11-3 and the cost per patient was Rs. 130-13-1, as compared with Rs. 5,375-10-11 and Rs. 173-6-7 in 1897 and Rs. 4,627-5-1 and Rs. 171-6-1 in 1896, respectively.

ENDOWED DISPENSARIES.

Cursetji Rustomji Wadia Dispensary, Thána.—*In charge of* Assistant Surgeon Khán Bahádur F. A. Moos, L.M. & S.

The dispensary building is in a good state of repair, well situated, but useless for dispensary purposes. Conservancy defective. Water-supply fair in quality and ample for drinking purposes. Dispensary committee met twelve times during the year 1896, nine times in 1897 and nine times in 1898. The total number of out-door patients treated in 1896 was 11,324 as compared with 7,697 in 1897 and 7,830 in 1898. The average daily attendance was 207·4 in 1896 against 185·8 in 1897 and 172·4 in 1898. There is no accommodation for in-door patients. The most common diseases were intermittent fevers of the quotidian type, catarrhal bronchitis, scabies, ringworm, diarrhœa and worms. From the beginning of October 1896 plague prevailed as shown below :—

	Cases.		Total.	Deaths.		Total.
	Imported.	Local.		Imported.	Local.	
1896... ...	2	...	2	2	...	2
1897... ...	39	154	193	23	109	132
1898... ...	11	247	258	9	194	203
Total ...	52	401	453	34	303	337

An epidemic of cholera broke out in 1896 and 1897. Eighty cases with 29 deaths occurred in 1896 and 59 cases with 32 deaths in 1897. 153 surgical operations were performed in 1896, as compared with 138 in 1897 and 153 in 1898. Vaccination is carried out by the municipal vaccinator. The dispensary was inspected annually by the Surgeon-General with the Government of Bombay. The total cost was Rs. 5,231-4-8 and the cost per patient Re. 0-7-5 in 1896, as compared with Rs. 5,852-2-8 and Re. 0-12-2 in 1897 and Rs. 6,611-2-10 and Re. 0-13-6 in 1898, respectively. The amount realized under the hospital stoppages rules was Rs. 318-12-0 in 1896 against Rs. 296-8-0 in 1897 and Rs. 293-10-0 in 1898.

The Rukminibai Dispensary, Kalyán,—*In charge of* Assistant Surgeon Khán Bahádur R. R. Dadina.

The additional quarters for the Assistant Surgeon recommended by the Surgeon-General with the Government of Bombay were erected in 1896. The dispensary committee met once in every quarter and evinced fair interest in its work. The sanitation of the town is satisfactory, but the water-supply from tanks and wells is scanty and liable to contamination. The scheme for new water-works has been held in abeyance owing to want of funds. The most common diseases were ague, worms, bronchitis, diarrhœa and skin diseases. The total treated was 4,959 out-door and 121 in-door patients, as compared with 4,098 out-door and 155 in-door in 1897 and 6,250 out-door and 91 in-door in 1896. The daily average attendance of patients was 2·3 in-door and 72·6 out-door in 1898, as compared with 3·7 in-door and 69·4 out-door in 1897 and 2·6 in-door and 73·7 out-door in 1896. There were 100 cases of plague with 82 deaths during the year, as compared with 214 cases and 167 deaths in 1897 and one case and no deaths in 1896. Nine *post-mortem* examinations were made in 1898, as compared with 7 in 1897 and 17 in 1896. There were 166 surgical operations performed against 110 in 1897 and 196 in 1896. Opinion was given in 22 medico-legal cases, as compared with 25 cases in 1897 and 28 cases in 1896. Vaccination was carried on by the municipal vaccinator. The Civil Surgeon of Thána inspected the dispensary in 1896 only, but it was visited every year by the Collector and the Assistant Collector of the district. The total cost was Rs. 6,433-11-10 and the cost per patient was Rs. 1-4-3 against Rs. 5,929-3-0 and Rs. 1-6-4 in 1897 and Rs. 6,458-7-4 and Re. 1-0-4 in 1896, respectively. The income from hospital stoppage rules was Rs. 251-3-0, as compared with Rs. 268-7-0 in 1897 and Rs. 292-5-0 in 1896.

The Bai Mithibai Hormasji Wadia Dispensary, Kurla.—*In charge of* Retired Assistant Surgeon Nassarvanji Dhanjibhai.

The building and out-houses are conveniently situated and kept in good order and repair. The dispensary committee visit the dispensary every two or three months. The sanitary condition of the town is much improved by the increase of the conservancy establishment, extension of the Vehár water-supply without charge to the public from taps at convenient stations, removal of night soil to the pits at Chembur and erection of private and public latrines. The total treated was 7,222 out-door and 68 in-door patients as compared with 5,905 and 155 in 1897 and 8,315 and 12 in 1896, respectively. The most common diseases were malarial fevers, skin diseases, bronchitis, diarrhœa, dysentery and worms. Plague and cholera prevailed in an epidemic form. Of plague there were 498 cases and 436 deaths in 1897 and 199 cases and 174 deaths in 1898.

Cholera gave 109 cases and 87 deaths in 1897. There were 170 surgical operations performed, as compared with 194 in 1897 and 250 in 1896. Vaccination is carried on with animal lymph by the táluka vaccinator. There were ten *post-mortem* examinations held against 2 in 1897 and 3 in 1896. The hospital stoppage rules are not in force in this dispensary. The dispensary was inspected once every year by the Civil Surgeon, Thána. The total cost was Rs. 4,034-11-5 and the cost per patient Re. 0-8-10, as compared with Rs. 5,635-5-4 and Re. 0-14-11 in 1897 and Rs. 5,369-8-1 and Re. 0-10-4 in 1896, respectively.

KOLA'BA COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

PEN.—*In charge of* First Class Hospital Assistant IBHRAHIM KHAN, No. 71.

The dispensary is located in a hired building, which is in good repair. During the year 1898 a wooden ceiling to the office and dispensary rooms and a verandah on the western side for the convenience of female patients were provided. Furniture and fittings are sufficient and in good order. The dispensary committee visited the dispensary four times in 1898, and thrice in 1897 and in 1896. The conservancy arrangements are not satisfactory. The water-supply, chiefly from the municipal tanks, is good and abundant. There were 28 in-door and 9,487 out-door patients treated against 30 in-door and 7,308 out-door in 1897 and 19 in-door and 9,210 out-door in 1896. Malarial fevers, intestinal worms, diarrhœa, dysentery and diseases of the eye and respiratory system were the prevailing diseases. Cholera gave 208 cases with 156 deaths in 1897, and 184 cases and 130 deaths in 1896. Of plague there were 5 imported cases in 1898 and 7 in 1897. There were 191 surgical operations performed against 167 in 1897 and 176 in 1896. Opinion was given in 20 medico-legal cases as compared with 24 in 1897 and 28 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Assistant Surgeon of Alibág annually. The total cost was Rs. 2,431-12-3 and the cost per patient Re. 0-4-1 against Rs. 1,938-6-1 and Re. 0-4-3 in 1897 and Rs. 1,852-12-10 and Re. 0-3-3 in 1896, respectively. The amount of hospital stoppages was Rs. 174-11-0, as compared with Rs. 155-15-0 in 1897 and Rs. 90-11-0 in 1896.

MAHÁD.—*In charge of* First Class Hospital Assistant EZEKIEL REUBEN, No. 99.

The usual repairs to the dispensary buildings were not carried out in 1898. The dispensary committee visited the dispensary thrice in each year. The sanitary condition of the town is not satisfactory. The water-supply from tanks and wells is abundant, but liable to pollution owing to want of precautions to keep them clean. The number of patients treated was 22 in-door and 4,031 out-door as compared with 32 and 3,706 in 1897, and 30 and 5,278 in 1896, respectively. The prevailing diseases were malarial fevers, bronchitis and diseases of the eye and digestive system. There was no epidemic. Surgical operations numbered 15 against 44 in 1897 and 37 in 1896. There were 4 *post-mortem* examinations held, and opinion was given in 12 medico-legal cases, as compared with 2 and 9 in 1897 and 3 and 15 in 1896, respectively. Vaccination is conducted by the táluka vaccinator. The Assistant Surgeon of Alibág inspected the dispensary once annually. The total cost was Rs. 1,509-4-2 and the cost per patient Re. 0-5-11 against Rs. 1,317-8-6 and Re. 0-5-8 in 1897 and Rs. 1,457-14-9 and Re. 0-4-5 in 1896, respectively. Rs. 5-10-0 were realized under the hospital stoppage rules, as compared with Rs. 6-14-0 in 1897 and Rs. 7-13-0 in 1896.

PANVEL.—*In charge of* First Class Hospital Assistant MANAJI CUDDUM, No. 32.

The present dispensary building, a hired one, is not suitable and convenient for the purpose. It has no accommodation for in-patients. The building requires repairs and whitewashing. As regards the furniture, &c., there is only one cot with tape. There is no bedding and clothing for the use of in-patients. The Mámlatdár and Vice-President and the members of the municipality visited the dispensary frequently. The most common diseases were malarious fevers, intestinal worms, rheumatic affections, diseases of the skin and respiratory system and diarrhœa. There was no epidemic of cholera in the town in 1898 and 1896, but there were 10 cases of cholera with 9 deaths reported in 1897. Plague broke out in the town in the month of February 1897, and more or less lasted up to 31st December 1898. There were 126 cases with 107 deaths in 1898, and 309 cases with 257 deaths in 1897. Of these 25 were imported cases with 17 deaths in 1897. The dispensary was inspected by the Assistant Surgeon of Alibág annually. The total number of out-door patients treated was 4,276 against 4,281 in 1897 and 8,563 in 1896. There were 29 in-patients treated in 1896. Sanitation of the town is not good, but the water-supply is good and ample. There were 263 surgical operations performed against 184 in 1897 and 205 in 1896. There were 5 *post-mortem* examinations performed against 4 in 1897 and 7 in 1896. Opinion was given in 36 medico-legal cases at the request of the Police, against 37 in 1897 and 26 in 1896. Vaccination is carried on by the táluka vaccinator. The fees collected under the hospital stoppage system amounted to Rs. 47-0-0 against Rs. 52-3-0 in 1897 and Rs. 94-4-0 in 1896. The total cost was Rs. 1,819-4-4, and cost per patient Re. 0-6-10 against Rs. 1,869-4-11 and Re. 0-7-0 in 1897, and Rs. 1,756-15-2 and Re. 0-3-3 in 1896, respectively.

ENDOWED DISPENSARY.

MRS. PASCOAL DESOUZA DISPENSARY, URAN.—*In charge of* First Class Hospital Assistant VITHAL LINGU, No. 70.

The dispensary, which has newly been built in the centre of the town, is suitable. The furniture and fittings are old and unserviceable and require renewal. The dispensary committee visited the dispensary thrice in each year. The conservancy is looked after by the municipality, and the town kept fairly clean. The water-supply from wells and tanks is ample, but contaminated by vegetable matter. The total treated was 1 in-door and 4,654 out-door patients against 3,326 out-door in 1897 and 5,186 out-door in 1896. Worms, malarial fevers, diarrhœa and rheumatic, respiratory and skin affections were the prevailing diseases. There were 128 cases of plague treated as compared with 194 in 1897 and *nil* in 1896. Surgical operations numbered 65 during the year 1898 against 57 in 1897 and 124 in 1896. Three *post-mortem* examinations were held, as compared with 1 in 1897 and 1 in 1896. Opinion was given in 45 medico-legal cases against 48 in 1897 and 26 in 1896. Vaccination is carried out by the táluka Local Fund vaccinator. The Civil Surgeon of Thána inspected the dispensary in 1898. The total cost was Rs. 2,683-14-5 and the cost per patient Re. 0-9-3, as compared with Rs. 2,797-2-3 and Re. 0-13-6 in 1897 and Rs. 7,311-14-0 and Rs. 1-6-7 in 1896, respectively. Rs. 139-14-0 were hospital stoppages against Rs. 133-2-0 in 1897 and Rs. 188-6-0 in 1896.

GOVERNMENT DISPENSARIES.

ALIBA'G.—*In charge of* Assistant Surgeon M. F. PEREIRA.

The dispensary buildings are in good repair. The female ward was furnished in 1898 with 6 iron cots, bedding and clothing at a cost of Rs. 114, sanctioned by Government. The furniture for the male ward, *viz.* 8 cots, 1 press, and 1 operating table have not yet been supplied. A sweeper was sanctioned by Government, from April 1897, at Rs. 8 per mensem. The sanitary condition of the town was satisfactory. The water-supply from the Eshwi water-works is insufficient, turbid and greenish from weeds; that from wells, brackish. The total number treated during the year 1898 was 4,197 out-door and 53 in-door patients as compared with 3,360 and 66 in 1897 and 7,450 and 64 in 1896. The daily average attendance of out-door and in-door patients for the respective three years was 41·7 and 2·6, 33·6 and 2·5 and 61·7 and 1·9. The prevailing diseases were malarial fevers, plague, rheumatism, bronchitis, diarrhœa, worms and skin affections. Fifty-three surgical operations were performed against 30 in 1897 and 89 in 1896. There were 3 *post-mortem* examinations made at the request of the Police, and opinion given in 20 medico-legal cases. Vaccination is carried out by the táluka vaccinator. The dispensary was visited once by the Collector and twice by the Executive Engineer. The total cost was Rs. 5,571-10-0 as compared with Rs. 5,385-15-5 in 1897 and Rs. 5,632-14-7 in 1896. The cost per patient was Rs. 1-5-0 against Rs. 1-9-2 in 1897 and Re. 0-12-0 in 1896. The fees collected under the hospital stoppage rules amounted to Rs. 106-15-0 as compared with Rs. 74-12-0 in 1897 and Rs. 77-9-0 in 1896.

MA'THERA'N.—*In charge of* Major M. A. T. COLLIE, M.B., I. M. S.

The dispensary is located in one of the rooms of the Superintendent's office. There is no dispensary committee. The total treated was 3,542 out-door patients as compared with 2,468 in 1897 and 3,554 in 1896. The conservancy arrangements and water-supply are good. Fever, worms and respiratory, skin and bowel affections were the prevailing diseases. Of relapsing fever 12 cases occurred amongst the Mahárs on the hills. There were 33 surgical operations performed against 54 in 1897 and 83 in 1896. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Surgeon-General with the Government of Bombay. The total cost was Rs. 1,314-15-9 and the cost per patient Re. 0-6-0 as compared with Rs. 1,312-7-1 and Re. 0-8-6 in 1897 and Rs. 1,338-15-11 and Re. 0-6-0 in 1896, respectively. Rs. 239-14-0 were hospital stoppages against Rs. 180-6-0 in 1897 and Rs. 138-13-0 in 1896.

RATNA'GIRI COLLECTORATE.

CIVIL HOSPITAL, RATNA'GIRI.—*In charge of* Lieutenant-Colonel K. R. KIRTIKAR, I. M. S.

Conservancy.—Defective.

Water-supply.—From Natchni Lake, of good quality, but insufficient. Private wells are liable to contamination from soakage.

Hospital buildings.—A new bathing place for hospital servants and a drain in connection with it and with the old bath-room, as well as the pavement of the new store-room, were completed during the year 1898.

The want of a properly lighted operation room is keenly felt. The senior hospital assistant's quarters are incommodious and have no drain for ablution water, which sinks, right in front of the hospital, into the adjacent ground. This will be attended to during the current year.

General health—Was good. In the district 334 indigenous cases of plague occurred with 283 deaths. In the town itself there were 17 cases with 13 deaths; of these, 15 were imported from Bombay and 2 indigenous cases which proved fatal.

Attendance of patients.—2,786 out-door and 229 in-door patients against 2,285 out-door and 160 in-door in 1897 and 3,428 out-door and 222 in-door in 1896.

Prevailing diseases.—Ascaris lumbricoides, malarial fevers, dyspepsia, bronchitis, ring-worm and scabies.

Surgical operations.—229 surgical operations were performed as compared with 138 in 1897 and 215 in 1896.

Mortality and its causes.—There were 24 deaths against 17 in 1897 and 7 in 1896. Of the former, 13 were due to plague, 2 to hepatic abscess, and the rest to other causes.

Vaccination—Is favourably received by the people, but, as usual, there is a strong objection to part with lymph.

Conduct of establishment.—Generally good. First Class Hospital Assistant Hari Vithal, No. 33, is zealous, attentive and well-informed.

Hospital stoppages.—Rs. 198-11-0 were realized as compared with Rs. 146-2-0 in 1897 and Rs. 1412-0-1 in 1896.

Cost.—The total cost was Rs. 3,200-1-5 and the cost per patient Rs. 1-1-0 against Rs. 5,758-0-3 and Rs. 2-5-8 in 1897 and Rs. 5,304-6-9 and Rs. 1-7-3 in 1896, respectively.

SIR DINSHAW MANECKJI PETIT LEPER HOSPITAL, RATNA'GIRI.—*In charge of* Lieutenant-Colonel K. R. KIRTIKAR, I. M. S.

Hospital Buildings—Are in good repair.

Water-supply—From an imperfectly covered well in front of the hospital compound is good but insufficient during the latter part of the hot season. The well has been deepened 5 feet, but this has not increased the supply.

Conservancy—Is on the dry earth system.

Admissions and results.—The following table shows the admissions and results for the year 1898 as compared with the previous two years:—

Years.	Remaining on 1st January.	Admitted.	Total treated.	Discharged cured.	Relieved.	Absented otherwise.	Died.	Daily average strength.
1898...	58	67	125	...	...	44	16	81·7
1897...	41	64	105	...	...	39	8	61·3
1896...	32	54	86	...	...	36	9	47·4

Mortality.—There were 16 deaths in hospital as compared with 8 in 1897 and 9 in 1896 The chief causes were exhaustion and ulceration, except in one case, where death was due to strangulation—a case of suicide.

Conduct of Establishment—Has been good. Third Class Hospital Assistant Udev Devji Powar, No. 241, is zealous and painstaking.

Miss Rosa Robert's Legacy.—This legacy of £100 was utilized for planting shady trees in the asylum compound. The amount realized in Indian coin was Rs. 1,739-2-11. Of this, Rs. 921-15-0 were expended for digging eight holes, the total capacity being about 9,442 cubic feet. Of these, 4 holes have been planted. The remaining four pits could not be filled in before the monsoon. The soil being rocky, the work of excavation has been difficult and expensive, as unskilled convict labour alone was available. The balance in the treasury on this count is now Rs. 817-3-11.

Cost.—The total cost was Rs. 7,922-12-7 and the cost per patient Rs. 63-6-1, as compared with Rs. 6,197-0-7 and Rs. 59-0-4 in 1897 and Rs. 4,764-0-10 and Rs. 55-6-4 in 1896, respectively.

SIR WESTROPP CIVIL HOSPITAL, SA'VANTVA'DI.—*In charge of* DR. D. G. DALGADO, M.D.

Conservancy.—Owing to the continued prevalence of plague in Bombay and Belgaum, the municipality has taken extra precautions to keep the town as clean as possible. The night-soil of the town is removed to a distant locality, and buried with dry earth and disinfected if necessary. The sweepings of the town are burnt and used for manuring fields.

Water-supply—Is good and sufficient. The average amount supplied per head is 6 gallons.

General health—Has been fairly good. There were 22 cases of plague, including the five imported ones, against 20 in 1897. In the district there have been 21 cases of small-pox, but none in the town. The death-rate of the town was 17·7 against 21·0 and 23·2 respectively in 1897 and 1896, and the birth-rate 20·9 against 28·0 and 25·7.

Hospital Buildings.—The hospital stands on a well drained piece of ground and has accommodation for 26 males and 10 females. The Dalgado Ward for paying patients is a small detached building with two beds. The plague hospital is placed at one corner of the spacious compound of the Leper Asylum and has accommodation for 12 beds. All these buildings are well ventilated and in thorough repair.

Attendance of patients.—616 in-door and 7,547 out-door patients were treated against 629 and 7,807 in 1897 and 531 and 8,119 in 1896, respectively.

Prevailing diseases.—Malarial fevers, bronchial catarrh, ascaris lumbricoides, dyspepsia and diarrhœa.

Surgical operations.—There were 619 surgical operations performed against 489 in 1897 and 601 in 1896.

Mortality and its causes.—The total number of deaths in hospital was 28 or 4·5 per cent. of the total treated against 26 or 4·1 per cent. in 1897 and 16 or 3·0 per cent. in 1896. The chief causes of death were difficult labour, bronchitis, phthisis pulmonalis, remittent fever and pneumonia.

Vaccination—Is carried out by a separate department, consisting of an inspector with 5 vaccinators. There were 223 primary and 41 secondary vaccinations against 342 and 39 in 1897 and 243 and 33 in 1896, respectively.

Conduct of Establishment—Has been very good. The First Class Hospital Assistant, Mr Ittoo Chowan, No. 7, has discharged his duties with great care and attention and had very heavy work in connection with the preventive measures on account of plague, although the actual amount of plague cases was small.

General observations.—The medico-legal cases were 76 against 64 in 1897 and 58 in 1896. There were 11 *post-mortem* examinations held as compared with 4 in 1897 and 15 in 1896. The rainfall was 184·13 against 177·17 and 137·91, respectively, in 1897 and 1896. It was very seasonable. The maximum and minimum temperatures recorded were 98° on 24th May and 50° on 23th January 1898.

Cost.—The total cost of the hospital which is maintained by the Native State, including the pay of the medical officer in charge, was Rs. 12,572-0-11, and the cost per patient Re. 1-8-7 as compared with Rs. 12,432-12-4 and Re. 1-7-7 in 1897 and Rs. 11,183-13-9 and Re. 1-4-8 in 1896, respectively.

Hospital stoppages.—The Dalgado Ward yielded Rs. 14-2-0 against Rs. 18-4-0 in 1897 and Rs. 16-12-0 in 1896.

GRANT-IN-AID DISPENSARIES.

DÁPOLI.—*In charge of* Compounder S. A. KADAR.

The dispensary buildings are in good repair. There are no quarters for the medical officer and dispensary servants. Furniture is quite insufficient. The dispensary committee visited the dispensary monthly. The general health of the town is good. The conservancy is well attended to, and the water-supply is abundant and of good quality. The total number of patients treated was 39 in-door and 6,184 out-door against 48 in-door and 4,545 out-door in 1897 and 21 in-door and 4,849 out-door in 1896. The prevailing diseases were malarial fevers, intestinal worms, dysentery and diseases of the digestive and respiratory systems. There was no epidemic in the town. A few cases of pneumonic plague occurred in a village 12 miles distant from Dápoli. There were 133 surgical operations in 1897 and 131 in 1896. *Post-mortem* examinations numbered 13 against 12 in 1897 and 6 in 1896. Opinion was given in 8 medico-legal cases as compared with 7 in 1897 and 1 in 1896. Vaccination work is performed by the táluka vaccinator. The Civil Surgeon, the Collector and the Assistant Collector of Ratnágiri inspected the dispensary annually. The total cost was Rs. 1,385-10-10 and the cost per patient Re. 0-3-7, as compared with Rs. 1,241-7-9 and Re. 0-4-4 in 1897 and Rs. 1,764-10-8 and Re. 0-5-10 in 1896, respectively. Rs. 8-15-0 were hospital stoppages against Rs. 11-12-0 in 1897 and Rs. 7-5-0 in 1896.

CANDY DISPENSARY, VENGURLA.—*In charge of* Third Class Hospital Assistant G. B. WELING, No. 271.

The dispensary buildings are in a good state of repair. The furniture, fittings, &c., are sufficient and in good order. The two cupboards recommended by the Civil Surgeon of Ratnágiri for clothing and surgical instruments have not yet been supplied. The dispensary committee visited the dispensary often. The conservancy arrangements are not satisfactory. The water-supply from wells and a tank is good and ample. The total treated was 136 in-door and 6,243 out-door patients, as compared with 160 and 4,898 in 1897 and 138 and 6,792 in 1896, respectively. Malarial fevers, diseases of the digestive and respiratory system and round worms were the most common complaints. The town and its vicinity were free from epidemic, but there were 4 imported cases of plague,—3 from Bombay and 1 from Belgaum, which proved fatal. The surgical operations performed were 592 against 389 in 1897 and 389 in 1896. Three

post-mortem examinations were held, and opinion was given in 6 medico-legal cases. Vaccination is carried out by a municipal vaccinator under the Sanitary Department. The dispensary was inspected by the Commissioner, Southern Division, and by the Civil Surgeon, the Collector and the Assistant Collector of Ratnágiri. The total cost was Rs. 1,890-0-6 and the cost per patient Re. 0-4-9 against Rs. 3,299-1-3 and Re. 0-10-5 in 1897 and Rs. 3,558-3-9 and Re. 0-8-3 in 1896, respectively. Rs. 192-0-0 were realized as hospital stoppages in 1898, Rs. 180-4-0 in 1897 and Rs. 206-13-0 in 1896.

RÁJÁPUR.—*In charge of* Compounder VITHAL GANESH PATIL.

The dispensary building is in a fair state of repair. The hospital assistant and compounders' quarters require repair. A glass window in the male ward, six shelves in the store-room, paving of the store-room, a verandah in the front of the dispensary, and a mortuary, 4 privy pans and a small press for surgical instruments are much needed. The wards are small and ill-ventilated. Furniture and fittings are in good order. The dispensary committee visited the dispensary seven times in 1898 against 12 in 1897 and 4 in 1896. The conservancy of the town is carried out by the municipality. There are no public latrines. Water-supply from main reservoir is abundant and of good quality, also from a few wells in the town which, in rainy season, allow of pollution by soakage. The total treated was 4,240 out-door and 27 in-door patients as compared with 4,018 and 44 in 1897 and 4,012 and 35 in 1896, respectively. The most common diseases were malarial fevers (chiefly ague), intestinal worms, diseases of the digestive system and respiratory and rheumatic affections. The town was free from epidemic in 1898 and 1896, but in 1897 cholera was prevalent. The dispensary was inspected by the Civil Surgeon, Ratnágiri, once in each year, and by the Deputy Sanitary Commissioner in 1896. Vaccination is carried on by the táluka vaccinator. Two *post-mortem* examinations were made, and opinion was given in 23 medico-legal cases in 1898 against 7 and 28 in 1897 and 7 and 18 in 1896, respectively. There were 94 surgical operations performed against 119 in 1897 and 152 in 1896. The amount realized on account of hospital stoppages was Rs. 27-15-0 against Rs. 28-12-0 in 1897 and Rs. 42-5-0 in 1896. The total cost was Rs. 1,221-2-8 and the cost per patient Re. 0-4-7, as compared with Rs. 1,169-10-2 and Re. 0-4-7 in 1897 and Rs. 1,305-14-4 and Re. 0-5-2 in 1896.

MUNICIPAL DISPENSARY.

CHIPLU'N.—*In charge of* MR. NARAYAN JAYAJIRAO CUDDAM.

The dispensary consists of one big room on the lower storey of the municipal office building. It is in good condition, but unsuitable. Furniture and fittings, though insufficient, are in good order. The municipal committee visited the dispensary ten times in 1898, as compared with eight times in 1897 and four times in 1896. Conservancy arrangements, as regards surface cleaning of the streets and gutters, are satisfactory. Water-supply from pipes and wells is good and abundant. No epidemic disease has appeared at this station this year. There occurred 77 cases of cholera in 1897 with 60 deaths as compared with 16 cases in 1896 with 10 deaths. The total treated was 2,514 out-door patients against 2,152 in 1897 and 2,928 in 1896. The most common diseases were malarial fevers, worms, diseases of the eye and digestive system and dysentery. There were 52 surgical operations performed in 1898, as compared with 50 in 1897 and 37 in 1896. Opinion was given in a few medico-legal cases. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Ratnágiri, once in each year. The total cost was Rs. 678-1-9 and the cost per patient Re. 0-4-4, as compared with Rs. 1,302-13-0 and Re. 0-9-8 in 1897 and Rs. 1,197-11-1 and Re. 0-6-7 in 1896, respectively. Rs. 200-12-0 were hospital stoppages against Rs. 162-6-6 in 1897.

KANARA COLLECTORATE.

CIVIL HOSPITAL, KÁRWÁR.—*In charge of* Assistant Surgeon G. G. BOPARDIKAR.

Conservancy—Is well looked after by the municipality. Latterly special preventive measures have been undertaken against the occurrence of plague. Nightsoil is daily removed and buried at a distance, so as not to interfere with public health.

Water-supply—Is abundant and good in quality, and is obtained from wells.

Hospital Buildings.—They are in good order. There has been no change during the last three years. Accommodation is sufficient for 28 males and 7 females.

General health.—Good. There was no epidemic in the town itself. Dysentery of a severe and fatal type prevailed in the year 1897 from September to December. Plague appeared in Halyál Táluka and Mundgod Petha in the latter part of 1898.

Attendance of Patients.—There were 327 in-door and 6,620 out-door patients treated as compared with 328 in-door and 6,449 out-door in 1897 and 341 in-door and 5,890 out-door in 1896. The daily average attendance of in-door was 16·8 and of out-door 62·4, against 16·4 and 45·9 in 1897 and 16·9 and 38·3 in 1896, respectively.

Prevailing diseases.—Malarial fever heads the list for the last three years, the highest number being in 1897. Next to it are round worms in 1896 and 1897, and skin diseases in 1898. The other diseases were diseases of the digestive system, skin diseases, diseases of the respiratory system and local injuries, &c.

Surgical operations.—247 surgical operations were performed against 182 in 1897 and 201 in 1896.

Mortality.—There were 15 deaths in hospital, as compared with 14 in 1897 and 16 in 1896.

Medico-legal cases.—Opinion was given in 8 medico-legal cases against 4 in 1897 and 5 in 1896.

Vaccination.—There were 850 operations against 836 in 1897 and 815 in 1896.

Conduct of the Establishment.—First Class Hospital Assistant Hanmantrao Chowan, No. 101, performed his duties very ably and satisfactorily. He is thoroughly efficient and painstaking and completely trustworthy. He deserves commendation for the zeal and energy with which he performs his duties. His conduct is satisfactory. The members of the second class establishment, except the sweeper, performed their duties satisfactorily.

Cost.—The total cost was Rs. 4,696-12-11 and the cost per patient Re 0-10-10, as compared with Rs. 5,167-13-2 and Re. 0-12-2 in 1897 and Rs. 3,739-15-3 and Re. 0-9-7 in 1896, respectively.

Hospital stoppages.—Rs. 286-13-0 were realized during the year, as compared with Rs. 146-0-0 in 1897 and Rs. 74-6-0 in 1896.

GRANT-IN-AID DISPENSARIES.

KUMTA.—*In charge of* First Class Hospital Assistant KESHOW GOVIND, No. 73.

The dispensary buildings are in good condition. Annual repairs to all these buildings have been executed. Furniture, fittings, &c., are in good order. The dispensary committee met four times, and the chairman visited it often. The most common diseases were malarial fevers, intestinal worms and diseases of the digestive and respiratory system and skin, including ulcers. There were five deaths among in-door patients, as compared with 14 in 1897 and 6 in 1896. No epidemic during the year, except that a few cases of measles occurred in the town and its vicinity in August, September and October. The Civil Surgeon, the Collector and the Assistant Collector, Kánara, inspected the dispensary during the year. The total treated was 39 in-door and 5,908 out-door patients, as compared with 67 and 5,172 in 1897 and 49 and 5,756 in 1896, respectively. The conservancy arrangements are carried out by the municipality. There are no public privies. Private privies number 39. There are six conservancy carts with 12 sweepers, which are not quite sufficient for a large town like Kumta. Water-supply from wells is abundant. Each compound has its own well, the water of which is used both for drinking and bathing purposes. In the monsoon the wells are quite full and admit of pollution from filth, &c., by soakage from road gutters and animal excreta collected in the compounds. There were 150 surgical operations performed, as compared with 120 in 1897 and 155 in 1896. Vaccination is performed by the town vaccinator. Four *post-mortem* examinations were performed at the request of the Police, as compared with five in 1897 and 2 in 1896. Six medico-legal cases were certified as compared with 4 in 1897 and 7 in 1896. The total cost was Rs. 1,784-2-4 and the cost per patient Re. 0 4-10, as compared with Rs. 1,858-12-1 and Re. 0-5-8 in 1897 and Rs. 2,024-7-1 and Re. 0-5-7 in 1896, respectively. Hospital stoppages amounted to Rs. 109-9-0, as compared with Rs. 48-4-0 in 1897 and Rs. 71-5-0 in 1896.

HONÁVAR.—*In charge of* Third Class Hospital Assistant RAMRAO S. SOHONI, No. 334.

The dispensary building is situated on elevated ground, open to the sea-breeze, within a spacious compound, and is in good repair. The dispensary committee met five times, and the chairman and members visited the dispensary often. The conservancy is well attended to. The water-supply from wells is good and abundant. The total treated was 33 in-door and 2,627 out-door patients as compared with 50 and 2,855 in 1897 and 44 and 3,970 in 1896, respectively. The prevailing diseases were malarial fevers, skin affections, intestinal worms and bowel complaints. There was no epidemic disease. The surgical operations performed were 68 against 173 in 1897 and 274 in 1896. There were six *post-mortem* examinations, and opinion was given in four medico-legal cases, as compared with four and three in 1897 and one and seven in 1896, respectively. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon of Kárwár. The total cost was Rs. 930-9-9 and the cost per patient Re. 0-5-7 against Rs. 1,186-0-9 and Re. 0-6-6 in 1897 and Rs. 1,157-2-5 and Re. 0-4-7 in 1896, respectively. The fees collected under the hospital stoppage rules were Rs. 8-5-0 as compared with Rs. 9 in 1897 and Rs. 16-4-0 in 1896.

SUPA.—*In charge of* Third Class Hospital Assistant P. N. KOPPIKAR, No. 327.

The dispensary building is in a good state of repair. Servants' quarters require to be rebuilt. The dead-house is quite unsuitable. Furniture and fittings are sufficient and in good order. The chairman and members of the dispensary committee visited the dispensary often. Conservancy is defective. There is only one sweeper employed by the Local Board to sweep the roads in the town. Heaps of dirt and rubbish &c. accumulate along the road-sides. There are no drains for the free escape of water, but there are superficial road-side gutters. There are no public or private latrines, and the people therefore resort for the calls of nature to the vicinity of the neighbouring jungles and on the bank of the river running just in front of the village.

Water-supply, chiefly from the river running in the vicinity of the town, is abundant, but is liable to contamination. There are about eight private wells, the water of which is good and ample, but liable to pollution by soakage during the rains. The general health of the town was fairly good. There was no epidemic disease. The total number of patients treated was 16 in-door and 714 out-door as compared with 37 in-door and 1,182 out-door in 1897 and 38 in-door and 1,209 out-door in 1896, respectively. The decrease in the number of sick during the year is due to the dispensary being closed for three months. The prevailing diseases were malarial fevers complicated with enlarged spleens, intestinal worms, rheumatic and respiratory affections and bowel complaints. There were two deaths among in-door patients as compared with one in 1897 and *nil* in 1896. There were 45 deaths in the town during the year as compared with 60 in 1897 and 53 in 1896. Twenty-one surgical operations were performed as compared with 7 in 1897 and 41 in 1896. Vaccination is carried on by a Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon, the Collector and the Assistant Collector of the district. Hospital stoppages amounted to Rs. 3-3-0 against Rs. 6-4-0 in 1897 and Rs. 6-2-0 in 1896. The total cost was Rs. 927-3-6 and the cost per patient Rs. 1-4-4 as compared with Rs. 1,073-4-6 and Re. 0-14-1 in 1897 and Rs. 1,030-8-5 and Re. 0-13-3 in 1896, respectively.

HALIYAL.—*In charge of* Third Class Hospital Assistant S. R. SOHONI, No. 254.

The roof of the dispensary building requires renewal. There are no quarters for the medical officer and dispensary servants. A ward for female in-door patients is much needed. The dispensary committee met seven times. The sanitation of the town is satisfactory. The water-supply from tanks is bad and insufficient. The total number of patients treated was 65 in-door and 3,014 out-door as compared with 72 and 5,110 in 1897 and 111 and 6,790 in 1896, respectively. The most common complaints were malarial fevers, intestinal worms and diseases of the skin and respiratory and digestive systems. There were five imported cases of plague during 1898. Surgical operations numbered 335 against 278 in 1897 and 265 in 1896. Vaccination is conducted by a táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Kárwár. The total cost was Rs. 783-4-2 and the cost per patient Re. 0-4-8 as compared with Rs. 1,580-6-2 and Re. 0-4-11 in 1897 and Rs. 1,142-15-8 and Re. 0-2-8 in 1896, respectively. Hospital stoppages amounted to Rs. 44-7-0 against Rs. 69-9-0 in 1897 and Rs. 84-15-0 in 1896.

SIRSI.—*In charge of* Assistant Surgeon G. M. DIXON.

The dispensary building is in good condition. The police ward has been repaired. The medical officer's quarters and the store-room require repair, for which an estimate has been prepared, but not yet sanctioned. The dispensary committee met regularly every month. Sanitary arrangements, though some improvements have been made, are not satisfactory. The water-supply is abundant. The surroundings of the tank, the water of which is used by the majority of people for drinking purposes, require improvements. There are many wells, but all are liable to contamination by soakage. The total treated during the year was 7,622 out-door and 70 in-door patients as compared with 10,099 out-door and 105 in-door in 1897 and 9,939 out-door and 73 in-door in 1896, respectively. The most common diseases were malaria, fevers, intestinal worms, bowel complaints and respiratory, rheumatic and skin affections. There was a mild epidemic of small-pox during the first four months of the year 1898 and an epidemic of cholera during the months of July and August. There were 103 surgical operations performed against 148 in 1897 and 280 in 1896. Vaccination is performed by the táluka vaccinator. Five *post-mortem* examinations were made against four in 1897 and six in 1896. The total cost was Rs. 1,376-1-7 and the cost per patient Re. 0-2-10 as compared with Rs. 5,298-11-8 and Re. 0-8-4 in 1897 and Rs. 2,899-14-2 and Re. 0-4-8 in 1896, respectively. The fees collected under the hospital stoppage rules amounted to Rs. 134-2-0 against Rs. 181-1-0 in 1897 and Rs. 185-7-0 in 1896.

YELLAPUR.—*In charge of* Second Class Hospital Assistant NARAYAN KRISHNA, No. 200.

The dispensary building is in good condition and suitable for the purpose. The Hospital Assistant's quarters and the dead-house are also in good order. The out-houseis have not yet been reconstructed, owing to which great inconvenience is felt, as theres no accommodation for the servants to live in or in-door patients to cook. A wooden fence was erected round the dispensary premises in 1897. The dispensary committee visited the dispensary twice. The sanitary arrangements are not satisfactory. The town is kept clean by the Local Fund Department. There is no municipality. There are no latrines, and the neighbouring fields and jungles are used by the public for natural purposes. A full-time sweeper is much desired, as the urine and other filthy matter of the patients generally collect and remain in the dispensary for hours together, owing to the female sweeper belonging to the Local Fund Department attending the dispensary for an hour or so daily. There is no well attached to the dispensary, and water has therefore to be brought from a long distance. The water-supply from wells and tanks is sufficient and fair. The total number of patients treated was 2,637 out-door and 26 in-door, as compared with 3,635 and 68 in 1897 and 3,369 and 37 in 1896, respectively. The most common diseases were dysentery, malarial fevers, intestinal worms and affections of lungs, spleen, digestive system, and skin. There was no epidemic during the year. Sixty surgical operations were performed against 51 in 1897 and 69 in 1896. The vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the

Civil Surgeon of Kárwár. The total cost was Rs. 1,260-13-2 and the cost per patient Re. 0-8-11, as compared with Rs. 1,194-11-5 and Re. 0-5-2 in 1897 and Rs. 1,208-3-8 and Re. 0-5-8 in 1896. The receipts under the hospital stoppage rules were Rs. 42-8-0 against Rs. 34-15-0 in 1897 and Rs. 56-12-0 in 1896.

SIDDAPUR.—*In charge of* First Class Hospital Assistant DATTATRAYA GANESH, No. 86.

The building is situated on a good airy place and kept in good repair. The furniture and fittings are in good condition. A store-room and a cook-room are badly wanted. The water-supply from wells is sufficient, but liable to contamination. There is no municipality. The dispensary committee visited the dispensary three times, and the District Deputy Collector of Kánara once. The sanitary condition of the town is unsatisfactory. The total number of patients treated was 2,219 out-door and 33 in-door, as compared with 2,922 and 29 in 1897 and 2,652 and 42 in 1896, respectively. The prevailing diseases were malarious fevers, worms, diseases of the digestive system and skin, and local injuries. Small-pox prevailed in 9 villages. There were 26 attacks with 4 deaths. Cholera was prevalent in Koralkai, a village of this táluka, and caused 10 attacks with 8 deaths. There were 54 surgical operations performed against 61 in 1897 and 66 in 1896. Vaccination is carried on by the táluka vaccinator from house to house. One *post-mortem* examination was held against 3 in 1897 and 2 in 1896. The dispensary was inspected by the Civil Surgeon, Kárwár, annually. The total cost was Rs. 1,173-10-2 and the cost per patient Re. 0-8-4, as compared with Rs. 1,226-6-0 and Re. 0-6-8 in 1897 and Rs. 1,078-0-6 and Re. 0-6-5 in 1896, respectively. The fees on account of hospital stoppages amounted to Rs. 19-11-0 against Rs. 28-1-0 in 1897 and Rs. 20-9-0 in 1896. The dispensary remained temporarily closed for two months of the year 1898.

MUNDGOD.—*In charge of* Second Class Hospital Assistant SESHGIR UDPIRAI, No. 209.

The dispensary buildings are clean and in good repair. A separate ward for female patients is necessary. The furniture and fittings are in good order and sufficient. The dispensary committee visited the dispensary eight times during the year. There are three sweepers engaged by the Local Boards for keeping the town clean. The water-supply from the tank called Basavan Houd is insufficient and liable to pollution in the hot season; that from wells is brackish. The total treated was 2,655 out-door and 62 in-door patients, as compared with 2,744 and 32 in 1897 and 2,650 and 45 in 1896, respectively. The prevailing diseases were malarial fevers, ascaris lumbricoides, conjunctivitis, bowel complaints, skin affections, ulcers and local injuries. Plague broke out in some of the villages of Mundgod Petha, and one imported case of plague was treated in the segregation camp of Mundgod. There were 50 surgical operations performed, as compared with 65 in 1897 and 60 in 1896. One *post-mortem* examination was held at the request of the Police, as compared with 2 each in 1897 and 1896. Opinion was given in a few medico-legal cases. Vaccination is carried on by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon and the Assistant Collector of Kánara. The amount realized on account of hospital stoppages was Rs. 8-0-0 against Rs. 11-15-0 in 1897 and Rs. 5-0-0 in 1896. The total cost was Rs. 909-1-0 and the cost per patient Re. 0-5-4, as compared with Rs. 1,076-12-8 and Re. 0-6-2 in 1897 and Rs. 1,391-5-7 and Re. 0-8-3 in 1896, respectively.

BHATKAL.—*In charge of* Third Class Hospital Assistant LUXIMON NARAYAN, No. 251.

The dispensary building, which is situated almost in the centre of the town, is in a good state of repair but unsuited for the purpose, being defective as regards light and ventilation. There is no proper latrine attached to the dispensary. There are no quarters for the Hospital Assistant and second class servants. The furniture and fittings are in good order. The work of sweeping the roads in the town is carried on by sweepers employed by the municipality. Some localities are filthy and require the prompt attention of the municipality. No public latrines exist, but there are some private ones which are cleaned by the municipal sweepers. There are no proper drains, but there are superficial roadside gutters for the free escape of rain water, &c. Water-supply chiefly from wells is good and abundant. There is only one Local Fund well near the dharmshála outside the town. There was no epidemic disease. The general health of the town has been good. The total treated was 15 in-door and 2,140 out-door patients, as compared with 34 in-door and 3,723 out-door in 1897 and 25 in-door and 3,874 out-door in 1896. The prevailing diseases were malarial fevers complicated with enlarged spleens, intestinal worms, rheumatism, dyspepsia, bowel complaints and skin affections. There were 2 deaths among in-door patients against 4 in 1897 and none in 1896. Nine surgical operations were performed, as compared with 53 in 1897 and 167 in 1896. Vaccination is carried on by a Local Fund vaccinator under the supervision of the Sanitary Department. There were 2 *post-mortem* examinations held, or the same as in the previous two years. Opinion was given in 6 medico-legal cases against 10 in 1897 and 3 in 1896. The total income under the hospital stoppage system was Rs. 5-7-0, as compared with Rs. 11-0-0 in 1897 and Rs. 13-1-0 in 1896, the decrease in 1898 being due to the dispensary being closed from 10th May to 12th September. The total cost was Rs. 825-15-6 and the cost per patient Re. 0-6-2, as compared with Rs. 1,226-6-2 and Re. 0-5-3 in 1897 and Rs. 780-0-10 and Re. 0-3-2 in 1896, respectively.

POONA COLLECTORATE.

THE DAVID SASSOON GENERAL HOSPITAL, POONA.—*In charge of* Lieut.-Colonel W. MCCONAGHY, M.D., up to 1st June; Lieut.-Colonel J. P. GREANY, M.D., from 1st July to 18th November; and Captain J. B. SMITH, M.B., from 4th to 30th June and from 19th November to 31st December 1898.

Conservancy.—A city conservancy establishment is maintained at an average yearly cost of Rs. 91,699-1-9. Seventy-eight public latrines and seventy urinals are maintained. In the Cantonment and Suburban Municipality the conservancy is done departmentally; that of the hospital is attended to by the hospital establishment, and the nightsoil removed by the Suburban Municipality.

Water-supply.—The quantity is sufficient, and the quality good.

Hospital buildings.—These have been kept in a good state of repair by the Public Works Department. The following alterations were made:—(*a*) The *post-mortem* room of the Bacteriological Laboratory of the Science College, Poona, was removed to the Sassoon Hospital, and has since been converted into the dissecting room of the Medical School; (*b*) the old dissecting room is now utilized as a museum; (*c*) a sweeper's passage on the ground-floor at the north end of the building was converted into a store-room for surgical appliances and a water closet for medical officers; (*d*) a surface drainage scheme which was commenced in 1896 was completed in 1898; (*e*) a small room under the staircase formerly used as a store-room was converted into an ophthalmic room; (*f*) a special plague hospital was established in the compound for Europeans and Eurasians; and (*g*) a sweeper's passage in the ground-floor at the south end of the building was converted and connected with the steward's store-room.

The building of a new maternity ward and quarters for the House Surgeon, sanctioned in Government Resolution No. 2002, dated 7th May 1896, have not yet been taken in hand although urgently needed.

General health.—The general health of the population has not been good; small-pox was prevalent, 77 cases admitted with 8 deaths; cholera giving 186 admissions with 137 deaths. Plague was imported from Bombay; the first case was admitted into hospital on the 8th October 1896, and up to the end of December 1896 there were 61 admissions with 31 deaths. Plague prevailed throughout the year 1897. In February, March and April the epidemic was severe, but during the hot season and rains it gradually subsided; in August 1897 there was a recrudescence of the disease, which attained its height in November. This second epidemic was more severe and the type of the disease more virulent than the first. The number of Europeans and Eurasians attacked during this period was greatly in excess of that in the first epidemic. The total treated in hospital was 311 (including 25 remaining from the preceding year 1896) with 93 deaths. The Native General Plague Hospital, which was opened in the compound of this hospital in October 1896, was removed to the Sangam in February 1897. A European plague hospital was established in connection with the Sassoon Hospital in October 1897.

Inoculation with Professor Haffkine's plague prophylactic was done at the Sassoon Hospital twice a week; the total inoculated was 285.

Details of treatment.—The total number of patients treated during the year 1898 was 9,027 out-door and 2,622 in-door against 7,808 and 3,219 in 1897 and 13,654 and 3,144 in 1896, respectively.

Prevailing diseases.—Amongst both classes of patients the largest number of admissions were for malarial fevers, skin, respiratory and rheumatic affections, diarrhœa, worms, syphilitic affections, dysentery and plague.

Mortality and its causes.—There were 310 deaths against 590 in 1897 and 319 in 1896, the principal causes being cholera, small-pox, dysentery, diseases of the nervous and respiratory system, diarrhœa and plague.

Surgical operations.—1,523 were performed against 2,175 in 1897 and 3,923 in 1896.

Vaccination—Is regularly performed every Monday from 8 to 9 A.M., lymph from the calf being used. The vaccinator is under the Sanitary Department.

Medico-legal cases.—There were 65 dead bodies sent for examination against 58 in 1897 and 54 in 1896. There were 85 cases of assault, poisoning and rape brought by the police for examination, report and treatment, as compared with 47 in 1897 and 64 in 1896.

Establishment.—Captain A. J. Heath, holding the permanent appointment of Assistant Civil Surgeon, went on furlough on sick certificate in February 1898, and Captain J. B. Smith was appointed to act in his place.

Captain J. Gallagher, I. S. M. D., the House Surgeon, retired on the pension of his rank in April 1897, and 2nd Class Assistant Surgeon J. M. Dias, I. S. M. D., took over the duties of House Surgeon from the 29th April to 9th August 1897; on the latter date he handed over the duties of House Surgeon to Captain C. Easdon, I. S. M. D., the present permanent incumbent.

1st Class Assistant Surgeon Ráo Sáheb Dattu G. Sabnis, L.M., and 2nd Class Assistant Surgeon E. S. Bharucha, L.M. & S., continued to act as Assistant Surgeons to the hospital throughout the period under report

The nursing of the hospital throughout the triennial period has been under the direction and supervision of the Wantage Sisters.

The 2nd class establishment have, on the whole, conducted themselves satisfactorily.

Cost.—The total cost was Rs. 54,190-5-3 and the cost per patient Rs. 4-10-5, as compared with Rs. 42,793-6-2 and Rs. 3-14-1 in 1897 and Rs. 53,532-12-4 and Rs. 3-3-0 in 1896, respectively.

Hospital stoppages—Amounted to Rs. 3,734-1-9 against Rs. 3,979-0-3 in 1897 and Rs. 4,547-13-3 in 1896.

THE ROMAN CATHOLIC ORPHANAGE SCHOOL, POONA.—*In charge of* Lieutenant-Colonel G. H. BULL, M.D., I.M.S.

Hospital building.—There is no regular hospital building. The sick children are treated in a well-ventilated room in the upper storey of the school, and it is in good repair. Cases of a contagious nature are transferred to a separate building.

Attendance of patients.—During the three years under review the in-door patients numbered respectively 13, 65 and 22; the out-door 437, 452 and 360. The illnesses for which patients were treated were, as a rule, of a mild type, the chief affections being ague and bronchial catarrh.

Surgical operations.—Fifteen minor operations were performed during the three years.

Mortality and its causes.—No death occurred in 1896. One child died of tonsillitis with high fever in 1897, and a man died of hepatitis in 1898.

Vaccination.—During the three years 51 children were vaccinated, the numbers for the different years being 17, 15 and 19. Of these, 26 were successful and 25 unsuccessful. Children on admission to the school are examined and, if necessary, re-vaccinated.

Water-supply.—By pipes from Khadakvasla. It is abundant and of good quality.

Conservancy.—Latrines are attended to twice daily, and the surroundings are kept clean.

General health of the Institution.—The general health has been good. There have been no epidemics.

Conduct of the establishment—Has been satisfactory.

Cost.—The total cost was Rs. 1,216-4-3 and the cost per patient Rs. 3-3-0, as compared with Rs. 1,280-15-3 and Rs. 2-7-8 in 1897 and Rs. 1,159-7-5 and Rs. 89-3-0 in 1896, respectively.

ENDOWED DISPENSARY.

KHÁN BÁHÁDUR PESTONJI SORABJI DISPENSARY, POONA.—*In charge of* First Class Assistant Surgeon J. P. WADIA.

The dispensary building is an old upper-storeyed house, which was used as a gymnasium in the old Peishwa times. The ground-floor only is used as a dispensary, the upper storey being rented by the city municipality for its offices on Rs. 30 per month. The dispensary accommodation is very insufficient and unsuitable. There is no accommodation for in-patients, no proper operation room, no examination room, nor are quarters for the medical officer and the staff provided on the premises. The dispensary committee consists of six members, each of whom visits the dispensary every month in rotation. The sanitary arrangements of the city were looked after by the city municipality during 1896. Owing to the outbreak of plague in the latter part of 1897, they are carried out by special officers appointed by Government. To help the municipal staff in a proper supervision of all sanitary matters, European soldier-inspectors are placed in charge of each ward in the town. This arrangement has resulted in much improvement. A complete drainage system for the whole city is to be taken in hand. Water-supply from the Khadakvasla lake is ample, but liable to contamination. In crowded streets the water is stored in low open tanks. This system of open dipping tanks is highly objectionable. All such tanks should be closed over and should be provided with a number of taps. The total number of patients treated was 13,807 out-door patients against 8,122 out-door in 1897 and 13,622 out-door and 1 in-door in 1896. The figures for 1897 show a decrease as compared with those for 1896 and 1898. This diminution is attributable to the prevalence of plague and the consequent exodus of the people from the city. The prevailing diseases were malarial fevers, intestinal worms, digestive disorders and bronchitis. There were 566 surgical operations performed against 375 in 1897 and 576 in 1896. Vaccination is conducted by vaccinators in the employ of the city municipality. The Surgeon-General inspected the dispensary on the 5th September 1898, and the Civil Surgeon of Poona once in each of the three years. The total cost was Rs. 5,267-13-8 and the cost per patient Re. 0-6-1 as compared with Rs. 5,977-1-7 and Re. 0-11-9 in 1897 and Rs. 4,327-12-7 and Re. 0-5-1 in 1896, respectively. The income under the hospital stoppage rules was Rs. 301-3-4 in 1896, Rs 247-8-0 in 1897, and Rs. 124 in 1898. There is a marked falling off under this head for the last year which is due to the prevalence of plague and consequent restrictions which frightened people away, as also to the existence of two municipal dispensaries where the stoppage rules are not in force and free medical relief is given to the rich and poor alike. There are also several private medical practitioners in the city in whose dispensaries only 2 annas for a day's medicine

are charged including consultation fees. Another difficulty in the proper working of the rules is that no authenticated lists of persons paying income-tax are supplied to the dispensary, and many persons evade the payment of such charges by denying their liability to pay.

MUNICIPAL DISPENSARIES.

SHANWA'R PETH DISPENSARY No. I., POONA—*In charge of* Mr. NARSOOJI SAYAJI POREDI.

The building, a hired one, is small and in a fair state of repair. The dispensary is supplied with sufficient furniture. The committee visited the dispensary ten times. The sanitary condition of Shanwár Peth is fair. The water supply from the Khadakvasla canal is good and abundant, but deficient in the hot season. The total number of patients treated was 10,661 out-door, as compared with 10,274 in 1897 and 17,475 in 1896. The prevailing diseases were malarial fevers, worms, bowel complaints and skin, eye, ear, respiratory, rheumatic and syphilitic affections. There was plague in the city in the months of January, February and March 1898, but no cases were treated in the disepnsary. Vaccination is carried out by the municipal vaccinators. The dispensary was inspected by the Civil Surgeon of Poona once in each year. The total cost was Rs. 1,769-7-3 and the cost per patient Re. 0-2-8, as compared with Rs. 982-4-8 and Re. 0-1-6 in 1897 and Rs. 1,733-4-8 and Re. 1-0-7 in 1896, respectively.

SIRUR.—*In charge of* Third Class Hospital Assistant BALVANT HARI, No. 319.

The dispensary building is in good order. The sanitary condition of the town is satisfactory, and the water-supply from the river Ghod good and ample. The number of patients treated was 30 in-door and 3,025 out-door, as compared with 15 and 2,584 in 1897 and 42 and 4,721 in 1896, respectively. The prevailing diseases were malarial fevers, worms, skin, eye and respiratory affections and bowel complaints. Surgical operations numbered 49 in 1898, 57 in 1897, and 144 in 1896. There were 5 *post-mortem* examinations held and 6 medico-legal cases examined and reported on, against 7 and 2 in 1897 respectively. Vaccination is carried on by the táluka vaccinators. The dispensary was inspected by the Civil Surgeon of Poona. The total cost was Rs 842-13-5 and the cost per patient Re. 0-4-5, as compared with Rs. 936-10-10 and Re. 0-5-9 in 1897 and Rs. 1,219-9-6 and Re. 0-4-1 in 1896, respectively.

GRANT-IN-AID DISPENSARIES.

SÁSVAD—*In charge of* First Class Hospital Assistant NURSOO DUMOOJEE, No. 100.

The building, a hired one, is in good repair. There is no accommodation for in-patients. The furniture and fittings are sufficient. The sanitary condition of the town is satisfactory. The water-supply from the river Kurha is good and sufficient, but liable to pollution. The committee visited the dispensary eight times, as compared with eleven times in 1897 and nine times in 1896. The total treated was 9,318 out-door patients, against 6,953 in 1897 and 10,535 in 1896. The prevailing diseases were malarial fevers, bowel complaints, eye, skin and respiratory affections and local injuries. Cholera was not prevalent during 1898 and 1896, but in 1897 there occurred 54 cases with 26 deaths. Three plague cases occurred in 1898, as compared with 34 in 1897 and none in 1896. Vaccination is carried on by the táluka vaccinator. There were 450 surgical operations performed, against 267 in 1897 and 429 in 1896. Opinion was given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona. The total cost was Rs. 1,312-5-9 and the cost per patient Re. 0-2-3, as compared with Rs. 1,211-10-11 and Re. 0-2-9 in 1897 and Rs. 835-11-11 and Re. 0-1-3 in 1896, respectively. The amount realized on account of hospital stoppages was Rs. 11-9-0, against Rs. 25-0-0. in 1897 and Rs. 14-15-0 in 1896.

BA'RA'MATI.—*In charge of* First Class Hospital Assistant SHRIPAT NICUM, No. 97.

The building, a leased one, is quite unsuitable for dispensary purposes. It is not in a good state of repair and not adequately supplied with furniture, fittings, shelves, &c. A new building for the dispensary is under construction to the north-east of the town. The committee visited the dispensary three times in the year 1898, as compared with five times in 1897 and three times in 1896. Sanitary condition of the town is fair. The water-supply from the river Kurha, the Nira Canal and some wells in the town is good and abundant, except in the hot seasons. The total number of patients treated was 7,279 out-door and 10 in-door patients, as compared with 5,394 and 5 in 1897 and 6,157 and 41 in 1896, respectively. The prevailing diseases were those of the eye, malarial fevers, bowel complaints, worms and skin and rheumatic affections. There were 98 cases of cholera with 48 deaths in 1897 and 6 cases with 3 deaths in 1896. The total number of surgical operations performed was 301, against 337 in 1897 and 354 in 1896. Vaccination is carried on by the táluka vaccinator. Fifteen *post-mortem* examinations were made, and opinion was given in 29 medico-legal cases, as compared with 4 and 26 in 1897 and 11 and 8 in 1896, respectively. The dispensary was inspected by the Civil Surgeon of Poona once in each year, also by the Assistant Collectors in 1896 and 1898, and by the individual members of the dispensary committee often. The total cost was Rs. 1,724-5-0 and the cost per patient Re. 0-3-9, as compared with Rs. 1,432-3-4 and Re. 0-4-3 in 1897 and Rs. 1,273-13-7 and Re. 0-3-3 in 1896, respectively. The hospital stoppage fees amounted to Rs. 50-4-0, against Rs. 43-8-0 in 1897 and Rs. 19-9-0 in 1896.

INDA'PUR.—*In charge of* Third Class Hospital Assistant PRABHAKAR S. SOHONI, No. 221.

The dispensary is located in an old hired building. A cook-room and a latrine are under construction. Some furniture is badly needed. The dispensary committee visited the dispensary six times. The conservancy arrangements are indifferent. Water-supply is good and abundant. The total treated was 21 in-door and 5,173 out-door patients, against 41 and 4,434 in 1897 and 24 and 7,149 in 1896, respectively. Intermittent fever, worms, eye affections and bowel complaints were the principal causes of admission. There were 148 surgical operations performed, as compared with 92 in 1897 and 111 in 1896. Ten *post-mortem* examinations were held, against 5 in 1897 and 6 in 1896. Opinion was given in several medico-legal cases Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Poona. The total cost was Rs. 957-3-10 and the cost per patient Re. 0-2-11, as compared with Rs. 995-9-1 and Re. 0-3-7 in 1897 and Rs. 1,028-11-2 and Re. 0-2-4 in 1896, respectively. Rs. 11-9-0 were hospital stoppages, against Rs. 14-8-0 in 1897 and Rs. 4-9-0 in 1896.

JUNNAR.—*In charge of* Second Class Hospital Assistant PEERAJI KAMAJI, No. 117.

The dispensary building is in a good state of repair and is suitable for out-door patients only. There are neither accommodation for in-door patients, nor a dead-house, nor a cook-room nor quarters for Hospital Assistant and servants. Furniture and fittings are sufficient. The dispensary committee visited the dispensary once during the year, against twice in 1897 and four times in 1896. The sanitation of the town is unsatisfactory; water-supply good and sufficient. The total number of patients treated was 12 in-door and 10,178 out-door, against 15 in-door and 10,881 out-door in 1897 and 15 in-door and 10,551 out-door in 1896. The most common diseases were conjunctivitis, malarial fevers, worms and diseases of the respiratory and digestive systems and skin. There were 202 cases of cholera with 104 deaths in the town in 1897, against 156 cases with 87 deaths in 1896. Three cases of plague were imported to Junnar during the year 1898, of which 2 proved fatal, whereas in 1897, 8 cases were imported and 6 proved fatal. 522 surgical operations were performed, against 475 in 1897 and 656 in 1896. Vaccination is carried out by the táluka vaccinator. There were 7 *post-mortem* examinations, against 7 in 1897 and 16 in 1896. Opinion was given in 17 medico-legal cases, against 36 in 1897 and 23 in 1896. The dispensary was inspected by the Civil Surgeon of Poona every year. The total cost was Rs. 1,207-14-1, against Rs. 1,299-7-11 in 1897 and Rs. 1,341-5-10 in 1896. The cost per patient was Re. 0-1-11, against Re. 0-1-11 in 1897 and Re. 0-2-0 in 1896. The fees on account of hospital stoppages were Rs. 44-13-0, as compared with Rs. 29-10-0 in 1897 and Rs. 19-0-0 in 1896.

KHED.—*In charge of* Second Class Hospital Assistant GANGADHAR B. SATHE, No. 111.

The dispensary buildings are in good repair. Furniture and fittings are sufficient. Glass windows are necessary, in lieu of wooden ones, to admit of light and prevent heavy breeze. A verandah on the south-east corner of the dispensary for out-door patients, cupboards for keeping poisons and records and quarters for second class servants are required. The dispensary committee visited the dispensary once in 1898 and thrice in 1897 and 1896. The municipality tries to keep the town clean with the means at its disposal. The water-supply from the river Bhima is good and abundant, except during the hot season, when pits are dug in the river bed to get potable water. The total number of patients treated was 5 in-door and 3,453 out-door against 24 in-door and 5,027 out-door in 1897 and 14 in-door and 5,061 out-door in 1896 The most common diseases were malarial fevers, ascaris lumbricoides, bowel complaints, and eye skin and respiratory affections. There were 165 cases of plague with 136 deaths in 1898 Surgical operations numbered 107, as compared with 69 in 1897 and 102 in 1896. Six *post-mortem* examinations were held, and opinion was given in 30 medico-legal cases, against 4 and 13 in 1897 and 10 and 28 in 1896, respectively. Vaccination is carried out by the Local Fund vaccinator. The Civil Surgeon of Poona inspected the dispensary. The total cost was Rs. 989-5-7 and the cost per patient Re. 0-4-7, against Rs. 1,013-9-10 and Re. 0-3-3 in 1897 and Rs. 956-4-5 and Re. 0-3-0 in 1896, respectively. Rs. 16-11-0 were hospital stoppages, as compared with Rs. 42-9-0 in 1897 and Rs. 25-3-0 in 1896.

TALEGAON DABHADA DISPENSARY.—*In charge of* Third Class Hospital Assistant KESHAV GANPAT JADHAV, No. 192.

The dispensary building is in good repair. Furniture and fittings are sufficient and in good order. The dispensary committee visited the dispensary nine times in 1898, against thirteen times in 1897 and ten times in 1896. The sanitation of the town is fair. The water-supply from a new tank, constructed by the municipality, is abundant and of good quality. The total treated was 1,946 out-door and 20 in-door patients, as compared with 2,587 and 101 in 1897 and 4,134 and 31 in 1896, respectively. The prevailing diseases were malarial fevers, worms, febricula, diseases of the skin, digestive and respiratory systems and eye. Two cases of plague occurred in 1898 and 112 in 1897. Cholera gave 17 cases in 1897 and 29 in 1896. There were 41 surgical operations performed, as compared with 73 in 1897 and 118 in 1896. Two *post-mortem* examinations were held, against 6 in 1897 and 5 in 1896, and opinion was given in 6 medico-legal cases in 1898, against 5 and 3, respectively, in 1897 and 1896. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Poona. The total cost was Rs. 935-3-8 and the cost per patient was Re. 0-7-7, as compared with

Rs. 907-3-2 and Re. 0-5-5 in 1897 and Rs. 1,020-8-10 and Re. 0-3-11 in 1896, respectively. Rs. 4-6-0 were hospital stoppages, against Rs. 7-14-0 in 1897 and Rs. 11-15-0 in 1896.

TALEGAON DHAMDHERA.—*In charge of* Second Class Hospital Assistant PRATAP GANGARAM, No. 206.

The dispensary building, a hired one, is in good repair. Furniture and fittings are sufficient and in good order. A dead-house is required. As there is no compounder attached to the dispensary, much of the Hospital Assistant's time is taken up in dispensing medicines. The dispensary committee visited the dispensary twice a year. Conservancy arrangements are not satisfactory. Water-supply is scanty, owing chiefly to the withdrawal of water from the river for irrigation purposes. The total treated was 4,934 out-door patients, against 5,060 out-door in 1897 and 5 in-door and 7,563 out-door in 1896. Eye and skin affections, malarial fevers, worms and diseases of the digestive system were the most common complaints. There were 133 surgical operations, as compared with 206 in 1897 and 356 in 1896. A few medico-legal cases were examined and reported on at the request of the Police. Vaccination is conducted by the táluka vaccinator. The Civil Surgeon of Poona inspected the dispensary. The total cost was Rs. 1,006-15-4 and the cost per patient Re. 0-3-3, against Rs. 1,053-14-10 and Re. 0-3-4 in 1897 and Rs. 889-15-2 and Re. 0-1-11 in 1896, respectively. The fees collected under the hospital stoppage system were Rs. 4-8-0 in 1897 and Rs. 10-0-0 in 1896.

ALANDI.—*In charge of* Third Class Hospital Assistant LAKSHMAN BHIVJI YADAO, No. 222.

The building is part of a dharmshála and is unsuitable for the purpose of a dispensary. There are no quarters for the Hospital Assistant and servants. The furniture and fittings are in good order. A dead-house and a latrine are much needed. The dispensary committee visited the dispensary three times, as compared with four times in 1897 and four times in 1896. The prevailing diseases were malarial fevers, worms, conjunctivitis and diseases of the digestive system and skin. There were 115 cases of cholera with 63 deaths in 1897 and 57 cases with 27 deaths in 1896. Plague broke out from October to December 1898, giving 254 cases with 173 deaths. There were 4 imported cases from Poona in 1897. The dispensary was inspected by the Civil Surgeon, Poona, once in each year. The total treated was 2 in-door and 3,899 out-door patients, as compared with 11 and 4,709 in 1897 and 2 and 6,615 in 1896, respectively. The public latrines built by the municipality have been brought into use from May 1896. There are 8 blocks with 10 seats in each block. The night-soil is removed to a depôt where it is thrown into pits and covered with earth. The sanitary condition of the town is satisfactory. The water-supply is got from the river Indrayani and from a small tank built by the municipality. 108 surgical operations were performed, as compared with 88 in 1897 and 173 in 1896. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 877-3-5 and the cost per patient Re. 0-3-7, as compared with Rs. 967-1-1 and Re. 0-3-3 in 1897 and Rs. 1,105-1-8 and Re. 0-2-8 in 1896, respectively. The receipts on account of hospital stoppages amounted to Rs. 3-2-0, against Rs. 3-4-0 in 1897 and Rs. 7-0-0 in 1896.

LONA'VLA.—*In charge of* Dr. J. MARR, M.B., C.M., up to 30th April 1898, and of Dr. F. E. PRICE, M.R.C.S. Eng., and L.R.C.P. London, till the end of the year.

The conservancy of the town is managed by a staff of 8 sweepers, 13 bhangis and 3 inspectors. One night-soil cart and one water-cart are employed. Water is obtained from the Railway Bhushi reservoir by pipes laid on to 6 stand-posts in different places throughout the town. It is pure, but suffices only for drinking purposes. Water for washing and bathing purposes is taken from the Lonávla Tank and the Indrayani river. The G. I. P. Railway hospital building is utilized. The total treated was 2,155 out-door patients against 2,434 out-door and 4 in-door in 1897 and 3,284 out-door and 3 in-door in 1896. Malarial fevers, diseases of the respiratory system, lungs and digestive system were the most common complaints. Vaccination is carried on by the Government vaccinator of the district, twice in a year. The sanitary state of the town is fair, but there being only sufficient water for drinking purposes, efficient drainage is impossible. The population according to the last census was 4,232. The increase, as compared with the previous report, is owing to some people, who had left the town, having returned, the town being free from plague during this year. The Plague Hospital was abolished from July 1898, and the staff of Inspectors at Railway Stations removed and inspections stopped from 1st November 1898. The total cost was Rs. 1,200 and the cost per patient Re. 0-8-11, as compared with Rs. 1,203-1-0 and Re. 0-7-11 in 1897, and Rs. 1,203-12-0 and Re. 0-5-19 in 1896, respectively.

DHOND.—*In charge of* Mr. HORMASJI COWASJI.

This is a G. I. P. Railway dispensary, a Government grant being received for the treatment of patients from Dhond and surrounding villages. The building is in good repair. The conservancy of the town is not satisfactory. The water-supply is got from the river Bhima. There were 1,222 out-door patients treated as compared with 1,148 in 1897 and 913 in 1896. Fever, respiratory affections and diseases of the digestive system were most common complaints. The total cost was Rs. 721-1-10 and the cost per patient Re. 0-9-5, as compared with Rs. 723-1-0 and Re. 0-10-2 in 1897 and Rs. 510-7-1 and Re. 0-9-3 in 1896, respectively.

AHMEDNAGAR COLLECTORATE.

THE RIPON HOSPITAL, AHMEDNAGAR.—*In charge of* Major C. F. WILLIS, M.D., I.M.S.

Conservancy.—No change in conservancy establishment. More public latrines are required. When plague occurred in 1898, the whole city was most thoroughly cleared out, cesspools emptied, all drains cleaned, and the refuse removed.

Water-supply.—A new system of water-supply has been introduced to about two-thirds of the city area; the water is now pumped to cisterns placed on a considerable elevation, and from there it is distributed by cisterns with numerous taps. Owing to the scanty rainfall for the last four years, the supply is short during the hot weather months.

Hospital Buildings.—Sky-lights have been let into the roof of the operating theatre with great benefit.

General Health.—In the years 1896 and 1897 cholera prevailed to a great extent, both in the town and district, the returns from the town for the year 1896 show 130 cases with 36 deaths. In 1897 there were 105 cases with 96 deaths in the town and 3,510 deaths were reported from this cause alone in the district during May, June, July, August and September. During the year 1898 there were no cases of cholera, and the general health has been very good, no doubt chiefly due to the thorough cleaning to which the town was subjected on account of the outbreak of plague and the improved water-supply. Towards the end of the year 1896, five cases of plague (all imported) made their appearance, of which four died. In 1897 the total number of plague cases in the town and district has been 622 with 441 deaths. In 1898 there were 143 cases with 109 deaths. They were treated in the Shidi-Bág Plague Hospital. The returns from the district show 479 cases with 381 deaths.

Attendance of patients.—The total treated was 482 in-door and 5,064 out-door patients, as compared with 383 in-door and 7,733 out-door in 1897 and 313 in-door and 10,358 out-door in 1896. There was a great falling off in the attendance of out-patients during the early months of 1898, due to the city being evacuated.

Prevailing diseases.—The most prevalent diseases each year are ascaris lumbricoides, malarial fevers, diseases of the eye, skin and ear.

Surgical operations.—There were 523 surgical operations performed against 699 in 1897 and 948 in 1896.

Mortality.—There were 136 deaths as compared with 56 in 1897 and 22 in 1896. Of the 136 deaths in the year 1898, there were 109 from plague—2 in the Civil Hospital and 107 in the Shidi-Bág Plague Hospital.

Medico-legal cases.—29 *post-mortem* examinations were held against 22 in 1897 and 15 in 1896. The number of medico-legal cases examined and reported on was 53, or an increase of 8 and three, respectively, over 1897 and 1896.

Hospital Stoppages.—Rs. 72-4-0, as compared with Rs. 134-7-0 in 1897 and Rs. 128-4-0 in 1896. The well-to-do people chiefly attend the Mission Hospital or the private dispensaries where the charges are very small. When their ailment becomes serious, they apply to the Civil Hospital in many cases.

Expenditure.—The total cost was Rs. 4,438-11-1 and the cost per patient Re. 0-12-10, as compared with Rs. 4,168-1-2 and Re. 0-8-3 in 1897 and Rs. 4,000-4-8 and Re. 0-6-0 in 1896, respectively.

Conduct of Establishment.—The conduct of the establishment has, on the whole, been very satisfactory.

GRANT-IN-AID DISPENSARIES.

SANGAMNER.—*In charge of* First Class Hospital Assistant CHINTAMAN SAKHARAM, No. 62.

The dispensary building has not been repaired since 1896. With the exception of an operating table, the furniture and fittings are sufficient. The dispensary was visited once by a single member of the dispensary committee during the year 1898, and thrice in each of the years 1897 and 1896. The sanitary and conservancy arrangements of the town are not so satisfactory as they ought to be, owing to the insufficient number of sweepers and public latrines for a town like Sangamner, which has a population of 10,000 persons. Water-supply from wells and from the river Pravara is abundant but liable to pollution; that of the well is brackish. The total treated was 5,063 out-door and 17 in-door patients against 7,001 and 24 in 1897 and 6,166 and 32 in 1896, respectively. The most common diseases were ophthalmia, malarious fever and intestinal worms. 267 surgical operations were performed against 222 in 1897 and 262 in 1896. Vaccination is done by the táluka Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmednagar. There were seven *post-mortem* examinations held against 15 in 1897 and seven in 1896. Opinion was given in 12 medico-legal cases against 9 and 14 cases, respectively, in 1897 and 1896. The total cost was Rs. 1,354-13-4 and the cost per patient Re. 0-4-3, against Rs. 1,460-15-7 and Re. 0-3-4 in 1897 and Rs. 1,347-0-6 and Re. 0-3-6 in 1896, respectively. The receipts on account of hospital stoppages amounted to Rs. 51-12-0, as compared with Rs. 32-10-0 in 1897 and Rs. 22-12-0 in 1896.

NEVÁSA.—*In charge of* First Class Hospital Assistant WAMON GANESH, No. 77.

The dispensary building, formerly an old masjid, is in good repair but not properly ventilated. The furniture and fittings are sufficient. The dispensary committee visited the dispensary twice in 1898, four times in 1897 and four times in 1896. No system of conservancy is in force in the town. By the orders of the local authorities, the town is kept fairly clean. The water-supply from the river Pravara is good and abundant. The total number of patients treated was 2,159 out-door and 27 in-door against 1,688 and 23 in 1897 and 2,497 and 17 in 1896, respectively. The most common complaints were malarial fevers, worms and diseases of the eye and respiratory and digestive system. There was no epidemic disease in 1898 and 1897, but cholera broke out in the town in 1896, causing 28 cases with 14 deaths. Surgical operations numbered 87, as compared with 78 in 1897 and 104 in 1896. Vaccination is carried on by the táluka vaccinator. Eleven *post-mortem* examinations were held in 1898 against 9 in 1897 and 10 in 1896. The number of medico-legal cases was 25 against 10 in 1897 and 9 in 1896. The total cost was Rs. 1,135-12-2 in 1898, Rs. 1,323-8-0 in 1897 and Rs. 1,170-8-4 in 1896. The cost per patient was Re. 0 8-4 against Re. 0-12-5 in 1897 and Re. 0-7-5 in 1896. Hospital stoppages amounted to Rs. 4-9-0 in 1898, Re. 1-8-0 in 1897 and Rs. 9-8-0 in 1896. The dispensary was inspected by the Civil Surgeon, the Collector and the District Deputy Collector of Ahmednagar.

SHEVGAON.—*In charge of* Second Class Hospital Assistant C. RAMCHANDRA, No. 94.

The dispensary buildings are kept in good repair. Furniture and fittings are sufficient. The dispensary committee met regularly. The conservancy is defective, there being no municipality. The water-supply from wells is good but deficient in the hot season. There were 18 in-door and 3,818 out-door patients treated against 19 and 4,810 in 1897 and 11 and 2,446 in 1896, respectively. The prevailing diseases were malarial fevers, dysentery, diarrhœa, worms and venereal, skin, rheumatic and respiratory affections. Surgical operations numbered 421 against 497 in 1897 and 174 in 1896. Three *post-mortem* examinations were held in 1898 and 4 each in 1897 and 1896. There were 4 medico-legal cases examined and reported on at the request of the police against 1 in 1897. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmednagar. The total cost was Rs. 971-11-11 and the cost per patient Re. 0-4-1, as compared with Rs. 1,061-3-4 and Re. 0-3-6 in 1897 and Rs. 890-6-8 and Re. 0-3-10 in 1896, respectively. Rs. 4-14-0 were hospital stoppages against Rs. 6-14-0 in 1897 and Rs. 3-1-0 in 1896.

PÁRNER.—*In charge of* Second Class Hospital Assistant NARAYEN VISHWANATH, No. 159.

The buildings are in a good state of repair and have sufficient accommodation and furniture. The dispensary committee visited the dispensary thrice. Water-supply is sufficient except in the summer. Conservancy arrangements for the town are defective. The total treated during the year was 22 in-door and 3,291 out-door patients against 39 and 3,866 in 1897 and 19 and 4,595 in 1896. The most common diseases were intestinal worms, malarial fevers, ophthalmia and diseases of the digestive and respiratory system and skin. There were 4 *post-mortem* examinations held against 6 in 1897 and 3 in 1896. The dispensary was inspected by the Civil Surgeon of Ahmednagar. Vaccination is carried on by the táluka vaccinator. There were 218 surgical operations performed against 165 in 1897 and 263 in 1896. The total cost was Rs. 1,043-2-11 and the cost per patient Re. 0-5-0, as compared with Rs. 1,234-4-0 and Re. 0-5-1 in 1897 and Rs. 1,042-11-5 and Re. 0-3-7 in 1896, respectively. The income from hospital stoppages was Rs. 10-15-0 against Rs. 12-4-0 in 1897 and Rs. 17-9-0 in 1896.

AKOLA.—*In charge of* Second Class Hospital Assistant MAHADEO SHANKER, No. 196.

The dispensary buildings, though old, are in a fair state of repair. The question of giving the court-house for dispensary use is under consideration. The dispensary committee visited the dispensary five times. The town being non-municipal is without a proper system of drainage. The water-supply from the river Pravara and wells is abundant, but liable to contamination. There were 39 in-door and 2,785 out-door patients, as compared with 46 and 5,027 in 1897 and 29 and 3,172 in 1896, respectively. Malarial fevers, worms, bowel and eye complaints were the prevailing diseases. The total number of surgical operations were 113 against 72 in 1897 and 85 in 1896. There were 11 *post-mortem* examinations held and 7 medico-legal cases certified, as compared with 5 and 14 in 1897 and 6 and 15 in 1896, respectively. Vaccination is carried out by the táluka vaccinator. The Civil Surgeon of Ahmednagar inspected the dispensary. The total cost was Rs. 847-14-2 and the cost per patient Re. 0-4-10 against Rs. 1,152-15-8 and Re. 0-3-8 in 1897 and Rs. 765-12-2 and Re. 0-3-10 in 1896, respectively. Rs. 18-7-0 were hospital stoppages, as compared with Rs. 22-13-0 in 1897 and Rs. 17-15-0 in 1896.

MIRAJGAON.—*In charge of* First Class Hospital Assistant ANAJI PANDURANG, No. 93.

The dispensary building is situated on an open and healthy place in the mouth of the town and kept in good repair. Furniture and fittings are sufficient. Conservancy arrangements are defective, as there is no municipality. The water-supply from wells is used only for washing clothes and that for drinking purposes from pits dug in the Dukri river situated to the south of the villages. The health of the town was fairly good during the three years. The

town was free from cholera and plague in 1896-97-98. The total treated was 3,907 out-door and 16 in-door against 3,365 out-door and 15 in-door in 1897 and 4,030 out-door and 11 in-door in 1896. The prevailing diseases were ascaris lumbricoides, conjunctivitis, ague, and skin diseases. There were 236 surgical operations against 188 in 1897 and 187 in 1896. Nine *post-mortem* examinations were held in 1898 and 4 each in 1897 and 1896. Vaccination is performed by the táluka vaccinator. The dispensary committee visited the dispensary four times. The Civil Surgeon of Ahmednagar inspected the dispensary once in each year. The total cost was Rs. 1,360-8-9 and the cost per patient Re. 0-5-7, as compared with Rs. 1,215-8-9 and Re. 0-5-9 in 1897 and Rs. 962-3-1 and Re. 0-3-10 in 1896, respectively. Rs. 14-14-0 were hospital stoppages against Rs 24-0-0 in 1897 and Rs. 28-13-0 in 1896.

NA'SIK COLLECTORATE.

HARRIS HOSPITAL, NA'SIK.—*In charge of* Major C. G. W. LOWDELL, I.M.S., up to 24th February 1898, of Dr. E. MAYNARD till 22nd November, and afterwards of Captain C. T. HUDSON, I.M.S.

Population.—24,406 according to the census of 1891.

Conservancy—Is well cared for by the municipality and is under the direct care and supervision of the Municipal Health Officer, Mr. Cabral. This gentleman is most diligent, hard-working and painstaking, and deserves commendation for the thorough manner in which all the conservancy arrangements were looked after during the years 1896, 1897 and 1898, particularly as he had a severe epidemic of cholera and famine in 1897 and plague in 1897 and 1898 to contend with.

Drainage.—Bad. During 1896 a new drain flushed by a well at the head was built along the river bank to receive the contents of the town drains. These drains are of stone and in very bad repair, and not only do they permit soakage into the soil but get blocked and overflow in the rainy season. A drainage scheme was sketched out in 1896, but remains in abeyance for want of funds.

Sanitation.—The conversion of night-soil into poudrette has proved satisfactory and is still carried out. The public latrines have been greatly improved during the last three years, and the greater number have now impervious floors and cesspools.

Water-supply—Is bad and quite insufficient. There has been no change in this respect during these three years. The sources of water are the river Godavery, wells and the river Nasurdi. All are more or less liable to pollution and contamination. Here again a scheme has been drawn up, and during 1897 a bund was partly built for forming a tank at Wasali by damming up the Nasurdi. This was undertaken as a famine relief work and has now been dropped for want of funds.

Hospital Buildings.—No change during the years under report, but a new operation room has been sanctioned and will very shortly be built. Additions and improvements to the Hospital Assistants' quarters have also been sanctioned and will be carried out immediately.

General Health.—The Sinhast year commenced in August 1896 and lasted till September 1897. In the former year the general health was good. There was neither cholera nor plague. The year 1897 was unlucky, in so much as there was famine, cholera and plague to contend against. This latter continued throughout 1898 but was not severe, there being only 9 cases between August and the end of the year. There was no famine and no epidemic of cholera during 1898.

Prevailing Diseases.—Malarial fevers, worms, diseases of the digestive and respiratory system and diarrhœa.

Surgical Operations.—There were 337 surgical operations against 303 in 1897 and 743 in 1896. Operations for stone in the bladder were the most common operations and are now almost entirely confined to litholapaxy.

Mortality.—There were 48 deaths or 6·1 per cent. of the total in-door patients, as compared with 225 deaths or 22·6 per cent. in 1897 and 101 deaths or 12·5 per cent. in 1896. The chief causes were cholera, dysentery, diarrhœa and plague.

Attendance of patients.—783 in-door and 5,825 out-door patients, as compared with 996 in-door and 6,108 out-door in 1897 and 805 in-door and 10,315 out-door in 1896.

Medico-legal cases.—17 *post-mortem* examinations were held, and opinion was given in 21 medico-legal cases, as compared with 19 and 39 in 1897 and 17 and 47 in 1896, respectively.

Vaccination.—710 primary and 3 secondary vaccinations, against 785 and 55 in 1897 and 843 and 48 in 1896, respectively.

Hospital stoppages—Are only collected from those who live outside municipal limits. They amounted to Rs. 5-11-0 in 1898, Rs. 12-8-0 in 1897, and Rs. 7-0-0 in 1896.

Conduct of establishment.—First Class Hospital Assistant Shaik Surfraz Hakim, No. 59, has given complete satisfaction throughout the whole period. The conduct of the rest of the establishment has, on the whole, been good.

Cost.—The total cost was Rs. 3,920-14-11 and the cost per patient Re. 0-9-6, as compared with Rs. 4,253-9-9 and Re. 0-9-7 in 1897 and Rs. 3,648-1-9 and Re. 0-5-3 in 1896, respectively.

MUNICIPAL DISPENSARIES.

MALEGAON.—*In charge of* Assistant Surgeon T. C. KHANDVALA.

The dispensary building, though unsuitable for the purpose, is in good repair. There are no quarters for the medical officer and second class servants. The dispensary committee visited the dispensary seven times. The town has no cess-pits. There are a very few privies, which are cleaned daily. Most of the inhabitants resort to open fields for the purposes of nature. There are two depôts, where the night-soil is heaped up daily and covered with earth and ashes to convert it into poudrette, which is sold annually by auction. The water-supply is got from the river Mosum and wells, that of the former being liable to pollution. There were 21 in-door and 14,721 out-door patients treated, against 31 in-door and 18,286 out-door in 1897 and 27 in-door and 21,640 out-door in 1896. The prevailing diseases were malarial fevers and diseases of the eye, skin and digestive and respiratory system. Plague broke out from 11th November 1897 to 14th March 1898, returning 408 cases with 324 deaths. There were 626 surgical operations, against 475 in 1897 and 767 in 1896. Opinion was given in 62 medico-legal cases and 6 *post-mortem* examinations were held, as compared with 128 and 9 in 1897 and 77 and 8 in 1896, respectively. Vaccination is carried out by a municipal vaccinator. The dispensary was inspected once by the Sanitary Commissioner for the Government of Bombay, the Civil Surgeon of Násik, and the Deputy Sanitary Commissioner, W. R. D. The total cost was Rs. 2,567-3-10 and the cost per patient Re. 0-2-9, against Rs. 3,070-15-4 and Re. 0-2-8 in 1897 and Rs. 3,996-10-2 and Re. 0-2-11 in 1896, respectively. Rs. 29-15-0 were hospital stoppages, as compared with Rs. 78-5-0 in 1897 and Rs. 111-15-0 in 1896.

YEOLA.—*In charge of* First Class Hospital Assistant SHAIKH AHMED PATEL, No. 56.

The buildings are in a fair state of repair. Quarters for servants, a store-room, and a compound wall have been erected. Furniture and fittings are sufficient. The dispensary committee visited the dispensary five times, as compared with nine times in 1897 and thrice in 1896. The sanitary condition of the town has not been improved. Drainage and male latrines are long-felt wants. The water-supply from wells is scanty in the hot season. The works for an ample and good supply of water are still being constructed by the Public Works Department at the cost of the municipality. The general health of the town was fair. The total treated was 10,120 out-door and 50 in-door patients, as compared with 7,240 and 66 in 1897 and 11,018 and 78 in 1896, respectively. The most common diseases were opthalmia, skin diseases, worms, malarial fevers, and respiratory, rheumatic and ear affections. Cholera prevailed in four villages of the táluka in 1896 and in six villages in 1897. Small-pox prevailed in the town as well as in the táluka in 1898 and 1897. Three cases of plague occurred in the observation camp amongst arrivals from Vinchur and were treated at the Plague Hospital during the month of August 1898; no local cases in the town have been reported, but seven villages in the táluka furnished 2 imported and 67 local cases with 49 deaths from August till December, against 6 imported cases with 6 deaths in five villages in 1897. There were 771 surgical operations performed against 624 and 714, respectively, in the two previous years. The municipal vaccinator vaccinated 566 children during the year, against 676 in 1897 and 761 in 1896. There were 26 *post-mortem* examinations held, and opinion was given in 52 medico-legal cases, against 14 and 28 in 1897 and 4 and 31 in 1896, respectively. The dispensary was inspected by the Civil Surgeon, Násik, once annually. The total cost was Rs. 1,686-7-5 and the cost per patient Re. 0-2-8, against Rs. 3,726-13-7 and Re. 0-8-2 in 1897 and Rs. 1,436-4-0 and Re. 0-2-1 in 1896, respectively. The amount realized on account of hospital stoppages was Rs. 61-5-0, as compared with Rs. 82-0-0 in 1897 and Rs. 62-2-0 in 1896.

GRANT-IN-AID DISPENSARIES.

DINDORI.—*In charge of* Second Class Hospital Assistant SAMSON REUBEN, No. 176.

The building is in good repair. The work of enlarging the verandah to the east side of it has been completed by the Public Works Department. Second class servants live in a hired house near the dispensary. The dispensary committee held their meetings four times and individual members visited the dispensary often. The sanitary condition of the town is fair. The water-supply from wells is good and ample. The total treated was 4,170 out-door and 11 in-door patients, as compared with 4,005 and 16 in 1897 and 5,886 and 11 in 1896, respectively. The prevailing diseases were malarial fevers, intestinal worms, and diseases of the eye, digestive system and skin. There was no epidemic of any kind in the town or its vicinity in 1898, except that cholera prevailed to a slight extent in the surrounding villages in 1897 and 1896. Vaccination is performed by the táluka vaccinator. There were 5 *post-mortem* examinations performed, against 4 in 1897 and 9 in 1896. Opinion was given in 3 medico-legal cases, against 9 in 1897 and 16 in 1896. The dispensary was inspected by the Civil Surgeon, Násik, once in each year, and was visited by the District Officers while on tour in the táluka. The amount realized under the hospital stoppage rules was Rs. 8-5-0, as compared with Rs. 5-8-0 in 1897 and Rs. 8-14-0 in 1896. The total cost was Rs. 1,162-6-0 and the cost per patient Re. 0-4-5 in 1898, against Rs. 1,167-2-10 and Re. 0-4-8 in 1897 and Rs. 1,003-6-3 and Re. 0-2-9 in 1896, respectively.

SINNAR.—*In charge of* Third Class Hospital Assistant GUFFURKHAN BAHADURKHAN, No. 329.

There has been no change in the dispensary building. It leaks in the rainy season, and special repairs are therefore desirable. A cook-room and a bath-room for in-door patients are

much needed. Furniture and fittings are not sufficient. The dispensary committee visited the dispensary every third month. The conservancy of the town is fair, and the water-supply from rivulets and wells good and abundant. The total treated was 113 in-door and 6,909 out-door patients, as compared with 78 in-door and 6,983 out-door in 1897 and 30 in-door and 11,342 out-door in 1896. Malarial fevers, eye and skin affections, worms and bowel complaints were the most common diseases. Plague broke out in Sinnar and its vicinity from October 1897 to April 1898, giving 112 cases. There were 156 surgical operations performed, against 294 in 1897 and 331 in 1896. Two *post-mortem* examinations were performed, as compared with 7 in 1897 and 5 in 1896. Medico-legal cases numbered 31, against 37 in 1897 and 25 in 1896. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon and the Collector of Násik. The total cost was Rs. 916-11-1 and the cost per patient Re. 0-2-1, against Rs. 1,512-9-9 and Re. 0-3-5 in 1897 and Rs. 1,517-0-9 and Re. 0-2-2 in 1896, respectively. Rs. 34-15-0 were hospital stoppages, as compared with Rs. 57-13-0 in 1897 and Rs. 61-12-0 in 1896.

SÁTANA.—*In charge of* Third Class Hospital Assistant KASHINATH ANANT, No. 252.

The dispensary building is convenient. There is accommodation for 8 in-door patients (4 males and 4 females). Quarters for the Hospital Assistant and establishment have been completed and occupied. A shed for cholera patients is urgently wanted. The committee visited the dispensary four times in each year. Sanitation of the town is fair. Water-supply is good and sufficient, but the people foul it by washing their cattle and clothes in the upper part of the river. The total treated was 22 in-door and 4,992 out-door patients, against 38 in-door and 5,584 out-door in 1897 and 32 in-door and 6,921 out-door in 1896. The most common complaints were worms and diseases of the eye, digestive system and skin. No epidemic during the three years. 337 surgical operations were performed, as compared with 326 in 1897 and 414 in 1896. Vaccination is carried on by the táluka vaccinator. Five *post-mortem* examinations were held, as compared with 3 in 1897 and 4 in 1896. Opinion was given in 10 medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in 1896 and 1898, and by the Sanitary Commissioner for the Government of Bombay in 1896. The total cost was Rs. 783-15-1, against Rs. 948-4-5 in 1897 and Rs. 895-0-10 in 1896. The cost per patient was Re. 0-2-6, against Re. 0-2-8 in 1897 and Re. 0-2-1 in 1896. Rs. 23-2-0 were realized as hospital stoppages, against Rs. 26-10-0 in 1897 and Rs. 26-13-0 in 1896.

PIMPALGAON BASVANT.—*In charge of* Third Class Hospital Assistant DATTATRAYA RAMCHANDRA, No. 255.

The dispensary building is in good repair. Furniture and fittings are insufficient. An operating table, cots and chairs are much needed. The dispensary committee met once. The conservancy of the town is not satisfactory. The water-supply from the river Parashari and a few wells is liable to pollution. Plague broke out in January and February 1898. There were 6 in-door and 3,004 out-door patients treated, as compared with 6 and 3,571 in 1897 and 28 and 9,449 in 1896, respectively. Malarial fevers and diseases of the eye, skin and respiratory and digestive systems were the most common complaints. 71 surgical operations were performed, against 113 in 1897 and 124 in 1896. There were 4 *post-mortem* examinations held and 2 medico-legal cases certified, against 7 and 2 in 1897 and 1 and 3 in 1896, respectively. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Násik and the Deputy Sanitary Commissioner, Western Registration District. The total cost was Rs. 1,003-14-2 and the cost per patient Re. 0-5-4, as compared with Rs. 1,306-13-6 and Re. 0-5-10 in 1897 and Rs. 1,444-9-4 and Re. 0-2-5 in 1896, respectively. Rs. 4-13-0 were taken as hospital stoppages, against Rs. 8-8-0 in 1897 and Rs 11-0-0 in 1896. The dispensary was closed for 5 months of the year 1898 owing to the Hospital Assistant in charge having been ordered on plague duty.

TRIMBAK.—*In charge of* Second Class Hospital Assistant SHIVARAM SHRIDHAR, No. 210.

No repairs were made to the dispensary buildings during the year 1898. Furniture and fittings are sufficient. A dead-house, a cook-room, a cholera shed and wire fencing to the compound are necessary. The town is extremely dirty, and the sanitary arrangements of the town are not satisfactory. Water-supply from Visoba's tank and Ketki well is good and sufficient. Cholera gave 87 cases in 1897 and 46 in 1896. Plague broke out in Trimbak during the months from January to April and September and October 1898. In all there were 82 cases with 62 deaths. There were two imported cases in 1897. The total treated was 1,547 out-door and 33 in-door patients, against 2,079 and 9 in 1897 and 3,332 and 14 in 1896, respectively. The most common diseases were intestinal worms, malarial fevers, ophthalmia and diseases of the digestive and respiratory systems. 60 surgical operations were performed, against 50 in 1897 and 103 in 1896. The dispensary was inspected by the Civil Surgeon, Násik. The dispensary committee visited the dispensary thrice. Vaccination is carried on by the Local Fund vaccinator. The total cost was Rs. 593-4-2 and the cost per patient Re. 0-6-0, against Rs. 1,538-6-10 and Re. 0-11-9 in 1897 and Rs. 784-15-11 and Re. 0-3-9 in 1896. Hospital stoppages amounted to Re. 1-10-0, as compared with Rs. 13-1-0 in 1897 and Rs. 8-13-0 in 1896.

KALWAN.—*In charge of* Second Class Hospital Assistant KRISHNAJI LUXMON, No. 140.

The dispensary building is in good repair. Furniture and fittings are in good order and sufficient. A room for surgical operations and for private examination of patients, quarters for second class servants and a cook-room for in-door patients for cooking are badly wanted. Steps are being taken to supply the last two wants. The dispensary was visited by the dispensary committee every month. The sanitation of the town is fair. Water-supply is chiefly from the river which is close to the town: it is good and sufficient. The total number of patients treated was 5 in-door and 3,142 out-door, against 10 and 3,890 in 1897 and 24 and 4,638 in 1896, respectively. Malarious fevers, intestinal worms, diseases of the eye, respiratory and digestive systems and skin and local injuries were the most common diseases. There were 116 surgical operations performed, as compared with 113 in 1897 and 252 in 1896. Two *post-mortem* examinations were held, against 4 in 1897 and 6 in 1896. Opinion was given in 3 medico-legal cases. Vaccination is performed by the táluka vaccinator. The amount realized under hospital stoppage rules was Rs. 23-12-0, against Rs. 47-1-0 in 1897 and Rs. 37-9-0 in 1896. The total cost was Rs. 904-2-4, against Rs. 1,063-4-11 in 1897 and Rs. 1,256-0-2 in 1896, the cost per patient being Re. 0-4-7, Re. 0-4-4 and Re. 0-4-4, respectively.

NIPHA'D.—*In charge of* First Class Hospital Assistant VASUDEV BALKRISHNA, No. 69.

The dispensary was opened on 1st July 1895. The building and out-houses are in a good state of repair. Furniture and fittings are sufficient and in good order. The committee visited the dispensary five times in 1898 and 1896 and once in 1897. The sanitation of the town is defective. The supply of water is chiefly from the river Wanita, and admits of soakage during the hot season. The total treated was 2,156 out-door and 7 in-door patients, against 3,300 and 30 in 1897 and 4,596 and 25 in 1896, respectively. The prevailing diseases were malarial fevers, worms and diseases of the eye, respiratory system and skin. There were 40 surgical operations performed, against 48 in 1897 and 115 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Násik, once in each year, and by the Deputy Sanitary Commissioner, Western Registration District, in 1897 and 1896. The fees under the hospital stoppage rules amounted to Re. 1-6-0, against Rs. 3-5-0 in 1897 and Rs. 15-2-0 in 1896. The total cost was Rs. 1,210-5-8 and the cost per patient Re. 0-8-11, as compared with Rs. 1,403-7-7 and Re. 0-6-9 in 1897 and Rs. 1,265-15-7 and Re. 0-4-5 in 1896, respectively.

CHA'NDOR.—*In charge of* Third Class Hospital Assistant BHASKAR SHRIPAT, No. 292.

The dispensary was opened on 15th March 1896. The building is in a fair state of repair. A well in the dispensary compound is required. The dispensary committee met nine times. Conservancy is looked after by the sanitary committee; the water-supply from wells is of fair quality and sufficient. There were 4,908 out-door patients treated, against 42 in-door and 6,966 out-door in 1897 and 32 in-door and 5,749 out-door in 1896. The prevailing diseases were malarial fevers, worms, and eye and respiratory affections. Surgical operations numbered 66, against 199 in 1897 and 188 in 1896. There were 5 *post-mortem* examinations held, as compared with 4 in 1897 and 2 in 1896. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon of Násik and by the Deputy Sanitary Commissioner, Western Registration District. The total cost was Rs. 966-6-9 and the cost per patient Re. 0-3-2, against Rs. 1,573-3-11 and Re. 0-3-7 in 1897 and Rs. 1,286-3-1 and Re. 0-3-7 in 1896, respectively. Hospital stoppages amounted to Rs. 3-3-0, as compared with Rs. 3-12-0 in 1897 and Rs. 14-6-0 in 1896.

IGATPURI.—*In charge of* Dr. J. O. PIRES.

This is a G. I. P. Railway Dispensary to which a grant is annually given by Government for the treatment of patients in Igatpuri and its vicinity. Conservancy of the town is well attended to, and the water-supply from the Railway water-works is sufficient. There were 11 in-door and 2,468 out-door patients treated, against 13 in-door and 2,754 out-door in 1897 and 17 in-door and 3,597 out-door in 1896. The most common diseases were malarial fevers, bowel complaints and respiratory affections. Small-pox and chicken-pox prevailed to a great extent in the town and its vicinity. There were 5 surgical operations performed. The dispensary was inspected by the Superintending Surgeon of the G. I. P. Railway Company. The total cost was Rs. 122-0-0 and the cost per patient Re. 0-0-9 in 1898.

GOVERNMENT DISPENSARY.

PEINT.—*In charge of* Second Class Hospital Assistant BALAJI KUSHABA, No. 116.

The dispensary building is situated in the centre of the town and kept in good repair. Quarters for second class servants and a contagious ward are much needed; also the dead-house should be so enclosed as to prevent people from seeing what takes place in it. Furniture and fittings are sufficient. The dispensary committee visited the dispensary once, and the chairman five times. The sanitary state of the town is not good. There is neither a municipality nor a Sanitary Board here. The water-supply from wells and a small spring is inferior and deficient in the hot season. Surgical operations numbered 65, against 79 in 1897 and 70 in 1896. There were 15 *post-mortem* examinations held in 1898 and 4 each in 1897 and 1896.

Opinion was given in 3 medico-legal cases, as compared with 16 in 1897 and 3 in 1896. The total treated was 40 in-door and 2,696 out-door patients, against 32 and 3,285 in 1897 and 41 and 4,480 in 1896, respectively. The prevailing diseases were malarial fevers, ascaris lumbricoides, eye, skin and respiratory affections and bowel complaints. Vaccination is carried out by the táluka vaccinator appointed by the Sanitary Department. The dispensary was inspected by the Civil Surgeon of Násik. The total cost was Rs. 817-9-10 and the cost per patient Re. 0-4-9, as compared with Rs 1,015-7-5 and Re. 0-4-11 in 1897 and Rs 868-14-2 and Re. 0-3-1 in 1896, respectively. Hospital stoppages yielded Re. 0-3-0, against Re. 1-4-0 in each of the years 1897 and 1896. The dispensary was closed for 3 months during the year 1898.

KHA'NDESH COLLECTORATE.

CIVIL HOSPITAL, DHULIA.—*In charge of* Lieutenant-Colonel K. A. DALAL, M.B., C.M.

Conservancy.—During the last few years the conservancy of the town has been much improved, but a great deal still requires to be done. There are 17 public latrines. The number is still insufficient. There are several dust-bins erected at different places. The night-soil is buried in trenches in a field on the east side and at a distance of about 2 miles from the town.

Water-supply.—The Dhulia municipal water-works at Dedargaum are completed, and the water is laid on in the town. Hydrants are put at different places in the town, and thus the people of Dhulia enjoy the benefits of pure and plentiful water. Some people still use well and river water. Almost all the wells in Dhulia allow of soakage. The river water is contaminated by people obeying the calls of nature on its banks, washing their clothes and watering their cattle. The drainage works in connection with the water-works are not taken in hand as yet.

Hospital buildings—Are in very good order. Quarters for the Hospital Assistant were finished in the year 1896.

General health.—During the last 3 years was fairly good. Luckily Dhulia has so far escaped plague, though it was prevalent in the neighbourhood, especially at Málegaon and Jalgaon, in 1897 and 1898. Cholera was prevalent in the months of July, August and September 1897, and small-pox from February to June 1896.

Attendance of patients.—There were 609 in-door and 4,686 out-door patients, as compared with 561 in-door and 3,829 out-door in 1897 and 540 in-door and 4,887 out-door in 1896. The Civil Hospital being situated far from the town, many out-patients go to the municipal dispensary, which is very conveniently situated.

Prevailing diseases.—Ague, conjunctivitis, constipation, bronchitis, intestinal worms, rheumatism, dysentery, diarrhœa and vesical calculus.

Mortality and its causes.—There were 25 deaths against 72 in 1897 and 44 in 1896. The excessive mortality in 1897 was due to famine and cholera.

Surgical Operations.—411 as compared with 370 in 1897 and 353 in 1896.

Vaccination—Is carried on by the municipal vaccinator.

Conduct of the Establishment.—Fairly good. First Class Hospital Assistant Hari Kakáji, No. 50, and Third Class Hospital Assistant Murshadali Wahedali, No. 336, are zealous and efficient, and their general conduct is good.

Cost.—The total cost was Rs. 3,565-3-8 and the cost per patient Re. 0-10-9 against Rs. 3,777-9-9 and Re. 0-13-9 in 1897 and Rs. 3,831-6-1 and Re. 0-11-4 in 1896, respectively.

Hospital stoppages—Amounted to Rs. 146-4-0 as compared with Rs. 142-13-0 in 1897 and Rs. 94-4-0 in 1896.

MUNICIPAL DISPENSARIES.

DHULIA BRANCH DISPENSARY.—*In charge of* Mr. BABU SEETAL SINGH.

The dispensary building is in good repair, but requires to be enlarged to make it more commodious, considering the steadily increasing number of patients. Furniture and fittings are sufficient and in good order. The dispensary committee visited four times. Conservancy is well attended to. The water-supply from the Dedargaon water-works is good and abundant. There were 13,219 out-door patients treated against 13,823 in 1897 and 14,781 in 1896. The most common diseases were malarial fevers, worms, dysentery and eye, respiratory and skin affections. There were 423 surgical operations performed as compared with 544 in 1897 and 403 in 1896. Vaccination is performed by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon of Dhulia. The total cost was Rs. 2,054-7-1 and the cost per patient Re. 0-2-6 as compared with Rs. 1,945-13-4 and Re. 0-2-3 in 1897 and Rs. 1,820-5-8 and Re. 0-2-0 in 1896, respectively.

THE SUNDERDAS MULJI DISPENSARY, JALGAON.—*In charge of* Second Class Hospital Assistant SUKHARAM LUXIMON, No. 112.

The dispensary buildings are in a fair state of repair and the furniture and fittings in good order. The gates of the compound, however, require immediate repair. The dispensary committee visited the dispensary five times every year. The conservancy and sanitary arrengements are fairly carried out by the municipality. The water-supply is chiefly derived from the Meherun tank, which generally fails during the hot season; that from wells is liable to contamination. The scheme for improving the water-supply is still under consideration. The total treated was 69 in-door and 5,151 out-door patients as compared with 117 and 5,885 in 1897, and 119 and 6,261 in 1896, respectively. The prevailing diseases were malarious fevers, intestinal worms, rheumatic affections, conjunctivitis, bronchitis, colic, constipation, eczema and scabies. Plague was prevalent in the town during the months of January and February 1898, giving 52 attacks with 49 deaths as compared with 62 attacks and 52 deaths in the previous year. Cholera and small-pox prevailed in 1896 and 1897. Plague made its first appearance on the 23rd of November 1897. There were 145 surgical operations performed as compared with 193 in 1897 and 211 in 1896. Vaccination is carried on by the táluka vaccinator. Twelve *post-mqrtem* examinations were performed in 1898 against 16 in 1897 and 6 in 1896. The dispensary has been inspected every year by the Civil Surgeon, Dhulia, and also by the Sanitary Commissioner for the Government of Bombay and the Deputy Sanitary Commissioner, while on tour. The total cost was Rs. 1,668-6-0 and the cost per patient Re. 0-5-1 as compared with Rs. 4,408-8-10 and Re. 0-11-9 in 1897 and Rs. 4,967-5-5 and Re. 0-12-5 in 1896, respectively. Hospital stoppages amounted to Rs. 57-9-0 against Rs. 314-5-0 in 1897 and Rs. 308-4-0 in 1896.

GRANT-IN-AID DISPENSARIES.

PAROLA.—*In charge of* First Class Hospital Assistant BUSVANT SINGH CHATUR SINGH, No. 52.

The dispensary buildings are in a fair repair; quarters for Hospital Assistant and servants are provided. Furniture and fittings are sufficient and in good order, except an operating table which is required. The committee visited the dispensary six times against four times in 1897 and five times in 1896. The conservancy and sanitary arrangements are satisfactory. Water-supply from wells is good and abundant, except in the hot season. The total treated was 7,956 out-door and 28 in-door patients as compared with 7,807 and 26 in 1897 and 7,709 and 24 in 1896 respectively. The prevailing diseases were malarial fevers, intestinal worms, conjunctivitis, inflammation of the external ear, diseases of the digestive and respiratory system, ulcers and skin diseases. Cholera broke out from July to September 1897 and small-pox in 1896 and 1898. There were 263 surgical operations performed against 464 in 1897 and 488 in 1896. Six *post-mortem* examinations were held and opinion was given in several medico-legal cases. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon of Dhulia once annually. The total cost was Rs. 1,498-1-2 and the cost per patient Re. 0-3-0 against Rs. 2,167-10-5 and Re. 0-4-5 in 1897 and Rs. 1,491-9-3 and Re. 0-3-1 in 1896, respectively. Rs. 56-6-0 were collected under the hospital stoppage rules as compared with Rs. 53-2-0 in 1897 and Rs. 42-14-0 in 1896.

ERANDOL.—*In charge of* First Class Hospital Assistant MULHAR SITARAM, No. 41.

The dispensary building is in good repair. Quarters for the second class establishment are urgently wanted. The dispensary committee visited the dispensary three times against eight times in 1897 and six times in 1896. The sanitary condition of the town is very unsatisfactory. The water-supply is got from wells and the river Anjuni; the well water is generally brackish, and the river water, though good, is liable to pollution owing to the washing of dirty clothes by people and the flowing of municipal sewage into it. The river passes through the heart of the town, and the municipality does not even keep its banks clean. The total treated was 34 in-door and 6,212 out-door patients as compared with 19 and 5,807 in 1897 and 8 and 5,676 in 1896, respectively. The prevailing diseases were malarial fevers, ophthalmia, inflammation of the external ear, rheumatic affections, diseases of the digestive system and skin and local injuries. There were performed 143 surgical operations as compared with 200 in 1897, and 241 in 1896. Six *post-mortem* examinations were held against 6 in 1897 and 4 in 1896. Opinion was given in 6 medico-legal cases against 11 in 1897 and 2 in 1896. The dispensary was inspected by the Civil Surgeon, Dhulia, once in each year. Vaccination is performed by the Táluka Local Fund vaccinator. The total cost was Rs. 1,303-1-4 and the cost per patient Re. 0-3-4 against Rs. 1,441-13-7 and Re. 0-4-0 in 1897 and Rs. 1,799-3-11 and Re. 0-5-1 in 1896, respectively. The fees under hospital stoppage rules amounted to Rs. 29-6-0 as compared with Rs. 9-15-0 in 1897 and Rs. 16-11-0 in 1896

CHOPDA.—*In charge of* First Class Hospital Assistant GANGADEEN, No. 22.

The building is spacious and in good order. The members of the committee visited the dispensary regularly. The sanitary condition and water-supply of the town have been good The total treated during the year was 6,764 out-door and 15 in-door patients against 7,178 and 9 in 1897 and 7,942 and 8 in 1896, respectively. The most common diseases were malarial fevers, conjunctivitis and syphilitic, rheumatic, skin and chest affections. There were 54 cases of cholera with 15 deaths in 1897. Surgical operations numbered 85 against 90 in

1897 and 165 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Dhulia, annually. The total cost was Rs. 1,473-0-6 and the cost per patient Re. 0-3-6 against Rs. 1,393-15-1 and Re. 0-3-1 in 1897 and Rs. 1,082-12-0 and Re. 0-2-2 in 1896, respectively. The income from hospital stoppages amounted to Rs. 70-15-0 against Rs. 42-4-0 in 1897 and Rs. 58-11-0 in 1896.

NANDURBA'R.—*In charge of* Third Class Hospital Assistant YESHWANT SHRIDHAR SHIDHAYE, No. 231.

The dispensary has been removed since 8th August 1898 to the present hired building, which is not suitable for the purpose. It has no proper accommodation for in-patients; a new dispensary building is very desirable. Furniture and fittings are not sufficient. The sanitation and conservancy of the town are not satisfactory. The water-supply from wells is bad and insufficient. The general health of the town was fair. There was no epidemic. The total number of patients treated was 3,627 out-door and 6 in-door against 5,161 out-door and 7 in-door in 1897 and 7,362 out-door in 1896. The most common diseases were malarial fevers, intestinal worms, diseases of the digestive system and skin, eye, rheumatic and respiratory affections. There were 112 surgical operations performed against 255 in 1897 and 326 in 1896. Vaccination is carried on by the táluka vaccinator. The total amount of fees received on account of hospital stoppages was Rs. 30-10-0 against Rs. 27-8-0 in 1897 and Rs. 5 in 1896. The total cost was Rs. 906-12-10 and the cost per patient Re. 0-4-0 against Rs. 1,080-11-2 and Re. 0-3-4 in 1897 and Rs. 1,503-14-7 and Re. 0-3-3 in 1896, respectively. The dispensary committee visited the dispensary thrice. There were 3 *post-mortem* examinations against 6 in 1897 and 5 in 1896.

SHIRPUR.—*In charge of* Second Class Hospital Assistant RAMCHANDRA VISHNU, No. 156.

The dispensary building and the out-houses are in good order. The furniture and fittings are sufficient and in good order. The dispensary committee visited the dispensary regularly once a month. The prevailing diseases were malarial fevers, conjunctivitis, bronchitis, constipation and skin diseases. Cholera broke out in the town and its surrounding villages in 1897. Small-pox prevailed every year in the táluka, and in the town to a small extent in 1897 only. The dispensary was inspected by the Civil Surgeon, Dhulia, every year. The total number treated was 3,336 out-door and 20 in-door patients against 3,934 and 19 in 1897 and 4,521 and 25 in 1896, respectively. The sanitary and conservancy arrangements of the town are good. The water-supply from wells is good and abundant. There were 104 surgical operations performed as compared with 118 and 212 in 1897 and 1896, respectively. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made against 2 in 1897. Opinion was given in 31 medico-legal cases against 13 in 1897 and 12 in 1896. The total cost was Rs. 1,104-5-5 and the cost per patient Re. 0-5-3 against Rs. 1,007-4-8 and Re. 0-4-1 in 1897 and Rs. 1,102-0-7 and Re. 0-3-11 in 1896, respectively. The fees realized on account of hospital stoppages amounted to Rs. 38-3-0 as compared with Rs. 29-15-0 in 1897 and Rs. 32-4-0 in 1896.

BHADGAON.—*In charge of* First Class Hospital Assistant GANGADHAR RAMKRISHNA, No. 89.

The dispensary building is in a good state of repair. The furniture and fittings are sufficient. The committee visited the dispensary five times in 1898 against six times in 1897 and ten times in 1896. Conservancy is well attended to. Water-supply from wells is impure and allows of soakage; that from the river Girna good, but liable to contamination. The total treated was 3,676 out-door and 2 in-door patients as compared with 4,124 and 10 in 1897 and 4,766 and 7 in 1896, respectively. The prevailing diseases were ague, worms, conjunctivitis diseases of the ear, digestive system and skin and local injuries. There were 190 surgical operations performed against 209 in 1897 and 242 in 1896. Six *post-mortem* examinations were held. Vaccination is carried on by the petha vaccinator. The dispensary was inspected by the Civil Surgeon, Dhulia, once in each year. The total cost was Rs. 1,054-4-4 and the cost per patient Re. 0-4-7 against Rs. 1,120-6-11 and Re. 0-4-4 in 1897 and Rs. 1,268-6-6 and Re. 0-4-3 in 1896, respectively. Fees from hospital stoppages amounted to Rs. 3-10-0 as compared with Rs. 12-5-0 in 1897 and Rs. 6-3-0 in 1896.

PIMPALNER.—*In charge of* Second Class Hospital Assistant RAMCHANDRA GANGADHAR KALE, No. 151.

The dispensary building is in good repair. Quarters for second class servants and a latrine for in-patients are much needed. Furniture and fittings are sufficient. The dispensary committee visited the dispensary twelve times in each year. There were 19 in-door and 3,817 out-door patients treated, as compared with 18 in-door and 3,452 out-door in 1897 and 21 in-door and 3,733 out-door in 1896. Malarial fevers, intestinal worms, diseases of the digestive and respiratory system, eye and spleen, rheumatic affections, dyspepsia and local injuries prevailed as usual. In the year 1897, cholera broke out in the táluka during August and September. Small-pox prevailed in the town and neighbouring villages from February to May and September, and a few cases of measles and chicken-pox occurred in April and May 1896. The dispensary was inspected by the Civil Surgeon, Dhulia. The sanitary condition of the town is unsatisfactory. There is no municipality. People use the banks of the river, the river-bed or any available corner of the town for the calls of nature. Many drains flow freely from the houses on the roads

and lanes. Excreta from the cattle and other rubbish are stored in the compounds of houses. There is one sweeper maintained by the town-people. The water-supply from wells and the river Panzru is good and abundant. Some wells allow of soakage. The river water is liable to contamination. There were 247 surgical operations performed, as compared with 184 in 1897 and 157 in 1896. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were performed during the year, as compared with 7 in 1897 and 1 in 1896. The total cost was Rs. 1,307-0-5 and the cost per patient Re. 0-5-0, against Rs. 1,401-0-3 and Re. 0-6-6 in 1897 and Rs. 1,314-14-0 and Re. 0-5-7 in 1896, respectively. Hospital stoppages amounted to Rs. 18-2-0, against Rs. 12-6-0 in 1897 and Rs. 11-13-0 in 1896.

SHA'HA'DA.—*In charge of* Third Class Hospital Assistant KRISHNAJI VITHAL, No. 191.

The new dispensary building, which was occupied in 1895, is suitable. The committee visited the dispensary nine times. The sanitary condition of the town is fair, and the water-supply from the river Gomai sufficient, but liable to contamination. The total treated was 2,387 out-door and 9 in-door patients, against 2,794 and 6 in 1897 and 3,471 and 18 in 1896, respectively. The most common complaints were malarial fevers, worms, rheumatic affections, diseases of the eye, ear, respiratory and digestive system and skin and local injuries. Vaccination is conducted by the táluka vaccinator. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Dhulia, once in each year. The total cost was Rs. 888-3-9 and the cost per patient Re. 0-5-11, as compared with Rs. 832-15-6 and Re. 0-4-9 in 1897 and Rs. 946-5-11 and Re. 0-4-4 in 1896, respectively. Hospital stoppages amounted to Rs. 10-12-0, against Rs. 2-13-0 in 1897 and Rs. 4-8-0 in 1896.

TALODA.—*In charge of* Third Class Hospital Assistant SHANKAR GANGADHAR, No. 225.

The dispensary building is suitable. The committee visited the dispensary six times. Conservancy arrangements are well attended to by the municipality, and the town is always kept fairly clean. The water-supply from wells is sufficient and of a fair quality. The total number of patients treated was 2,372 out-door and 18 in-door, against 2,709 out-door and 16 in-door in 1897 and 2,299 out-door and 21 in-door in 1896. The prevailing diseases were malarial fevers and diseases of the digestive system, skin, eye and ear. There were 100 surgical operations performed in 1898, against 101 in 1897 and 85 in 1896. In 1897 seven cases of cholera with 4 deaths occurred in the town; 25 cases of cholera with 14 deaths and 152 cases of small-pox with 7 deaths occurred in the neighbouring villages of Taloda Táluka. In 1896 there were 2 cases of cholera in the town with one death, and one fatal case of cholera and 203 cases of small-pox with 6 deaths in the neighbouring villages. Vaccination is conducted by the táluka vaccinator. Ten *post-mortem* examinations were held in the year, against 6 in 1897 and one in 1896. The dispensary was inspected every year by the Civil Surgeon of Dhulia and the Deputy Collector, W. D. Khándesh. The total cost was Rs. 1,223-15-2 and the cost per patient was Re. 0-8-2, against Rs. 1,213-3-11 and Re. 0-7-1 in 1897 and Rs. 1,074-15-3 and Re. 0-7-5 in 1896, respectively. Rs. 16-7-0 were hospital stoppages, as compared with Rs. 15-13-0 in 1897 and Rs. 26-5-0 in 1896.

AMALNER.—*In charge of* Second Class Hospital Assistant HARI KHANDU, No. 124.

The building is suitable and is constructed according to the standard design. A large compounding table and shelves in the store-room are very badly required. The committee visited the dispensary twice. The sanitation of the town is generally good, excepting the latrine accommodation. The water-supply from the river is ample and good, but is deficient and inferior in the hot season. The total treated was 3,052 out-door and 18 in-door patients, as compared with 2,928 and 43 in 1897 and 4,488 and 28 in 1896, respectively. The most common diseases were malarial fevers, worms, diseases of the eye, ear, respiratory and digestive system and skin. 86 surgical operations were performed, against 101 in 1897 and 153 in 1896. Vaccination is carried out by the táluka vaccinator. One *post-mortem* examination was made, against 4 in 1897 and 2 in 1896. The dispensary was inspected by the Civil Surgeon, Dhulia. The total cost was Rs. 802-7-0 and the cost per patient Re. 0-4-2, as compared with Rs. 891-15-8 and Re. 0-4-10 in 1897 and Rs. 2,744-4-6 and Re. 0-9-9 in 1896, respectively. The amount realized under hospital stoppage rules was Rs. 5-13-0 in 1898, Rs. 12-8-0 in 1897 and Rs. 25-1-0 in 1896. The dispensary was closed during the last quarter of the calendar year 1898.

DHARANGAON.—*In charge of* Third Class Hospital Assistant ATMARAM BAPUJI, No. 230.

The dispensary buildings are very suitable, but they require repair. The female ward is yet to be built. A dead-house is badly wanted. The dispensary committee visited the dispensary five times in each year. The most common diseases were malarial fevers, worms, conjunctivitis, diseases of the digestive system and ulcers. In the year 1897 cholera broke out in the town, giving 113 cases with 77 deaths. There were 167 cases of small-pox with 38 deaths in 1896. The Civil Surgeon, Dhulia, inspected the dispensary once in each year. The sanitary condition of the town is unsatisfactory. Water-supply from wells is good; that from tanks is liable to pollution and emits an offensive smell during the hot season. There were 268 surgical operations performed, as compared with 243 in 1897 and 368 in 1896. Vaccination is well received by the people and is conducted by the táluka vaccinator. *Post-mortem* examinations numbered 4 each in 1898 and 1897, and 1 in 1896. The total treated was 6 in-door and 6,847 out-door patients,

as contrasted with 1 and 6,878 in 1897 and 6 and 8,161 in 1896, respectively. The total cost was Rs. 1,240-7-4 and the cost per patient Re. 0-2-11, against Rs. 1,007-10-0 and Re. 0-2-4 in 1897 and Rs. 1,088-11-5 and Re. 0-2-2 in 1896, respectively. The fees realized on account of hospital stoppages were Rs. 44-9-0, as compared with Rs. 16-2-0 in 1897 and Rs. 32-2-0 in 1896.

SINDKHEDA.—*In charge of* Second Class Hospital Assistant VISHNU SHIVARAM, No. 129.

The dispensary, a dhaba building, is in good repair. A dead-house with a dissecting table is required. The committee visited the dispensary five times. Conservancy of the town is not well attended to. The water-supply from the river Bordi is good, but liable to pollution; that from wells brackish. The total treated was 31 in-door and 2,255 out-door patients, as compared with 19 in-door and 2,091 out-door in 1897 and 22 in-door and 2,633 out-door in 1896. The prevailing diseases were malarial fevers, conjunctivitis, dyspepsia, and skin and bowel affections. Small-pox of a mild type prevailed in the táluka. There were 113 surgical operations performed, against 75 in 1897 and 80 in 1896. Vaccination is carried on by the táluka vaccinator. Five *post-mortem* examinations were held, against 7 in 1897 and 3 in 1896. Opinion was given in 4 medico-legal cases, against 10 in 1897 and 15 in 1896. The dispensary was inspected by the Civil Surgeon of Dhulia. The total cost was Rs. 1,259-5-3 and the cost per patient Re. 0-8-10, against Rs. 1,669-2-1 and Re. 0-12-8 in 1897 and Rs. 1,336-4-2 and Re. 0-8-1 in 1896, respectively. The hospital stoppages amounted to Rs. 15-3-0 as compared with Rs. 14-12-0 in 1897 and Rs. 13-5-0 in 1896.

NAVA'PUR.—*In charge of* Third Class Hospital Assistant RAJARAM DAMODAR, No. 172.

The dispensary building is not in a good state of repair. The committee visited the dispensary twelve times. There is neither a regular drainage system nor public latrines. The water-supply from the river in the vicinity of the town is plentiful. There were 201 in-door and 4,654 out-door patients treated, against 29 and 3,440 in 1897 and 4 and 3,265 in 1896, respectively. The increase in attendance over the previous years is due to the workmen belonging to the Tapti-Valley Railway seeking medical relief at the dispensary. The most common complaints were malarial fevers, local injuries, worms and diseases of eye and respiratory and digestive system. In the year 1896 cholera, small-pox and measles prevailed in the town and its vicinity. There were 26 surgical operations performed, against 29 in 1897 and 34 in 1896. *Post-mortem* examinations numbered 3, against 1 in 1897 and 2 in 1896. Opinion was given in 3 medico-legal cases in 1898 and 1897 each, and 2 in 1896. Vaccination is carried on by the Local Fund vaccinator. The Civil Surgeon of Dhulia inspected the dispensary once in each year. The total cost was Rs. 2,069-4-4 and the cost per patient Re. 0-6-10, against Rs. 1,307-15-6 and Re. 0-6-0 in 1897 and Rs. 1,129-13-0 and Re. 0-5-6 in 1896, respectively. The fees on account of hospital stoppages were Rs. 14-1-0, as compared with Rs. 27-13-0 in 1897 and Rs. 20-13-0 in 1896.

SA'VDA.—*In charge of* Second Class Hospital Assistant KRISHNAJI GOWALKAR, No. 123.

The dispensary buildings are in good repair, and furniture and fittings sufficient. The committee visited the dispensary twice. Conservancy is well attended to, and the water-supply from wells abundant. There were 27 in-door and 7,600 out-door patients treated, against 35 and 6,203 in 1897 and 34 and 6,358 in 1896, respectively. The prevailing diseases were malarial fevers, conjunctivitis, bowel complaints and skin and respiratory affections. Surgical operations numbered 215, against 194 in 1897 and 143 in 1896. There were 12 *post-mortem* examinations held, and 37 medico-legal cases certified, as compared with 10 and 22 in 1897 and 10 and 31 in 1896, respectively. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Dhulia. The total cost was Rs. 2,629-0-6 and the cost per patient Re. 0-5-6, against Rs. 1,204-15-0 and Re. 0-3-1 in 1897 and Rs. 1,205-2-8 and Re. 0-3-0 in 1896, respectively. Hospital stoppages amounted to Rs. 34-13-0, as compared with Rs. 13-10-0 in 1897 and Rs. 7-3-0 in 1896.

YA'WAL.—*In charge of* First Class Hospital Assistant MAHOMAD KHAN, No. 87.

The buildings are in good condition, but no annual repairs have been executed since the last two years. Shelves in the store-room and cots, clothing and bedding for pauper in-door patients are required. The dispensary committee visited the dispensary seven times in 1896, but not in 1897 and 1898. It was inspected by the Civil Surgeon, Dhulia, once in each year, and by the Deputy Sanitary Commissioner and the Assistant Collector of Khándesh in 1896. Malarial fevers, ascaris lumbricoides, rheumatic, ear, skin and respiratory affections, bowel complaints and local injuries were the most common diseases. Some cases of plague occurred in the vicinity of the town in 1898. Cholera and small-pox prevailed in the town and its vicinity in 1896. The total treated was 2,111 out-door and 2 in-door patients, against 2,473 and 8 in 1897 and 2,416 and 5 in 1896, respectively. The sanitary condition of the town has, on the whole, been fair. Water-supply from wells is good and ample. The river water is used for ablution and other purposes. There were 36 surgical operations, as compared with 38 in 1897 and 70 in 1896. Vaccination is conducted from house to house and at the police chavdi by the town vaccinator. Five dead bodies were examined, against 9 in 1897 and 2 in 1896, and opinion was given in 8 medico-legal cases, as compared with 18 in 1897 and 7 in 1896. The total cost was Rs. 1,176-6-3 and the cost per patient Re. 0-8-11, against Rs. 1,166-7-1 and Re. 0-7-6 in

1897 and Rs. 1,804-0-9 and Re. 0-11-11 in 1896, respectively. Rs. 11-8-0 were hospital stoppages, against Rs. 17-12-0 in 1897 and Rs. 19-7-0 in 1896. The dispensary was closed for six months of the year 1898, as the Hospital Assistant was sent on plague duty at Mahábaleshvar.

PA'CHORA.—*In charge of* Third Class Hospital Assistant KESHAVLAL MOTILAL MEHTA, No. 317.

The dispensary building is in good repair. A press for keeping office records, shelves to the store-room and a compounding table are wanted. The dispensary committee met eight times. There are no public latrines, and so the people generally resort to the river-bed for purposes of nature. The water-supply from the river Hivra during the winter and monsoon and from wells during the hot season is sufficient. There were 13 in-door and 2,349 out-door patients treated, against 10 and 1,901 in 1897 and 2 and 1,706 in 1896, respectively. Malarial fevers, worms and diseases of the eye, skin and digestive system were the most common complaints. There were 84 surgical operations performed, against 51 in 1897 and 20 in 1896. Four *post-mortem* examinations were held, and 11 medico-legal cases certified, as compared with 10 and 9 in 1897 and 2 and 12 in 1896, respectively. Vaccination is carried out by the táluka vaccinator. The Civil Surgeon of Dhulia inspected the dispensary. The total cost was Rs. 1,346-14-10 and the cost per patient Re. 0-9-1, against Rs. 980-10-6 and Re. 0-8-3 in 1897 and Rs. 959-7-11 and Re. 0-9-0 in 1896, respectively. Rs. 8-7-0 were hospital stoppages, as compared with Rs. 2-1-0 in 1897 and 1896 each.

SA'TA'RA COLLECTORATE.

SA'TA'RA CIVIL HOSPITAL.—*In charge of* Captain G. S. THOMSON, I. M. S., from 1st to 3rd January and from 9th May to 31st December, and of Lieutenant-Colonel K. R. KIRTIKAR, I. M. S., from 4th January to 8th May 1898.

Conservancy—Is defective. No sewage or drainage system of any kind exists. The town, being on the slope of hills, has several natural drains in the shape of nalás and streams, which are dry for the greater part of the year but supply ample passage for the quick descent of water in the rainy season all throughout the town. The surface drains along the road are not properly built, nor are they continuous. There are 18 road sweepers and 42 latrine sweepers, also 14 night-soil carts and a night-soil depôt.

Water-supply.—Good and ample, but liable to contamination between the catchment area and the city; that delivered to the city is unfiltered.

Hospital buildings.—Many alterations and additions have been suggested from time to time, but a very few have been carried out. The menials have no quarters of any kind. This necessitates their residence in town, far away from the hospital. The dispensary is badly situated in a portion of the original rear verandah now walled up. There is neither a proper office room, nor a well-lighted room for the examination of out-door patients. The privy arrangements for patients are not satisfactory, and there is no bathing accommodation for them. The Hospital Assistant's quarters are not sufficiently lighted or ventilated, and have no washing or bathing places. The verandah of the wards should be open on all sides, and the operation room provided with skylight or larger windows along the upper portions of the enclosing walls. Proper drains for carrying surface water in the rains should be provided, wherever required, to drain the entire compound.

Details of treated.—534 in-door and 4,142 out-door patients, as compared with 848 and 6,290 in 1897 and 878 and 9,964 in 1896, respectively.

Prevailing diseases.—Malarial fevers, round worms, scabies, conjunctivitis and dyspepsia.

Surgical operations.—240 surgical operations were performed, against 437 in 1897 and 1,706 in 1896.

Mortality and its causes.—There were 36 deaths in hospital, as compared with 244 in 1897 and 37 in 1896. The chief causes were ascitis, diarrhœa, sloughing ulcers, vesical calculus, intermittent fever, pneumonia and paralysis.

Medico-legal cases—Were 33, against 52 in 1897 and 51 in 1896.

Vaccination—Is performed by the municipal vaccinator.

Cost.—The total cost was Rs. 6,682-13-4 and the cost per patient Re. 1-6-10, against Rs 8,661-12-6 and Re. 1-3-5 in 1897 and Rs. 6,032-1-4 and Re. 0-8-11 in 1896, respectively.

Hospital stoppages.—Rs. 111-7-0 were realized, against Rs. 67-8-0 in 1897 and Rs. 138-3-0 in 1896

Conduct of establishment.—Has, on the whole, been good. First Class Hospital Assistant Gangaram Abuna, No. 63, is most painstaking, energetic and skilful, and Second Class Hospital Assistant Chunilal Sankelchand, No. 109, and Temporary Hospital Assistant Vishnu Balvant Bhide worked satisfactorily.

MAHA'BALESHVAR CIVIL HOSPITAL.—*In charge of* Lieut.-Colonel D. C. DAVIDSON, I. M. S.

Hospital building—In good repair. The question of building a new hospital is still under the consideration of Government.

Conservancy.—Inefficient.

Water-supply.—From wells good, but runs dry in the hot season. That from the Bishop's Tank is ample.

General health.—Good.

Attendance of patients.—4,900 out-door and 20 in-door patients were treated, against 4,998 out-door and 30 in-door in 1897 and 8,839 out-door and 45 in-door in 1896.

Prevailing diseases.—Ascaris lumbricoides, constipation, scabies, conjunctivitis, bronchitis and ague.

Surgical operations.—89 operations were performed, against 108 in 1897 and 167 in 1896.

Mortality and its causes.—There were 3 deaths—from pneumonia, snake-bite and paralysis 1 each—against *nil* in 1897 and 1 in 1896.

Vaccination—Is performed by the táluka vaccinator.

Cost.—The total cost was Rs. 2,260-4-4 and the cost per patient Re. 0-7-4, as compared with Rs. 2,447-7-5 and Re. 0-7-9 in 1897 and Rs. 2,684-13-4 and Re. 0-4-10 in 1896.

Hospital stoppages.—Rs. 16-2-0 were realized, against Rs. 25-7-0 in 1897 and Rs. 19-4-0 in 1896.

Conduct of establishment.—First Class Hospital Assistant Antaji Gopal, No. 65, and Compounder Ganpat Babaji worked satisfactorily, assisting largely in the plague work.

General remarks.—The most careful measures were adopted by the Superintendent for keeping plague off the Hill, and were completely successful.

GRANT-IN-AID DISPENSARIES.

WÁI.—*In charge of* First Class Hospital Assistant RÁMCHANDRA S. PRABHUNE, No. 91.

The present building, an old one, is quite unsuitable for dispensary purposes; the furniture and fittings &c. are sufficient and in good order. The dispensary committee visited the dispensary four times. The conservancy arrangement of the town is not satisfactory. The water-supply from the river Krishna is abundant, but scanty during the hot season. The total treated was 11,088 out-door and 20 in-door patients as compared with 11,473 and 44 in 1897 and 14,245 and 20 in 1896, respectively. The most common diseases were malarial fevers, ascaris lumbricoides, diseases of the eye, ear, skin and respiratory system, and bowel complaints. There was neither cholera nor plague in the town. Surgical operations numbered 223 against 180 in 1897, and 210 in 1896. Nine *post-mortem* examinations were held against 4 in 1897 and 2 in 1896. The dispensary was inspected by the Civil Surgeon in May, and by the Surgeon General with the Government of Bombay in November, by the Supervising Plague Officer, Sátára, in July, once by the Collector and twice by the First Assistant Collector of Sátára. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 1,612-10-7 and the cost per patient Re. 0-2-4, against Rs. 1,751-4-0 and Re. 0-2-5 in 1897 and Rs. 1,616-9-8 and Re. 0-1-10 in 1896. Hospital stoppages amounted to Rs. 20-13-0, as compared with Rs. 22-10-0 in 1897 and Rs. 36-9-0 in 1896.

KARÁD.—*In charge of* Third Class Hospital Assistant GAJANAN KRISHNÁ, No. 181.

The dispensary building is in a bad state of repair; the building being an old dharamshála, petty additions and alterations are needed. Furniture and fittings are sufficient and in good order. A press for surgical instruments and a shelf for records are required. The committee visited the dispensary nine times as against seven times in 1897 and three times in 1896. Sanitary arrangements were well looked after by the municipality. The water-supply from the rivers Krishna and Koina is abundant and fair. The total treated was 3,322 out-door and 56 in-door patients, as compared with 4,595 and 53 in 1897, and 8,481 and 95 in 1896, respectively. The prevailing diseases were intestinal worms, malarial fevers, and diseases of the eye and respiratory and digestive systems. Plague has been prevalent in the villages of the tálukas and in the town of Kárad. There were 104 surgical operations performed against 1 in 1897 and 438 in 1896. Fifteen *post-mortem* examinations were held, and 18 medico-legal cases examined and reported upon. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Sátára, once in each year. The total cost was Rs. 1,057-13-6, and the cost per patient Re. 0-5-0, as compared with Rs. 1,317-5-2 and Re. 0-4-6 in 1897, and Rs. 1,598-15-5 and Re. 0-3-0 in 1896, respectively. The amount realized under the hospital stoppages rules was Rs. 12-0-0 against Rs. 26-0-0 in 1897 and Rs. 63-13-0 in 1896.

ISLÁMPUR—*In charge of* Second Class Hospital Assistant MAHADEO GOVIND, No. 211.

The dispensary is situated on elevated ground in a healthy and open space out of the town. The building, an old one, is the property of the local municipality and in a fair state of repair. It is, however, too small and unsuitable, considering the amount of work done by the dispensary. The scheme for the construction of an additional room to accommodate more male patients, a separate surgical and examination room, and quarters for two of the menial servants is held in abeyance for want of funds. The necessary additions and alterations to the medical officer's quarters have lately been carried out. The furniture and fittings are sufficient. An operating table is much wanted. The dispensary committee visited the dispensary thrice against twice in 1897 and four times in 1896. The individual members of the municipality

and the District Revenue officers also paid frequent visits. The sanitary condition of the town is quite unsatisfactory. The latrines (24 seats) built by the municipality in three different places of the town still continue to be unused owing to want of ground for the storage of night-soil. The water-supply from four tanks and a spring is insufficient in the hot season and inferior in quality. The total treated was 6,255 out-door and 54 in-door patients, as compared with 5,630 and 58 in 1897 and 10,057 and 47 in 1896, respectively. The most common diseases were ascaris lumbricoides, stomach and bowel complaints, malarial fevers and eye, ear, skin and respiratory affections. In 1896 and 1897 cholera and small-pox prevailed in the táluka. Plague broke out in 1897 and 1898 in the town and its táluka. There were 272 surgical operations performed as compared with 163 in 1897 and 318 in 1896. Vaccination is carried on by the táluka vaccinator. 16 *post-mortem* examinations were held against 7 in 1897 and 9 in 1896. Medico-legal cases numbered 24 against 16 in 1897 and 30 in 1896. The dispensary was inspected by the Civil Surgeon, Sátára, on the 22nd November 1896 and 8th February 1898. The total cost was Rs. 1,542-5-0 and the cost per patient Re. 0-3-11 against Rs. 1,058-0-2 and Re. 0-3-0 in 1897, and Rs. 1,211-15-0 and Re. 0-1-11 in 1896, respectively. The amount realized on account of hospital stoppages was Rs. 22-0-0, as compared with Rs. 28-7-0 in 1897 and Rs. 6-12-0 in 1896.

PUSESÁVLI.—*In charge of* Second Class Hospital Assistant GOVIND ANNÁJI BODHÁNI, No. 137.

The conservancy of the town is not satisfactory, the municipality having been abolished. The dispensary building is of the old type and in good order. There is no proper accommodation for in-door patients and servants. The general health of the town was fair. Malarial fevers of intermittent type were most prevalent. Plague prevailed in the town and its vicinity from September to December 1898, returning 270 cases against only one imported case in 1897. There were 8 cases of cholera in 1897 and 45 in 1896. Small-pox gave 35 cases in 1898. There were 10 in-door and 5,534 out-door patients treated against 11 in-door and 4,890 out-door in 1897 and 28 in-door and 7,760 out-door in 1896. The prevailing diseases were malarial fevers, intestinal worms, stomach and bowel complaints and eye, respiratory and skin affections. There were 140 surgical operations performed against 138 in 1897 and 222 in 1896. Vaccination is performed by the Khatáv-Khánápur vaccinator. Eight *post-mortem* examinations were held and opinion was given in 6 medico-legal cases against 2 and 12 in 1897 and 5 and 16 in 1896, respectively. The dispensary was inspected by the Civil Surgeon, Sátára. The total cost was Rs. 1,137-10-11 and the cost per patient Re. 0-3-3 against Rs. 1,243-1-5 and Re. 0-4-1 in 1897 and Rs. 1,627-4-3 and Re. 0-3-4 in 1896, respectively. Hospital stoppages amounted to Rs. 5-9-0, as compared with Rs. 2-13-0 in 1897 and Re. 1-15-0 in 1896.

MHASVAD.—*In charge of* Second Class Hospital Assistant GANESH RÁMCHANDRA, No. 203.

The dispensary building is in a good state of repair. A partition wall should be built between the rooms for in-door patients and the dispensary proper to make it more suitable. Some more furniture is required. The dispensary committee visited the dispensary ten times. Conservancy is well attended to, and the town kept fairly clean. Water-supply from the river Mán is abundant, but runs short in the hot season. That of the three wells is not potable. The general health of the town has been fairly good. There were 9 in-door and 4,953 out-door patients treated, as compared with 25 in-door and 4,920 out-door in 1897 and 45 in-door and 5,290 out-door in 1896, respectively. The prevailing diseases were malarial fevers, worms, bowel complaints, conjunctivitis and respiratory and skin affections. Surgical operations numbered 113, as compared with 120 in 1897 and 186 in 1896. There were 2 *post-mortem* examinations held against 6 in 1897 and 2 in 1896. Vaccination is carried on by the Dahivádi táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Sátára. The total cost was Rs. 708-10-6 and the cost per patient Re. 0-2-3 against Rs. 919-0-10 and Re. 0-3-0 in 1897 and Rs. 1,249-12-4 and Re. 0-3-9 in 1896, respectively. Rs. 13-15-0 were hospital stoppages, as compared with Rs. 11-14-0 in 1897 and Rs. 16-2-0 in 1896.

PÁTAN.—*In charge of* First Class Hospital Assistant VINAYEK SAKHARAM KELKAR, No. 43.

The dispensary building with its out-houses is situated on the hill to the west of the town and is well ventilated and in a fair state of repair. Quarters for menial servants are much needed, and the services of a compounder in the absence of the Hospital Assistant on duty outside are essentially required. The sanitary condition of the town is not good, as it has no municipality to look after its cleanliness. The dispensary was visited thrice by the dispensary committee as compared with five times in each of the previous two years. The 2nd Assistant Collector of Sátára also visited it. The most common diseases were intestinal worms, malarial fevers, and diseases of the eye, skin and digestive system. Cholera broke out in the táluka during the years 1897 and 1896. The dispensary was inspected by the Civil Surgeon of Sátára and the Deputy Sanitary Commissioner, Central Registration District. There were 3,339 out-door and 50 in-door patients treated as compared with 1,858 and 27 in 1897 and 3,953 and 38 in 1896, respectively. The water-supply from the rivers Kera and Koina is abundant, but liable to pollution. There were 54 surgical operations performed as compared with 47 in 1897 and 82 in 1896. Vaccination is carried out by the táluka vaccinator. Nine *post-mortem* examinations were held as compared with 4 in 1897 and 7 in 1896. Medico-legal cases numbered 10 against 12 in 1897 and 11 in 1896. The total cost was Rs. 1,675-12-3 and the cost per patient Re. 0-7-11 as compared with Rs. 1,287-4-0 and Re. 0-10-11 in 1897, and Rs. 1,213-0-8 and Re. 0-4-10 in 1896, respectively. Hospital stoppages amounted to Rs. 8-9-0, as compared with Rs. 9-9-3 in 1897 and Rs. 23-12-0 in 1896.

TA'SGAON.—*In charge of* First Class Hospital Assistant BALKRISHNA HARI, No. 24.

The repairs to the dispensary buildings have not been executed during the year 1898 for want of funds. Some more furniture is required to complete the sanctioned list. The dispensary committee met thrice. Conservancy is not well attended to. Water-supply from a stream on the southern part of the town is abundant and excellent. There were 40 in-door and 6,793 out-door patients treated against 37 and 5,172 in 1897 and 27 and 10,153 in 1896, respectively. The most common diseases were conjunctivitis, worms, malarial fevers and diseases of the skin and respiratory and digestive systems Plague broke out during the years 1897 and 1898. Surgical operations numbered 139 against 183 in 1897 and 145 in 1896. There were 11 *post-mortem* examinations held as compared with 7 in 1897 and 8 in 1896. Opinion was given in several medico-legal cases. Vaccination is carried on by the táluka vaccinator The Civil Surgeon of Sátára inspected the dispensary. The total cost was Rs. 1,677-13-6 and the cost per patient Re. 0-3-11 against Rs. 1,308-15-5 and Re. 0-3-5 in 1897 and Rs. 1,128-6-2 and Re 0-1-9 in 1896, respectively. Rs. 34-12-0 were hospital stoppages as compared with Rs. 41-5-0 in 1897 and Rs. 70-0-0 in 1896.

PÁNCHGANI.—*In charge of* First Class Hospital Assistant J. F. D'JOSS, No. 13, Superintendent of the Station.

The dispensary buildings, furniture and fittings, &c., are sufficient and in good order. The conservancy of the station is fairly well attended to. The entertainment of a few more sweepers is necessary. Water-supply is good and ample. There were 5,090 out-door patients treated, as compared with 3,620 out-door in 1897 and 9,463 out-door and 1 in-door in 1896. There was no epidemic. Surgical operations numbered 85 against 131 in 1897 and 104 in 1896. Vaccination is conducted by the public vaccinator, who visits the station twice a year for this purpose. The dispensary was inspected by the Surgeon-General with the Government of Bombay and the Civil Surgeon and the Collector of Sátára. The total cost was Rs. 762-15-1 and the cost per patient Re. 0-2-5 against Rs. 1,167-4-7 and Re. 0-5-2 in 1897 and Rs. 529-4-6 and Re. 0-0-11 in 1896, respectively. Hospital stoppages amounted to Rs. 285-14-0 as compared with Rs. 343-3-0 in 1897 and Rs. 231-10-0 in 1896.

RAHIMATPUR.—*In charge of* Second Class Hospital Assistant SHAIK GULAB, No. 141.

The dispensary building, a hired one, is quite unsuitable for the purpose. Plague was prevalent in the town. There were 210 deaths out of 251 attacks during the year. Conservancy arrangements are well attended to. The water-supply, chiefly from a stream, is good and abundant. The dispensary committee visited the dispensary occasionally. The total treated was 8,306 out-door and 12 in-door patients, as compared with 7,641 and 13 in 1897 and 12,515 and 18 in 1896, respectively. The prevailing complaints were malarial fevers, worms and diseases of the eye, skin and digestive system. There were 160 surgical operations performed against 120 in 1897 and 203 in 1896. Vaccination is carried out by the táluka vaccinator. Ten *post-mortem* examinations were held, and opinion was given in 7 medico-legal cases against 3 and 4 in 1897 and 7 and 17 in 1896, respectively. The dispensary was inspected every year by the Civil Surgeon, Sátára. The total cost was Rs. 2,036-3-9 and the cost per patient Re. 0-3-11, as compared with Rs. 1 572-2-0 and Re. 0-3-3 in 1897 and Rs. 914-1-3 and Re. 0-1-2 in 1896, respectively. Rs. 15-14-0 were hospital stoppages against Rs. 5-2-0 in 1897 and Rs. 2-11-0 in 1896.

SHOLA'PUR COLLECTORATE.

SHOLÁPUR CIVIL HOSPITAL.—*In charge of* Captain W. R. SCROGGIE, L.R.C.P., M.R.C.S., Senior Assistant Surgeon, I.S.M.D.

Conservancy.—The conservancy of the municipality is carried out fairly well, and special attention was given to this during the years 1897 and 1898 when plague was expected and prevailed. There is no regular drainage system, and the sanitary condition cannot be much improved until this great defect is remedied.

Water-supply.—The water-supply from the Ekruk tank is sufficient and pure. It is pumped into the municipal reservoirs from the settling tank into which the water enters by gravitation. From the reservoirs the water is distributed by iron pipes to road-side water-stands and into the houses. There are wells in the town which permit soakage from neighbouring houses, but they are still used on account of supposed virtues.

Hospital buildings – During 1896 new quarters for one of the two Hospital Assistants was completed. They are well and substantially built and are on the standard plan, but have no adequate light or ventilation, and this want is much felt when the doors are closed, as then there is no ventilation whatever. These quarters have no zenana compound. The house of the Second Hospital Assistant is a low unsuitable building in a leaky and badly repaired condition. Plans and estimates have been submitted for new quarters, which may be completed in the near future. An examining and operating room attached to the northern side of the dispensary room of the male ward was completed in 1896 ; but its sky-light has not yet been constructed, though this is much needed for better lighting, especially in eye operations. The floors of the Police ward and of the lunatic cells are of mud ; these should be paved with Shábábád stone, except the floors of two of the six lunatic cells which should be boarded for violent lunatics. The floors of the

lunatic cells of this yard should be raised about a foot, as during the rains they are very damp and even wet. Bath-rooms for each of the wards, and a store-room for medicines and clothing, are much needed. Venetian and glass windows should be substituted for zamps in the male, female and police wards. The cactus hedge of the compound should be removed, and a wire fencing or a low wall substituted. The chupper roofs of the male, female and police wards have worn very thin, and are very leaky and beyond repair. Mangalore tile roofing should be substituted, the same as is at present over the operating room. There is no accommodation for contagious diseases such as measles, small-pox, leprosy, &c. The municipality has two suitably constructed cholera wards in the hospital compound.

General health.—Fairly good, except during the last quarter of 1897 and the first half of 1898 when plague prevailed and caused sad havoc. Since then plague has ceased, though a very few imported cases have been detected. Cholera prevailed during 1896 and 1897, and was rather severe during the latter year. Of this disease there were only two cases in 1898. Influenza, measles and small-pox prevailed each year.

Attendance of patients.—There were 13,893 out-door and 601 in-door patients in 1896, 8,489 out-door and 729 in-door patients in 1897, and 9,853 out-door and 508 in-door patients in 1898.

Prevailing diseases.—Malarial fevers, ascaris lumbricoides, conjunctivitis, inflammation of external ear, bronchitis, eczema, injuries, itch and ringworm.

Surgical operations.—837 against 221 in 1897 and 1,264 in 1896.

Mortality and causes.—There were 45 deaths compared to 97 in 1897 and 36 in 1896. The chief causes were dysentery, cholera, plague, debility, remittent fever, diarrhœa and pneumonia.

Vaccination.—Is performed by the municipal vaccinator of the town from calf lymph and from arm to arm. There were 1,771 primary vaccinations, being 715 less than in 1897. There were 68 re-vaccinations, or 52 more than in 1897.

Medico-legal.—There were 85 cases including 14 *post-mortem* examinations.

Conduct of establishment.—The conduct of the 1st and 2nd class establishment has been good.

Cost.—The total cost was Rs. 6,705-1-6 and the cost per patient Re. 0-10-4 against Rs. 6,100-4-1 and Re. 0-10-7 in 1897 and Rs. 5,389-13-8 and Re. 0-5-11 in 1896, respectively.

Hospital stoppages.—The amount realized was Rs. 194-6-5 compared with Rs. 164-11-5 in 1897 and Rs. 162-12-0 in 1896.

MUNICIPAL DISPENSARIES.

Sholápur City Dispensary.—*In charge of* First Class Hospital Assistant Trimbak Luximon, No. 78.

The dispensary buildings are in a good state of repair. Furniture and fittings are sufficient and in good order. The dispensary committee met 5 times against 9 in 1897 and 11 in 1896. The sanitary condition of the town is fairly satisfactory. The night-soil depôt, which was a nuisance on account of its being close to the city, has now been removed far away to the northern side. Some more public latrines, dust-bins and daily removal of silt from the gutters are the principal things required to be attended to by the municipality. The water-supply from the Ekruk tank is ample and good. The total number of patients treated was 13,178 out-door and 101 in-door, as compared with 13,721 and 91 in 1897 and 16,189 and 40 in 1896, respectively. The most common diseases were malarial fevers, conjunctivitis, bronchitis, ascaris lumbricoides and diarrhœa. There were 81 cases of plague with 84 deaths during the year as compared with 2,653 cases and 2,186 deaths in 1897. There were 908 surgical operations performed against 1,772 in 1897 and 1,694 in 1896. Vaccination is carried on by the municipal vaccinators. The dispensary was inspected by the Civil Surgeon, Sholápur, once in each year, by the Surgeon-General with the Government of Bombay in August 1898, and by the Collector of Sholápur in 1897. The total cost was Rs. 2,982-0-8 and the cost per patient Re. 0-3-7, as compared with Rs. 3,742-9-8 and Re. 0-4-4 in 1897 and Rs. 3,182-5-2 and Re. 0-3-2 in 1896, respectively. The hospital stoppage rules are not in force in this dispensary.

Pandharpur.—*In charge of* Assistant Surgeon V. B. Karandikar, B.A.

The buildings are in good repair except that they require white-washing. Quarters for the Hospital Assistant, an examination room, a screen wall opposite the dead house, and *post-mortem* and examination tables are badly wanted. The furniture and fittings are sufficient. The committee met only once in 1898 and 1897, and six times in 1896. The conservancy is fairly well looked after by a sanitary establishment, headed by a Head Sanitary Inspector, who is not a medical man. Water-supply from the municipal tank is insufficient, as it does not reach the highest parts of the town, and dries up in the hot season; that from the river Bhima is sufficient but liable to contamination from soakage. A proposal to get water from the Mhasvad canal, which will reach the highest part of the town and which will not dry in the hot season, is under consideration by the municipality. The principal diseases were malarial fevers, worms, and diseases of the skin and eye. The total treated was 8,171 out-door and 111 in-door patients against 7,770 out-door and 174 in-door in 1897 and 11,020 out-door and 150 in-door in 1896. The total number of deaths among in-patients was 17 or 15·4 per cent. against 56 deaths or 32·2 per cent. in 1897 and

45 deaths or 30 per cent. in 1896. There were 533 surgical operations performed against 364 in 1897 and 440 in 1896. The general health of the town was fair. There were 62 medico-legal cases certified and 13 *post-mortem* examinations performed against 40 cases and 8 examinations in 1897 and 88 cases and 11 examinations in 1896. Vaccination is performed by a municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Sholápur, on 17th December 1898. The total cost was Rs. 3,824-11-1 and the cost per patient Re. 0-7-5, as compared with Rs. 5,456-14-3 and Re. 0-11-0 in 1897 and Rs. 4,987-7-10 and Re. 0-7-2 in 1896, respectively. The hospital stoppages rules are not in force here.

BA'RSI.—*In charge of* First Class Hospital Assistant VITHAL BALVANT, No. 60.

The buildings are in a fair state of repair. The water-supply is from wells and a tank. The total number of patients treated was 13,759 out-door and 60 in-door, as compared with 14,290 and 64 in 1897, and 18,515 and 35 in 1896, respectively. The prevailing diseases were malarial fevers, intestinal worms, conjunctivitis and diseases of the digestive system and skin. There were 505 surgical operations performed against 701 in 1897 and 1,146 in 1896. *Post-mortem* examinations numbered 17 against 22 in 1897 and 18 in 1896. Opinion was given in 21 medico-legal cases as compared with 7 in 1897 and 11 in 1896. Conservancy is well attended to. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Sholápur. The total cost was Rs. 2,211-9-6 and the cost per patient Re. 0-2-7 against Rs. 2,810-8-3 and Re. 0-3-2 in 1897 and Rs. 1,779-3-2 and Re. 0-1-6 in 1896, respectively. The rules for hospital stoppages are not in force in this dispensary.

GRANT-IN-AID DISPENSARIES.

KARMA'LA.—*In charge of* First Class Hospital Assistant NURSAPA POCHAYA, No. 81.

The building is in a fair state of repair. In-door accommodation is insufficient. Quarters for servants are needed. Compound wall requires to be rebuilt. Furniture and fittings are sufficient. The committee met regularly every month. There were 23 in-door and 10,134 out-door patients treated, as compared with 23 and 9,571 in 1897 and 21 and 10,626 in 1896, respectively. The most common diseases were malarious fevers, intestinal worms, rheumatic affections, conjunctivitis and diseases of the respiratory and digestive systems and skin. Cholera prevailed in an epidemic form in the town in 1897, returning 31 cases with 8 deaths, and in the surrounding villages to a slight extent in 1897 and 1896. Small-pox broke out in 1898 in the town and in the surrounding villages in 1898 and 1897. This dispensary was inspected by the Civil Surgeon, Sholápur, once in each year, and by the Deputy Sanitary Commissioner in 1897 and 1896. The sanitary condition of the town is fair and well attended to. There are 10 municipal latrines with six seats in each. There were three wells, which have been converted into a large well with the object of increasing the storage capacity of water. The municipality constructed a dam at the distance of 100 feet from the well. This dam has become very useful as it accumulates water in the bed beyond the dam, which naturally percolates into the well. The water from this well is distributed to the town by means of cast iron pipes. Vaccination is carried on by the táluka vaccinator. There were 301 surgical operations, as compared with 305 in 1897 and 398 in 1896. Opinion was given in 30 cases against 36 in 1897 and 22 in 1896. Three *post-mortem* examinations were held against 6 in 1897 and 10 in 1896. Rs. 39-6-0 were realized on account of hospital stoppages against Rs. 51-5-0 in 1897 and Rs. 45-5-0 in 1896. The total cost was Rs. 1,507-0-4 and the cost per patient Re. 0-2-4, as compared with Rs. 1,525-1-1 and Re. 0-2-7 in 1897 and Rs. 1,606-13-4 and Re. 0-2-5 in 1896, respectively.

AKLUJ.—*In charge of* Second Class Hospital Assistant GANESH ROWJI, No. 177.

The dispensary buildings are in fair condition A store-room and an isolation ward are much required. The dispensary committee met four times. There is no municipality, and hence the sanitation of the town is very unsatisfactory. Water-supply is from the river Nira and a well. There were 88 in-door and 8,553 out-door patients treated, as compared with 82 in-door and 7,078 out-door in 1897 and 73 in-door and 8,776 out-door in 1896. The prevailing complaints were malarial fevers, worms and eye and respiratory affections. Surgical operations numbered 251 against 149 in 1897 and 202 in 1896. There were 7 *post-mortem* examinations held, as compared with 2 each in 1897 and 1896. Opinion was given in 17 medico-legal cases against 14 in 1897 and 9 in 1896. Vaccination is carried out by the táluka vaccinator. The Civil Surgeon of Sholápur inspected the dispensary once in each year. The total cost was Rs. 1,613-7-6 and the cost per patient Re. 0-3-0 against Rs. 1,699-4-4 and Re. 0-3-10 in 1897 and Rs. 1,211-3-10 and Re. 0-2-2 in 1896, respectively. Rs. 86-1-0 were hospital stoppages, as compared with Rs. 17-3-0 in 1897 and Rs. 10-2-0 in 1896.

SANGOLA.—*In charge* of First Class Hospital Assistant GOVIND TANTYA, No. 96.

The dispensary building, together with servants' quarters and the dead-house, which were constructed by the municipality, are in good repair. A new operating room has been constructed in the dispensary compound. Furniture and fittings are sufficient and in good order. The dispensary committee met once in each year. The most common diseases were malarial fevers, worms, eye and respiratory affections and bowel complaints. Cholera breaks out generally at the time of the Pandharpur fairs. There was no epidemic of any kind during the year 1898.

There were 24 cases of cholera with 18 deaths in the town in 1897 against 12 cases and 2 deaths in 1896. It also broke out in the district in the year 1897, giving 1,117 cases with 534 deaths, against 548 cases and 52 deaths in 1896. Most of the cases occurred in the relief camps in the táluka. The dispensary was inspected by the Civil Surgeon, the Collector and the District Deputy Collector of Sholápur once in each year. The total number of out-door patients treated was 5,932 against 5,959 in 1897 and 8,487 in 1896. The sanitary condition of the town is fair. Water-supply from wells and a stream is generally deficient in the hot season. There are 13 public and 53 private wells; most of them are of old pattern and are liable to soakage. The municipality has during the last two years arranged for increasing the supply of water. A Persian wheel, which is to be worked with a bullock, has been put up at a well at about quarter of a mile from the town. A reservoir has been made here from which iron pipes are laid and water is conveyed into cisterns. Conservancy establishment consists of 2 bhangis and 3 sweepers, and a temporary establishment is entertained occasionally. There are no public latrines, but plots of ground sufficiently away from the town have been assigned by the municipality for natural purposes. The town is kept fairly clean by the municipality. Vaccination is performed by the Táluka Local Fund vaccinator from house to house and arm to arm. The general health of the town was on the whole fair. There were 274 surgical operations against 145 in 1897 and 513 in 1896. The total cost was Rs. 1,633-2-4 and the cost per patient Re. 0-4-5 against Rs. 1,284-11-11 and Re. 0-3-5 in 1897 and Rs. 1,191-3-4 and Re. 0-2-3 in 1896, respectively. The receipts on account of hospital stoppages amounted to Rs. 2-7-0 as compared with Rs. 15-15-6 in 1897 and Rs. 22-5-0 in 1896.

NATIVE STATE DISPENSARY.

AKALKOT.—*In charge of* Mr. D. G. ABHYANKAR, L.M.S.

The dispensary buildings are in good repair. Furniture and fittings are sufficient. There is no dispensary committee. Conservancy of the town is well attended to, and the water-supply, chiefly from wells, is deficient in the hot season. The water-works for supplying the town with pure and abundant water is nearly completed. There were 13 in-door and 5,721 out-door patients treated against 44 and 9,796 in 1897 and 59 and 10,103 in 1896, respectively. The prevailing diseases were malarial fevers, worms and eye, skin and respiratory affections. The number of plague cases treated during the year 1898 at the Akalkot plague hospital was 72, and at the Karajgi plague hospital it was 26. There were 168 surgical operations performed against 217 in 1897 and 243 in 1896. Vaccination is carried out by the State vaccinator. The dispensary was inspected by the Administrator of the State. The total cost was Rs. 3,138-15-2 and the cost per patient Re. 0-8-9, as compared with Rs. 3,191-4-1 and Re. 0-5-4 in 1897 and Rs. 3,853-4-4 and Re. 0-6-0 in 1896, respectively.

BELGAUM COLLECTORATE.

BELGAUM CIVIL HOSPITAL.—*In charge of* Lieut.-Colonel C. T. PETERS, M.B., I.M.S.

Conservancy.—Public and private latrines cleaned by sweepers. Streets with surface drains. Night-soil depôt situated some two miles to the north of the town on the top of a hill, which appears to be a most unusual place to select for such purposes, as all the drainage from that hill fills the tank which lies outside the fort.

Water-supply.—From wells, both public and private. The supply is abundant excepting only at famine times, *i.e.* in 1896 and 1897 there was a drought from want of rain. Quality fair, and as the water filters through beds of laterite, it is seldom contaminated.

Hospital buildings.—The same as they have been during the past 25 years or more, and there is no prospect of getting a new hospital, although the plans and estimates have been sanctioned, for want of funds.

General Health.—In 1896 the general health was fair and the number of deaths from fever was much smaller than in preceding years. In 1897 it suffered very much in consequence of the prevalence of plague, which still continues.

Attendance of patients.—675 in-door and 5,868 out-door patients were treated against 567 and 5,685 in 1897 and 453 and 9,508 in 1896, respectively.

Prevailing diseases.—Malarial fevers, worms, rheumatic affections, conjunctivitis and plague.

Epidemics.—Chicken-pox and small-pox in the spring months of 1896, cholera in 1896 and early part of 1897; plague from October 1897, which has continued till the end of the year 1898.

Mortality and its causes.—There were 180 deaths as compared with 82 in 1897 and 24 in 1896. The chief causes were plague, dysentery, diarrhœa, pneumonia, apoplexy and chest affections.

Surgical operations—Have suffered in number in 1897 and 1898 in consequence of the prevalence of plague. Two hundred and eleven surgical operations were performed in 1898 as

compared with 423 in 1897 and 806 in 1896. The principal ones were excision of tumours, amputations, extraction of lens and removal of vesical calculi.

Medico-Legal cases.—Eleven *post-mortem* examinations were made against 17 in 1897 and 10 in 1896. Certificates were given in 24 medico-legal cases as compared with 35 in 1897 and 25 in 1896.

Vaccination—Is done by the municipal vaccinator under the orders of the Sanitary Department.

Conduct of establishment.—First Class Hospital Assistant Piraji Jadow, No. 49, has worked as Senior Hospital Assistant since September 1896. His conduct has been uniformly good, and he has performed his duties zealously, not only in connection with the Civil Hospital but also all the extra duties that devolved on him in connection with the famine, and subsequently, when, in consequence of the sudden outbreak of plague in cantonment the military authorities having no arrangements to treat their own sick, the plague cases and their friends had to be admitted into the Civil Hospital for treatment and segregation. Mr. Piraji Jadow was in their midst night and day insuring confidence and encouraging the sick and afflicted ones, while also by encouraging the hospital establishment a sufficient number of attendants were secured, when the people were struck with panic and even the friends and the relatives of the sick would not come near them. Third Class Hospital Assistant Krishnaji Dattatraya, No. 273, performed his duties at the Civil Hospital up to 1st October 1897, when he was transferred to the Sátára District on plague duty. He worked very zealously, and his conduct was uniformly good during the entire period.

Third Class Hospital Assistant Bhavanishankar Harnarayan, No. 324, who died on the 25th September 1898 of plague, was employed more or less on plague duty in addition to his ordinary duties at the Civil Hospital. He had rendered efficient help to the plague authorities in the town in diagnosing and detecting plague cases. His kindness to the sick stricken by plague was acknowledged by the relatives of the sick and deceased patients.

Third Class Hospital Assistant Govind Gangadhar Jathar, No. 256, was on plague duty from 2nd November 1897. He is very zealous in the discharge of his duties, and has worked hard night and day.

Second Class Hospital Assistant Joitaram Motiram Pandya, No. 161, on plague duty from 1st December 1898, who was transferred from plague duty at Ankleshwar, has since his arrival here given me every reason to be satisfied with his work and zeal with which he is looking after the prisoners both at the Jail and the Civil Hospitals.

The conduct of the second class establishment was, on the whole, satisfactory.

Cost.—The total cost was Rs. 5,217-12-4 and the cost per patient Re. 0-12-9, as compared with Rs. 6,387-6-6 and Re. 1-0-4 in 1897 and Rs. 5,339-11-2 and Re. 0-8-7 in 1896, respectively.

Hospital stoppages—Amounted to Rs. 129-9-0, against Rs. 122-2-0 in 1897 and Rs. 92-9-0 in 1896.

MUNICIPAL DISPENSARIES.

BELGAUM.—*In charge of* Mr. R. A. MODHKE.

The dispensary buildings are in good repair, and furniture and fittings sufficient and in good order. The management of the dispensary is under the direct control of the managing committee of the municipality. The total treated was 2,159 out-door patients, against 4,692 in 1897 and 10,266 in 1896. The prevailing diseases were intestinal worms, conjunctivitis and skin affections. An epidemic of plague broke out in the town and district. There were 139 surgical operations performed, as compared with 200 in 1897 and 427 in 1896. The dispensary was inspected by the Surgeon-General with the Government of Bombay on 25th August 1898, by the Director-General, Indian Medical Service, on 28th November 1898, and by the Civil Surgeon of Belgaum once in each year. Conservancy arrangements are satisfactory. The water-supply, chiefly from municipal and private wells, is good and ample. The total cost was Rs. 544-14-4 and the cost per patient Re. 0-4-0, as compared with Rs. 1,399-14-11 and Re. 0-4-9 in 1897 and Rs. 1,453-8-2 and Re. 0-2-3 in 1896, respectively. No hospital stoppages were realized in 1898, but in 1897 they amounted to Rs. 4-6-0 and in 1896 to Rs. 92-2-0. The falling off in these receipts was due to the exodus of rich paying patients on account of the scare caused by the plague which broke out in the town in the years 1897 and 1898.

NIPANI.—*In charge of* Mr. PARASHURAM AMRIT NAGPURKAR.

The dispensary building is in good repair. The managing committee of the municipality looks after the dispensary affairs. Sanitation of the town is well attended to. Water-supply is sufficient. There were 4,594 out-door patients treated, against 4,448 in 1897 and 5,656 in 1896. Malarial fevers, respiratory and skin affections, worms and bowel complaints were the most common diseases. There was no epidemic disease. Surgical operations numbered 95, as compared with 55 in 1897 and 71 in 1896. The total cost was Rs. 1,069-6-2 and the cost per patient Re. 0-3-9, against Rs. 1,274-11-3 and Re. 0-4-7 in 1897 and Rs. 1,162-3-6 and Re. 0-3-3 in 1896, respectively.

GRANT-IN-AID DISPENSARIES.

GOKAK.—*In charge of* Second Class Hospital Assistant GANPATI NILOBA, No. 138.

The building is in good repair. There are no quarters for the dispensary servants. The committee visited the dispensary six times, against eight in 1897 and nine in 1896. The water-supply is from the river Ghatapraba. The sanitary condition of the town is fair. The total treated was 5,770 out-door and 27 in-door patients, as compared with 6,346 and 40 in 1897 and 7,679 and 31 in 1896, respectively. The prevailing diseases were malarial fevers, worms, diseases of the eye, digestive system and skin. There were 46 cases of cholera in 1897 and 30 in 1896. Plague gave 905 cases in the town during the year 1898, against one case in 1897. Vaccination is carried on by the municipal vaccinator. The dispensary was visited by the District Deputy Collector, Belgaum, in November 1898. There were 304 surgical operations performed, against 405 in 1897 and 326 in 1896. Nine *post-mortem* examinations were held, against 13 in 1897 and 8 in 1896. Opinion was given in 36 medico-legal cases, against 54 in 1897 and 36 in 1896. The fees collected under the hospital stoppage rules were Rs. 17-8-0, as compared with Rs. 31-5-0 in 1897 and Rs. 24-13-0 in 1896. The total cost was Rs. 1,551-10-10 and the cost per patient Re. 0-4-3, as compared with Rs. 1,339-2-0 and Re. 0-3-4 in 1897 and Rs. 1,433-13-7 and Re. 0-3-0 in 1896, respectively.

ATHNI.—*In charge of* the late Third Class Hospital Assistant WASSUDEV GANGADHAR, No. 277, up to 17th August 1898.

The buildings are in good order. The committee visited the dispensary four times. The sanitary condition of the town is satisfactory. The water-supply from wells and a tank is sufficient. The total treated was 2,947 out-door and 10 in-door patients, as compared with 6,060 and 45 in 1897 and 6,449 and 28 in 1896, respectively. The most common diseases were conjunctivitis, worms, skin and respiratory affections and bowel complaints. There were 174 surgical operations performed, against 252 in 1897 and 223 in 1896. Vaccination is carried on by the municipal vaccinator. *Post-mortem* examinations numbered 10 in 1897 and 7 in 1896. The total cost was Rs. 1,177-2-4 and the cost per patient Re. 0-6-4, as compared with Rs. 1,241-13-4 and Re. 0-3-3 in 1897 and Rs. 1,399-2-9 and Re. 0-3-5 in 1896, respectively. The fees collected under the hospital stoppage rules amounted to Re. 1-12-0, against Rs. 7-3-0 in 1897 and Rs. 10-4-0 in 1896.

SAUNDATTI.—*In charge of* First Class Hospital Assistant NARSAPPA NAIDOO, No. 39.

The dispensary building and out-houses are in good order. A wall round the dispensary compound, quarters for servants and a store-room are much needed. The dispensary committee visited the dispensary often. The surface conservancy of the town is good. There are no public latrines, but 2 scavengers are employed by the municipality to clean gutters every morning. The total number of patients treated was 18 in-door and 3,621 out-door, as contrasted with 20 in-door and 4,548 out-door in 1897 and 29 in-door and 5,998 out-door in 1896. The most common diseases were malarious fevers, intestinal worms, rheumatism and diseases of the eye, respiratory and digestive systems and skin. Cholera to a small extent prevailed in 1896 and 1897. In 1898 plague broke out in 4 villages near the town. Eleven cases were treated by the Hospital Assistant travelling to those villages for that purpose. The vaccination work is carried on by the táluka vaccinator. There were 383 surgical operations performed, against 401 in 1897 and 595 in 1896. *Post-mortem* examinations numbered 20, as compared with 13 in 1897 and 11 in 1896. The dispensary was inspected by the Civil Surgeon, Belgaum, in 1896 and 1897. The total expenditure was Rs. 1,499-1-11, as compared with Rs. 1,442-12-5 in 1897 and Rs. 1,224-15-4 in 1896. The cost per patient was Re. 0-6-7 in 1898, against Re. 0-5-1 in 1897 and Re 0-3-3 in 1896. Rs. 38-10-0 were hospital stoppages, as compared with Rs. 27-0-0 in 1897 and Rs. 31-10-0 in 1896.

CHIKODI.—*In charge of* First Class Hospital Assistant PANDURANG GANESH, No. 88.

The dispensary building is an old bungalow which was presented by the Sir Desái of Wantmuri when the dispensary was established. It is in a dilapidated condition and requires special repairs. There are no quarters for the second class servants. Furniture and fittings, &c., are in good order. The dispensary committee met four times. There is no municipality, but the sanitation of the town is looked after by a Sanitary Board which has been established since 1st April 1896. The water-supply from wells and a brook is good and abundant. There were 22 in-door and 4,111 out-door patients treated, against 15 and 4,530 in 1897 and 16 and 5,610 in 1896, respectively. The most common diseases were malarial fevers, intestinal worms, eye and skin affections and bowel complaints. Plague broke out in some villages of the táluka in 1897 and 1898, and cholera in the town in 1896 and 1897. There were 170 surgical operations performed, against 125 in 1897 and 167 in 1896. *Post-mortem* examinations numbered 15, as compared with 17 in 1897 and 9 in 1896. Opinion was given in 23 medico-legal cases against 21 in 1897 and 13 in 1896. Vaccination is carried on by the táluka vaccinator. The Civil Surgeon of Belgaum inspected the dispensary once in 1897 and in 1896. The total cost was Rs. 1,810-10-3 and the cost per patient Re. 0-7-0, as compared with Rs. 1,600-2-10 and Re. 0-5-11 in 1897 and Rs. 1,270-14-1 and Re. 0-3-7 in 1896, respectively. Rs. 15-12-0 were hospital stoppages, against Rs. 8-2-0 in 1897 and Rs. 10-0-0 in 1896.

KHÁNÁPUR.—*In charge of* Third Class Hospital Assistant SAKHARAM TUKARAM, No. 312.

The roof of the dispensary building requires repair. There is neither accommodation for in-door patients, nor a latrine. Furniture and fittings are in good order. A few chairs and a table are required. The dispensary committee meet once a year. Conservancy is fairly attended to, although there is no municipality. Water-supply from wells and river is good and abundant. There were 3,374 out-door patients treated, against 4,225 in 1897 and 4,408 in 1896. The prevailing diseases were malarial fevers, worms, conjunctivitis, bowel complaints and skin and respiratory affections. Plague broke out in the town and its vicinity from December 1897 to June 1898. Surgical operations numbered 63, against 47 in 1897 and 70 in 1896. There were 5 *post-mortem* examinations held in 1898 and 4 in 1896. Opinion was given in 10 medico-legal cases, against 3 each in 1897 and 1896. Vaccination is conducted by the táluka vaccinator. The total cost was Rs. 929-14-7 and the cost per patient Re. 0-4-5, as compared with Rs. 879-15-9 and Re. 0-3-4 in 1897 and Rs. 1,040-12-6 and Re. 0-3-9 in 1896, respectively. The fees under the hospital stoppage system amounted to Rs. 4-11-0, against Rs. 20-1-0 in 1897 and Rs. 16-10-0 in 1896.

DHA'RW'R COLLECTORATE.

DHÁRWA'R CIVIL HOSPITAL.—*In charge of* Major W. A. CORKERY, I. M. S.

Conservancy.—The conservancy arrangements remain practically the same as reported on three years previously. The pit-privies are still numerous, and no steps have been taken for their removal. The latrine and conservancy arrangements are inadequate, though the number of sweepers has been increased this year. The slaughter-houses and meat markets have been paved during the past two years, but no drains have as yet been provided in connection with them, and hence no flushing takes place. Arrangements for the removal of the night-soil, which were formerly in the hands of a contractor, have this year been carried out under municipal supervision. A European Sanitary Inspector has also been taken on during the year. In consequence of the prevalence of plague during the year, advantage has been taken of thoroughly cleaning, disinfecting and whitewashing every single house in the town, burning and destroying a lot of refuse and demolishing a few insanitary hovels.

Water-supply.—The water-supply is inadequate on the whole, and in many cases indifferent in quality, and has been the same as reported on three years ago. The new water-supply scheme, which was contemplated a few years ago, has now been postponed, and Dhárwár has to depend solely on the rainfall for its supply of water.

Hospital buildings.—The buildings are in good repair and limewashed yearly at Government expense by the Public Works Department. An operating room was constructed during the year 1896, and now the building fulfils all the requirements.

General health.—Cholera prevailed during the last three years more or less in all the tálukas generally, commencing in March and reaching its climax in the months of July, August and September, the chief tálukas affected being Gadag, Hubli, Ránebennur, Hángal, Navalgund and Dhárwár Tálukas. Plague also became epidemic in the town of Dhárwár and the district during the year 1898. The first imported case being on the 18th August, and up to the end of the year 34,329 cases with 27,852 deaths have occurred in the district, while 1,272 cases with 971 deaths occurred in the town itself.

Prevailing diseases.—Malarial fevers, intestinal worms (ascaris lumbricoides), bronchial affections, scabies, dyspepsia and skin diseases. Malarial fevers have been rife during the months of October, November and December of the past three years. Bronchial affections have also prevailed to a certain extent in the cold months during the past three years.

Attendance of patients.—361 in-door and 6,348 out-door patients were treated, against 445 in-door and 6,726 out-door in 1897 and 373 in-door and 7,973 out-door in 1896.

Surgical operations.—206 against 379 in 1897 and 661 in 1896. In the three preceding years the total number was 2,042, this large decrease being mainly due to the scare the plague has given rise to during the past two years and the reluctance with which the people seek admission into hospital through fear of being sent to the Plague Hospital.

Mortality and its causes.—There were 19 deaths in hospital, as compared with 17 in 1897 and 23 in 1896. The chief causes were pneumonia, dysentery, cholera, starvation and tetanus.

Medico-legal cases.—16 *post-mortem* examinations were held, against 18 in 1897 and 26 in 1896. Opinion was given in 47 cases, or 24 and 30 less than in 1897 and 1896 respectively.

Hospital stoppages.—Amounted to Rs. 195-8-0, against Rs. 311-13-0 in 1897 and Rs. 267-3-0 in 1896.

Expenditure.—The total cost was Rs. 4,826-0-9 and the cost per patient Re. 0-11-6, as compared with Rs. 4,599-12-4 and Re. 0-10-3 in 1897 and Rs. 5,642-13-10 and Re. 0-10-10 in 1896, respectively.

Establishment.—The conduct of the establishment, on the whole, has been satisfactory, except that of Second Class Hospital Assistant Gopalrao Ramchandarao, who was attached to this hospital from 24th August to 2nd October 1898.

GRANT-IN-AID DISPENSARIES.

HUBLI.—*In charge of* Assistant Surgeon D. CARDOZ.

The dispensary buildings are in good repair, and furniture and fittings sufficient. The operation room should be extended so as to admit of sufficient light. A new mortuary is also an urgent necessity. Though the committee visited the dispensary only three times during the year, owing to their members being engaged with the plague work, they evinced a great interest in the welfare of the institution. The year 1898 was one of the greatest trial in many respects. To the defective conservancy arrangements which existed in the previous year, there was superadded the difficulty of getting sufficient establishment to attend to the scavenging and other conservancy arrangements. There was unfortunately a high mortality from plague among the sweepers, scavengers and gutter-cleaners. Many evaded the work and others absented themselves, and the result was that just at a time when sanitation needed special attention, the condition of the town was anything but satisfactory; matters however mended, and towards the latter part of the year the cleanliness of the town had considerably improved. The water-supply is abundant. It is brought into the town by pipes from a small lake situated some 3 miles off. There were 191 in-door and 15,715 out-door patients treated, as compared with 161 and 21,506 in 1897 and 147 and 25,334 in 1896, respectively. The prevailing diseases were simple, continued and malarial fevers, rheumatic, bronchial, neuralgic, eye and ear affections and bowel complaints. Plague, which first broke out on 17th October 1897 in the railway chawls situated about one-third mile from the town, worked its way very slowly into the town, and by the end of April or rather the beginning of May 1898, it seemed to have got a firm hold of the town and prevailed in an epidemic form till about the middle of October 1898, when it subsided. From that time till the end of the year this disease prevailed in a sporadic form, and there were several badly affected cases imported from the neighbouring villages. During the year 1898 there were 3,435 cases with 2,900 deaths from plague, as compared with 41 cases and 39 deaths in 1897. Surgical operations numbered 429, against 780 in 1897 and 998 in 1896. The total number of *post-mortem* examinations was 16 and of medico-legal cases 32, against 13 and 52 in 1897 and 13 and 42 in 1896, respectively. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Surgeon-General with the Government of Bombay and the Civil Surgeon of Dhárwár. The total cost was Rs. 7,110-11-8 and the cost per patient Re. 0-7-2, against Rs. 7,883-14-2 and Re. 0-5-10 in 1897 and Rs. 8,353-6-8 and Re. 0-5-3 in 1896, respectively. Hospital stoppages amounted to Rs. 568, as compared with Rs. 1,240-12-0 in 1897 and Rs. 1,270-4-0 in 1896.

GADAG.—*In charge of* Second Class Hospital Assistant VISHNU NARAYEN, No. 171.

The building is in good repair. The dispensary committee visited the dispensary 6 times against 9 times in 1897 and 6 times in 1896. The sanitation of the town is fair. The water-supply is good and abundant. The total treated was 7,092 out-door and 62 in-door patients, against 6,301 and 64 in 1897 and 8,353 and 66 in 1896, respectively. The most common diseases were malarial fevers, worms and respiratory, eye and skin affections. There were cholera and plague epidemics during the year. The total number of surgical operations was 225, against 347 in 1897 and 674 in 1896. There were 18 *post-mortem* examinations performed, against 19 in 1897 and 23 in 1896. The dispensary was inspected by the Civil Surgeon, Dhárwár. The total cost was Rs. 2,027-15-0, against Rs. 3,599-8-1 in 1897 and Rs. 3,674-8-4 in 1896. The cost per patient was Re. 0-4-6, against Re. 0-9-1 in 1897 and Re. 0-7-0 in 1896. The amount collected on account of hospital stoppages was Rs. 109-5-0, against Rs. 145-15-0 in 1897 and Rs. 206-8-0 in 1896.

HAVERI.—*In charge of* Second Class Hospital Assistant D. NARAYANARAO, No. 110.

The dispensary building and out-houses are in a good state of repair. Stone paving has been made to the dispensary floor. New cots and chairs have been supplied. Clothing for in-patients is wanted. The committee visited the dispensary 9 times. The sanitary condition of the town is fair. The water-supply mainly from the tank is sufficient but not good. The total treated was 5,470 out-door and 24 in-door patients, as compared with 6,194 and 28 in 1897 and 7,532 and 12 in 1896, respectively. The most common diseases were worms, ague, conjunctivitis, skin diseases and local injuries. There were 198 cases of cholera with 100 deaths, 72 cases of small-pox with 7 deaths, and 3 imported fatal plague cases in the town. Cholera broke out in many villages of this táluka. Surgical operations numbered 60 against 54 and 121 in 1897 and 1896, respectively. There were 12 *post-mortem* examinations held and 6 medico-legal cases certified. Vaccination is conducted by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon of Dhárwár once in each year. The total cost was Rs. 1,586-6-7 and the cost per patient Re. 0-4-7, as compared with Rs. 1,193-7-6 and Re. 0-3-1 in 1897 and Rs. 1,224-2-1 and Re. 0-2-7 in 1896, respectively. The amount realised under the hospital stoppage rules was Rs. 52-1-0, against Rs. 33-15-0 in 1897 and Rs. 36-9-0 in 1896.

NAVALGUND.—*In charge of* First Class Hospital Assistant LUXMANRAO SAWANT, No. 55.

The building and out-houses are in a fair state of repair. The dispensary compound requires to be improved. The services of a bhangi or a Mahár are urgently required, both at the dispensary and the plague hospital. The dispensary was visited 9 times by the committee and twice by the President. The sanitation of the town is bad. The water-supply from two tanks

stored in rains is fairly good and sufficient, but subject to pollution. The total treated was 4,541 out-door and 14 in-door patients, against 4,540 and 34 in 1897 and 4,964 and 26 in 1896, respectively. The most common diseases were intestinal worms, itch, malarial fevers, ulcers and conjunctivitis. Cholera and plague were prevalent here and in the táluka. There were 200 surgical operations, against 336 in 1897 and 302 in 1896. *Post-mortem* examinations numbered 12, against 11 in 1897 and 12 in 1896. Opinion was given in 6 medico-legal cases, against 16 in 1897 and 10 in 1896. Vaccination is conducted by the Local Fund vaccinator. There were 352 primary and 30 re-vaccinations in 1898, against 424 and 13 in 1897 and 204 and *nil* in 1896, respectively. The dispensary was inspected by the Civil Surgeon, Dhárwár, in 1898 and 1897. The total cost was Rs. 1,354-7-0 and the cost per patient Re. 0-4-9, as compared with Rs. 1,663-12-4 and Re. 0-5-10 in 1897 and Rs. 1,500-7-7 and Re. 0-4-10 in 1896, respectively. Rs. 16-2-0 were hospital stoppages, against Rs. 21-1-0 in 1897 and Rs. 33-4-0 in 1896.

RA'NEBENNUR.—*In charge of* First Class Hospital Assistant VITHAL BHICAJI, No. 31.

The dispensary building with its out-houses is in good repair; a cook-room, two rooms for in-patients, quarters for servants and addition of three rooms to Hospital Assistant's quarters have been provided. Furniture is insufficient. The dispensary committee visited the dispensary eleven times against ten in 1897, and thirteen in 1896. The sanitary condition of the town is fair. The water-supply from tanks and wells is good, but scanty during the hot season. The total treated was 1 in-door and 7,987 out-door patients, as compared with 8,348 out-door in 1897 and 8,884 out-door in 1896. The prevailing diseases were worms, malarial fevers, bowel complaints and eye, skin and respiratory affections. Cholera broke out in March and disappeared in November, returning 65 attacks and 30 deaths. There were also 417 cases of small-pox with 32 deaths. Surgical operations numbered 165, against 172 in 1897 and 190 in 1896. There were 14 *post-mortem* examinations in 1897 and 6 in 1896. Vaccination is carried on by the táluka Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon, Dhárwár, once in every year. The total cost was Rs. 3,953-12-0, and the cost per patient Re. 0-7-11, against Rs. 1,711-10-9 and Re. 0-3-3 in 1897 and Rs. 1,260-7-5 and Re. 0-2-3 in 1896, respectively. The amount realized under the hospital stoppage rules was Rs. 80-9-0, against Rs. 36-4-0 in 1897 and Rs. 42-15-0 in 1896.

KALGHATGI.—*In charge of* Second Class Hospital Assistant RAMCHANDRA BALLAJI, No. 83.

The dispensary was opened on the 18th July 1896. The building, a new one, is in thorough repair. The dispensary was inspected by the Civil Surgeon, Dhárwár. The dispensary committee did not visit the dispensary since its re-opening on 6th September 1898. The sanitation of the town was fairly good. Water-supply is mainly obtainable from two tanks and two wells; that from tanks is liable to pollution. There were 8 in-door and 1,697 out-door patients, against 7 in-door and 4,185 out-door in 1897 and 3 in-door and 3,107 out-door in 1896. Malarial fevers, worms, skin, rheumatic and respiratory affections and bowel complaints were the prevailing diseases. Surgical operations numbered 6, as compared with 130 in 1897 and 71 in 1896. Five *post-mortem* examinations were held in 1897 and 3 in 1896. Vaccination is carried on by the Táluka Local Fund vaccinator. The amount of fees realized under the hospital stoppage rules was Rs. 7-15-0, against Rs. 18-9-0 in 1897 and Rs. 2 in 1896. The total cost was Rs. 640-15-3 and the cost per patient Re. 0-6-0, as compared with Rs. 1,345-5-7 and Re. 0-5-2 in 1897 and Rs. 273-7-9 and Re. 0-1-5 in 1896, respectively.

The dispensary was temporarily closed from 13th October 1897 to 5th September 1898.

NATIVE STATE DISPENSARY.

SA'VA'NUR.—*In charge of* First Class Hospital Assistant DATOO PANDURANG, No. 85.

The dispensary buildings and out-houses are in a fair state of repair. They are well ventilated and spacious, having wards for in-door patients. The dispensary committee meet every three months. The dispensary was visited twice by the Assistant Political Agent, Dhárwár, and inspected by the Civil Surgeon, Dhárwár, every year. The water-supply is good and sufficient. The sanitation of the town is fairly attended to. The total treated was 12,410 out-door and 3 in-door patients, against 11,943 and 9 in 1897 and 12,534 and 20 in 1896, respectively. The prevailing diseases were malarial fevers, worms, and diseases of the digestive system and skin. A few cases of cholera occurred in 1898. There were 118 surgical operations performed, against 116 in 1897 and 137 in 1896. Three *post-mortem* examinations were held in 1898 and 1 in 1896. Opinion in 2 medico-legal cases was given in 1898, and in 6 cases in 1897 and 1896 each. Vaccination is carried out by the Native State vaccinator. The total cost was Rs. 2,234-3-4 and the cost per patient Re. 0-2-11, against Rs. 2,734-10-1 and Re. 0-3-8 in 1897 and Rs. 2,311-8-2 and Re. 0-2-0 in 1896, respectively. The amount of hospital stoppages was Rs. 29-1-0, against Rs. 24-8-0 in 1897 and Rs. 28-1-0 in 1896.

BIJAPUR COLLECTORATE.

BIJA'PUR CIVIL HOSPITAL.—*In charge of* Assistant Surgeon J. F. GONSALVES, L.M.

Conservancy.—The extra-mural party of convicts have continued to be employed during the three years in extirpating prickly-pear bushes and the famine weed from Government land. It does not appear that private land-owners have done much in this respect.

There has been no change during these three years in the number of public latrines, of which there are 17 with 85 seats, which are scarcely adequate for such a scattered town like this. There is no organized halálkhor service. The municipal conservancy establishment has generally continued the same during the three years, *viz.* 12 halálkhors, 35 road-sweepers, 1 cart for night-soil, 1 for cesspools and 5 for street-sweepings.

Water-supply.—There has been no change during the three years. It is derived from the ancient water-works of Torvi and Begam tank, from draw-wells and also some step-wells. It is sufficient and good, except that from the step-wells.

Hospital buildings.—These are in good order, and there have been no additions or alterations during the three years. The dead-house requires some repairs.

General health.—There was cholera in this district and town in 1896 and in 1897, with 9,541 cases and 4,624 deaths and 8,309 cases and 3,992 deaths, respectively; only 3 fatal cases of sporadic cholera occurred in 1898 in the whole district. There was 1 death from small-pox in 1896, 13 in 1897 and 83 in 1898 in the whole district. There was no case of plague in 1896. One imported fatal case in the detention camp occurred in 1897, but in 1898 there were 1,351 attacks and 1,059 deaths for the whole district. This town continues free from this disease.

Attendance of patients.—158 in-patients and 4,069 out-patients were treated against 343 and 4,970 in 1897 and 327 and 7,076 in 1896, respectively.

Prevailing diseases.—Malarial fevers, ascaris lumbricoides, conjunctivitis, respiratory affections and diseases of the digestive system and skin.

Surgical operations.—136 surgical operations were performed against 205 in 1897 and 353 in 1896.

Mortality and its causes.—There were 15 deaths among in-patients against 34 in 1897 and 13 in 1896. The chief causes were dysentery, cholera, diarrhœa, pneumonia, phthisis pulmonalis and hemiplegia.

Vaccination.—This work is performed under the direction of the Sanitary Department.

Medico-legal cases.—There were 9 *post-mortem* examinations with 29 other medico-legal cases against 8 and 19 in 1897 and 9 and 21 in 1896, respectively.

Hospital stoppages.—Rs. 113-8-0 were realized in 1898 against Rs. 137-1-0 in 1897 and Rs. 67-10-0 in 1896.

Conduct of the establishment.—The conduct of the 1st and 2nd class establishment has been on the whole good. First Class Hospital Assistant Atmaram Tattiaji, No. 46, rendered very useful service.

Cost.—The total cost was Rs. 4,345-3-8 and the cost per patient Rs. 1-0-5 as compared with Rs. 4,550-11-4 and Re. 0-13-8 in 1897 and Rs. 3,502-12-1 and Re. 0-7-7 in 1896, respectively.

GRANT-IN-AID DISPENSARIES.

BA'GALKOT.—*In charge of* First Class Hospital Assistant DAJEE DHONDEO, No. 15.

The building continues in the same state as before. The sanitary condition of the town has a little improved and the number of scavengers and carts has been increased. The water-supply from the river Ghataprabha and wells is abundant and of good quality. The total treated was 6,285 out-door and 32 in-door patients as compared with 7,769 and 37 in 1897 and 13,460 and 41 in 1896, respectively. The prevailing diseases were malarial fevers, worms and diseases of the eye, digestive system and skin. Cholera gave 160 cases with 67 deaths in 1896 and 240 cases with 112 deaths in 1897. There were 217 surgical operations performed against 168 in 1897 and 317 in 1896. Ten *post-mortem* examinations were held against 11 in 1897 and 12 in 1896. Vaccination is carried on by a municipal vaccinator. The dispensary was visited by the Assistant Collector and inspected by the Civil Surgeon, Bijápur. The total cost was Rs. 2,258-10-4 and the cost per patient Re. 0-5-9 in 1898 as compared with Rs. 2,041-8-10 and Re. 0-4-2 in 1897 and Rs. 2,068-7-7 and Re. 0-2-5 in 1896, respectively. Rs. 14-6-0 were hospital stoppages against Rs. 9 in 1897 and Rs. 13-9-0 in 1896.

MUDDEBIHAL.—*In charge of* Second Class Hospital Assistant NARA'YEN VITHAL, No. 136.

The dispensary buildings are in a good state of repair. A female ward is necessarily required. The furniture and fittings are in good order and sufficient. The dispensary committee met only once in the month of October 1896. The dispensary was visited by the District Revenue Officers and by the Commissioner, Southern Division. The town, though fairly clean, requires a great deal of attention on the part of the Sanitary Committee. Public and private latrines require much improvement. Sweepings and refuse are removed and sold for agricultural purposes as usual. The water-supply from only three wells is of a fair quality and ample. One of the wells needs thorough repair and renewal. The general health of the town has been fairly good. Cholera broke out in the year 1896, giving 20 cases with 6 deaths in the town and 2,160 cases with 957 deaths in the táluka; there were 37 cases of cholera with 19 deaths in the town, and 1,363 with 604 deaths in the

táluka in the year 1897. In 1898 small-pox returned 70 cases with 5 deaths, and plague 61 cases with 54 deaths in the táluka. There were 2,714 out-door and 23 in-door patients treated as compared with 3,031 out-door and 45 in-door in 1897 and 2,913 out-door and 39 in-door in 1896. The prevailing diseases were malarial fevers, ascaris lumbricoides, rheumatic and skin affections, conjunctivitis and bowel complaints. Vaccination is carried out by the táluka vaccinator. Surgical operations numbered 100 as compared with 70 in 1897 and 64 in 1896. Six *post-mortem* examinations were made and 7 medico-legal cases reported upon against 5 and 14 in 1897 and 3 and 19 in 1896, respectively. The dispensary was inspected by the Civil Surgeon, Bijápur, every year, and by the Deputy Sanitary Commissioner, S. R. D., in 1897. Hospital stoppages amounted to Rs. 25-10-0 against Rs. 42 in 1897 and Rs. 53-11-0 in 1896. The total cost was Rs. 1,080-7-6 and the cost per patient Re. 0-6-4 against Rs. 1,246-10-0 and Re. 0-6-6 in 1897 and Rs. 1,029-13-5 and Re. 0-5-7, in 1896, respectively.

BÁGEWÁDI.—*In charge of* Third Class Hospital Assistant HARI SHRINIVAS BICHU, No. 224.

The dispensary building is in good order. A cupboard for the safe custody of poisons and some warm clothing are required. The committee visited the dispensary five times. The sanitary committee looks after the town. The sanitation is far from satisfactory. There are no public latrines and the people resort to open places around the town for the purposes of nature. The water-supply is from wells and a tank. There were 33 in-door and 3,840 out-door patients treated as compared with 38 in-door and 4,359 out-door in 1897 and 36 in-door and 4,356 out-door in 1896. Intestinal worms, conjunctivitis, malarial fevers and ulcers were the most common complaints. Small-pox gave 13 cases with 2 deaths in the táluka. There were 126 surgical operations performed against 145 in 1897 and 209 in 1896. *Post-mortem* examinations numbered 8 each in 1898 and 1896, and 10 in 1897. Opinion was given in 41 medico-legal cases against 21 in 1897 and 34 in 1896. Vaccination is carried on by two Local Fund vaccinators. The dispensary was inspected by the Civil Surgeon of Bijápur. The total cost was Rs. 1,192-5-5 and the cost per patient Re. 0-4-11 as compared with Rs. 988-6-8 and Re. 0-3-7 in 1897 and Rs. 837-11-10 and Re. 0-3-1 in 1896, respectively. Hospital stoppages amounted to Rs. 13-9-0 against Rs. 19-8-0 in 1897 and Rs. 15-13-0 in 1896.

SINDGI.—*In charge of* Second Class Hospital Assistant NARAYAN DHONDEO, No. 155.

The buildings are in good repair. The want of a well in or near the dispensary compound is greatly felt. Furniture and fittings are sufficient. The committee visited the dispensary twice. The sanitary committee looks after the conservancy of the town. The water-supply is chiefly from wells. There were 12 in-door and 1,168 out-door patients treated against 21 and 2,126 in 1897 and 41 and 2,269 in 1896, respectively. The prevailing diseases were worms, conjunctivitis, malarial fevers and skin affections. Small-pox gave 43 cases with 3 deaths in the táluka. Surgical operations numbered 16, or 14 and 43 less than in 1897 and 1896, respectively. There were 3 *post-mortem* examinations held against 2 in 1897 and 7 in 1896. Opinion was given in 35 medico-legal cases as compared with 7 in 1897 and 27 in 1896. Vaccination is carried on by the Táluka Local Fund vaccinator. The District Deputy Collector of Bijápur inspected the dispensary. The total cost was Rs. 1,276-13-2 and the cost per patient Re. 1-1-4 against Rs. 1,020-8-6 and Re. 0-7-7 in 1897 and Rs. 828-15-0 and Re. 0-5-9 in 1896, respectively. A sum of Rs. 1-6-0 was realized in each of the years 1898 and 1897 under the hospital stoppage system and Rs. 3-5-0 in 1896.

INDI.—*In charge of* Second Class Hospital Assistant GOVIND JANARDHAN, No. 193.

The dispensary buildings are in a good state of repair. Latrines for in-door patients require renewal. The committee visited the dispensary twice. Conservancy is fairly attended to. Water-supply from wells and canal is good and abundant, but the former source is liable to pollution. There were 35 in-door and 3,923 out-door patients treated as compared with 31 in-door and 4,898 out-door in 1897 and 25 in-door and 6,444 out-door in 1896. The principal diseases were intestinal worms, conjunctivitis, malarial fevers and bowel complaints. Small-pox gave 53 cases with 4 deaths in the town and 420 cases with 26 deaths in the táluka. Seven cases of plague occurred, and they ended fatally. There were 76 surgical operations performed against 102 in 1897 and 211 in 1896. Five *post-mortem* examinations were made and 38 medico-legal cases certified as compared with 3 and 11 in 1897 and 2 and 23 in 1896, respectively. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Bijápur. The total cost was Rs. 1,473-2-2 and the cost per patient Re. 0-5-11 against Rs. 946-12-6 and Re. 0-3-1 in 1897 and Rs. 1,117-11-2 and Re. 0-2-9 in 1896, respectively. Rs. 11-15-0 were hospital stoppages as compared with Rs. 12-12-0 in 1897 and Rs. 6-10-0 in 1896.

GULEDGUDD.—*In charge of* Third Class Hospital Assistant WAMAN KASINATH GOGATE, No. 247.

The dispensary was opened on 1st February 1897, but had to be temporarily closed up to 1st June 1898, as the Hospital Assistant in charge was ordered on plague duty at Sholápur. The building, a hired one, is quite unsuitable for dispensary purposes. A site for a new building to be erected on the standard plan has been selected, but considering the present state of the

municipal funds, it is not likely that this scheme will be carried out for some years to come. Furniture is sufficient and in good order. The committee visited the dispensary three times. Conservancy is not so satisfactory as it should be. Water-supply from a canal, running to the south of the town, is scanty during the hot season and liable to pollution. The total number treated was 29 in-door and 2,203 out-door patients. The prevailing diseases were malarial fevers, conjunctivitis, intestinal worms, bowel complaints and skin affections. Plague broke out in the vicinity of the town. There were 131 surgical operations performed. Three *post-mortem* examinations were held, and opinion was given in 26 medico-legal cases. Vaccination is carried on by the Badámi táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Bijápur on 8th November 1898. The total cost was Rs. 1,084 and the cost per patient Re. 0-7-9. The sum collected under the hospital stoppage system was Rs. 9-3-0.

KOLHA'PUR AND SOUTHERN MARA'THA COUNTRY.

NATIVE STATE INSTITUTIONS.

ALBERT EDWARD HOSPITAL, KOLHÁPUR.—*In charge of* Darbár Surgeon GEORGE SINCLAIR.

Conservancy.—Receives due attention and is more satisfactory than in former years.

Water-supply.—Amply sufficient in quantity and of good quality.

Hospital buildings.—A handsome structure, commodious and excellent in every respect.

General health.—Cholera and epidemic diarrhœa prevailed in Kolhápur and districts in 1896. Cholera prevailed in districts alone in 1897. During 1898 the general health of the town and districts was remarkably good.

Attendance of patients.—1,338 in-door and 36,143 out-door patients were treated against 1,837 and 37,139 in 1897 and 1,774 and 43,587 in 1896, respectively.

Prevailing diseases.—Respiratory affections, bowel complaints, fevers and affections of the eye and skin.

Surgical operations.—1,877 against 2,620 in 1897 and 3,525 in 1896.

Mortality.—There were 35 deaths as compared with 142 in 1897 and 92 in 1896.

Vaccination—Continues to receive every attention.

Medico-legal cases.—432 cases were referred for report and 80 *post-mortem* examinations held at the request of the Police.

Conduct of the establishment.—Satisfactory in all respects.

Cost.—The total cost was Rs. 24,302 and the cost per patient Re. 0-10-5 as compared with Rs. 24,512-6-0 and Re. 0-10-1 in 1897 and Rs. 22,250-9-0 and Re. 0-7-10 in 1896, respectively.

PRINCE OF WALES' HOSPITAL, JAMKHANDI.—*In charge of* Mr. VISHNU R. KIRLOSKAR, L.M. & S.

Conservancy—Is well attended to by the town municipality.

Water-supply—Is good and abundant.

Hospital buildings.—Good and well furnished.

General health—Has been, on the whole, good. Small-pox and measles were epidemic in the town and its vicinity.

Attendance of patients.—55 in-door and 16,786½ out-door patients as compared with 74 in-door and 19,342 out-door in 1897 and 46 in-door and 19,188 out-door in 1896.

Prevailing diseases.—Malarial fevers, intestinal worms, diarrhœa, dysentery and rheumatic, bronchial, eye, ear and skin affections.

Surgical operations.—780 were performed against 712 in 1897 and 638 in 1896.

Mortality.—There were 3 deaths in hospital as compared with 8 in 1897 and 5 in 1896.

Vaccination—Is managed by a separate department of the State.

Medico-legal cases.— Four *post-mortem* examinations were held and 40 medico-legal cases reported on, against 1 and 41 in 1897 and 5 and 40 in 1896, respectively.

Inspection.—By the Political Agent of Kolhápur and Southern Marátha Country and by the Administrator of the State.

Conduct of establishment—Was satisfactory. The medical subordinate and the compounders have discharged their duties efficiently and with zeal and ability.

Cost.—The total cost was Rs. 7,249-7-9 and the cost per patient Re. 0-5-2 as compared with Rs. 7,380-11-3 and Re. 0-6-1 in 1897 and Rs. 7,445-7-4 and Re. 0-6-2 in 1896, respectively.

NATIVE STATE DISPENSARIES.

KOLHA'PUR CITY DISPENSARY.—*In charge of* Mr. MARUTI NANA CHAVAN.

The dispensary since its opening has been located in a portion of the State building called Nagpurkar's Wada, where the lower portion of the Rájárám High School is located. The portion allotted for the dispensary is very small and quite unsuitable for the purpose. There are neither accommodation for in-patients, nor quarters for the first and second class servants. Furniture and fittings are in good order. There is no dispensary committee. Conservancy is well carried out by the municipality. Surface drainage works are in progress. The water-supply from the Kalamba tank is good and abundant. The total number of out-door patients treated was 27,595, as compared with 25,861 in 1897 and 26,133 in 1896. The most common diseases were malarial fevers, worms and diseases of the digestive and respiratory systems, eye and skin. There were 828 surgical operations performed, against 795 in 1897 and 651 in 1896. The Darbár Surgeon of Kolhápur inspected the dispensary in 1896 and 1897, and paid two visits in 1898. The total cost was Rs. 2 007-4-10 and the cost per patient Re. 0-1-1, as compared with Rs. 1,917-4-2 and Re. 0-1-2 in 1897 and Rs. 1,732-3-5 and Re. 0-1-1 in 1896, respectively.

GAD-HINGLAJ.—*In charge of* Mr. K. B. LIKTAY.

The dispensary building and the quarters of the first and second class servants are suitable and in good repair. The furniture and fittings are sufficient and in good order. The dispensary is often visited by the Kolhápur State officials and inspected every year by the Darbár Surgeon, Kolhápur. The sanitary condition of the town is well looked after. The water-supply is insufficient and of inferior quality, especially in the hot season. The total treated was 10,559 out-door and 30 in-door patients, against 11,525 and 22 in 1897 and 11,431 and 36 in 1896, respectively. The prevailing diseases were malarial fevers, diseases of the eye, ear and nervous and respiratory systems and bowel complaints. There were 295 surgical operations performed, as compared with 366 in 1897 and 323 in 1896. Plague broke out in a mild form in the surrounding villages of the town during 1898, and cholera in the town and the district in 1897 and 1896. Vaccination is carried out by the State vaccinator. Fifteen *post-mortem* examinations were held, and opinion was given in 47 medico-legal cases, against 13 and 32 in 1897 and 12 and 45 in 1896, respectively. The conduct of the second class establishment is fair on the whole. The total cost was Rs. 1,358-9-2 and the cost per patient Re. 0-2-1, against Rs. 1,517-15-2 and Re. 0-2-1 in 1897, and Rs. 1,395-1-0 and Re. 0-1-11 in 1896, respectively.

MALKA'PUR.—*In charge of* Mr. R. G. PITKAR.

The dispensary building is convenient and in good repair. The erection of servants' quarters is under consideration. The furniture and fittings are complete and in good order. The sanitation of the town is well looked after. The water-supply from the river Shali is good throughout the year, except during the summer, when it is scanty. Three wells have been dug by the municipality since the last famine, and are provided with windlasses for raising up water. It is hoped that this new work will give an ample and good supply of water in the hot weather. There were 28 in-door and 8,548 out-door patients treated, against 27 and 9,161 in 1897 and 27 and 8,817 in 1896, respectively. The prevailing diseases were malarial fevers, animal parasites, diseases of the eye, skin and nervous system and bowel complaints. In 1896 and 1897 cholera prevailed in the town and the surrounding district, returning 114 attacks and 57 deaths in 1896 and 376 cases and 200 deaths in 1897. There were 210 surgical operations performed, against 247 in 1897 and 150 in 1896. One *post-mortem* examination was made and opinion given in 4 medico-legal cases, as compared with 5 and 9 in 1897 and *nil* and 5 in 1896, respectively. The Darbár Surgeon of Kolhápur inspected the dispensary. Vaccination is carried on by the State vaccinator. The total cost was Rs. 1,281-12-0 and the cost per patient Re. 0-2-4, as compared with Rs. 1,277-6-6 and Re. 0-2-2 in 1897 and Rs. 1,384-11-3 and Re. 0-2-6 in 1896, respectively.

JAYASINGRAO DISPENSARY, KA'GAL.—*In charge of* Mr. NARSU LINGU DAGEY.

Conservancy is well attended to. Water-supply is good and abundant. The dispensary building is quite suitable for the purpose, and is situated in a convenient locality and in good repair, but a dead-house is needed. Furniture and fittings are sufficient and in good order.

There were 14 in-door and 6,529 out-door patients treated, as compared with 6 and 6,055 in 1897 and 2 and 7,109 in 1896, respectively. The prevailing diseases were ague, bronchitis, intestinal worms, dyspepsia and eye and skin affections. Measles and small-pox prevailed in a mild form in 1896, and the former also in 1898. Cholera gave 771 cases with 265 deaths in 1897, and 481 cases with 202 deaths in 1896. There were 148 surgical operations performed, against 57 in 1897 and 95 in 1896. Opinion was given in 7 medico-legal cases, and 3 *post-mortem* examinations were held. The dispensary was inspected by the Darbár Surgeon of Kolhápur. Vaccination is performed by the State vaccinator. The total cost was Rs. 1,770-14-3 and the cost per patient Re. 0-4-4, as compared with Rs. 1,661-7-10 and Re. 0-4-5 in 1897 and Rs. 1,483-6-6 and Re. 0-3-4 in 1896, respectively.

AJRA.—*In charge of* Mr. G. G. MAJGAOKAR.

The dispensary building is in good repair and suitable for the purpose. The furniture and fittings are sufficient and in good order. There is no dispensary committee, but the State officials visit the dispensary frequently. The sanitary and conservancy arrangements are not satisfactory, there being no municipal committee. The water-supply from wells is good and abundant, but liable to contamination by soakage. The total treated was 4,427 out-door and 10 in-door patients, as compared with 5,293 and 10 in 1897 and 5,414 and 9 in 1896, respectively. The most common diseases were malarial fevers, intestinal worms, eye, skin, rheumatic and respiratory affections, bowel complaints and local injuries. There were 96 surgical operations performed. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Kárbhári of the Ichalkaranji State. The total cost was Rs. 1,295-5-10 and the cost per patient Re. 0-3-0, as compared with Rs. 1,216-12-5 and Re. 0-3-1 in 1897 and Rs. 1,038-10-0 and Re. 0-3-1 in 1896, respectively.

GARGOTI.—*In charge of* Mr. S. B. VAKHA'RKAR.

Conservancy is well attended to. Water-supply is abundant and of fair quality. The dispensary building is well situated and commodious. Latrines are under construction. Furniture and fittings are sufficient and in good order. The total treated was 10,191 out-door and 15 in-door patients, as compared with 9,004 out-door and 7 in-door in 1897 and 9,836 out-door and 20 in-door in 1896. The prevailing diseases were malarial fevers, intestinal worms, eye, skin and respiratory affections, bowel complaints and local injuries. Cholera broke out in a virulent form in the station and its adjoining villages in the year 1897 and only in adjoining villages in the year 1896. There were 288 surgical operations performed, as compared with 204 in 1897 and 206 in 1896. Four *post-mortem* examinations were held, against 2 in 1897 and 6 in 1896. Opinion was given in 13 medico-legal cases, against 7 in 1897 and 5 in 1896. The Darbár Surgeon of Kolhápur inspected the dispensary once in each year. Vaccination is carried out by the State vaccinator. The total cost was Rs. 1,135-1-7 and the cost per patient Re. 0-1-9, as compared with Rs. 1,018-4-10 and Re. 0-1-9 in 1897 and Rs. 1,173-0-7 and Re. 0-1-10 in 1896, respectively.

RAYBAG.—*In charge of* Mr. SITARA'M BALKRISHNA BHAGVAT.

The dispensary building is in good repair. Furniture and fittings are sufficient and in good order. Conservancy is fairly attended to. Water-supply is good and abundant. There is no dispensary committee, but the State officials visit the dispensary often. The total number of patients treated was 14 in-door and 5,125 out-door, as compared with 5 in-door and 5,500 out-door in 1897 and 2 in-door and 5,940 out-door in 1896. Malarial fevers, worms, scabies, eye affections and bowel complaints were the most common diseases. Cholera prevailed in 1897 and 1896. There were 328 surgical operations performed against 327 in 1897 and 346 in 1896. Medico-legal cases numbered 12, or 3 and 1, respectively, less than in 1897 and 1896. Three *post-mortem* examinations were held against 8 in 1897 and 2 in 1896. Vaccination is carried on by the station vaccinator. The dispensary was inspected by the Darbár Surgeon of Kolhápur. The total cost was Rs. 1,212-8-11 and the cost per patient Re. 0-3-6, as compared with Rs. 1,191-6-4 and Re. 0-3-3 in 1897 and Rs. 1,171-14-7 and Re. 0-3-1 in 1896, respectively.

SHIROL.—*In charge of* Mr. D. R. SATHE.

The conservancy of the town has been good and well looked after by the town municipality. The water supply from a well and the river Panchganga, which is one mile distant from the town, is good and abundant. The dispensary buildings are suitable for the purpose and in a good state of repair. The furniture and fittings are sufficient and in good order. There is no dispensary committee, but the Kolhápur State officials visit the dispensary frequently. The total treated was 6,953 out-door and 17 in-door patients, as compared with 7,221 and 19 in 1897 and 8,437 and 16 in 1896, respectively. The most common diseases were malarial fevers, worms, rheumatism, and diseases of respiratory and digestive systems and skin. The Darbár Surgeon of Kolhápur inspected the dispensary in 1897 and 1896. There were 17 *post-mortem* examinations made against 7 in 1897 and 10 in 1896. The total number of surgical operations performed was 297 against 242 in 1897 and 284 in 1896. The vaccination is carried out by the State vaccinator. The total cost was Rs. 1,351-9-2 and the cost per patient Re. 0-3-1, as compared with Rs. 1,330-3-6 and Re. 0-2-11 in 1897 and Rs. 1,275-6-0 and Re. 0-2-5 in 1896, respectively.

KATKOL.—*In charge of* Mr. GOVIND KONDO.

The dispensary building is suitable and in good repair. The furniture and fittings are in good order. There is no dispensary committee, but the State officials visit the dispensary frequently. The sanitary and conservancy arrangements are well attended to. Water-supply is good and abundant. The total treated was 6,053 out-door and 7 in-door patients, as compared with 5,985 and 12 in 1897 and 6,315 and 14 in 1896, respectively. The most common diseases were malarial fevers, worms, diseases of the eye and digestive system, bronchitis, skin affections and local injuries. There were 279 surgical operations performed against 360 in 1897 and 423 in 1896. Five dead bodies were examined and opinion was given in 20 medico-legal cases against 4 and 23 in 1897 and 1 and 27 in 1896, respectively. Vaccination is carried out by the State vaccinator. The Darbár Surgeon, Kolhápur, inspected the dispensary in 1896 and 1897. The

total cost was Rs. 1,274-12-5 and the cost per patient Re. 0-3-4 against Rs. 946-1-3 and Re. 0-2-6 in 1897 and Rs. 1,038-15-10 and Re. 0-2-7 in 1896, respectively.

ICHALKARANJI.—*In charge of* Mr. L. J. PHALINKAR.

The dispensary building with out-houses for the medical officers and servants answers the purpose very well. Furniture and fittings are sufficient and in good order. There is no dispensary committee, but the State officials visit the dispensary occasionally. Sanitary and conservancy arrangements are good. Water-supply from the river Panchganga is good and abundant. The total number of out-door patients treated was 10,831, as compared with 9,592 in 1897 and 10,300 in 1896. There were 6 in-door patients against 10 in 1897 and 11 in 1896. The most common diseases were malarial fevers, ophthalmia, and diseases of the respiratory and digestive systems and skin. Plague broke out on 15th November 1898 in Lát, a village in the Ichalkaranji Táluka, returning 28 cases with 23 deaths at the end of the year. There were 400 surgical operations performed as compared with 250 in 1897 and 347 in 1896. Vaccination is performed by the State vaccinator. The Darbár Surgeon, Kolhápur, inspected the dispensary during the years 1896 and 1897. Opinion was given in 4 medico-legal cases against 1 in 1897 and 3 in 1896. *Post-mortem* examinations numbered 4 in 1898 and 3 in 1896. The total cost was Rs. 1,428-9-9 and the cost per patient Re. 0-2-1, as compared with Rs. 1,389-0-9 and Re. 0-2-3 in 1897 and Rs. 1,536-11-8 and Re. 0-2-1 in 1896, respectively.

VADGAON.—*In charge of* Mr. N. R. RANADE.

Furniture and fittings are sufficient. The dispensary is still located in an old wáda, which is quite useless for the purpose. There is no dead-house. A new building is essentially required. The municipality looks to the sanitation and conservancy of the town. Water-supply from a tank situated to the south of the town is sufficient, except that during the summer it is scanty. A new tank is under construction. The most common diseases were eye, ear, skin, rheumatic and syphilitic affections, dysentery, intestinal worms, and diseases of the digestive system. There were 5,805 out-door patients treated as compared with 7,957 in 1897 and 7,982 in 1896. There were 241 surgical operations performed as compared with 209 in 1897 and 268 in 1896. Twelve *post-mortem* examinations were made against 6 each in 1897 and 1896. Opinion was given in 18 medico-legal cases against 11 in 1897 and 9 in 1896. Vaccination is conducted by the State vaccinator. The Darbár Surgeon, Kolhápur, inspected the dispensary in 1897 and 1896. The total cost was Rs. 1,250-2-11 and the cost per patient Re. 0-3-5, as compared with Rs. 1,322-1-2 and Re. 0-2-4 in 1897 and Rs. 1,329-12-11 and Re. 0-2-7 in 1896, respectively.

KÁPSHI.—*In charge of* Mr. VAMAN VITHAL HEBALKAR.

The dispensary building is in good repair. Furniture and fittings are sufficient and in good order. Conservancy arrangements are not satisfactory. Water-supply is good and abundant. There were 7 in-door and 7,929 out-door patients treated against 6 and 7,409 in 1897 and 9 and 7,451 in 1896, respectively. The prevailing diseases were dysentery, malarial fevers, intestinal worms, bowel complaints and skin, eye, rheumatic and respiratory affections. Cholera prevailed in 1897 and 1896. Surgical operations numbered 135, or 28 and 104, respectively, less than in 1897 and 1896. There were 3 *post-mortem* examinations held against 10 in 1897 and 2 in 1896. Seven medico-legal cases were certified, against 11 each in 1897 and 1896. Vaccination is carried on by the petha vaccinator. The total cost was Rs. 931-5-8 and the cost per patient Re. 0-1-10, as compared with Rs. 830-5-9 and Re. 0-1-9 in 1897 and Rs. 901-5-7 and Re. 0-1-11 in 1896, respectively.

PANHA'LA.—*In charge of* Mr. GOPAL DHONDJI SAKPAL.

The dispensary building is in good repair. Furniture and fittings are sufficient and in good order. The sanitary condition of the town is good, and the water-supply from a well and a spring good and sufficient. There were 27 in-door and 7,759 out-door patients treated, against 14 in-door and 8,572 out-door in 1897 and 15 in-door and 8,435 out-door in 1896. Malarial fevers, diseases of the respiratory and digestive systems, eye and skin and intestinal worms were the most common complaints. Cholera prevailed in 1897 and 1896. There were 135 surgical operations performed against 250 in 1897 and 200 in 1896. Medico-legal cases numbered 27 and *post-mortem* examinations 5, as compared with 20 and 6 in 1897 and 10 and 2 in 1896, respectively. Vaccination is performed by the petha vaccinator. The total cost was Rs. 1,214-8-7 and the cost per patient Re. 0-2-5, as compared with Rs. 1,324-9-10 and Re. 0-2-5 in 1897 and Rs. 1,229-12-5 and Re. 0-2-3 in 1896, respectively.

UMDI.—*In charge of* Mr. GOVIND GOPAL.

The dispensary is located in a chávdi which is suitable for out-door patients only. The construction of the new dispensary building will be completed in a year or two. Furniture and fittings are in good order. Conservancy is well looked after. The water-supply from wells and a brook is good and abundant. There were 3,046 out-door patients treated against 3,283 in 1897 and 3,706 in 1896. Malarial and simple continued fevers, intestinal worms, bowel complaints and eye and skin affections were the prevailing diseases. Plague broke out in the village Belondgi, about 5 miles distant, on the 10th October 1898. There were 13 surgical operations performed against 33 in 1897 and 67 in 1896. The number of *post-mortem* examinations was

3 and of medico-legal cases 16, as compared with *nil* and 3 in 1897 and 2 and 6 in 1896, respectively. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Administrator and the Mámledár of Jath. The total cost was Rs. 927-15-0 and the cost per patient Re. 0-4-10 against Rs. 974-9-2 and Re. 0-4-9 in 1897 and Rs. 682-9-0 and Re. 0-2-11 in 1896, respectively.

JATH.—*In charge of* Mr. NARAYAN S. VAIDYA.

The dispensary building is situated to the western side of, but not far from, the town on a high level. Furniture is sufficient. Conservancy arrangements are good, and the water-supply from wells and a brook which flows through the centre of the town is good and abundant. There were 5,926 out-door patients treated, as compared with 8,466 in 1897 and 11,814 in 1896. The most common complaints were malarial fevers, and diseases of the digestive and respiratory systems, eye, ear and skin. The number of surgical operations performed was 55 against 58 in 1897 and 60 in 1896. There were 5 *post-mortem* examinations held and 11 medico-legal cases certified, as compared with 6 and 16 in 1897 and 2 and 17 in 1896, respectively. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Assistant Political Agent, Southern Marátha Country. The total cost was Rs. 1,354-13-4 and the cost per patient Re. 0-3-7 against Rs. 1,280-3-0 and Re. 0-2-5 in 1897 and Rs. 2,134-3-0 and Re. 0-2-1 in 1896, respectively.

MIRAJ.—*In charge of* Mr. P. M. KADAM.

The dispensary buildings are in good repair. In honour of the commemeration of the Diamond Jubilee of Her Gracious Majesty the Queen-Empress, new buildings have been erected by His Highness the Chief of Miraj, consisting of two spacious and well ventilated halls—the one serving as a compounding room and the other as an operating room, and three wards for patients with 3 opposite rooms as well as three cook-rooms for their attendants. Furniture is sufficient and in good order. The conservancy arrangements of the town are satisfactory. Water-supply is pure and plentiful. There were 37 in-door and 16,119 out-door patients treated, as compared with 55 and 16,930 in 1897 and 79 and 21,401 in 1896, respectively. The prevailing diseases were malarial fevers, round worms, conjunctivitis, skin and respiratory affections and bowel complaints. Plague broke out in September 1898. There were 8 surgical operations performed against 417 in 1897 and 563 in 1896. The number of medico-legal cases was 74 and of *post-mortem* examinations 6, as compared with 94 and 4 in 1897 and 54 and 5 in 1896, respectively. Vaccination is carried on by the State vaccinator. The total cost was Rs. 3,728-9-4 and the cost per patient Re. 0-3-8, against Rs. 4,541-0-3 and Re. 0-4-3 in 1897 and Rs. 2,965-0-0 and Re. 0-2-2 in 1896, respectively.

LAKSHMESHVAR.—*In charge of* Mr. SHANKAR AMRUT JOSHI.

The dispensary buildings are in good repair and furniture and fittings sufficient. Conservancy is looked after by the municipality. Water-supply is sufficient. There were 5 in-door and 6,712 out-door patients treated against 13 in-door and 7,188 out-door in 1897 and 8 in-door and 9,535 out-door in 1896. Malarial fevers, worms and diseases of the eye, ear, skin, and digestive system were the most common complaints. Small-pox and cholera prevailed to some extent in the town and its vicinity. The total number of surgical operations was 110, as compared with 181 in 1897 and 240 in 1896. Opinion was given in 6 medico-legal cases against 10 in 1897 and 7 in 1896. Vaccination is performed by the State vaccinator. The dispensary was visited by the Deputy Educational Inspector of Dhárwár and inspected by the Náib Kárbhári of Sángli. The total cost was Rs. 1,478-7-9 and the cost per patient Re. 0-3-6 as compared with Rs. 1,518-9-9 and Re. 0-3-4 in 1897 and Rs. 1,383-3-10 and Re. 0-2-3 in 1896, respectively.

GADGERI.—*In charge of* Mr. VAMAN VINAYAK GOKHALE.

The dispensary building is in excellent state. Furniture and fittings are sufficient and in good order. The conservancy arrangements are fairly satisfactory. Water-supply from wells and tanks is scanty during the hot season. There were 4,326 out-door patients treated against 3,822 in 1897 and 4,079 in 1896. The prevailing diseases were ague, worms, eye and skin affections and bowel complaints. Since November 1898 there had been 5 cases of cholera and 13 of plague in the town. The number of surgical operations performed was 35 against 31 in 1897 and 17 in 1896. There were 2 *post-mortem* examinations held in 1898 and in 1897. Opinion was given in 15 medico-legal cases against 12 in 1897 and 18 in 1896. Vaccination is carried on by the State vaccinator. The total cost was Rs. 1,080-4-6 and the cost per patient Re. 0-3-11 as compared with Rs. 1,137-5-1 and Re. 0-4-9 in 1897 and Rs. 1,058-7-5 and Re. 0-4-2 in 1896, respectively.

BUDHGAON.—*In charge of* Mr. SAKHARAM R. BABREKAR.

The dispensary buildings are in an excellent state of repair, and were disinfected and whitewashed four times on account of the plague epidemic which prevailed from August to November 1898. Furniture and fittings are sufficient. Water-supply is good and plentiful. There were 2,456 out-door patients treated as compared with 4,720 in 1897 and 7,651 in 1896. Worms, eye, respiratory and skin affections and bowel complaints were the prevailing diseases.

There were 72 surgical operations performed against 90 in 1897 and 114 in 1896. One *post-mortem* examination was held, and opinion given in 3 medico-legal cases. Vaccination is carried out by a separate department of the State. The total cost was Rs. 1,674-8-9 and the cost per patient Re. 0-10-8 as compared with Rs. 1,307-9-8 and Re 0-4-5 in 1897 and Rs. 1,391-13-8 and Re. 0-2-0 in 1896, respectively.

MODNIMB.—*In charge of* Mr. SHIVRAM LINGUJI.

The dispensary buildings are in good repair; furniture and fittings sufficient. The town is kept clean and the water-supply sufficient. The total treated was 7 in-door and 5,157 out-door patients as compared with 6 in-door and 5,658 out-door in 1897 and 14 in-door and 6,109 out-door in 1896. The prevailing diseases were malarial fevers, conjunctivitis, worms, stomach and bowel complaints and skin affections. Plague broke out at Hewra, a village 11 miles off Modnimb, giving 33 cases with 12 deaths. Surgical operations numbered 201 against 179 in 1897 and 146 in 1896. There were 8 medico-legal cases against 5 in 1897 and 6 in 1896. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the State officials every year. The total cost was Rs. 944-2-6 and the cost per patient Re. 0-2-11 as compared with Rs. 1,247-12-11 and Re. 0-3-2 in 1897 and Rs. 1,224-2-9 and Re. 0-3-4 in 1896, respectively.

MUDHOL.—*In charge of* Mr. S. C. PASCAL, L.M. & S.

The dispensary building is in good repair and quite suitable for the purpose. It is situated in a convenient and healthy locality. Furniture and fittings are sufficient and in good condition. The dispensary was visited by the Political Agent of Kolhápur and Southern Marátha Country in 1897, and inspected by the Darbár Surgeon of Kolhápur in 1896 and 1897. Conservancy of the town is well attended to; the water-supply is good and abundant. The total number of patients treated was 7 in-door and 13,907 out-door as compared with 8 in-door and 13,892 out-door in 1897 and 4 in-door and 14,761 out-door in 1896. The most common diseases were malarial fevers, intestinal worms, conjunctivitis and respiratory, bowel and skin affections. There were 204 surgical operations performed against 219 in 1897 and 242 in 1896. The total number of medico-legal cases was 2 and of *post-mortem* examinations 5, as compared with 15 and 10 in 1897 and 7 and 2 in 1896, respectively. Vaccination is carried on by the State vaccinator. The total cost was Rs. 4,241-1-6 and the cost per patient Re. 0-4-10 against Rs. 4,156-12-3 and Re. 0-4-9 in 1897 and Rs. 4,822-10-11 and Re. 0-5-2 in 1896, respectively.

MAHA'LINGPUR.—*In charge of* Mr. NARAYAN KRISHNA SHIROL.

The dispensary building is in good repair and quite suitable for the purpose, and is situated in a convenient and healthy locality. Furniture and fittings are sufficient and in good condition. The dispensary was inspected by the Chief Medical Officer of Mudhol and the Darbár Surgeon of Kolhápur in 1896, and was visited by the Chief of Kurundvád in 1898. Conservancy of the town is well attended to; and water-supply good and abundant. The total number of out-door patients treated was 6,884 as compared with 7,136 in 1897 and 7,526 in 1896. The most common diseases were malarial fevers, intestinal worms, conjunctivitis, skin, rheumatic and respiratory affections and bowel complaints. There were 149 surgical operations performed against 127 in 1897 and 137 in 1896. Vaccination is performed by the State vaccinator. The total cost was Rs. 859-9-2 and the cost per patient Re. 0-2-0 as compared with Rs. 916-5-3 and Re. 0-2-0 in 1897 and Rs. 1,048 and Re. 0-2-3 in 1896, respectively.

RA'MDURG.—*In charge of* Mr. VASUDEV C. CHHATRE.

The dispensary buildings are in good repair, and furniture and fittings sufficient. The dispensary was often visited by the State Kárbhári of Rámdurg. Conservancy needs improvements. Water-supply is good and abundant, but liable to pollution. There were 17 in-door and 7,099 out-door patients treated as compared with 19 in-door and 6,928 out-door in 1897 and 22 in-door and 6,946 out-door in 1896. Malarial fevers, round worms, bronchitis, rheumatic affections, dyspepsia and conjunctivitis were the most common complaints. Small-pox, chicken-pox, cholera and plague prevailed during the year. Surgical operations numbered 375, against 521 in 1897 and 250 in 1896. There were 5 *post-mortem* examinations held in 1898 and 3 each in 1897 and 1896. The total number of medico-legal cases was 12 against 20 in 1897 and 28 in 1896. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Assistant Political Agent, Southern Mahrátta Country. The total cost was Rs. 2,754-4-11 and the cost per patient Re. 0-6-2 as compared with Rs. 2,069-10-9 and Re. 0-6-10 in 1897 and Rs. 2,554-4-2 and Re. 0-5-10 in 1896, respectively.

SUREBAN.—*In charge of* Mr. POCHUTTEE HIRAPPA.

The dispensary is located in an old chávdi, which is in good repair. Furniture and fittings are sufficient. The dispensary was visited by the State Kárbhári and the Munsiff of Rámdurg. The conservancy and sanitation of the town need improvements. Water-supply is good and abundant. The total treated was 3,867 out-door patients against 3,516 in 1897 and 3,816 in 1896. The prevailing diseases were malarial fevers, ulcers, dyspepsia, diarrhœa, rheumatism, worms and bronchitis. There were 48 surgical operations performed as compared with 42 in 1897 and 68 in 1896. Vaccination is carried on by the Rámdurg State vaccinator. The total

cost was Rs. 542-6-7 and the cost per patient Re. 0-2-2 against Rs. 521-6-0 and Re. 0-2-4 in 1897 and Rs. 553-13-0 and Re. 0-2-3 in 1896, respectively.

KURUNDVA'D.—*In charge of* Mr. S. P. VAIDYA, L.M. & S.

The dispensary building is in good condition. Conservancy is well attended to. Water-supply is deficient. There were 4,914 out-door patients treated against 4,147 in 1897 and 4,860 in 1896. The most common complaints were malarial fevers and bronchial, rheumatic, eye, skin and bowel affections. Plague broke out in the vicinity of the town. The total number of surgical operations was 282 against 299 in 1897 and 264 in 1896. Three *post-mortem* examinations were made against 1 each in 1897 and 1896. Opinion was given in 22 medico-legal cases in each of the years 1898 and 1896, or 6 more than in 1897. Vaccination is conducted by the State vaccinator. His Highness the Bálásáheb and the State Kárbhári inspected the dispensary. The total cost was Rs. 2,040 and the cost per patient Re. 0-7-10, as compared with Rs. 2,043-8-0 and Re. 0-8-0 in 1897 and Rs. 1,757-8-0 and Re. 0-5-9 in 1896, respectively.

TIKOTA.—*In charge of* Mr. H. B. JATKAR.

The dispensary buildings are in good repair, and furniture and fittings sufficient and in good order. The sanitation of the town is satisfactory, and the water-supply from wells pure and abundant. There were 1,171 out-door patients treated as compared with 1,400 in 1897 and 1,342 in 1896. The prevailing diseases were round worms, eye and skin affections and stomach complaints. There were 2 surgical operations performed against 39 in 1897 and 58 in 1896. Opinion was given in 4 medico-legal cases as compared with 9 in 1897 and 12 in 1896. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the State Kárbhári. The total cost was Rs. 483, and the cost per patient Re. 0-6-7 against Rs. 380-2-0 and Re. 0-4-4 in 1897 and Rs. 365-14-6 and Re. 0-4-4 in 1896, respectively.

MAINDARGI.—*In charge of* Mr. PANDURANG HANMANT.

The dispensary building is commodious and in good repair. Quarters for servants and a *post-mortem* room are required. Furniture and fittings are sufficient. Conservancy arrangements are good. Water-supply, only from wells, is liable to pollution. There were 3,659 out-door patients treated against 4,944 in 1897 and 6,604 in 1896. Worms, malarial fevers and eye and rheumatic affections were the most common complaints. Plague prevailed in a mild form in the adjoining villages. Surgical operations numbered 47 against 40 in 1897 and 109 in 1896. There were 4 *post-mortem* examinations held in 1898 and 3 in 1896. Opinion was given in 16 medico-legal cases during the year 1898 and in 17 cases in 1896. Vaccination is carried on by the State vaccinator. The dispensary was occasionally visited by the State Kárbhári. The total cost was Rs. 495 and the cost per patient Re. 0-2-1 as compared with Rs. 385-5-4 and Re. 0-1-3 in 1897 and Rs. 553-14-6 and Re. 0-1-4 in 1896, respectively.

SÁNGLI.—*In charge of* Mr. YESHWANT PANDURANG GODAMBE, L.M.

The dispensary building is in a good state of repair. Furniture and fittings are clean and in good order. The dispensary was visited by the Assistant Political Agent, Southern Marátha Country. The conservancy arrangements of the town are fair. Water-supply from the river Krishna and the Kakarvadi spring is good and plentiful. The total treated was 5,310 out-door patients as compared with 8,652 out-door in 1897 and 7 in-door and 12,875 out-door in 1896. The most common complaints were diseases of the skin, respiratory and digestive systems and eye and intestinal worms. Plague broke out in the town and its vicinity on 3rd January 1898, giving 1,246 cases with 1,060 deaths up to the end of the year. There were 46 surgical operations performed against 76 in 1897 and 136 in 1896. The total number of medico-legal cases was 27 and of *post-mortem* examinations 6 as compared with 22 and 11 in 1897 and 26 and 10 in 1896, respectively. Vaccination is carried on by the State vaccinator. The total cost was Rs. 5,703-1-7 against Rs. 5,800 in 1897 and Rs. 5 428-12-7 in 1896. The cost per patient averaged Re. 1-1-2 as compared with Re. 0-10-9 in 1897 and Re. 0-6-9 in 1896.

MANGALVEDHA.—*In charge of* Mr. C. B. NARAVANE.

The dispensary building is in good repair. There are no quarters for servants on the dispensary premises. Furniture and fittings are sufficient. Conservancy is fairly attended to. Water-supply from wells is deficient, owing to scanty rainfall, and liable to contamination. There were 7,168 out-door patients treated against 6,015 in 1897 and 10,113 in 1896. The prevailing diseases were eye and skin affections, malarial fevers and worms. Surgical operations numbered 66, as compared with 50 in 1897 and 169 in 1896. There were 2 *post-mortem* examinations held in 1898 and 1897 each, and 4 in 1896. Opinion was given in 15 medico-legal cases against 7 in 1897 and 18 in 1896. Vaccination is conducted by a vaccinator who visits the town once a year for the purpose. The total cost was Rs. 1,132-11-0 and the cost per patient Re. 0-2-8 as compared with Rs. 1,302-15-11 and Re. 0-3-6 in 1897 and Rs. 1,314-9-0 and Re. 0-2-1 in 1896, respectively.

SHÁHPUR.—*In charge of* Mr. PATVARDHAN.

The dispensary building is in the heart of the city. It has neither accommodation for in-door patients, nor quarters for servants. It is in a very good state of repair. The furniture

is in fair condition but insufficient. Conservancy is unsatisfactory, owing to a large number of pit-privies in the city which seriously affect the general health; this long standing evil is likely to be remedied soon by the State authorities. There is no dispensary committee, but the members of the municipality visit the dispensary occasionally. The Naib Kárbhári of the State inspected the dispensary on 30th June 1898. The Chief Medical Officer supervised this institution for two months and a half of the year during the plague epidemic. The water-supply is ample but not of good quality. The total number of patients treated was 7,741 out-door and 1 in-door against 10,584 out-door in 1897 and 12,958 out-door and 1 in-door in 1896. The most common diseases were malarial fevers, worms and diseases of the eye, skin and respiratory system. Up to the end of the year 1898 there were two outbreaks of plague epidemic, giving 994 cases with 826 deaths. There were 242 surgical operations performed against 376 in 1897 and 543 in 1896. Vaccination is conducted by the State vaccinators. Three *post-mortem* examinations were made against 6 in 1897 and 11 in 1896. Opinion was given in several medico-legal cases. The total cost was Rs. 2,864-7-1 and the cost per patient Re. 0-3-0 as compared with Rs. 3,424-5-7 and Re. 0-5-2 in 1897 and Rs. 4,045-3-5 and Re. 0-4-0 in 1896, respectively.

SHIRHATTI.—*In charge of* Mr. R. R. JANGI.

The dispensary building is in good repair. Furniture and fittings are insufficient. Conservancy and sanitary arrangements are fair. Water-supply from wells is good and abundant. There were 4,008 out-door patients treated as compared with 5,424 in 1897 and 7,362 in 1896. The most common diseases were malarial fevers, worms, conjunctivitis, skin and rheumatic affections and bowel complaints. Cholera broke out from April to August 1898 in the town and its vicinity, giving 95 cases. Three *post-mortem* examinations were made, and opinion was given in several medico-legal cases. Vaccination is carried on by the State vaccinator. The total cost was Rs. 924, and the cost per patient Re. 0-3-8 as compared with Rs. 924 and Re. 0-2-8 in 1897 and Rs. 900-6-10 and Re. 0-1-6 in 1896 respectively.

TERDAL.—*In charge of* Mr. B. R. M. DESAI.

The dispensary building is suitable and in good repair. Conservancy arrangements are not satisfactory.. Water-supply is from pipes and a large tank in which rain-water is stored. The total treated was 8 in-door and 5,781 out-door patients, as compared with 3 and 5,816 in 1897 and 1 and 4,894 in 1896, respectively. The diseases of the eye, skin and digestive system were most common. Surgical operations numbered 317 against 278 in 1897 and 241 in 1896. There were 9 *post-mortem* examinations held in each of the years 1898 and 1896 and 5 in 1897. Opinion was given in 7 medico-legal cases against 10 in 1897 and 12 in 1896. Vaccination is performed by a special vaccinator of the State. The Naib Kárbhári of the State inspected the dispensary. The total cost was Rs. 1,297-1-1 and the cost per patient Re. 0-3-0 as compared with Rs. 1,104-2-3 and Re. 0-3-0 in 1897 and Rs. 1,234-9-4 and Re. 0-4-0 in 1896 respectively.

KAVATHA MAHANKAL.—*In charge of* Mr. B. L. GOLE.

The dispensary building is situated on an elevated place just near the town and kept in good repair. Furniture and fittings are sufficient and in good order. Conservancy is fair, and water-supply from a brook abundant and good. There were 3,353 out-door patients treated as compared with 5,112 in 1897 and 6,923 in 1896. The prevailing diseases were malarial fevers, bowel complaints and eye and skin affections. There were 56 surgical operations performed against 67 in 1897 and 82 in 1896. One *post-mortem* examination was held against 4 each in 1897 and 1896. Opinion was given in 3 medico-legal cases against 9 in 1897 and 12 in 1896. Vaccination is carried on by the State vaccinator. The total cost was Rs. 661-2-2 and the cost per patient Re. 0-3-2 as compared with Rs. 827-8-2 and Re. 0-2-7 in 1897 and Rs. 737-12-6 and Re. 0-1-8 in 1896, respectively.

BANHATTI.—*In charge of* Mr. P. V. GOKHALE.

The dispensary building is a new one, convenient and in good repair. The officials of the State visit the dispensary frequently. The sanitation of the town is good. The water-supply is good and abundant, except in the summer. The total treated was 6,111 out-door patients as compared with 5,947 out-door in 1897 and 6,679 out-door and 1 in-door in 1896. The most common diseases were malarial fevers, intestinal worms and respiratory, skin, eye and ear affections. There were 182 surgical operations performed against 234 in 1897 and 199 in 1896. Vaccination is conducted by the State vaccinator. The dispensary was inspected by the Chief Medical Officer of the Jamkhandi State. The total cost was Rs. 984 and the cost per patient Re. 0-2-6 against Rs. 870 and Re. 0-2-4 in 1897 and Rs. 835-2-9 and Re. 0-2-0 in 1896, respectively.

SAVALGI.—*In charge of* Mr. N. V. GOKHALE.

The dispensary building is small and inconvenient. Furniture and fittings are sufficient for the present wants. The sanitary condition of the town is not satisfactory; water-supply scanty. There were 4,611 out-door patients treated against 5,480 out-door in 1897 and 11 in-door and 5,862 out-door in 1896. Intestinal worms, malarial fevers, bowel complaints and

eye, skin and respiratory affections were the prevailing diseases. There was one *post-mortem* examination held, and opinion given in 6 medico-legal cases. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Chief Medical Officer and the Administrator of the State. The total cost was Rs. 958-3-8 as compared with Rs. 862-2-5 in 1897 and Rs. 950-10-10 in 1896. The cost per patient averaged Re. 0-3-1$_{4}$ against Re. 0-2-6 in 1897 and Re. 0-2-7 in 1896.

KUNDGOL.—*In charge of* Mr. JAGANNATH HARI.

The dispensary building is situated on an elevated site; it is well designed and spacious and in excellent repair. The sanitary condition of the town is good; water-supply from wells and tanks good but scanty. There were 3,947 out-door patients treated against 4,385 in 1897 and 4,542 in 1896. The most common diseases were malarial fevers, rheumatism, dyspepsia, diarrhœa and eye and respiratory affections. Cholera returned 5 cases with 3 deaths against 37 cases with 6 deaths in 1897 and 11 cases with 5 deaths in 1896. Plague broke out in September 1898, giving 966 cases with 679 deaths up to the end of the year. There were 24 surgical operations performed against 18 in 1897 and 119 in 1896. Three *post-mortem* examinations were held against 1 each in 1897 and 1896. Medico-legal cases numbered 7 against 12 in 1897 and 17 in 1896. Vaccination is carried on by the State vaccinator. The total cost was Rs. 1,563-7-9 and the cost per patient Re. 0-6-4, as compared with Rs. 1,029-11-10 and Re. 0-3-9 in 1897, and Rs. 1,584-0-0 and Re. 0-5-6 in 1896, respectively.

GUJARAT.

SURAT COLLECTORATE.

SIR COWASJI JEHANGIR CIVIL HOSPITAL, SURAT.—*In charge of* Lieutenant-Colonel K. S. NARIMÁN, I. M. S.

Conservancy.—The conservancy of the hospital is well attended to; that of the city has been gradua ly improving. The number of objectionable well-privies was annually decreasing and that of open privies increasing, but owing to the prevalence of plague in the city, under the orders of the District Magistrate most of the pit-privies have been filled up and open privies built in their stead.

Water-supply.—In the city water from the Warachha water-works has been in use since the beginning of 1898, instead of water from wells and under-ground tanks. This water is good and wholesome, and a great improvement on the water of the city wells, which is brackish and liable to contamination from pit-privies and khal-kuwas.

Hospital building—In very good state of repair. Quarters for First and Second Hospital Assistants, two cells for supposed lunatics under observation and a new dead-house, which were sanctioned in 1894, were completed in March 1896.

Attendance of patients.—The number of in-patients was 709 in 1896, while in 1897 and 1898 it was 1,381 and 787 respectively, inclusive of plague cases, and only 443 and 316 exclusive of plague cases. The number of out-patients in 1896 was 8,760, while in 1897 and 1898 it was 2,904 and 2,453, respectively. This enormous decrease in the numbers of in and out patients was due to the prevalence of plague. The fear of segregation and removal to hospitals was so great that, even after the subsidence of plague, people were reluctant to avail themselves of the medical treatment at the hospital.

General health—Was not at all satisfactory. Plague broke out in the city in February 1897 and lasted up to the beginning of May 1898, except for the two months of May and June 1897, when it had subsided. In 1897 there were in all 1,820 cases with 1,169 deaths against 835 cases and 632 deaths in 1898. There was no cholera in 1898, whereas it gave 16 cases with 8 deaths in 1897 against 808 cases with 415 deaths in 1896.

Prevailing diseases.—Plague, ague, scabies, injuries, bronchitis, rheumatism, inflammation of external ear, conjunctivitis, indigestion, ulcers, diarrhœa and dysentery.

Surgical operations.—161 against 137 in 1897 and 607 in 1896. This great decrease in the last two years was due to the prevalence of plague.

Mortality and its causes.—There were 303 deaths among in-door patients against 664 in 1897 and 64 in 1896. The chief causes were cholera in 1896 and 1897, plague in 1897 and 1898, and dysentery, remittent fever, debility and bronchitis during the three years under report.

Vaccination—Is carried on by the municipal vaccinators at the Civil Hospital twice a week and at the Parekh Dispensary thrice a week. In 1896 there were 3,862 primary vaccinations, of which 3,703 were successful, 97 unsuccessful and 62 doubtful, with 174 revaccinations. In 1897 there were 3,156 primary vaccinations, of which 2,993 were successful, 56 unsuccessful and 17 doubtful, with 95 revaccinations. In 1898 there were 2,054 primary vaccinations, of which 2,008 were successful, 20 unsuccessful and 26 doubtful, with 25 revaccinations.

Medico-legal cases.—The numbers for *post-mortem* examinations and medico-legal cases were 6 and 159 in 1898 against 5 and 101 in 1897 and 3 and 200 in 1896, respectively.

Conduct of Establishment.—First Class Hospital Assistant Shanker Hari, No. 80, joined the hospital on 12th September 1896. His conduct has been satisfactory. Second Class Hospital Assistant Manekrai Pranshanker Vakil, No. 197, has been doing duty in this hospital since November 1891, and has maintained his character as a zealous and painstaking subordinate. Both the Hospital Assistants as well as some of the second class establishment worked with great zeal and efficiency, particularly during the plague epidemic when the duties they performed were laborious and trying.

Cost.—The total cost was Rs. 5,847-11-0 and the cost per patient Rs. 1-12-11, as compared with Rs. 7,278-9-4 and Rs. 1-11-2 in 1897 and Rs. 7,897-12-7 and Re. 0-13-4 in 1896, respectively.

Hospital stoppages.—Rs. 23-0-6 were realized against Rs. 11-2-0 in 1897 and Rs. 31-8-0 in 1896.

GRANT-IN-AID DISPENSARIES.

CURSETJI FURDUNJI PAREKH DISPENSARY, SURAT.—*In charge of* Assistant Surgeon MANILAL G. DESAI.

The dispensary was temporarily closed from 1st November to 31st December 1897, and the services of the Assistant Surgeon and the dispensary staff, except one compounder, were utilized for plague work. The dispensary building is very substantial and commodious and in a fair state of repair. Furniture and fittings are sufficient and in good order. The total number of patients treated was 2 in-door and 6,471 out-door against 6 and 3,357 in 1897

and 12 and 10,843 in 1896, respectively. The prevailing diseases were malarial fevers, worms and diseases of the eye, respiratory and digestive systems and skin. There were 258 surgical operations performed against 128 in 1897 and 437 in 1896. The most important operations were lateral lithotomies, operations on bones and for removal of tumours and amputations. The dispensary was inspected by the Civil Surgeon of Surat once in each year and by the Surgeon-General with the Government of Bombay twice in 1896, and was visited by the Collector and President of the Municipality once in 1897. The dispensary committee visited the dispensary once in 1898 and twice in 1897 and in 1896. Vaccination is carried on by municipal vaccinators. Since the opening of the new water-works in 1898 the water-supply is abundant and pure. The sanitary condition of the town is fair. The total cost was Rs. 4,949-1-6 against Rs. 2,961-2-2 in 1897 and Rs. 5,390-2-8 in 1896, while the cost per head was Re. 0-12-3 against Re. 0-14-1 in 1897 and Re. 0-7-11 in 1896. The amount realized from hospital stoppages was Rs. 81-4-0 against Rs. 17-12-0 in 1897 and Rs. 63-8-0 in 1896.

MORARBHAI VIJBHUKHANDAS DISPENSARY FOR WOMEN AND CHILDREN, SURAT.—*In charge of* Lady Doctor Bái RUKHMABAI, M.D.

The dispensary was removed to the new buildings on 1st August 1896. It stands in the centre of the town, is well ventilated and has open space all round it. The building consists of two stories with four rooms on each floor. The ground floor is used for the out-patient department, and one of the top floor rooms is reserved for paying-patients. Attached to this building is a one-storied room called "The Bái Dayakore Ward for In-door patients." This ward was declared open on 30th November 1896 by Her Excellency Lady Elgin. This institution is managed by the Countess of Dufferin Fund Society, Surat, with grants from Government and local and municipal funds. Owing to the severe epidemic of plague in the city, this dispensary was closed from 8th November 1897 to 1st June 1898, and the whole staff was employed at the General Plague Hospital. There were 13 in-door and 2,240 out-door patients treated during the year 1898, as compared with 8 in-door and 2,039 out-door in 1897 and 3 in-door and 5,768 out-door in 1896. The most common diseases were those peculiar to women, malarial fevers, bowel complaints and skin and respiratory affections. Surgical operations numbered 188 against 173 in 1897 and 946 in 1896. The dispensary was inspected during the three years under review, twice by the Surgeon-General with the Government of Bombay and once in each year by the Civil Surgeon of Surat, and visited by the Collector of Surat very often. The managing committee of the Countess of Dufferin Fund Society, Surat, met three times. The total cost was Rs. 3,833-12-9 and the cost per patient Re. 1-11-3, against Rs. 3,968-14-8 and Rs. 1-15-0 in 1897 and Rs. 9,261-8-0 and Re. 1-9-8 in 1896, respectively. Rs. 21-11-0 were hospital stoppages, as compared with Rs. 56-13-0 in 1897 and Rs. 51-8-0 in 1896.

OLPAD.—*In charge of* Second Class Hospital Assistant ANANT SANTARAM MALVE, No. 167.

The dispensary premises are in good repair; furniture and fittings sufficient. The dispensary was visited by the dispensary committee only once (in 1897) during the last three years. The sanitary condition of the town is not satisfactory. The water-supply from wells and tanks is good and abundant. The total treated was 3,429 out-door and 31 in-door patients against 2,648 and 34 in 1897, and 3,568 and 27 in 1896, respectively. The prevailing diseases were malarial fevers, eye and ear affections, diseases of the respiratory and digestive systems and skin and local injuries. Fifty cases of plague with 44 deaths occurred in the town and 78 cases with 67 deaths in the táluka, against 28 cases with 23 deaths and 28 cases with 18 deaths in the town and the táluka, respectively, in 1897. There were 209 cases of cholera in the táluka with 133 deaths during the year 1896. The dispensary was inspected once every year by the Civil Su rgeon of Surat, and also by the Collector and the Assistant Collectors. Vaccination was carried on by the táluka vaccinator. Two *post-mortem* examinations were made and 39 medico-legal cases were examined and certified, against 4 and 30 in 1897, and 2 and 41 in 1896, respectively. There were 86 surgical operations performed, against 103 in 1897 and 127 in 1896. The total expenditure was Rs. 1,122-5-1 and the cost per patient Re 0-5-2, as compared with Rs. 1,168-7-10 and Re. 0-7-0 in 1897 and Rs. 757-1-10 and Re. 0-3-4 in 1896, respectively. The total amount of hospital stoppages was Rs. 23-0-0, against Rs. 18-0-0 in 1897 and Rs. 13-0-0 in 1896. The increase was due to the new compounding system.

SIR DINSHA MANEKJI PETIT DISPENSARY, CHIKHLI.—*In charge of* Second Class Hospital Assistant MAGANLÁL KASSONLÁL, No. 175.

The buildings are in a good state of repair. The dispensary was visited 11 times by the chairman and twice by the dispensary committee. The sanitation of the town is not satisfactory. The water-supply from wells is abundant but inferior in quality. The total treated was 4,187 out-door and 10 in-door patients, against 4,364 and 26 in 1897 and 7,602 and 25 in 1896, respectively. The most common diseases were malarial fevers, ascaris lumbricoides, bronchitis, conjunctivitis and diseases of the skin and digestive system. Cholera prevailed in 1896 and 1897. A few imported cases of plague occurred in 1897, but it became epidemic in 1898, giving 28 cases and 23 deaths in the town and 100 cases and 61 deaths in the táluka. There were 89 surgical operations performed against 78 in 1897 and 143 in 1896. Vaccination was carried on by the táluka vaccinator. One *post-mortem* examination was made and 15 medico-legal cases were certified, as compared with 1 and 19 in 1897 and 1 and 21 in 1896,

respectively. The dispensary was inspected by the Civil Surgeon, Surat, once in each year, and by the Deputy Sanitary Commissioner, Gujarát Registration District, in 1896. The total cost was Rs. 896-6-8 and the cost per patient Rs. 0-3-5 against Rs. 1,072-14-2 and Re. 0-3-11 in 1897 and Rs. 687-13-6 and Re. 0-1-5 in 1896, respectively. The hospital stoppage fees amounted to Rs. 35-9-0, as compared with Rs. 41-6-0 in 1897 and Rs. 40-1-0 in 1896.

BARDOLI.—*In charge of* Third Class Hospital Assistant JAGESARSINGH MAHABALSINGH, No. 214.

The dispensary buildings are in good repair; furniture and fittings sufficient. The chairman of the dispensary committee visited the dispensary thrice and the District Deputy Collector of Surat once. The sanitary condition of the town is fairly good, the water-supply from wells is good, but that from the river Mudhola is not potable. There were 41 in-door and 5,091 out-door patients treated, as compared with 35 and 4,851 in 1897 and 42 and 5,193 in 1896, respectively. The prevailing diseases were malarial fevers, ophthalmia, bowel complaints and ear affections. Surgical operations numbered 139 against 110 in 1897 and 425 in 1896. There was one *post-mortem* examination held, and opinion given in 19 medico-legal cases. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Surat. The total cost was Rs. 1,430-6-5 and the cost per patient Re. 0-4-6 against Rs. 1,492-1-0 and Re. 0-4-11 in 1897 and Rs. 1,209-15-1 and Re. 0-3-8 in 1896, respectively. Hospital stoppages amounted to Rs. 20-9-0, as compared with Rs. 15-1-0 in 1897 and Rs. 17-13-0 in 1896.

PARDI.—*In charge of* First Class Hospital Assistant ESSOOBJI SELAMANJI, No 38.

The building is in a good state of repair. The brick flooring in the verandah is in a bad state; it will be better if the bricks are replaced by Porbandar stones. A store room and an examination room are required. The furniture and fittings are in good order. The dispensary was visited eleven times by the dispensary committee. The sanitary condition of the town is on the whole good, and the water-supply from wells good and abundant, but liable to pollution by soakage. The total treated was 8,507 out-door and 82 in-door patients, as compared with 8,856 and 58 in 1897, and 12,516 and 64 in 1896, respectively. The prevailing diseases were malarial fevers, worms, diarrhœa and skin affections. Cholera prevailed to a slight extent in the year 1896, and two cases of plague were imported from Bombay. There were 9 importep cases of plague and 5 indigenous cases in 1897 and 14 indigenous cases in 1898, the first indigenous case being detected on the 16th of December 1897. Surgical operations numbered 337, as compared with 330 in 1897 and 469 in 1896. Opinion was given in 15 cases of assaults and injuries at the request of the police. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Surat. The total cost was Rs. 1,606-0-9 and the cost per patient Re. 0-3-0, as compared with Rs. 2,285-4-9 and Re. 0-4-1 in 1897 and Rs. 1,494-3-1 and Re. 0-1-11 in 1896, respectively. Rs. 74-6-0 were hospital stoppages, against Rs. 83-8-0 in 1897 and Rs. 75-2-0 in 1896.

MANDVI.—*In charge of* First Class Hospital Assistant BEHRAMJI JIVAJI, No. 75.

The dispensary buildings are in a good state of repair; furniture and fittings sufficient and in good order. The committee visited the dispensary eight times. Conservancy is well attended to by the municipality. Water-supply from wells and the river Tapti is abundant, that from the former being of inferior quality. There were 58 in-door and 7,461 out-door patients treated, against 65 in-door and 7,517 out-door in 1897 and 55 in-door and 7,948 out-door in 1896. Malarial fevers, worms and eye, ear, bowel, skin and respiratory affections were the most common complaints. There were 323 surgical operations performed, against 548 in 1897 and 505 in 1896. Opinion was given in 15 medico-legal cases in 1896, and in 10 each in 1897 and 1898. Vaccination is carried on by the táluka vaccinator. The dispensary was inpected by the Civil Surgeon of Surat. The total cost was Rs. 1,602-10-3 and the cost per patient Re. 0-3-5, as compared with Rs. 1,790-10-10 and Re. 0-3-9 in 1897 and Rs. 1,622-3-10 and Re. 0-3-3 in 1896, respectively. Hospital stoppages amounted to Rs. 35-0-0, against Rs. 40-0-0 in 1897 and Rs. 27-1-0 in 1896.

RANDER.—*In charge of* Second Class Hospital Assistant HORMASJI EDALJI ANKLESARIA, No. 131.

The building, a leased one, is in good repair, but not suitable for dispensary purposes, containing but two small rooms. The dispensary committee visited the dispensary three times against 7 in 1897 and 10 in 1896. It was also visited thrice by the Collector and the Assistant Collector of Surat during the years 1896 and 1897. The conservancy arrangements of the town are not very satisfactory, as house refuse and other rubbish are allowed to accumulate and decay in some places, and pit privies and deep cesspools to be dug. The water-supply from the river Tapti and under-ground tanks is abundant, but not good in quality; that from wells is liable to pollution, owing to percolation from the night-soil depôt situated very near them. The total number of out-door patients treated was 5,849, as compared with 4,233 in 1897 and 14,821 in 1896. The most common diseases were malarial fevers, worms and diseases of the respiratory and digestive systems, eye, ear and skin. There were 118 cases of cholera with 61 deaths in 1896, and 221 cases of plague with 193 deaths in 1897 against 171 cases with 143

deaths in 1898. Vaccination was performed by the táluka vaccinator. There were 293 surgical operations performed against 212 in 1897 and 396 in 1896. The dispensary was inspected every year by the Civil Surgeon of Surat and once by the Surgeon General with the Government of Bombay in 1896. Opinion was given in 24 medico-legal cases against 14 in 1897 and 11 in 1896. The total cost was Rs. 1,671-8-1 and the cost per patient Re. 0-4-7, as compared with Rs. 1,817-10-1 and Re. 0-6-10 in 1897, and Rs. 1,749-12-2 and Re. 0-1-11 in 1896, respectively. Rs. 21-14-0 were realized under the hospital stoppage rules, against Rs. 18-15-0 in 1897 and Rs. 42-9-0 in 1896.

NASSARVANJI MANECKJI PETIT DISPENSARY, KHEIRGAON.—*In charge of* Second Class Hospital Assistant PURSHOTAM HARIBHAI PATIL, No. 165.

The dispensary building is in good condition, except that the *post-mortem* room and latrines require repair. Furniture and fittings are sufficient. Conservancy arrangements are fairly good. Water-supply from wells is ample and of good quality. There were 1 in-door and 1,944 out-door patients treated, as compared with 5 in-door and 2,389 out-door in 1897 and 12 in-door and 5,000 out-door in 1896. The most common complaints were malarial fevers, worms and skin, eye and bowel affections. There was no epidemic disease. Surgical operations numbered 22, against 35 in 1897 and 82 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Surat. The total cost was Rs. 697-15-6 and the cost per patient Re 0-5-9 against Rs. 1,017-6-8 and Re. 0-6-9 in 1897 and Rs. 678-9-2 and Re. 0-2-2 in 1896, respectively. The receipts under the hospital stoppage system amounted to Rs. 4-0-0, or the same as in each of the previous two years. The dispensary was temporarily closed from 1st January to 15th June 1898, as the Hospital Assistant in charge was deputed on plague duty.

SIR D. M. PETIT DISPENSARY, BULSAR.—*In charge of* Assistant Surgeon Khán Báhadur P. H. DADACHANJI.

The building is kept in a fair state of repair. A suitable fence round the compound is badly wanted. The dispensary committee held eight meetings. The sanitation of the town is well looked after by the municipality. The water-supply is good and sufficient. The total treated was 49 in-door and 7,551 out-door patients against 46 and 7,023 in 1897 and 87 and 13,537 in 1896. The prevailing diseases were malarial fevers, respiratory diseases, round worms, diarrhœa, bowel complaints and ophthalmia. Plague prevailed in an epidemic form from February to May in 1897 and from April to September in 1898, returning 528 cases with 349 deaths. There were 119 surgical operations performed against 144 in 1897 and 287 in 1896; the most important being amputations, operations for cataract and for abscess of the liver, lateral lithotomy and obstetric operations. Vaccination is carried on by the táluka vaccinator. The dispenary was inspected by the Civil Surgeon, Surat, once in each year, and by the Surgeon-General with the Government of Bombay in 1896. The total cost was Rs. 5,324 3-11 and the cost per patient Re. 0-11-3, against Rs. 6,608-5-7 and Re. 0-14-11 in 1897 and Rs. 5,674-0-9 and Re. 0-6-8 in 1896, respectively. The receipts from hospital stoppages were Rs. 227-1-0, against Rs. 218-14-0 in 1897 and Rs. 302-15-0 in 1896.

SELF-SUPPORTING DISPENSARY.

VICTORIA DISPENSARY, NA'VSARI.—*In charge of* First Class Hospital Assistant HARI KRISHNA RAYAKAR, No. 58.

The dispensary buildings are in a good state of repair. The dispensary committee held two meetings, and the members visited the dispensary 25 times. The village of Káliáwádi, in which the dispensary is situated, is a non-municipal one. The sanitary condition of the village is fairly good. The water-supply is abundant for bathing and washing purposes. There is only one sweet well in the village which supplies good and potable water. The general health has been good. No epidemic of any kind prevailed during the three years in the village of Káliáwádi. Of plague 73 cases occurred in 1898 in the táluka against 50 in 1897. There were 59 in-door and 4,969 out-door patients treated, against 27 and 4,511 in 1897, and 75 and 6,240 in 1896, respectively. Malarial fevers and diseases of the respiratory and digestive systems were the most common complaints. Surgical operations numbered 193 against 243 in 1897 and 504 in 1896. Vaccination is well received by the people and is carried on by the Taluka Local Fund vaccinator. There was one *post-mortem* examination held and opinion given in 12 medico-legal cases. The dispensary was inspected once every year by the Civil Surgeon of Surat and by the Surgeon General with the Government of Bombay in 1896. The total cost was Rs. 2,094-14-4 and the cost per patient Re. 0-6-8, as compared with Rs. 3,481-9-5 and Re. 0-12-3 in 1897 and Rs. 3,118-1-8 and Re. 0-7-11 in 1896, respectively. The hospital stoppage system is not introduced in this dispensary as it is a self-supporting and an endowed institution.

NATIVE STATE DISPENSARY.

DUMAS.—*In charge of* Second Class Hospital Assistant MANILAL MANSOOKHRAM, No. 187.

The buildings are in good repair. The dispensary committee visited the dispensary three times. The sanitary condition of the village is fair. The water-supply from wells is ample and of good quality. The total treated was 3,804 out-door and 14 in-door patients against 2,271

and 2 in 1897 and 2,901 and 2 in 1896, respectively. The most common diseases were malarial fevers, conjunctivitis, worms and diseases of the digestive system, ear and skin. Plague was prevalent in the village and in its vicinity. There were 134 surgical operations performed against 118 each in 1897 and in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Surat. The total cost was Rs. 1,251-12-5 and the cost per patient Re. 0-5-3, as compared with Rs. 1,026-1-6 and Re. 0-7-2 in 1897 and Rs. 1,522-9-3 and Re. 0-8-4 in 1896, respectively. The hospital stoppage system is not introduced in this dispensary, as it is a Native State institution.

BROACH COLLECTORATE.

BROACH CIVIL HOSPITAL.—*In charge of* Major K. H. MISTRI, I.M.S.

Conservancy.—The town is kept fairly clean. The conservancy establishment was increased from 155 to 269 sweepers, and 5 inspectors, 2 sub-inspectors and 5 mukádams have been added.

Water-supply—From the river Nerbuda. There are besides groups of wells on tanks which yield drinking water. There are under-ground reservoirs in houses, especially of the Parsis, which contain rain water. A new well has been added for the use of sweepers.

Hospital buildings—Are in a good state of repair. There are no quarters for the bhisti and peon, and there is no available space in the compound for their construction. It is proposed to build a room for insanes at the south end of the hospital.

General health.—Cannot be said to be satisfactory, as fever and catarrhal diseases widely prevailed. Plague broke out on 14th September 1898, returning 79 cases and 62 deaths up to the end of the year.

Attendance of patients.—5,489 out-door and 373 in-door patients were treated, as compared with 7,211 out-door and 289 in-door in 1897 and 11,970 out-door and 369 in-door in 1896. The falling off in the attendance was chiefly due to the reluctance on the part of the patients to attend from fear, owing to plague preventive measures.

Prevailing diseases.—Malarious fevers, scabies, bronchitis catarrhal, conjunctivitis catarrhal, ringworm and rheumatism.

Surgical operations.—422 against 627 in 1897 and 1,091 in 1896.

Mortality and its causes—There were 26 deaths in hospital as compared with 37 in 1897 and 27 in 1896. The chief causes were diarrhœa, dysentery, anæmia, bronchitis and privation.

Vaccination.—By the municipal vaccinator. There were 1,270 primary and 112 secondary vaccinations against 2,035 and 176 in 1897 and 1,163 and 141 in 1896, respectively.

Medico-legal cases.—Forty-seven police cases were examined and certified, including 7 *post-mortem* examinations, against 48 cases with 10 examinations in 1897 and 47 cases with 5 examinations in 1896.

Conduct of the Establishment.—Good.

Cost.—The total cost was Rs. 3,387-3-10 and the cost per patient Re. 0-9-3 as compared with Rs. 4,583-4-0 and Re. 0-9-9 in 1897 and Rs. 4,712-8-1 and Re. 0-6-1 in 1896, respectively

Hospital stoppages.—Rs. 135-1-0 were realized against Rs. 266 in 1897 and Rs. 202-1-0 in 1896.

GRANT-IN-AID DISPENSARIES.

ANKLESWAR.—*In charge of* First Class Hospital Assistant PHIROJSHAW D. COOPER, No. 66.

The dispensary building is in good repair. The committee visited the dispensary once. Sanitation is attended to. Water-supply is good and plentiful. The total number treated was 47 in-door and 5,839 out-door patients as compared with 30 and 6,034 in 1897 and 28 and 9,001 in 1896, respectively. The most common diseases were malarial fevers, dysentery, respiratory, rheumatic, eye, ear and skin affections and diarrhœa. During the year 1898 there were 331 local cases of plague with 245 deaths and 2 imported cases with 1 death. Four cases of plague were imported in 1897, of which two died. There were 97 surgical operations performed against 170 in 1897 and 267 in 1896. Two *post-mortem* examinations were held and opinion was given in several medico-legal cases. Vaccination is carried on by the táluka vaccinator. The Civil Surgeon, Broach, inspected the dispensary once in each year. The total cost was Rs. 1,721-10-3 and the cost per patient Re. 0-4-8 against Rs. 1,270-7-3 and Re. 0-3-4 in 1897 and Rs. 2,249-7-3 and Re. 0-4-0 in 1896, respectively. Hospital stoppages amounted to Rs. 37-4-0 as compared with Rs. 41-8-0 in 1897 and Rs. 39-7-0 in 1896.

ARDESAR HORMUSJI WADIA DISPENSARY, ILAV.—*In charge of* Second Class Hospital Assistant KESHAVLAL CHHOTALAL, No. 146.

The dispensary building is in a good state of repair; furniture and fittings sufficient and in good order. Quarters for 2nd class servants and store and cook-rooms were constructed during

the year 1898 at a cost of Rs. 1,639-3-5 from the Local Funds. Paving of the ward and verandah with stones is required. The committee visited the dispensary very often. Village sanitation rules have been brought into force since the last year. Water-supply, chiefly from wells, is good and copious. There were 5 in-door and 3,715 out-door patients treated as compared with 2 in-door and 3,522 out-door in 1897 and 1 in-door and 4,494 out-door in 1896. Malarial fevers, dyspepsia and respiratory affections were the most common diseases. Plague broke out in Kantiájal and Sámli of the Hánsot Mahál, about 12 miles from Ilav, from the months of July to November 1898, giving 76 cases with 58 deaths. Surgical operations numbered 150 against 121 in 1897 and 157 in 1896. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Broach. The total cost was Rs. 3,029-9-8 and the cost per patient Re. 0-13-0 against Rs. 1,329-14-10 and Re. 0-6-0 in 1897 and Rs. 1,339-5-7 and Re. 0-4-9 in 1896, respectively. Rs. 30-5-0 were hospital stoppages as compared with Rs. 42-12-0 in 1897 and Rs. 57-10-0 in 1896.

HA'NSOT.—*In charge of* Third Class Hospital Assistant SAMALDAS NAHNJI, No. 199.

The dispensary is situated in a hired building, which is quite unsuitable for the purpose. A new dispensary on the standard plan is being constructed, and it is expected that it will be ready for occupation in a couple of months. A committee of two members visit the dispensary every month. The sanitation of the town is good. The water-supply from wells outside the town is good and plentiful. The total number of out-patients treated was 3,551 against 3,685 in 1897 and 6,194 in 1896. The most common diseases were malarial fevers and diseases of the skin, digestive system, eye and ear. Plague prevailed from the months of July to November 1898 in the villages of Kantiájal and Sámli of this mahál. In 1897 and 1896 small-pox prevailed in Hánsot. During the latter year a few cases of cholera also occurred in Hánsot as well as in the surrounding villages. There were 166 surgical operations performed against 176 in 1897 and 259 in 1896. Vaccination is performed by the táluka vaccinator. Opinion was given in 58 medico-legal cases against 47 in 1897 and 39 in 1896. The dispensary was inspected by the Civil Surgeon, Broach, once in each year. The total cost was Rs. 1,080-5-3 and the cost per patient Re. 0-4-10 as compared with Rs. 1,017-15-3 and Re. 0-4-5 in 1897 and Rs. 1,116-13-2 and Re. 0-2-11 in 1896, respectively. Hospital stoppages amounted to Rs. 42-2-0 against Rs. 48-10-0 in 1897 and Rs. 47-11-0 in 1896.

JAMBUSAR.—*In charge of* First Class Hospital Assistant ISAAC AARON, No. 61.

The dispensary is situated on elevated ground, is well-ventilated and in good repair. Furniture and fittings are sufficient and in good order. Quarters for 1st and 2nd class servants are needed. The committee visited the dispensary 10 times in 1898 against 15 times in 1897 and 8 times in 1896; it was also visited twice by the Collector and by the Assistant Collector, and once by the Sessions Judge, Broach. The town is kept fairly clean by the municipality. Water-supply from wells is abundant and of good quality. There were 83 in-door and 5,543 out-door patients treated as compared with 70 in-door and 5,271 out-door in 1897 and 68 in-door and 6,648 out-door in 1896. Malarial fevers, bowel complaints and skin, eye, ear and respiratory affections were the prevailing diseases. Cholera was prevalent in the year 1896, returning 36 cases. Surgical operations numbered 365 as compared with 397 in 1897 and 425 in 1896. There were 5 *post-mortem* examinations held and 79 medico-legal cases certified against 6 and 65 in 1897 and 4 and 62 in 1896, respectively. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Broach once in each year. The total cost was Rs. 1,736-8-5 and the cost per patient Re. 0-4-11 against Rs. 1,638-6-8 and Re. 0-4-11 in 1897 and Rs. 1,592-12-4 and Re. 0-3-10 in 1896, respectively. Rs. 34-11-0 were hospital stoppages as compared with Rs. 16-4-0 in 1897 and Rs. 26-6-0 in 1896.

AMOD.—*In charge of* Second Class Hospital Assistant MAHOMEDUSUFF DADAMIYA MUNSHI, No. 180.

The building is in a good state of repair. Furniture and fittings are sufficient and in good order. A dead-house has been added to the dispensary building, and an operating room is under construction. The dispensary was visited 10 times by the committee against 12 times in 1897 and 13 times in 1896, and inspected once every year by the Civil Surgeon, Broach. The conservancy arrangements are fairly good. The water-supply from wells is good and abundant, but liable to contamination by soakage. The total treated was 4,008 out-door and 18 in-door patients against 3,611 and 19 in 1897 and 3,249 and 37 in 1896, respectively. The most common complaints were malarial fevers, diseases of the eye and respiratory and digestive systems and ulcers. There was one case of cholera in 1896 and none in 1897 and 1898. The town is totally free from plague infection. The sanitary condition of the town is good. Vaccination is performed by the táluka vaccinator. The total number of surgical operations performed was 384 as contrasted with 409 in 1897 and 170 in 1896; of these, the most important were removal of tumours, reduction of dislocation and obstetric operations. Five *post-mortem* examinations were performed during the year as compared with in 1897 and 2 in 1896. Opinion was given in 16 medico-legal cases as against 20 in 1897 and 38 in 1896. The total cost was Rs. 1,666-6-5 and the cost per patient Re. 0-6-7 as compared with Rs. 1,365-14-4 and Re. 0-6-0 in 1897 and Rs. 1,441-15-2 and Re. 0-7-0 in 1896,

respectively. Rs. 10-6-0 were received on account of hospital stoppages against Rs. 38-12-0 in 1897 and Rs. 20-3-0 in 1896.

VAGRA.—*In charge of* Compounder KESHAVJI GULABCHAND.

The dispensary buildings are in a good state of repair; furniture and fittings sufficient and in good order. The Hospital Assistant's quarters are being enlarged. Operating and examination rooms are badly required. The committee visited the dispensary 12 times. Conservancy arrangements are defective. The water-supply from wells is good and ample. There were 54 in-door and 4,448 out-door patients treated against 49 in-door and 3,649 out-door in 1897 and 50 in-door and 4,092 out-door in 1896, respectively. The most common diseases were malarial fevers, bowel complaints and eye, ear and skin affections. There were 170 surgical operations performed against 203 in 1897 and 184 in 1896. Medico-legal cases numbered 24 as compared with 28 in 1897 and 49 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon and the Collector of Broach. The total cost was Rs. 1,415-4-4 and the cost per patient Re. 0-5-0 against Rs. 1,625-15-0 and Re. 0-7-0 in 1897 and Rs. 1,207-6-6 and Re. 0-4-8 in 1896, respectively. Hospital stoppages amounted to Rs. 14-8-0 as compared with Rs. 15-1-0 in 1897 and Rs. 24-1-0 in 1896.

KAVI.—*In charge of* Temporary Third Class Hospital Assistant AMBALAL MOTILAL SHAH.

The dispensary has been located in the new building specially erected for the purpose outside the village near the police post. Furniture and fittings are sufficient and in good order. The dispensary committee met 13 times. Conservancy arrangements are not satisfactory. Water-supply from a well on the tank is good and plentiful. There were 4 in-door and 2,668 out-door patients treated as compared with 15 in-door and 3,703 out-door in 1897 and 18 in-door and 3,752 out-door in 1896. The prevailing diseases were ague, rheumatism, bowel complaints and eye, ear and respiratory affections. Surgical operations numbered 224 as compared with 222 in 1897 and 247 in 1896. Opinion was given in 3 medico-legal cases against 9 in 1897 and 7 in 1896. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 6,437-0-7 and the cost per patient Rs. 2-6-7 against Rs. 1,104-3-3 and Re. 0-4-9 in 1897 and Rs. 1,079-15-1 and Re. 0-4-7 in 1896, respectively. Rs. 2-13-0 were realized under the hospital stoppage system in 1897 and Rs. 6-13-0 in 1896. The dispensary has been temporarily closed from 5th September 1898.

DEHEJ.—*In charge of* Compounder HIRAPPA NAIDU.

The dispensary has been located in a new building specially erected for the purpose since 1st July 1896. Furniture and fittings are sufficient and in good order. The dispensary was visited by the chairman of the dispensary committee and the Collector of Broach. Conservancy is not satisfactory, there being no municipality. Water-supply is insufficient, especially during the summer, and liable to contamination. There were 13 in-door and 1,719 out-door patients treated, against 18 in-door and 2,182 out-door in 1897 and 25 in-door and 2,525 out-door in 1896. Malarial fevers, ophthalmia and diseases of the digestive system and skin were the most common complaints. There were 95 surgical operations performed, against 105 in 1897 and 59 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Broach. The total cost was Rs 739-14-9 and the cost per patient Re. 0-6-10, as compared with Rs. 687-8-9 and Re. 0-5-0 in 1897 and Rs. 6,504-0-1 and Rs. 2-8-10 in 1895, respectively. Hospital stoppages yielded Rs. 3-14-0 against Rs. 2-4-0 in 1897 and Re. 0-6-0 in 1896.

KAIRA COLLECTORATE.

KAIRA CIVIL HOSPITAL.—*In charge of* Assistant Surgeon M. S. POSTWALLA.

Conservancy.—Satisfactory.

Water-supply.—Mainly from the river Vatruk and partly from wells situated near the river, is abundant, but pronounced unfit for drinking purposes by the Chemical Analyser. The river banks are in a very dirty and insanitary condition.

Hospital buildings—Are in good repair. A new cook-room and a privy are required for the police ward.

General health.—Good. No epidemic occurred in the town. Plague made its appearance in the Anand and Thásra Tálukas in the month of September 1898. There were 539 local cases with 399 deaths up to the end of the year.

Attendance of patients.—359 in-door and 5,851 out-door patients as compared with 480 and 5,896 in 1897 and 516 and 7,804 in 1896, respectively.

Prevailing diseases.—Malarial fevers, bronchitis, diseases of the skin, eye and ear, local injuries and rheumatic affections.

Surgical operations.—There were 382 operations against 428 in 1897 and 466 in 1896. They included operations for stone, cataract and removal of tumours and amputations.

Mortality.—Among in-patients there were 8 deaths or 2·2 per cent. to the total treated as compared with 38 or 7·9 per cent. in 1897, and 18 or 3·5 per cent. in 1896. The chief causes were malaria, starvation, pneumonia, dysentery, diarrhœa and fracture of skull.

Vaccination—Is carried out by the táluka vaccinator.

Medico-legal cases.—There were 16 *post-mortem* examinations held against 13 in 1897 and 8 in 1896. Besides, opinion was given in 53 medico-legal cases, as compared with 66 in 1897 and 56 in 1896.

Conduct of the establishment—Was good. First Class Hopital Assistant Rama Malup, No. 34, is zealous and hard-working, and his general conduct is excellent.

Cost.—The total cost was Rs. 3,143-6-1 and the cost per patient Re. 0-8-1, as compared with Rs. 3,993-5-8 and Re. 0-10-0 in 1897 and Rs. 3,874-13-10 and Re. 0-7-5 in 1896, respectively

Hospital stoppages.—Rs. 158-1-0 were received against Rs. 116-10-0 in 1897 and Rs. 147-15-0 in 1896.

GRANT-IN-AID DISPENSARIES.

BAI MANEÇKBAI BYRAMJI JIJIBHOY DISPENSARY, MEHMADABAD.—*In charge of* First Class Hospital Assistant NARSAPPA ERRAPPA, No. 82.

The dispensary building is in good repair. Quarters for servants and a store-room are much needed. The dispensary was visited seven times by the committee and once by the Collector of Kaira. The sanitary condition of the town is good. Water-supply from wells and a river is good and abundant. There were 53 in-door and 8,504 out-door patients treated against 90 and 7,462 in 1897 and 110 and 10,460 in 1896, respectively. Malarial fevers, bowel complaints and eye, ear and skin affections were the most common complaints. Surgical operations numbered 245, as compared with 280 in 1897 and 495 in 1896. There were 33 medico-legal cases examined and reported on, against 70 in 1897 and 73 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Kaira. The total cost was Rs. 1,351-7-9 and the cost per patient Re. 0-2-6, against Rs. 1,915-8-0 and Re. 0-4-1 in 1897 and Rs 1,125-8-8 and Re. 0-1-8 in 1896, respectively. Rs. 25-13-0 were hospital stoppages, as compared with Rs. 36-11-0 in 1897 and Rs. 41-3-0 in 1896.

BORSAD.—*In charge of* Second Class Hospital Assistant RAMKRISHNA SUKESHWAR, No. 139.

The dispensary buildings and the Hospital Assistant's quarters require repair and white-washing. Quarters for servants are urgently needed. The dispensary committee met four times in 1898 and in 1897 and six times in 1896. The Commissioner, N. D., visited the dispensary in 1896, and the Collector of Kaira once in 1897 and 1898. The sanitary condition of the town was fair and is improving under the management of the municipality. The water-supply from wells is good and sufficient. The total treated was 4,691 out-door and 201 in-door patients, against 4,335 and 141 in 1897 and 7,531 and 116 in 1896, respectively. The prevailing diseases were malarial fevers, ophthalmia, worms, diseases of the digestive system, ulcers and local injuries. There was no epidemic disease in 1898. Three cases of cholera occurred in July 1896 with 2 deaths. In 1897 there were 2 cases of small-pox. Surgical operations numbered 221 against 206 in 1897 and 251 in 1896. There were 20 *post-mortem* examinations held against 11 in 1897 and 7 in 1896. The Civil Surgeon of Kaira inspected the dispensary once in each year. The total cost was Rs. 1,765-10-5 and the cost per patient Re. 0-5-9 against Rs. 1,232-4-10 and Re. 0-4-5 in 1897 and Rs. 1,638-15-1 and Re. 0-3-5 in 1896 respectively. Rs. 10-1-0 were hospital stoppages, as compared with Rs. 5-7-0 in 1897 and Rs. 9-1-0 in 1896.

MAHUDHA.—*In charge of* Second Class Hospital Assistant BAPUJI JADOW, No. 135.

The dispensary is situated on an elevated site of the town. The buildings with the dead-house and hospital assistant's quarters are in a fair state of repair. Furniture and fittings are sufficient. Quarters for dispensary servants are wanted. The dispensary was visited by the committee 7 times in 1896 as compared with 5 times in 1897 and twice in 1898. Malarial fevers, conjunctivitis, bronchitis catarrhal, scabies and constipation were the most common complaints. There were 79 in-door and 5,841 out-door patients treated as compared with 81 in-door and 6,956 out-door in 1897 and 52 in-door and 8,256 out-door in 1896. Cholera had broken out in the town in June, July and August 1896. The dispensary was inspected by the Civil Surgeon, Kaira, once in each year. Conservancy is, on the whole, fair. Water-supply from wells is good and abundant, but that of some of them is liable to pollution. The tank water is used for watering cattle, washing clothes and bathing purposes. There were 206 surgical operations performed against 224 in 1897 and 184 in 1896. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made in 1896, against nine in 1897 and two in 1898. Opinion was given in 45 medico-legal cases as compared with 67 in 1897 and 39 in 1898. The total cost was Rs. 1,238-2-2 and the cost per patient Re. 0-3-4 during the year 1898, as compared with Rs. 1,312-11-8 and Re. 0-3-0 in 1897 and Rs. 1,674-11-6 and Re. 0-3-3 in 1896, respectively. Rs. 11-4-0 were collected under the hospital stoppages rules in 1896, Rs. 23-2-0 in 1897 and Rs. 26-8-0 in 1898.

KAPADVANJ.—*In charge of* First Class Hospital Assistant MANIKLAL H. VYAS, No. 67.

The building is in good repair, with the exception of the roofs which are damaged by monkeys. The committee visited the dispensary every month. The water-supply from wells is good and abundant. The sanitary condition of the town is fair. The total number treated was 10,063 out-door and 26 in-door patients as compared with 9,892 and 37 in 1897 and 13,113 and 51 in 1896, respectively. The most common diseases were dysentery, malarial fevers, rheumatic, eye, ear, skin and respiratory affections, bowel complaints and ulcers. There was one case of plague in each of the years 1898 and 1897 and 6 cases in 1896. Surgical operations numbered 372 as compared with 406 in 1897 and 706 in 1896. The dispensary was inspected by the Civil Surgeon, Kaira. Vaccination is carried on by the táluka vaccinator. There were 4 *post-mortem* examinations held, or the same as in 1897. The number of medico-legal cases certified was 46 against 63 in 1897 and 61 in 1896. The total cost was Rs. 2,323-2-6 and the cost per patient Re. 0-3-8 as compared with Rs. 2,057-12-5 and Re. 0-3-4 in 1897 and Rs. 1,601-11-9 and Re. 0-1-11 in 1896, respectively. The amount collected under the compounding system of the hospital stoppage rules was Rs. 87 against Rs. 54 in 1897 and Rs. 77-2-0 in 1896.

A'NAND.—*In charge of* Second Class Hospital Assistant MAHABIR PRASADA, No. 114.

The dispensary building is in good repair. The committee visited the dispensary twice during the year. Conservancy is fairly good. Water-supply from wells and tanks good and abundant. There were 81 in-door and 4,607 out-door patients treated against 159 in-door and 7,262 out-door in 1897 and 149 in-door and 5,953 out-door in 1896. The prevailing diseases were malarial fevers, bowel complaints, eye affections and ulcers. Of plague, 130 cases were treated by the Hospital Assistant in villages of the táluka. There were 13 *post-mortem* examinations held and 200 medico-legal cases certified as compared with 10 and 258 in 1897 and 18 and 210 in 1896, respectively. Surgical operations numbered 258 in the year 1897 and 204 in 1896; those for the year 1898 were not recorded by the Hospital Assistant on account of heavy plague work. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Kaira. The total cost was Rs. 1,702-8-10 and the cost per patient Re. 0-5-10 against Rs. 1,423-2-0 and Re. 0-3-1 in 1897 and Rs. 1,163-5-9 and Re. 0-3-1 in 1896, respectively. Rs. 19-8-0 were hospital stoppages as compared with Rs. 34-8-0 in 1897 and Rs. 16-2-0 in 1896. The dispensary was closed from 24th November to 31st December 1898.

MUNICIPAL DISPENSARIES.

NADIA'D.—*In charge of* First Class Hospital Assistant BALAJI MOOCUND, No. 47.

The dispensary building is in a good state of repair. Quarters for the Hospital Assistant have been provided, but those for menial servants and a new dead-house in accordance with the standard plan are urgently needed. The committee visited the dispensary three times during the year. The sanitation of the town is well attended to, and the streets are well watered and lighted by the municipality. There are 28 wells which yield sweet water—5 in and 23 outside the town, and 150 wells, the water of which being brackish, is used for domestic purposes. There were 97 in-door and 20,856 out-door patients treated against 126 in-door and 20,750 out-door in 1897 and 82 in-door and 26,287 out-door in 1896. The prevailing diseases were malarial fevers, ulcers and eye, ear and respiratory affections. There was no epidemic disease in the town or in the táluka. The total number of surgical operations was 845 as compared with 999 in 1897 and 1,034 in 1896. Opinion was given in 140 medico-legal cases against 149 each in 1897 and 1896. There were 15 *post-mortem* examinations held as compared with 12 in 1897 and 1896. Vaccination is performed by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon, the Assistant Collector and the District Deputy Collector, Kaira. The total cost was Rs. 3,612-4-2 and the cost per patient Re. 0-2-9 against Rs. 5,415-0-6 and Re. 0-4-2 in 1897 and Rs. 2,310-6-7 and Re. 0-1-5 in 1896, respectively.

DAKOR.—*In charge of* Second Class Hospital Assistant KISSON SINGH, No. 134.

The dispensary building is in good repair. The furniture and fittings are sufficient and in good order. Sanitary condition of the town is good. The water-supply from wells is good and sufficient. The dispensary committee visited the dispensary 6 times against 7 in 1897 and 8 in 1896. The total treated was 8,001 out-door and 91 in-door patients as compared with 8,059 and 138 in 1897 and 11,467 and 78 in 1896. The most common diseases were malarial fevers, intestinal worms, diseases of the skin, eye, ear and digestive and respiratory system and local injuries. There were 3 imported plague cases in 1898 against one in 1897. Plague is prevalent in surrounding villages of Dákor. Vaccination is carried out by the táluka vaccinator. Surgical operations numbered 208 against 218 in 1897 and 391 in 1896. There were 9 *post-mortem* examinations held against 7 in 1897 and 1 in 1896. Opinion was given in several medico-legal cases. The dispensary was inspected every year by the Civil Surgeon, Kaira. The conduct of the establishment has been very good. The death of the dispensary compounder, Mr. Davideen Pitamber, is a distinct loss to the Dákor dispensary. He was a very honest, efficient and meritorious subordinate. The total cost was Rs. 1,188-4-11 and the cost per patient Re. 0-2-4 as compared with Rs. 2,100-11-0 and Re. 0-4-1 in 1897 and Rs. 1,398-12-0 and Re. 0-2-0 in 1896, respectively. The amount collected under the compounding and hospital stoppage systems was Rs. 17-15-0 against Rs. 21-13-0 in 1897 and Rs. 31-3-0 in 1896.

UMRETH.—*In charge of* Mr. SHIVPRASAD J. MEHTA.

The dispensary building, a hired one, is kept in good repair. The committee visited the dispensary twice in 1898 and 4 times in 1897. The conservancy arrangements are well attended to by the municipality. Water-supply from wells is wholesome and plentiful. The total treated was 6,354 out-door patients, as compared with 7,165 in 1897 and 9,982 in 1896. Ague, worms, rheumatic, eye, ear, skin and bronchial affections and bowel complaints prevailed as usual. Plague broke out in the town and its vicinity, returning 101 cases with 80 deaths. There were 122 surgical operations performed against 151 in 1897 and 156 in 1896. Vaccination is carried out by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon of Kaira. The total cost was Rs. 1,640-14-4 and the cost per patient Re. 0-4-2 against Rs. 1,629-8-4 and Re. 0-3-8 in 1897 and Rs. 1,552-5-9 and Re. 0-2-6 in 1896, respectively. The dispensary was practically closed by the end of October 1898, owing to the prevalence of plague and consequent evacuation of the town.

LOCAL FUND DISPENSARY.

MATAR AND MEHMADABAD ITINERATING DISPENSARY.—*In charge of* Mr. GOPAL SINGH.

The dispensary was sent out from 22nd October to 17th December 1896 and from 15th to 31st December 1898, having been entirely closed during the year 1897 for want of medical subordinates. The sanitary condition of the villages visited during the above periods for medical relief is defective, and the water-supply from wells and rivers sufficient and of fair quality. There were 140 patients treated in 1898, and 1,546 in 1896. The principal ailments were malarial fevers and bowel, skin and respiratory affections. Five surgical operations were performed in 1896. Vaccination is carried out by the táluka vaccinator. The Civil Surgeon of Kaira inspected the dispensary once in each period. The total cost was Rs. 119-6-5 and the cost per patient Re. 0-13-8 during the year 1898, and Rs. 18-1-2 and Re. 0-0-2 respectively in 1896.

PANCH MAHA'LS COLLECTORATE.

GODHRA CIVIL HOSPITAL.—*In charge of* Assistant Surgeon M. J. MISTRI.

Conservancy.—Fair on the whole. The arrangements remain practically the same as reported in previous years. The old cesspits and well-privies still continue, but many open privies accessible to bhangis have been allowed to be opened in private houses.

Water-supply.—From wells chiefly, also from the river and the tank. Some of the wells are liable to soakage from surrounding dwellings and some have objectionable surroundings.

Hospital buildings.—The main buildings and the out-houses are kept in a good state of repair, but the iron railing round the hospital compound sanctioned by Government in their Resolution No. 2829, dated 30th July 1894, has not as yet been taken in hand.

General health.—Fair in 1896, there having been a mild epidemic of cholera prevalent in the town about the middle of the year. Good in 1897 and bad in 1898, owing to the prevalence of plague in an epidemic form towards the end of the year and also to wider prevalence of seasonal fevers.

Attendance of patients.—7,219 out-door and 328 in-door patients were treated against 7,200 and 452 in 1897 and 9,420 and 491 in 1896, respectively.

Prevailing diseases.—Ague, conjunctivitis, bronchitis, boils and intestinal worms.

Surgical operations.—327 operations were performed against 303 in 1897 and 568 in 1896.

Mortality and its causes.—There were 29 deaths (including 11 from plague) against 100 of 1897 and 71 of 1896. Almost all deaths occurred among beggars and medicants suffering from the last stage of privation.

Vaccination—Is performed by the táluka vaccinator. There were 583 primary and 6 secondary vaccinations against 665 and nil in 1897 and 597 and 35 in 1896, respectively.

Medical legal cases.—Five *post-mortem* examinations were made and opinion given in 15 police cases against 12 and 24 in 1897 and 3 and 45 in 1896, respectively.

Conduct of establishment.—Good.

Cost.—The total cost was Rs. 3,103-14-6 and the cost per patient Re. 0-6-7 against Rs. 3,872-7-3 and Re. 0-8-1 in 1897 and Rs. 3,963-3-9 and Re. 0-6-5 in 1896, respectively.

Hospital stoppages.—Rs. 340-9-0 were realized against Rs. 341-9 in 1897 and Rs. 506 in 1896.

GRANT-IN-AID DISPENSARIES.

DOHAD.—*In charge of* Third Class Hospital Assistant JAMIETRAM BHUPATRAI DESAI, No. 302.

The buildings are in a good state of repair. The dispensary was visited by the Commissioner, Northern Division, the Collector, the Assistant Collector, and the District Superintendent of Police, Panch Mahâls, and the Mámlatdár and the chairman of the dispensary committee. Meetings were held by the dispensary committee. The sanitary arrangements of the town are imperfect. The water-supply from a large tank and several wells is fairly sufficient but very impure. The total number of patients treated was 7,613 out-door and 191 in-door as compared with 5,677 and 253 in 1897 and 6,806 and 265 in 1896, respectively. The prevailing diseases were malarial fevers, skin affections, intestinal worms and diseases of the digestive and respiratory systems. Cholera prevailed both in the town and neighbouring villages in June, July and August. There were 360 surgical operations performed against 417 in 1897 and 454 in 1896. Vaccination is carried on by a local fund vaccinator. Three *post-mortem* examinations were made at the instance of the police against 4 in 1897 and 6 in 1896. The dispensary was inspected by the Surgeon-General with the Government of Bombay and the Civil Surgeon of Panch Mahâls. The total cost was Rs. 1,804-14-6 and the cost per patient Re. 0-3-8 against Rs. 2,248-8-10 and Re. 0-6-1 in 1897 and Rs. 2,796-14-2 and Re. 0-6-4 in 1896, respectively. The receipts from hospital stoppages were Rs. 73-8-0 as compared with Rs. 71-12-0 in 1897 and Rs. 122-7-0 in 1896. The compounding system has been introduced since the year 1897.

KALOL.—*In charge of* Second Class Hospital Assistant HARILAL CHHAGANLAL, No. 173.

The dispensary buildings are suitable and in a good state. Shelves in the store-room are much needed. The chairman of the dispensary committee visited the dispensary six times. Conservancy arrangements are not very satisfactory. Water-supply from wells is good and abundant. There were 68 in-door and 2,874 out-door patients treated against 81 in-door and 4,001 out-door in 1897 and 92 in-door and 4,507 out-door in 1896. Malarial fevers, conjunctivitis, worms, rheumatism and skin affections were the most common diseases. Plague broke out in the town and its vicinity, returning 121 cases with 100 deaths. Surgical operations numbered 113 as compared with 99 in 1897 and 83 in 1896. There were 6 *post-mortem* examinations held and 12 medico-legal cases certified against 10 and 11 in 1897 and 5 and 8 in 1896, respectively. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Panch Mahâls. The total cost was Rs. 1,080-5-11 and the cost per patient Re. 0-5-10 as compared with Rs. 942-11-11 and Re. 0-3-8 in 1897 and Rs. 1,186-11-10 and Re. 0-4-2 in 1896, respectively. Rs. 21 were hospital stoppages against Rs. 27-12-0 in 1897 and Rs. 23-10-0 in 1896. The dispensary was temporarily closed for two months of the year 1898.

JHALOD.—*In charge of* Third Class Hospital Assistant JEYSHANKAR MAGANLAL, No. 227.

The dispensary building is suitable and in a good state of repair. Furniture and fittings are sufficient. The dispensary committee visited the dispensary three times against four times in 1897 and ten times in 1896. The sanitation of the town is not satisfactory. The water-supply from wells and a tank is ample and of a fairly good quality. The total treated was 4,787 out-door and 81 in-door patients as compared with 5,229 and 59 in 1897 and 4,999 and 64 in 1896, respectively. The most common diseases were malarial fevers, worms, ophthalmia, bowel complaints and skin affections. There were 343 surgical operations performed against 340 in 1897 and 292 in 1896. The town was free from epidemic during these three years. Two *post-mortem* examinations were held as compared with 3 in 1897 and 1 in 1896, and opinion was given in several medico-legal cases. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Panch Mahâls, once in each year. The total cost was Rs. 1,179-9-10 and the cost per patient Re. 0-3-11 against Rs. 1,157-14-0 and Re. 0-3-6 in 1897 and Rs. 1,262-10-2 and Re. 0-4-0 in 1896, respectively. The fees under the hospital stoppage rules amounted to Rs. 43-2-0, as compared with Rs. 35-15-0 in 1897 and Rs. 23 in 1896.

HALOL.—*In charge of* Temporary Third Class Hospital Assistant JAGANNATH JAYANAND VYAS.

The dispensary is located in a hired building, a portion of which provides accommodation for the Hospital Assistant. The new dispensary building is nearly completed. The dispensary was visited by the Collector and the Assistant Collector of Panch Mahâls and by the Mahálkari and the dispensary committee. The Sanitary Board takes a keen interest in the sanitation of the town. Water-supply from wells is good and abundant. There were 15 in-door and 2,471 out-door patients treated as compared with 281 out-door in 1897 and 1,385 out-door in 1896. Malarial fevers, bowel complaints, worms and eye, ear and respiratory affections were the chief causes of admission. Plague broke out for the first time in the month of December 1898, returning 24 cases with 7 deaths in the town and 9 cases with 3 deaths in its vicinity. Surgical operations numbered 129 against 12 in 1897 and 54 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Panch Mahâls. The total cost was Rs. 554-4-2 and the cost per patient Re. 0-3-7 as compared with Rs. 293-12-5 and Re. 1-0-9 in 1897, and Rs. 162-11-7 and Re. 0-1-11 in 1896, respectively. Rs. 11-10-0 were hospital stoppages against Rs. 4-6-0 in 1897 and Rs. 4-13-0 in 1896.

AHMEDABAD COLLECTORATE.

HUTTESING AND PREMABHAI CIVIL HOSPITAL, AHMEDABAD.—*In charge* of Lieutenant-Colonel M. L. BARTHOLOMEUSZ, M.B., I. M. S.

Hospital buildings—Are in good order and afford sufficient accommodation for male patients, but that for female patients is inadequate. A new ophthalmic hospital and a dispensary for the out-patient department of the civil hospital are about to be built through the liberality of Khán Bahádur Navroji Pestonji Vakil, C.I.E.

Conservancy.—Funds are being raised to extend the drainage system recommended by Mr. Baldwin Latham, and the conservancy will not be satisfactory until this drainage scheme is carried out throughout the whole town. At present a small portion of the town has been scientifically drained, and the conservancy of the major portion is in the hands of sweepers, who transport all night-soil to some distance, where it is converted into poudrette.

Water-supply.—From the municipal water-works: is ample and good.

General health—Was fairly good, there being no epidemic disease since the introduction of the new water-supply.

Attendance of patients.—1,625 in-door and 14,296 out-door patients as compared with 1,564 in-door and 12,607 out-door in 1897 and 1,745 in-door and 19,872 out-door in 1896. The marked decrease in 1897 was due to the panic created by the measures adopted to keep away the plague.

Prevailing diseases.—Malarial fevers and skin, eye, ear, bronchial and venereal affections.

Surgical operations.—618 operations were performed against 1,219 in 1897 and 1,410 in 1896.

Mortality and its causes.—There were 80 deaths in hospital as compared with 138 in 1897 and 167 in 1896. The chief causes were diarrhœa, dysentery, pneumonia, leprosy, debility, enteric fever, phthisis and plague.

Vaccination—Is carried out by the municipal vaccinator, and is favourably received by the people.

Medico-legal cases.—704 cases were reported upon, including 24 autopsies.

Conduct of establishment—Has, on the whole, been good.

Kagrapeth Asylum for Lepers—Is a branch of the Civil Hospital for the segregation of lepers who are found wandering about the town. The following statement shows the steady increase of lepers in the asylum during the last seven years:—

	1892.	1893.	1894.	1895.	1896.	1897.	1898.
Daily average sick	27·5	28·5	31·3	38·9	40·1	47·7	55·3

Cost.—The total cost was Rs. 14,993-14-4 and the cost per patient Re. 0-15-1 as compared with Rs. 14,368-10-8 and Re. 1-0-3 in 1897 and Rs. 12,475-11-9 and Re. 0-9-3 in 1896, respectively.

Hospital stoppages.—Amounted to Rs. 26-4-0 against Rs. 61-1-0 in 1897 and Rs. 26-2-0 in 1896.

GRANT-IN-AID DISPENSARIES.

RANCHHODLAL DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon S. F. GHANDHY.

The buildings are kept in a good state of repair. The furniture and fittings are quite sufficient. The dispensary committee visited the dispensary ten times. The sanitary condition of the town is fair. The water-supply from Dudheswar water-works is good and abundant. The drainage works have been completed in a part of the town. The total treated was 11,700 out-door and 149 in-door patients against 9,690 and 139 in 1897 and 14,850 and 150 in 1896. The most common diseases were malarial fevers and diseases of the skin and digestive and respiratory systems. There were 833 surgical operations performed against 831 in 1897 and 1,028 in 1896. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmedabad once in each year, and by the Surgeon-General with the Government of Bombay in 1896. The total cost was Rs. 4,728-9-3 and the cost per patient Re. 0-6-5 against Rs. 4,630-2-8 and Re. 0-7-6 in 1897 and Rs. 4,539-11-3 and Re. 0-4-10 in 1896, respectively. Hospital stoppage rules are not in force at this dispensary.

VICTORIA JUBILEE DISPENSARY, AHMEDABAD.—*In charge of* Miss KAPADIA.

The buildings are kept in a good state of repair. The furniture and fittings are sufficient. The committee visited the dispensary eight times, and the individual members frequently. The total treated was 11,173 out-door and 264 in-door patients against 9,511 and 239 in 1897 and 14,018 and 176 in 1896, respectively. The most common diseases were malarial fevers, diseases of the respiratory and generative system, eye and skin and ulcers. There were 322 surgical operations performed as compared with 449 in 1897 and 537 in 1896. The dispensary was inspected by the Civil Surgeon of Ahmedabad. The total cost was Rs. 5,476-2-6 and the cost per patient Re. 0-7-8 against Rs. 4,990-11-4 and Re. 0-8-2 in 1897 and Rs. 5,001-14-10 and Re. 0-5-8 in 1896, respectively.

SANAND.—*In charge of* Second Class Hospital Assistant POPUTLAL LALLUBHAI, No. 105.

Repairs to the dispensary buildings have not been executed since 1st April 1897. A room for surgical operation and private examination is much needed; also a cupboard for keeping records and shelves in the store-room. The male and female wards should have concrete flooring instead of earthen ones. The committee visit the dispensary once a month regularly. The Commissioner, Northern Division, and the Collector and the District Deputy Collector of Ahmedabad also visited it. The conservancy of the town is well looked after. Water-supply from the tanks and wells is ample and of a fairly good quality. The principal diseases were malarial fevers, skin, eye, ear and respiratory affections, ulcers and bowel complaints. In 1896 cholera gave 172 cases with 99 deaths. The total treated was 5,879 out-door and 76 in-door patients against 4,415 and 41 in 1897 and 5,734 and 41 in 1896, respectively. There were 119 surgical operations performed against 109 in 1897 and 170 in 1896. Six *post-mortem* examinations were held against 1 each in 1897 and 1896. Opinion was given in several medico-legal cases. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmedabad. The amount of hospital stoppages collected during the year was Rs. 124-4-0 against Rs. 109-11-0 in 1897 and Rs. 67-1-0 in 1896. The total cost was Rs. 1,726-7-6 and the cost per patient Re. 0-4-8 against Rs. 1,715-14-1 and Re. 0-6-2 in 1897 and Rs. 1,771-11-6 and Re. 0-4-11 in 1896.

VIRAMGÁM.—*In charge of* First Class Hospital Assistant RAMSINGH, No. 42.

The dispensary building and out-houses need repair, but this will be done shortly, as the estimate has now been sanctioned. A new dead-house is badly required, the one at present in use being condemned by the inspecting officers. The dispensary committee and the chairman visited the dispensary frequently. The most common diseases were malarial fevers, worms and diseases of the eye, digestive system and skin. There was no epidemic in 1897 and 1898, but in 1896, 93 cases of cholera occurred with 53 deaths in the town. The dispensary was inspected by the Surgeon-General with the Government of Bombay on the 24th November 1896 and by the Civil Surgeon of Ahmedabad every year regularly. The total treated was 6,553 out-door and 103 in-door patients against 6,256 and 136 in 1897 and 5,827 and 138 in 1896, respectively. The sanitary condition of the town is indifferent. The water-supply is of fair quality, and generally runs short during the hot season. There were 422 surgical operations performed as compared with 360 in 1897 and 465 in 1896. Vaccination is conducted by the táluka vaccinator. Six *post-mortem* examinations were held against 10 in 1897 and 5 in 1896. There were 64 medico-legal cases certified as compared with 142 in 1897 and 139 in 1896. The total cost was Rs. 2,006-13-2 and the cost per patient Re. 0-4-11 as compared with Rs. 2,558-1-10 and Re. 0-6-5 in 1897 and Rs. 2,166-15-3 and Re. 0-5-10 in 1896, respectively. The amount realized from hospital stoppages was Rs. 90-4-0 against Rs. 78-10-0 in 1897 and Rs. 67-4-0 in 1896.

DHOLKA.—*In charge of* Second Class Hospital Assistant SHIVRAM NARAYEN, No. 153.

The dispensary buildings are in a good state of repair. The furniture and fittings are sufficient and in good order. The dispensary committee met 15 times during the year. The sanitary condition of the town has been good. The water-supply, chiefly from wells, is abundant and fairly good. There were 84 in-door and 5,005 out-door patients treated against 99 in-door and 5,676 out-door in 1897 and 85 in-door and 6,941 out-door in 1896. The prevailing diseases were malarial fevers, rheumatic affections and diseases of the eye, ear, respiratory and digestive systems and skin and ulcers. There were 111 surgical operations performed against 192 in 1897 and 218 in 1896. Vaccination is carried out by a local fund vaccinator. There were 9 *post-mortem* examinations held against 10 in 1897 and 2 in 1896. The number of medico-legal cases examined and reported on was 132 against 121 in 1897 and 81 in 1896. The Civil Surgeon, Ahmedabad, inspected the dispensary once every year, and the Deputy Sanitary Commissioner once in 1897. The total cost was Rs. 1,804-5-9 and the cost per patient Re. 0-5 8 as compared with Rs. 1,581-13-11 and Re. 0-4-5 in 1897 and Rs. 1,664-9-9 and Re. 0-3-9 in 1896, respectively. Rs. 41-15-0 were hospital stoppages against Rs. 59-7-0 in 1897 and Rs. 64-7-0 in 1896.

DHANDHUKA.—*In charge of* First Class Hospital Assistant BABURAO NARAYAN, No. 53.

The dispensary building is well situated and in good repair, but the roofs of the dead-house and two latrines require renewal. Furniture and fittings are sufficient and in good order. An

operating table is required. The dispensary committee visited the dispensary three times against 4 in 1897 and 8 in 1896. Conservancy arrangements of the town are good. Water-supply, chiefly from wells, is of good quality and sufficient.

The total number of patients treated was 4,210 out-door and 60 in-door as compared with 4,119 and 57 in 1897 and 5,692 and 79 in 1896, respectively. The prevailing diseases were malarial fevers, diseases of the eye, ear and digestive system and ulcers. Surgical operations numbered 387 against 447 in 1897 and 703 in 1896. Vaccination is conducted by a local fund vaccinator under the supervision of the Sanitary Department. Opinion was given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Ahmedabad, once in each year. The total cost was Rs. 1,519-12-5 and the cost per patient Re. 0-5-8 against Rs. 1,624-4-7 and Re. 0-6-3 in 1897 and Rs. 1,738-6-3 and Re. 0-4-10 in 1896, respectively. The amount collected under the compounding and hospital stoppage system was Rs. 24-15-0 against Rs. 35-8-0 in 1897 and Rs. 58-14-0 in 1896.

PARANTIJ.—*In charge of* Second Class Hospital Assistant CHINTAMAN YADAV VAIDYA, No. 158.

The dispensary buildings require repairs, which have not been executed during the last four years. A small separate latrine for dispensary establishment is needed. The dispensary was frequently visited by the members of the committee as well as by the President of the Municipality. The sanitary condition of the town is, on the whole, good Water-supply from wells is fair and sufficient. The total treated was 3,205 out-door and 9 in-door patients against 4,595 and 38 in 1897 and 5,543 and 85 in 1896, respectively. The prevailing diseases were malarial fevers, ophthalmia, bowel complaints and skin diseases. There were 132 surgical operations performed against 121 in 1897 and 152 in 1896. Three *post-mortem* examinations were held against 7 in 1897 and 5 in 1896. Vaccination is carried out by the táluka local fund vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmedabad. The dispensary was closed on account of the Hospital Assistant being sent on plague duty, Sátára, from 10th December 1897 to 20th May 1898. The conduct of the establishment was good. The total cost was Rs. 1,117-11-10 and the cost per patient Re. 0-5-7 against Rs. 1,114-15-4 and Re. 0-3-10 in 1897 and Rs. 1,171-0-4 and Re. 0-3-4 in 1896, respectively. Rs. 7-12-0 were hospital stoppages as compared with Rs. 27-6-0 in 1897 and Rs. 54 in 1896.

GOGHA.—*In charge of* Third Class Hospital Assistant DOLATRAI DAYABHAI, No. 228.

The dispensary buildings are repaired annually. The want of quarters for the compounder and peon is much felt. The dispensary compound requires a wire fence to prevent the ingress of stray cattle. The committee and its members visited the dispensary frequently.

The total number of patients treated was 39 in-door and 5,932 out-door as compared with 68 and 5,866 in 1897 and 60 and 6,641 in 1896. In all there were 7 plague cases with 5 deaths during the three years—3 fatal cases in 1898 and 2 cases with 1 death in 1897 and in 1896. Cholera broke out in 1896 and gave 79 cases. The prevailing diseases were malarial fevers, round worms, conjunctivitis, catarrhal bronchitis, bowel complaints and skin affections. Surgical operations numbered 233 against 384 in 1897 and 409 in 1896. There were 4 *post-mortem* examinations held in each of the years 1898 and 1896 and 3 in 1897. Opinion was given in 42 medico-legal cases against 47 in 1897 and 46 in 1896. The Civil Surgeon of Ahmedabad inspected the dispensary once in each year. Vaccination is conducted by the táluka vaccinator. The sanitary condition of the town is fairly good. The water-supply is sufficient, but impure.

The total cost was Rs. 1,398-15-6 and the cost per patient Re. 0-3-9 as compared with Rs. 1,650-13-1 and Re. 0-4-5 in 1897 and Rs. 1,765-15-7 and Re. 0-4-3 in 1896, respectively. Hospital stoppages amounted to Rs. 55-3-0 against Rs. 79-5-0 in 1897 and Rs. 65-9-0 in 1896.

MODA'SA.—*In charge of* Second Class Hospital Assistant JEYSHING NAGINDAS SHAH, No. 215.

The dispensary buildings are in good order and repair. There are no quarters for the Hospital Assistant in the dispensary compound. Furniture and fittings are sufficient, but an additional shelf is required in the store-room. The dispensary committee visited the institution 4 times, and the Collector of Ahmedabad, the Assistant Collector and President of the Modása Municipality and the Mahálkari of this station once. The town is kept clean by the municipality, and conservancy arrangements are satisfactory. Water-supply from wells and the river Mahajum is abundant and fairly good. The total treated was 3,468 out-door and 46 in-door patients, against 2,858 and 49 in 1897 and 4,049 and 66 in 1896. The most common diseases were ague, diseases of the eye, ear, skin and digestive system, ulcers and local injuries. No epidemics of any kind occurred in the town during the years 1898 and 1897. Small-pox was epidemic in the town during the months from February to April 1896. There were 100 surgical operations performed against 79 in 1897 and 112 in 1896. Vaccination is conducted from house to house by the Local Fund vaccinator. Three *post-mortem* examinations were made at the request of the police and opinion was given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Ahmedabad, once in each year. The total cost was Rs. 1,239-8-8 and the cost per patient Re. 0-5-8, against Rs. 996-4-11 and Re. 0-5-6 in

1897 and Rs. 1,156-13-0 and Re. 0-4-6 in 1896, respectively. The fees collected under the hospital stoppage rules amounted to Rs. 42-7-0, as compared with Rs. 41-6-0 in 1897 and Rs. 46-7-0 in 1896.

RANPUR.—*In charge of* Second Class Hospital Assistant SHIVRAM NARAYAN, No. 153.

The dispensary building, a hired one, is well repaired. The construction of a new building for the dispensary has been begun, but it does not seem to provide servants' quarters, a cook-room and a *post-mortem* room. The dispensary committee met 4 times in 1898 against 1 in 1897 and 10 in 1896. The sanitation of the town has been fairly good during the 3 preceding years. The water-supply from the river Bhadur and from wells is free from soakage and of good quality.

The total number of patients treated during the year 1898 was 3,015 out-door and 28 in-door, against 3,219 and 47 in 1897 and 3,505 and 35 in 1896, respectively. The prevailing diseases were malarial fevers, eye, ear and skin affections, bowel complaints and ulcers. There were 140 surgical operations performed, against 102 in 1897 and 134 in 1896. Vaccination is carried on by the Local Fund vaccinator. Three *post-mortem* examinations were made at the instance of the police, against 3 in 1897 and 1 in 1896. Opinion was given in several medico-legal cases. The Civil Surgeon, Ahmedabad, inspected the dispensary once every year.

The total cost of the institution was Rs. 1,120-12-9 and the cost per patient Re. 0-5-11, against Rs. 1,239-15-4 and Re. 0-6-1 in 1897 and Rs. 1,074-2-8 and Re. 0-4-10 in 1896, respectively. The amount collected under the compounding and hospital stoppage systems was Rs. 21-2-0, against Rs. 30-9-0 in 1897 and Rs. 19-13-0 in 1896.

MA'NDAL.—*In charge of* Second Class Hospital Assistant BANKAY BEHARI, No. 144.

The dispensary was moved from the kuchery (old office of the Thanadár) into the new building on the 1st August 1898. This new dispensary building answers the purpose very well, and its site is very convenient for the town people. The store-room is too small and inadequate for the purpose. It therefore requires to be enlarged, as suggested by the Civil Surgeon, Ahmedabad. Furniture and fittings are fairly sufficient and in good order; but a table for *post-mortem* examination and wooden shelves for keeping medicines, &c., in the store-room are much needed. Vaccination is carried on by the táluka vaccinator. The committee visited the dispensary regularly, and the District Deputy Collector and President and the Mámlatdár of Viramgám occasionally. The conservancy arrangements of the town are good. Water-supply from wells and tank is sufficient and of fairly good quality. The dispensary was inspected by the Civil Surgeon, Ahmedabad, once every year. The total treated was 4,863 out-door and 5 in-door patients, as compared with 4,322 and 5 in 1897 and 4,491 and 9 in 1896, respectively. The most common diseases were ague, conjunctivitis, inflammation of external ear, bronchitis, scabies, ringworm, ulcers and eczema. Cholera broke out in the beginning of April and lasted till the commencement of June 1896 about 18 miles from this station. There were 383 surgical operations performed, as compared with 397 in 1897 and 353 in 1896. The total cost was Rs. 1,065-14-5 and the cost per patient Re. 0-3-6, as compared with Rs. 1,091-4-5 and Re. 0-4-0 in 1897 and Rs. 1,009-5-3 and Re. 0-3-7 in 1896, respectively. The amount collected under the compounding and hospital stoppage systems was Rs. 91-13-0, against Rs. 47-2-0 in 1897 and Rs. 37-11-0 in 1896.

THE LORD HARRIS TRAVELLING DISPENSARY, DASKROI, TÁLUKA AHMEDABAD.—*In charge of* Third Class Hospital Assistant NARAYANRAO JERAMRAO, No. 314.

The dispensary committee met once in 1896 and in 1897. The total number of patients treated was 5,099, against 4,001 in 1897 and 4,279 in 1896. The most common diseases were malarial fevers, worms, ulcers and diseases of the respiratory and digestive system, earliest and skin. Vaccination is conducted by the táluka local fund vaccinators from village to village. The Civil Surgeon of Ahmedabad inspected the dispensary. The conservancy arrangements of the táluka are not satisfactory. The water-supply chiefly from wells is sufficient and of fairly good quality. This dispensary is exempted from the operation of the hospital stoppage rules. The total cost was Rs. 1,610-6-2 and the cost per patient Re. 0-5-1, against Rs. 1,688-4-6 and Re. 0-6-9 in 1897 and Rs. 1,268-12-2 and Re. 0-4-9 in 1896, respectively.

ENDOWED DISPENSARIES.

BECHERDAS DISPENSARY, AHMEDABAD.—*In charge of* First Class Assistant Surgeon Khán Bahádur K. B. COOPER.

The dispensary buildings and furniture, fittings, &c., are in good order. There were 10 meetings of the dispensary committee which consist of 5 members, who are all appointed by Government. The total treated was 56 in-door and 16,338 out-door patients, as compared with 49 in-door and 13,595 out-door in 1897 and 64 in-door and 21,540 out-door in 1896. The prevailing diseases were conjunctivitis, ague, scabies, ascaris lumbricoides, bronchitis and ulcers. Surgical operations numbered 808, against 744 in 1897 and 950 in 1896; of these, the most

important were lithotomies, extraction of lens, amputations and removal of tumours. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon of Ahmedabad. The total cost was Rs. 5,471-10-2 and the cost per patient Re. 0-5-4, as compared with Rs. 5,533-4-4 and Re. 0-6-6 in 1897 and Rs. 5,437-13-3 and Re. 0-4-0 in 1896, respectively. Rs. 54 were hospital stoppages, against Rs. 34-2-0 in 1897 and Rs. 28-4-0 in 1896.

RANCHHODLAL HOME MEDICAL RELIEF INSTITUTION, AHMEDABAD.—*In charge of* Pensioned First Class Hospital Assistant LUXMON SINGH.

The dispensary is situated in one of the rooms of the municipal office and the work in connection with it is done by circulars. There were 608 patients treated as compared with 378 in 1897 and 529 in 1896. The prevailing diseases were ague and rheumatic, respiratory and bowel affections. There were 44 deaths among the patients against 46 in 1897 and 91 in 1896. The total cost was Rs. 1.149-4-6 and the cost per patient Rs. 1-14-3 as compared with Rs. 1,447-8-9 and Rs. 3-13-3 in 1897 and Rs. 1,190-4-1 and Rs. 2-4-0 in 1896, respectively.

MUNICIPAL DISPENSARY.

RAIPUR DISPENSARY, AHMEDABAD.—*In charge of* First Class Hospital Assistant BHAU SAKHARAM, No. 4.

The main dispensary building and out-houses are in a good state of repair, and the furniture and fittings sufficient and in good order. The dispensary committee of the municipality visited the dispensary every month during the years 1896 and 1897 and five times in 1898. The sanitary arrangements of the city have been looked after by the Municipal Sanitary Committee assisted by the Health Officer of the Municipality. Good potable water is supplied to the city for a trifling payment of Re. 1 per family. The total number of patients treated was 18 in-door and 9.083 out-door as compared with 10 and 8,545 in 1897 and 13 and 11,563 in 1896. respectively. The most common diseases were malarial fevers, eye, ear, skin and respiratory affections and bowel complaints. The dispensary was inspected by the Civil Surgeon, Ahmedabad, once in each year, and by the Surgeon-General with the Government of Bombay in 1896. The surgical operations performed during the year 1898 were 496 against 426 in 1897 and 505 in 1896. This dispensary is vaccine station No. 3, where the vaccinator appointed by the municipality attends every Tuesday and Friday from 7 A.M. to 10 A.M. The hospital stoppage rules are not in force in this dispensary, as it is purely a municipal institution. The total expenditure was Rs. 2,090-10-5 as compared with Rs. 2,368-8-9 in 1897 and Rs. 1,688 in 1896. The cost per patient averaged Re. 0-3-8 against Re. 0-4-5 in 1897 and Re. 0-2-4 in 1896.

SELF-SUPPORTING DISPENSARY.

DHOLERA.—*In charge of* Temporary Third Class Hospital Assistant AMBALAL CHIMANLAL.

The dispensary building, a hired one, requires repair and whitewashing. The addition of a cook-room and a privy for the in-door patients will be a great boon. Furniture and fittings are sufficient. The dispensary was visited four times by the committee, twice by the Vice-President and once by the President of the Municipality. The town is kept fairly clean. Water-supply from wells is defective and impure. There were 44 in-door and 3.007 out-door patients treated as compared with 40 and 4.938 in 1897 and 44 and 5,888 in 1896, respectively. Malarial fevers, eye, ear and skin affections and bowel complaints chiefly prevailed. There was no epidemic disease of any kind in the town or its vicinity. Surgical operations numbered 151 against 130 in 1897 and 434 in 1896. There were 27 medico-legal cases certified as compared with 30 in 1897. Vaccination is carried on by the Local Fund vaccinator of Dhandhuka Táluka for three months of every year. The dispensary was inspected by the Civil Surgeon of Ahmedabad. The total cost was Rs. 1,239-9-9 and the cost per patient Re. 0-6-6 against Rs. 1,432-10-6 and Re. 0-4-7 in 1897 and Rs. 1,597-1-0 and Re. 0-4-4 in 1896, respectively.

GOVERNMENT DISPENSARY.

KHA'RA'GHODA.—*In charge of* Temporary Assistant Surgeon G. L. KUSUMBEKAR.

The dispensary building and its out-houses are in good repair; furniture and fittings sufficient. There is no committee but the dispensary was often visited by the Assistant Collector of Salt Revenue, Khárághoda, and inspected by the Civil Surgeon of Ahmedabad and the Collector of Salt Revenue, Bombay. Conservancy is fairly looked after by the officers of the Salt Department. Water-supply is derived from a tank constructed by Government, the water being brought by means of underground pipes into large troughs, and also from two wells. There were 4,685 out-door and 14 in-door patients treated against 3,899 out-door and 18 in-door in 1897 and 4,910 out-door and 16 in-door in 1896. The prevailing diseases were malarial fevers, constipation and eye and skin affections. There were 99 surgical operations performed as compared with 76 in 1897 and 98 in 1896. Three *post-mortem* examinations were held and opinion was given in 6 medico-legal cases. Vaccination is conducted by the táluka vaccinator. The total cost was Rs. 3,118-11-6 and the cost per patient Re. 0-10-7 against Rs. 3 339-5-2 and Re. 0-13-8 in 1897 and Rs. 2,871-3-10 and Re. 0-9-4 in 1896, respectively. Rs. 28-14-0 were hospital stoppages realized in 1898, Rs. 65-4-0 in 1897 and Rs. 16-10-0 in 1896.

MAHI KA'NTHA AGENCY.

SA'DRA CIVIL HOSPITAL.—*In charge of* Assistant Surgeon D. E. ANKLESARIA.

Conservancy.—Of the Sádra bazár fair, but capable of being improved upon by the erection of a few more public latrines and increase in the number of sweepers. In Sádra village, which belongs to the Thákor of Vásna, it continues to be unsatisfactory.

Water-supply.—Ample from the Sábarmati river, but of inferior quality, unless filtered and purified. That from wells in the Sádra Bazár limits is ample and of good quality.

Hospital buildings—Are in a fair state of repair. A separate ward for the sick of the Agency Police and of the detachment of Native Infantry, two properly fitted up store-rooms, two rooms for servants and a kitchen were completed during 1898. The dead-house should be in the compound of the hospital and not on an inconvenient site at a considerable distance from the hospital. The furniture is old and requires renewal.

General health.—Was good in the past three years. In 1896 cholera prevailed to a very mild extent. In 1897 there was one indigenous case of plague in Sádra and three more in the district.

Attendance of patients.—286 in-door and 9,060 out-door patients were treated against 235 in-door and 8,365 out-door in 1897 and 246 in-door and 11,292 out-door in 1896.

Prevailing diseases.—Malarial fevers, diseases of the digestive and respiratory system, eye and skin, dysentery, diarrhœa, syphilitic and rheumatic affections and ulcers.

Surgical operations.—618 operations were performed against 670 in 1897 and 665 in 1896. Of these, the most important were extraction of the lens, litholapaxy, lithotomies, amputations and removal of tumours.

Mortality.—There were 12 deaths among in-door patients as compared with 7 in 1897 and 9 in 1896.

Vaccination—Is performed by the Assistant Surgeon for six months of the year from arm to arm :—

Year.	Number of Primary Vaccinations.			Re-vaccination.
	Number of children vaccinated.	Number of successful.	Unsuccessful and doubtful.	
1896	127	118	9	22
1897	156	152	4	43
1898	156	155	1	...

Medico-legal cases.—The number of medico-legal cases was 41 against 38 in 1897 and 22 in 1896. These include 12 *post-mortem* examinations held in 1898 against 10 in 1897 and 9 in 1896.

Conduct of the establishment—Was satisfactory.

General observations and wants.—A separate ward for eye cases and surgical and serious cases, two rooms for servants, a *post-mortem* room in the compound of the hospital, an examination room, a shed for dressing surgical cases, an extra compounder, a cook and a ward-boy are badly wanted.

Cost.—The total cost was Rs. 2,631-5-8 and the cost per patient Re. 0-4-6 as compared with Rs. 2,644-11-6 and Re. 0-4-11 in 1897 and Rs. 1,721-0-7 and Re. 0-2-5 in 1896, respectively.

Hospital stoppages.—Rs. 43-2-0 were realized against Rs. 42-13-0 in 1897 and Rs. 36-9-0 in 1896.

NATIVE STATE DISPENSARIES.

SATLA'SNA.—*In charge of* Third Class Hospital Assistant CHIMANLAL MAHASUKHRAM, No. 213.

The new dispensary building was occupied on 1st December 1898. It has accommodation for 5 beds in 2 wards (3 for males and 2 for females), but not yet been supplied with the necessary articles. A dead-house and quarters for the peon are required. The dispensary was visited by the Political Agent, Mahi Kántha, and his Personal Assistant. The sanitary condition of the town is fair. The water-supply from wells is sufficient but of a much inferior quality. The total treated was 1,891 out-door patients against 1,554 in 1897 and 1,716 in 1896. The prevailing diseases were skin affections, malarial fevers, diseases of the digestive system, ophthalmia and ulcers. There was no epidemic. There were 67 surgical operations performed as compared with 65 in 1897 and 76 in 1896. Opinion was given in 11 medico-legal cases against 19 in 1897 and 5 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Assistant Surgeon of Sádra once in each year. The total cost was Rs. 690-3-6 and the cost per patient Re. 0-5-10 against Rs. 679-3-9 and Re. 0-7-0 in 1897 and Rs. 736-10-11 and Re. 0-6-10 in 1896, respectively.

SCOTT DISPENSARY, MA'NSA.—*In charge of* Mr. RAMSHANKAR JAYANAND INGREJI.

The dispensary building is situated at a little distance from the town and is kept in good repair. Quarters for second class servants are needed. The State officials visit the dispensary often. Conservancy arrangements are not satisfactory. Water-supply from wells is abundant and of fair quality. There were 5 in-door and 5,807 out-door patients treated as compared with 9 in-door and 5,955 out-door in 1897 and 3 in-door and 6,817 out-door in 1896. Malarial fevers, bowel complaints and eye and ear affections were the most common diseases. There was no epidemic. Surgical operations numbered 194 against 209 in 1897 and 184 in 1896. One *post-mortem* examination was held in 1898 and 2 each in 1897 and 1896. Opinion was given in 40 medico-legal cases against 31 in 1897 and 35 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Political Agent of Mahi Kántha. The total cost was Rs. 1,580-0-0 and the cost per patient Re. 0-4-4, as compared with Rs. 2,523-15-6 and Re. 0-6-9 in 1897 and Rs. 1,324-0-0 and Re. 0-3-1 in 1896, respectively.

KA'THIA'WA'R AGENCY.

WEST HOSPITAL, RA'JKOT.—*In charge of* Major W. H. BURKE, M.B., I. M. S.

Conservancy.—The new conservancy establishment established in 1897 now consists of 24 public sweepers, 14 road sweepers, 6 public latrine sweepers and 4 drain sweepers, with 8 night-soil carts. The night-soil is removed by contract twice daily to trenches dug on the Allahabad system in open fields on the Gondal road about a mile to the south of the station. Besides one urinal, there are at present 4 public latrines with 44 seats. All the private privies in the Civil Station have been altered according to the plan approved by the Political Agent of Káthiáwár. One branch drain was constructed during the year 1898 on the side of the road leading to the Vala Utara and connected with the main drain.

Water-supply.—From the Lalpori water-works is pure and abundant.

Hospital buildings—Are suitable for all requirements at present. The present latrines are of the old solid masonry objectionable pattern and they are situated at an inconveniently long distance from the main building. New ones should be built nearer the hospital.

General health.—No case of either small-pox or cholera was reported; but an epidemic of measles prevailed in the city and Civil Station during the months of October, November and December 1898, and is still prevailing. No less than 188 deaths were attributed to this cause alone during the above months.

Attendance of patients.—There were 741 in-door and 4,901 out-door patients treated, as compared with 809 in-door and 4,594 out-door in 1897 and 923 in-door and 5,042 out-door in 1896.

Prevailing diseases.—Malarial fevers, worms, bowel complaints and eye, respiratory and skin affections.

Surgical operations.—425 were performed against 418 in 1897 and 816 in 1896.

Mortality.—There were 25 deaths in hospital against 39 in each of the two previous years.

Vaccination—Is performed by the station vaccinator under the superintendence of the Medical Officer to the Káthiáwár Political Agency.

Medico-legal cases.—There were 6 *post-mortem* examinations held and 37 other medico-legal cases certified, against 4 and 40 in 1897 and 3 and 20 in 1896, respectively.

Conduct of the establishment.—Assistant Surgeon J. E. Bocarro holds medical charge of the station during the time the Agency Surgeon is on tour in the district. He is a most reliable officer and performs all his duties with great zeal and intelligence. The conduct of First Class Hospital Assistant Jamietram Jeyshankar, No. 68, has always been highly satisfactory.

Cost.—The total cost was Rs. 11,580-14-7 and the cost per patient Rs. 2-0-10, against Rs. 12,387-0-10 and Rs. 2-4-8 in 1897 and Rs. 11,590-7-8 and Re. 1-15-1 in 1896, respectively.

Hospital stoppages—Amounted to Rs. 227-12-0, as compared with Rs. 145-11-5 in 1897 and Rs. 74-10-0 in 1896.

GRANT-IN-AID DISPENSARIES.

WADHWAN.—*In charge of* Assistant Surgeon Ráo Bahádur THAKORDAS KIKABHAI DALAL.

The dispensary building and out-houses are in good repair. Furniture and fittings are sufficient and in good order. The dispensary is under the direct supervision of the Assistant Political Agent, Jhálávád Prant, who visits it often. Conservancy is good and well attended to. Water-supply from wells and the beds of the river Bhagano is good. There were 223 in-door and 5,787 out-door patients treated, against 208 in-door and 6,134 out-door in 1897 and 187 in-door and 7,692 out-door in 1896. Malarial fevers, intestinal worms, bowel complaints and eye, ear, skin and respiratory affections were the most common diseases. Surgical operations numbered 254, against 206 in 1897 and 313 in 1896. There were 5 *post-mortem* examinations held in 1897 and 3 in 1896. Opinion was given in 13 medico-legal cases, against 18 in 1897 and 22 in 1896. Vaccination is carried on by the district vaccinator. The dispensary was inspected by the Medical Officer to the Káthiáwár Political Agency, Rájkot. The total cost

was Rs. 6,643-7-10 and the cost per patient Re. 1-1-9, as compared with Rs. 6,608-6-3 and Re. 1-0-8 in 1897 and Rs. 6,836-2-1 and Re. 0-13-11 in 1896, respectively.

SONGAD DISPENSARY.—*In charge of* Mr. KESHAWLAL ICHACHAND.

The dispensary buildings are in good order. The dispensary is under the direct supervision of the Assistant Political Agent, Gohelvád Prant, who visits it from time to time. The most common diseases were fevers, diseases of the skin, eye, ear and respiratory and digestive systems and rheumatic affections. The general health was good. There were 5 cases of small-pox in 1897. The dispensary was inspected by the Medical Officer, Káthiáwár Political Agency, once in each year. The sanitary condition of the station was good; water-supply good and sufficient. Vaccination is carried out by the district vaccinator and is favourably received by the people. There were 2.062 out-patients and 3 in-patients treated during the year, against 1,662 out-patients and 7 in-patients in 1897 and 1,633 out-patients and 4 in-patients in 1896. Surgical operations numbered 135, against 114 in 1897 and 121 in 1896. There were 24 medico-legal cases examined and certified, against 32 in 1897 and 18 in 1896. Two *post-mortem* examinations were performed during the year, against 4 in 1897 and 1 in 1896. The total cost was Rs. 1,379-8-10 and the cost per patient Re. 0-10-8, as compared with Rs. 1,441-11-0 and Re. 0-13-10 in 1897 and Rs. 2,195-7-10 and Re. 1-5-6 in 1896, respectively. The hospital stoppage rules are not in force here.

JEYTALSAR.—*In charge of* Third Class Hospital Assistant CHUNILAL PRANJIVAN, No. 240.

The dispensary building is in good repair. Furniture and fittings are sufficient. There is no dispensary committee. Conservancy is well attended to; water-supply good and ample. The total treated was 16 in-door and 604 out-door patients, as compared with 22 in-door and 747 out-door in 1897 and 23 in-door and 1,058 out-door in 1896. The prevailing diseases were malarial fevers, bowel complaints, skin and respiratory diseases and ulcers. There were 11 surgical operations performed, against 26 in 1897 and 27 in 1896. Vaccination is conducted by the Agency vaccinator. The dispensary was inspected by the Medical Officer to the Káthiáwár Political Agency and visited by the Assistant Political Agent of Sorath Prant. The total cost was Rs. 1,180 and the cost per patient Rs. 1-14-5, as compared with Rs. 1,149-9-0 and Re. 1-7-11 in 1897 and Rs. 1,115-7-11 and Re. 1-0-6 in 1896, respectively.

PA'LANPUR AGENCY.

SCOTT MEMORIAL HOSPITAL, PA'LANPUR.—*In charge of* Assistant Surgeon P. P. MOOLAN.

Conservancy—Is defective and open to considerable improvements.

Water-supply.—From wells is sufficient, but liable to contamination.

Hospital buildings.—The new buildings were occupied in February 1898, and consist of one block containing an operation room, a compounding and prescribing room, one male ward with 8 beds, one female ward with 4 beds, a separate ward for special diseases, 2 small store-rooms, and 2 bath-rooms. The quarters of the medical officer and the servants, as well as the latrines, are detached buildings in the same compound. A *post-mortem* room is much required.

General health.—Has, on the whole, been good. Plague broke out in the town of Pálanpur from 8th February to 5th June 1897, giving 142 cases with 91 deaths, and from 2nd August to 31st December 1897, returning 674 cases with 413 deaths. It also prevailed in the villages of the Pálanpur State from 30th September 1897 to 7th April 1898, giving in all 915 cases with 656 deaths.

Attendance of patients.—There were 128 in-door and 2,371 out-door patients treated, as compared with 161 and 2,710 in 1897 and 173 and 5,005 in 1896.

Prevailing diseases.—Malarial fevers, respiratory, eye and skin affections and digestive disorders.

Surgical operations.—37 were performed against 89 in 1897 and 134 01896.

Cost.—The total cost was Rs. 1,107-3-3 and the cost per patient Re. 0-7-1, as compared with Rs. 1,626-9-1 and Re. 0-9-1 in 1897 and Rs. 5,275-15-5 and Re. 1-0-3 in 1896.

CUTCH AGENCY.

NATIVE STATE INSTITUTIONS.

CIVIL HOSPITAL, BHUJ.—*In charge of* Dr. B. J. DAMANIA, L.M. & S. (Bombay), L.F.P.S. (Glasgow), L.S.A. (London).

Conservancy—Is satisfactory.

Water-supply.—Abundant from wells and tanks.

Hospital building—In good order.

General health.—Fair.

Details of treated.—346 in-door and 7,280 out-door patients, against 311 and 6,708 in 1897 and 514 and 8,451 in 1896.

Prevailing diseases.—Malarial fevers, worms, rheumatic, skin and bronchial affections, dysentery, diarrhœa and ulcers.

Surgical operations.—241 in-door and 943 out-door, against 173 and 656 in 1897 and 183 and 1,129 in 1896. The most important were extraction of the lens, paracentesis of the abdomen, lithotomies, &c.

Mortality and its causes.—Among in-door patients there were 16 deaths, against 10 in 1897 and 20 in 1896. They were due to dysentery, phthisis, syphilis, pneumonia, leprosy, &c.

Vaccination—Is carried out satisfactorily at the expense of the State. There were 857 primary vaccinations, of which 604 were successful and 141 unsuccessful and 142 unknown.

Conduct of the establishment.—Very satisfactory.

Cost.—The total cost was Rs. 14,902-13-3 and the cost per patient Re. 1-1-6, against Rs. 12,031-8-10 and Re. 0-12-11 in 1897.

CUTCH-BHUJ.—*In charge of* Mr. NARAYENDAS RUTTONSEE.

The dispensary building is in a good state of repair. Furniture and fittings are sufficient. Conservancy is satisfactory and water-supply from wells and tanks abundant. There were 19,979 out-door patients treated, as compared with 19,005 in 1897 and 17,058 in 1896. The most common diseases were malarial fevers, worms, rheumatic, respiratory, eye, ear and skin affections and bowel complaints. Cholera prevailed in the month of September 1898. There were 270 surgical operations performed, against 304 in 1897 and 282 in 1896. Vaccination is carried on by the State vaccinator. The dispensary was inspected by Dr. B. J. Damania, the Chief Medical Officer of the Cutch State. The total cost was Rs. 2,794-11-3 and the cost per patient Re. 0-2-3, as compared with Rs. 2,278-1-3 and Re. 0-1-11 in 1897 and Rs. 2,765-13-4 and Re. 0-2-7 in 1896, respectively.

CUTCH-MA'NDVI.—*In charge of* Dr. MERWANJI D. KARANJIA, M.R.C.S., L.R.C.P. (London).

The dispensary building requires urgent repairs. The sanitation of the town is in a deplorable state, and the water-supply fair. There were 87 in-door and 3,849 out-door patients treated, against 23 in-door and 2,220 out-door in 1897 and 156 in-door and 11,661 out-door in 1896. The prevailing diseases were dysentery, diarrhœa, malarial fevers, gonorrhœa, worms and eye, ear and skin affections. Plague gave 894 cases with 640 deaths in the town of Mándvi, as compared with 5,446 cases and 4,774 deaths in 1897. Surgical operations numbered 65, against 52 in 1897 and 327 in 1896. Opinion was given in 24 medico-legal cases, or 12 and 11 respectively less than in 1897 and 1896. Vaccination is carried out by the State vaccinator. The total cost was Rs. 5,139-10-4 and the cost per patient Re. 1-4-9, as compared with Rs. 4,440-11-2 and Re. 1-11-3 in 1897 and Rs. 6,424-4-4 and Re. 0-8-8 in 1896.

DATTUBHAI IBRAHIM DISPENSARY, CUTCH-MA'NDVI.—*In charge of* Mr. ROWJI JADOW.

The dispensary building is in good condition. Furniture and fittings are sufficient. Conservancy is well attended to. Water-supply, from wells in the bed of a large tank, is of fair quality. The total treated was 10 in-door and 6,678 out-door patients, as compared with 14 and 7,366 in 1897 and 43 and 11,893 in 1896, respectively. Malarial fevers, ascaris lumbricoides, bowel complaints and rheumatic, eye, ear and skin affections were the most common diseases. Plague prevailed in a much milder form during the year 1898 than in 1897 and spread to several villages of the Mándvi district. There were 79 surgical operations performed, against 116 in 1897 and 263 in 1896. Vaccination is carried out by the State vaccinator. The dispensary was inspected by the Chief Medical Officer of the Cutch State. The total cost was Rs. 2,358-11-8 and the cost per patient Re. 0-5-7, as compared with Rs. 2,181-14-7 and Re. 0-4-5 in 1897 and Rs. 2,746-10-6 and Re. 0-3-8 in 1896, respectively.

CUTCH-ANJA'R.—*In charge of* Mr. ATMARAM KESHAV.

The dispensary building is in good order. Furniture and fittings are sufficient. Conservancy is well attended to by the municipality. The water-supply from wells is good and abundant. There were 46 in-door and 11,848 out-door patients treated, as compared with 40 in-door and 13,134 out-door in 1897 and 73 in-door and 13,365 out-door in 1896. The prevailing diseases were malarial fevers, worms, bowel complaints and eye, ear, rheumatic and respiratory affections. Surgical operations numbered 384, against 584 in 1897 and 735 in 1896. Opinion was given in 84 medico-legal cases, against 64 in 1897 and 72 in 1896. Vaccination is conducted by the State vaccinator. The total cost was Rs. 3,045-12-8 and the cost per patient Re. 0-4-0, as compared with Rs. 3,106-9-3 and Re. 0-3-9 in 1897 and Rs. 2,966-10-4 and Re. 0-2-8 in 1896, respectively.

CUTCH-NA'LIYA.—*In charge of* Mr. MANISHANKAR.

The dispensary building, a hired one, is in good repair and provided with the necessary furniture and fittings. Conservancy is fairly attended to. Water-supply from tanks and wells

is sufficient and of good quality. The total treated was 5,392 out-door patients, against 4,605 in 1897 and 6,838 in 1896. The most common complaints were malarial fevers, worms, rheumatism, diseases of the eye, ear and skin, diarrhœa, dyspepsia and bronchitis. There were 194 surgical operations performed, against 91 in 1897 and 146 in 1896. Four *post-mortem* examinations were held and 53 medico-legal cases certified, as compared with 2 and 52 in 1897 and 1 and 56 in 1896, respectively. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Chief Medical Officer of the Cutch State. The total cost was Rs. 1,196-2-8 and the cost per patient Re. 0-3-6, against Rs. 1,231-12-7 and Re. 0-4-4 in 1897 and Rs. 1,271-12-9 and Re. 0-2-9 in 1896.

CUTCH-RA'HPUR.—*In charge of* Hospital Assistant BHAVAJI K. THAKKAR.

The building is in a good state. The sanitation is well looked after. Water-supply is sufficient and of fair quality. The total treated was 61 in-door and 3,669 out-door patients, as compared with 46 in-door and 3,674 out-door in 1897 and 63 in-door and 4,175 out-door in 1896. The prevailing diseases were malarial fevers, diseases of the respiratory and digestive systems, eye, connective tissues and skin. There was no epidemic. The dispensary was inspected by the Political Agent of Cutch and by His Highness the Ráo Sáheb of Cutch. Vaccination is conducted by two State vaccinators. *Post-mortem* examinations numbered 37 and medico-legal cases 74, as compared with 20 and 90 in 1897 and 34 and 118 in 1896. The total cost was Rs. 1,341-10-8 and the cost per patient Re. 0-5-9, against Rs. 1,367-13-11 and Re. 0-5-11 in 1897 and Rs. 1,335-14-3 and Re. 0-5-1 in 1896, respectively.

CUTCH-BHACHA'O.—*In charge of* Mr. MULJI HARIRAM.

The dispensary building is kept in good repair. A new ward for in-door patients with 5 beds was constructed during the year. Furniture and fittings are sufficient. Conservancy arrangements are looked after by the municipality. Water-supply from wells and a tank is excellent, but scanty owing to small rainfall. There were 11 in-door and 3,820 out-door patients treated, as compared with 3,658 out-door in 1897 and 4,775 out-door in 1896. The prevailing diseases were malarial fevers, worms, rheumatism, conjunctivitis, inflammation of the external ear, bronchitis, skin affections and bowel complaints. The total number of surgical operations was 134, against 114 in 1897 and 124 in 1896. One *post-mortem* examination was held, or the same as in 1897. Vaccination is conducted by the State vaccinator. The total cost was Rs. 1,086-2-1 and the cost per patient Re. 0-4-1, as compared with Rs. 927-0-1 and Re. 0-4-1 in 1897 and Rs. 997-8-5 and Re. 0-3-4 in 1896.

LALJI SOMAN DISPENSARY, CUTCH-MUNDRA.—*In charge of* Mr. HIRJI HANSRAJ.

The dispensary buildings are in a good state of repair; furniture and fittings sufficient and in good order. The conservancy arrangements are well attended to by the municipality. Water-supply from wells is good and abundant. There were 41 in-door and 4,775 out-door patients treated, against 28 in-door and 3,732 out-door in 1897 and 71 in-door and 7,118 out-door in 1896. Malarial fevers, ascaris lumbricoides, chronic rheumatism, conjunctivitis, dyspepsia and skin diseases were the most common complaints. Plague, which broke out in the year 1897 in the villages of Mundra, still rages. Surgical operations numbered 96, as compared with 192 in 1897 and 245 in 1896. Opinion was given in 60 medico-legal cases, and 1 *post-mortem* examination held. Vaccination is carried on by the State vaccinator. The total cost was Rs. 2,280-2-10 and the cost per patient Re. 0-7-5, against Rs. 2,207-2-4 and Re. 0-9-5 in 1897 and Rs. 2,487-0-4 and Re. 0-4-9 in 1896, respectively.

CUTCH NARAYEN SAROVAR.—*In charge of* Mr. DALPATRAM P. MEHTA.

The dispensary building, a hired one, is quite unsuitable for the purpose. The sanitation of the town needs improvement. Water-supply from wells is moderate. The total treated was 3,499 out-door patients, as compared with 3,487 in 1897 and 3,655 in 1896. The prevailing diseases were ague, eye, ear, skin and respiratory affections and bowel complaints. There were 193 surgical operations performed against 123 in 1897 and 250 in 1896. Two *post-mortem* examinations were held, and opinion was given in 4 medico-legal cases. Vaccination is carried out by the State vaccinator. The total cost was Rs. 1,014-5-5 and the cost per patient Re. 0-4-8, as compared with Rs. 964-15-9 and Re. 0-4-4 in 1897 and Rs. 1,024-12-8 and Re. 0-4-5 in 1896, respectively.

GANGJIBAI DISPENSARY, CUTCH-KERU.—*In charge of* Mr. KUVERJI D. MEHTA.

The dispensary buildings are suitable and in good repair. Furniture and fittings are sufficient and in nice condition. Conservancy is not satisfactory, as no attention is paid to it. Water-supply, chiefly from wells, is abundant and good. There were 24 in-door and 1,708 out-door patients treated, against 163 in-door and 1,882 out-door in 1897 and 66 in-door and 4,191 out-door in 1896. The most common diseases were ague, worms, rheumatic, lung, skin, eye and ear affections and digestive disorders. There were 104 surgical operations performed against 111 in 1897 and 292 in 1896. Opinion was given in 6 medico-legal cases in 1898 and 4 in 1897. Vaccination is conducted by the State vaccinator. The total cost was Rs. 1,248-10-2 and the cost per patient Re. 0-11-1, as compared with Rs. 1,269-13-4 and Re. 0-10-9 in 1897 and Rs. 1,429-15-2 and Re. 0-5-6 in 1896.

MHOW.

ENDOWED DISPENSARY.

DORABJI PESTONJI DISPENSARY, MHOW.—*In charge of* Pensioned First Class Hospital Assistant KRISNAPPAH.

The dispensary buildings are in excellent order. The dispensary was visited every month by the Major-General commanding the Mhow District, the Cantonment Magistrate and Secretary to the Cantonment Committee, and the Superintendent of the dispensary, Major C. S. Sparkes, R.A.M.C. The conservancy of the bazár and its suburbs are most carefully attended to. The water-supply from the Bricha reservoir is sufficient and good. It would be an advantage if filtration on a large scale were carried out at the source of the supply, *viz.* Bricha. There were 48 in-door and 8,377 out-door patients treated, as compared with 48 in-door and 7,762 out-door in 1897 and 64 in-door and 6,561 out-door in 1896. The most common diseases were malarial fevers, dyspepsia, diarrhœa and eye, ear, skin, respiratory and venereal affections. A few cases of small-pox occurred in Mhow. Surgical operations numbered 652, against 851 in 1897 and 755 in 1896. Vaccination is under the supervision of the Staff Surgeon. The dispensary was inspected by the Sanitary Committee and by the Principal Medical Officer, Mhow and Deesa District. The total cost was Rs. 2,198-3-11 and the cost per patient Re. 0-4-2, as compared with Rs. 2,203-2-3 and Re. 0-4-6 in 1897, and Rs. 2,232-5-2 and Re. 0-5-5 in 1896, respectively.

KARA'CHI COLLECTORATE.

KARA'CHI CIVIL HOSPITAL.—*In charge of* Lieutenant-Colonel J. McCLOGHRY, I. M. S.

Conservancy.—Remains the same as when last reported on, except that 276 new drainage connections have been made, that the two new destructors are working, and that the halálkor system has been extended to the whole of the town and suburbs.

Water-supply—Is ample, but is much too freely used for gardening purposes inside of municipal limits. It is fair in quality.

Hospital buildings—In good order. As in 1897, it was found necessary to make use of them for plague cases and also to supplement them by the erection of 29 grass huts in the compound. The ordinary cases were accommodated in the Arts College from the 3rd April to 26th July. It seems that the money raised for the extension of the hospital buildings is not sufficient, and it is now proposed to endow a fund for the purposes of employing a European nurse and improving the class of ward-boys by paying them higher salaries. Quarters for the nurse still remain a difficulty.

Health of the Town—Has been fairly good. Plague prevailed in Karáchi and its suburbs from 10th December 1896 to 26th July 1897, returning 4,181 cases with 3,398 deaths. It again broke out (after an interval of nearly 8 months) on the 24th March 1898, giving 3,254 cases and 2,543 deaths up to the end of the year.

Attendance of Patients.—There were 1,661 in-door and 4,011 out-door patients treated, as compared with 1,668 and 4,698 in 1897 and 1,076 and 7,767 in 1896. The falling off in attendance during the years 1898 and 1897 was due to the prevalence of plague, and the preventive measures in connection with it.

Prevailing diseases.—Intermittent fever, conjunctivitis, rheumatism, bronchitis, dysentery, and wounds of the upper extremity.

Surgical operations.—1,072 operations were performed against 1,255 in 1897 and 1,757 in 1896. The most important were amputations, litholapaxies, lithotomies, extraction of lens, excision of tumours and joints, iridectomy and herniotomy.

Mortality and its causes.—There were 549 deaths in hospital as compared with 428 in 1897 and 93 in 1896. The chief causes were phthisis, dysentery, pneumonia, fevers, burns and scalds and ulcers.

Medico-legal cases—13 dead bodies were examined and certified at the request of the police.

Conduct of the establishment.—The conduct of the superior establishment has been very good. That of the menial servants is not satisfactory, as the work is done by them in a perfunctory manner; and owing to the carelessness and laziness of the ward-boys and sweepers, who know that better ones cannot be obtained for the wages paid them, it is impossible to keep the hospital as clean as it should be.

Cost.—The total cost was Rs. 12,297-7-0 and the cost per patient Rs. 2-2-8, as compared with Rs. 7,617-2-7 and Re. 1-3-2 in 1897, and Rs. 15,148-4-1 and Rs. 1-11-5 in 1896, respectively.

Stoppages.—Rs. 23-14-0 were realized against Rs. 38-2-0 in 1897 and Rs. 128-2-0 in 1896.

LADY DUFFERIN HOSPITAL, KARA'CHI.—*In charge of* Lady Physician C. ARNOTT.

Conservancy—Is well attended to by the municipality.

Water-supply.—By water pipes from Malir, is ample.

Hospital buildings.—Require repairs. They were occupied in January 1898, but had to be closed for three months on account of plague.

Details of treated.—There were 128 in-door and 2,696 out-door patients treated.

Prevailing diseases.—Dysentery, eye, respiratory and skin affections, bowel complaints and diseases peculiar to women.

Surgical operations.—Numbered 44, of which the most important were craniotomies, version, application of forceps.

Mortality.—There were 11 deaths in hospital.

Cost.—The total cost was Rs. 8,786-0-3 and the cost per patient Rs. 3-1-9.

MUNICIPAL DISPENSARIES.

KARA'CHI BANDAR ROAD.—*In charge of* Second Class Hospital Assistant P. D. TALATI, No. 142.

The dispensary buildings are in a fair state of repair. The furniture and fittings are sufficient and in good condition. The dispensary committee visited the dispensary four times in 1896, once in 1897, but did not visit it in 1898. The prevailing diseases were malarial fevers, eye, ear, skin, respiratory and rheumatic affections, worms and stomach and bowel complaints.

There were 7,859 out-door patients treated, as compared with 9,051 in 1897 and 11,003 in 1896, showing a decrease of 1,952 patients in the year 1897, and of 3.144 in the year 1898, compared with the year 1896. This decrease was owing chiefly to plague which prevailed epidemically in these years when most of the people left the town, as well as to the opening of the Lady Dufferin Hospital. Surgical operations numbered 454 against 866 in 1897 and 1,119 in 1896. The sanitary condition of the town is fairly good. Streets, roads and latrines are kept in a fairly clean state by the municipality. The water-supply from Malir is good and abundant.

Vaccination is carried on by the Sanitary Department.

The total cost was Rs. 1,641-6-3, and the cost per patient Re. 0-3-4, as compared with Rs. 1,892-8-1 and Re. 0-3-4 in 1897, and Rs. 1.842-13-10 and Re. 0-2-8 in 1896, respectively. The hospital stoppages rules are not in force in this dispensary.

The dispensary was inspected by the Principal Medical Officer, Sind District, once in 1896 and twice in each of the years 1897 and 1898, and by the Civil Surgeon of Karáchi once in each year.

LYARI DISPENSARY, KARA'CHI.—*In charge of* Second Class Hospital Assistant TUKARAM PANDHARINATH, No. 152.

The dispensary buildings are in a good state of repair. The furniture and fittings are sufficient. The dispensary committee did not visit the dispensary during the years 1897 and 1898. The most common diseases were malarial fevers, conjunctivitis catarrhal, rheumatic affections, instestinal worms, inflammation external ear, bronchitis and diseases of the digestive system and skin. Small-pox and plague were prevalent in 1897, and the latter in 1898. The dispensary was inspected by the Principal Medical Officer, Sind District, and by the Civil Surgeon of Karáchi every year. The total treated was 8,414 out-door patients against 6,829 in 1897 and 8,783 in 1896. The sanitary condition of the Lyari quarter is fair. The water-supply from Malir well is good and sufficient. There were 458 surgical operations performed against 294 in 1897 and 477 in 1896. Vaccination is carried on by the Sanitary Department. The total cost was Rs. 1,675-12-5 and the cost per patient Re. 0-3-2 against Rs. 1,210-8-1 and Re. 0-2-10 in 1897 and Rs. 1,150-0-0 and Re. 0-2-1 in 1896. The general health of the town was not good on account of malarial fevers and plague in 1897 and 1898. The hospital stoppages rules are not enforced here, as the dispensary is a municipal one.

EDULJI DINSHAW DISPENSARY, SADAR BAZA'R, KARA'CHI.—*In charge of* Second Class Hospital Assistant SADHUMAL SANTDASS, No. 205.

The dispensary buildings are in a good state of repair, and furniture and fittings in good order. The dispensary committee visited the dispensary once in 1897 and three times in 1896. Conservancy of the Sadar Bazár quarter is well looked after by the municipality. The water-supply from Malir is good and abundant.

The most common diseases were intermittent fever, worms, rheumatic affections, conjunctivitis, intestinal diseases and local injuries. The total treated was 10,182 out-door patients, as compared with 9,124 in 1897 and 16,204 in 1896. There were 740 surgical operations performed, as compared with 630 in 1897 and 1,432 in 1896.

Small-pox prevailed in the years 1896 and 1897. There occurred 116 cases of plague in the Sadar Bazár from 29th January to 3rd June 1897, out of which, 23 were found dead. On 22nd March 1898, plague broke out again in Karáchi and caused in the whole town 3,254 attacks with 2,543 deaths. The dispensary was inspected by the Principal Medical Officer, Sind District, and by the Civil Surgeon, Karáchi.

The total cost was Rs. 1,974-7-1 and the cost per patient Re. 0-3-1, as compared with Rs. 1,910-14-6 and Re. 0-3-4 in 1897 and Rs. 1,813-0-4 and Re. 0-1-9 in 1896. The hospital stoppages rules are not in force in this dispensary.

Vaccination is carried on by the Sanitary Department.

BAI BACHUBAI EDALJI DINSHAW DISPENSARY, KEAMA'RI.—*In charge of* Mr. J. B. C. DACOSTA, L.R.C.P., &c.

The dispensary buildings require thorough repair and alterations. The dispensary committee met twice. Conservancy is well attended to by the municipality. Water-supply from Malir is good and sufficient. There were 42 in-door and 1,392 out-door patients treated

as compared with 13 in-door and 2,886 out-door in 1897 and 23 in-door and 5,268 out-door in 1896. The prevailing diseases were conjunctivitis catarrhal, intermittent fever, ulcers, rheumatism, bronchitis, penumonia and wounds. Surgical operations numbered 127 against 82 in 1897 and 240 in 1896. Vaccination is carried on by the Sanitary Department. The dispensary was inspected by the Principal Medical Officer, Sind District, and by the Civil Surgeon, Karáchi. The total cost was Rs. 1,765-3-6 and the cost per patient Re. 0-9-0, as compared witht Rs. 2,023-7-8 and Re. 0-11-2 in 1897 and Rs. 2,448-3-7 and Re. 0-7-5 in 1896, respectively.

KOTRI.—*In charge of* Second Class Hospital Assistant Ráo Sáheb METHARAM HARISING, No. 179.

The dispensary building is in excellent order and kept in proper state of repair. Quarters for the sweeper are needed. Furniture and fittings are sufficient and suitable. Warm blankets for in-door patients are required. The committee visited the dispensary seven times during the year 1896 and once in 1897 and in 1898, and the chairman very often. There were 71 in door and 4,724 out-door patients treated against 90 in-door and 4,651 out-door in 1897 and 66 in-door and 6,820 out-door in 1896. The most common diseases were malarial fevers and rheumatic, eye, ear, skin and respiratory affections. There were reported 225 cases of small-pox with 23 deaths in 1896, and 12 cases with 2 deaths in 1897. Plague was prevalent from 10th January to 31st March 1897, during which period 44 cases with 25 deaths took place; again it broke out on 28th October 1897 and lasted till the end of January 1898, and during this period 100 cases were reported with 68 deaths. The dispensary was inspected by the Civil Surgeon, Karáchi, and the Deputy Sanitary Commissioner, Sind Registration District, once in each year, and by the Principal Medical Officer, Sind District, once in 1896 and twice in 1898. Conservancy is well looked after by the municipality; the night-soil is removed to the depôt outside the town, and buried in trenches, and the refuse and sweepings are also removed to the south of the town and burnt from time to time. New cesspools have been constructed, and the underground drains traced, dug up, disinfected and closed up with fresh earth. Water-supply from the river Indus is good and abundant. There are some private wells the water of which is not used for drinking purposes. There were 173 surgical operations performed against 170 in 1897 and 285 in 1896. Vaccination is carried on by the táluka vaccinator. Six *post mortem* examinations were performed against 3 in 1897. Opinion was given in 15 medico-legal cases against 16 in 1897 and 24 in 1896. Hospital stoppages amounted to Rs. 28-1-0 against Rs. 37-13-0 in 1897 and Rs. 19-10-0 in 1896 The system is not very popular here, as the people run away to the railway hospital at Kotri or the Gidu Bundar dispensary, where they get medicines and advice gratis. The total cost was Rs. 2,128-8-3 and the cost per patient Re. 0-7-1 as compared with Rs. 1,874-10-0 and Re. 0-6-4 in 1897 and Rs. 2,329-6-9 and Re. 0-5-5 in 1896.

BAI JAMNABAI DISPENSARY, TATTA.—*In charge of* Assistant Surgeon BHAU GOVIND.

The dispensary building with its attached out-houses and the medical officer's quarters are in pretty good repair. The office was paved with stone last year. The dispensary committee met five times against four times in 1897 and nine times in 1896. Conservaney of the town was not quite satisfactory. The water-supply from tanks and wells is impure and scanty during the hot season.

The total treated was 6,627 out-door and 39 in-door patients against 5,862 and 26 in 1897 and 10,415 and 38 in 1896, respectively. The most common diseases were malarial fevers, digestive disorders and respiratory, skin and eye affections. Small-pox appeared in 1896 and during the first quarter of 1897. Plague appeared during the first half of the year 1897. Altogether 36 imported and 16 local cases of plague were treated and reported on in 1897. There was no epidemic of any sort during the year 1898.

Vaccination is carried on by the municipal vaccinator. There were 405 surgical operations performed against 263 in 1897 and 319 in 1896. Three *post-mortem* examinations were held against 8 in 1897 and 4 in 1896, and 6 medico-legal cases were reported on against 7 and 19 in 1897 and 1896, respectively. The dispensary was inspected by the Civil Surgeon of Karáchi once in each year.

The total cost was Rs. 4,021-2-11 and the cost per patient Re. 0-9-8 against Rs. 2,852-15-1 and Re. 0-7-9 in 1897 and Rs. 3,757-4-8 and Re. 0-5-9 in 1896.

The hospital stoppages rules have not been made applicable to this institution.

KETI BANDAR.—*In charge of* Third Class Hospital Assistant ASOOMAL MULRAM, No. 295.

The buildings need repair. Furniture and fittings are insufficient. The committee visited the dispensary thirteen times during the year. The water-supply from the river Indus was abundant but brackish. The sanitary condition of the town was very fair. The total treated was 2,094 out-door and 13 in-door patients, as compared with 1,782 out-door and 15 in-door in 1897, and 1,539 out-door and 12 in-door in 1896. There was no epidemic during the year in the town or in its vicinity. The most common diseases were intermittent fever, rheumatism, conjunctivitis, diseases of the digestive system, ear and skin and local injuries. There were 74 surgical operations performed against 121 in 1897 and 134 in 1896. The dispensary was twice

visited by the Assistant Collector of the Jerruck Division, and once inspected by the Deputy Sanitary Commissioner, Sind Registration District, and by the Civil Surgeon, Karáchi.

The total cost was Rs. 874-13-3 and the cost per patient Re. 0-6-8 against Rs. 1,031-1-11 and Re. 0-9-2 in 1897 and Rs. 1,294-8-11 and Re. 0-13-4 in 1896. Rs. 9-2-0 were hospital stoppages as compared with Rs. 6-3-0 in 1897 and Rs. 7-1-0 in 1896. Vaccination is carried on by the táluka vaccinator.

PARUMAL KHUBCHAND DISPENSARY, SEHWAN.—*In charge of* MR. KHIAMAL MOHANLAL, L.M. & S.

The dispensary buildings are in good order. A female ward is urgently needed. Furniture and fittings are sufficient. The dispensary committee meet every three months. The sanitary condition of the town is fair. Water-supply is chiefly derived from wells and the Aral canal. The water of the canal is good and abundant in summer, but not potable in winter, as it derives its supply from the Mancher lake during that season. There were 132 in-door and 9,605 out-door patients treated against 124 and 9,798 in 1897 and 146 and 7,131 in 1896, respectively. Malarial fevers, bowel complaints and eye, rheumatic and skin affections were the most common diseases. Surgical operations numbered 487 against 311 in 1897 and 335 in 1896. There were 7 *post-mortem* examinations held and 13 medico-legal cases certified, as compared with 9 and 13 in 1897 and 7 and 18 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Principal Medical Officer, Sind District, the Civil Surgeon of Karáchi and the Deputy Sanitary Commissioner, Sind Registration District. Rs. 136-10-0 hospital stoppages were realized in 1898 and Rs. 50-10-0 in 1896. The total cost was Rs. 2,247-10-4 and the cost per patient Re. 0-3-8, as compared with Rs. 2,114-2-3 and Re. 0-3-5 in 1897 and Rs. 2,176-11-4 and Re. 0-4-9 in 1896.

GRANT-IN-AID DISPENSARIES.

JERRUCK.—*In charge of* Third Class Hospital Assistant CHUHERMAL SANTDASS, No. 261.

The dispensary building is spacious and well ventilated, and is situated on a hill close to the town. Furniture and fittings are good and sufficient. The conservancy of the town is fairly good. The water-supply from the river Indus is abundant. A reservoir should be built and the water from the river pumped into it, or a few wells provided in the town. There was no epidemic during the year 1898. Vaccination is carried on by the táluka vaccinator. A cook-room, a bath-room and two latrines have been erected. The most common diseases were malarial fevers, conjunctivitis, diseases of the digestive, nervous and respiratory systems and ulcers. There were 52 surgical operations performed against 9 in 1897 and 130 in 1896. The total treated was 872 out-door and 7 in-door patients against 196 and 1 in 1897, and 2,012 and 10 in 1896. The cause of decrease in attendance was that the dispensary remained closed for about six months owing to the transfer of the Hospital Assistant on plague duty. The receipts on account of hospital stoppages were Re. 0-12-0 in 1898 and Re. 0-14-0 in 1896. The total cost was Rs. 318-3-4 and the cost per patient Re. 0-5-9, as compared with Rs. 660-10-4 and Rs. 3-5-8 in 1897 and Rs. 875-11-7 and Re. 0-6-11 in 1896, respectively.

MIRPUR-BATORO.—*In charge of* Second Class Hospital Assistant DAYARAM KHEMCHAND, No. 178.

The dispensary buildings require repair. The roof was entirely renewed in 1897, while the verandah floor is being renewed and repaired. Quarters for Hospital Assistant are under construction. Since the month of September 1897 more attention has been paid to the cleanliness of the town. Water-supply from wells and a tank is abundant, but not good. The general health of the town was fair. Small-pox was prevalent in 1896. No epidemics in 1897 and 1898. There were 1,588 out-door and 30 in-door patients treated, as compared with 1,720 and 17 in 1897 and 3,716 and 46 in 1896, respectively. The prevailing diseases were malarial fevers, conjunctivitis and diseases of the digestive system and skin. There were 158 surgical operations performed as compared with 72 in 1897 and 241 in 1896. Vaccination is carried on by the táluka vaccinator. Medico-legal cases numbered 14 against 5 in 1897 and 13 in 1896. Three *post-mortem* examinations were made in 1898 and in 1897 and 1 in 1896. Hospital stoppages amounted to Rs. 5-8-0 against Rs. 22-9-0 in 1897 and Rs. 2-7-0 in 1896. The total cost was Rs. 1,023-12-1 and the cost per patient Re. 0-10-1, as compared with Rs. 960-11-10 and Re. 0-8-10 in 1897 and Rs. 1,033-10-5 and Re. 0-4-5 in 1896, respectively.

THÁNO BULAKHAN.—*In charge of* Temporary Hospital Assistant BULCHAND JAWHERMAL.

The dispensary building, the medical subordinate's quarters and the huts of the dispensary servants are in want of repair. The sanitary condition of the town is indifferent. The town has no sweeper, and in consequence there is a great likelihood of the private privies being unclean. The water-supply from wells is good. General health of the village was good. There was no epidemic. The total number treated was 351 out-door patients, as compared with 1,040 out-door and 6 in-door in 1897 and 2,005 out-door and 2 in-door in 1896. The decrease in attendance over the previous years is due to the dispensary being closed for 9 months during the year 1898. The prevailing diseases were malarial fevers, diseases of the eye, diges-

tive system and skin and ulcers. There were 25 surgical operations performed compared with 83 in 1897 and 200 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Karáchi, once in each year. The total cost was Rs. 328-15-9 and the cost per patient Re. 0-15-0, as compared with Rs. 1,008-10-1 and Re. 0-15-5 in 1897, and Rs. 1,510-2-9 and Re. 0-12-0 in 1896, respectively.

GOVERNMENT DISPENSARY.

MANORA.—*In charge of* Assistant Surgeon E. MACKENZIE, Honorary Assistant Surgeon to His Excellency the Viceroy.

The main building and the out-houses of the dispensary are in good order. A small latrine for the use of Europeans and quarters for the Hospital Assistant were constructed, and the verandahs were enclosed in teakwood trellis work in 1896. Furniture and fittings are sufficient. There were no variations in the prevailing diseases, which were intermittent fever, rheumatism, catarrhal conjunctivitis, catarrhal bronchitis and diarrhœa. The years 1896 and 1898 were free from epidemics. In 1897 there was an outbreak of plague, and 25 cases occurred during the three months it lasted. The total number of out-door patients treated was 5,342 against 4,644 in 1897 and 8,367 in 1896. The decrease in admissions for the last two years is attributable to exodus of people on account of plague and other coincident influences. In 1898, though plague did not prevail at Manora, it existed in Karáchi from March to the end of the year. There were 402 surgical operations performed against 277 in 1897 and 636 in 1896. There is no accommodation for in-door patients. The vaccination is performed by the municipality at the dispensary, which is the station. The dispensary was inspected by the Civil Surgeon, Karáchi, once in every year, and by the Principal Medical Officer, Sind District, once in 1896 and twice in 1898. Surgeon General R. Harvey, Director General, Indian Medical Service, also inspected the dispensary in November 1898. The total cost was Rs. 5,574-2-9 against Rs. 5,688-13-8 in 1897 and Rs. 5,920-7-2 in 1896, the total cost per patient being Re. 1-0-8, Re. 1-3-7 and Re. 0-11-4, respectively. The amount realized under hospital stoppages rules was Rs. 127-12-0 as compared with Rs. 121 in 1897 and Rs. 180-3-0 in 1896.

4,037 vessels were boarded and inspected and 109,294 passengers on them were medically examined against 2,943 vessels and 100.492 passengers in 1897 and 421 vessels and 20,000 passengers in 1896. The rules for detention against plague in Bombay have been in operation in the port of Karáchi from the 13th October 1896. 108 samples of different kinds, including 6 of explosives, were tested and reported upon against 132 samples, including 1 of explosive, in 1897 and 124 samples, including 4 of explosives, in 1896.

During the past three years Third Class Hospital Assistant Baberbhai Chhotabhai, No. 270, has been steady and persevering, and his conduct exemplary.

HYDERABAD COLLECTORATE.

HYDERABAD CIVIL HOSPITAL.—*In charge of* Lieutenant-Colonel W. G. H. HENDERSON, F.R.C.S.I., I.M.S., till 30th June; of Captain J. H. McDONALD, I.M.S., up to 17th July, and of Captain A. STREET, M.B., F.R.C.S., I.M.S., up to the end of the year.

Conservancy.—The conservancy of the town is fairly well looked after by the municipality, for which purpose a sufficient number of scavengers with a due proportion of makadums and inspectors is maintained.

During the epidemic of plague in 1897 the municipality, at the request of the Plague Committee, made considerable improvements and alterations in their conservancy arrangements of the city and suburbs. Among the most important of these was the appointment of an European Sanitary Inspector on a salary of Rs. 130 a month, who has under his control the whole menial staff and whose duty is to look after the cleanliness of the town.

Night-soil from the public latrines (16 in number) is removed to two manure depôts to the north-east and south-east of the city, where it is buried in pits. The waste water is removed by open drains, which cross the public streets in all directions. They are far from effective, being frequently blocked, and are often very foul, as many drains from private houses pour into them what is not waste water. The drains are now flushed regularly twice a day.

Water-supply.—Is obtained from the river Indus and distributed in pipes, and is good and abundant.

Hospital buildings.—No addition or alteration has been done to them. An infectious ward is much needed.

General health.—The general health of the town and district has been generally good. During the year 1896, small-pox prevailed for the first five months of the year, the cases reported being 149 with 55 deaths.

In 1897 plague broke out in Hyderabad Sind on the 28th of February in an epidemic form and lasted till the beginning of June, during which period 586 cases occurred with 451 deaths. Of these 42 were imported and 544 local, and the deaths 38 imported and 413 local.

Attendance of patients.—There were 1,005 in-door and 6,701 out-door patients treated against 764 in-door and 6,430 out-door in 1897 and 1,027 in-door and 11,037 out-door in 1896.

Prevailing diseases.—Intermittent fever, conjunctivitis, inflammation of the external ear, bronchitis, skin diseases and ulcers.

Surgical operations.—In 1898 there were 1,663 operations performed, of which 424 were cases of litholapaxy, 35 of perineal lithotrity, 6 of lithotomy and 4 of supra-pubic, against 1,390 in 1897, of which 260 were litholapaxies, 17 perineal lithotrities and 3 lithotomies; and 1,980 in 1896, of which 386 were litholapaxies, 21 perineal lithotrities and 29 lithotomies.

Mortality and its causes.—There were 49 deaths in hospital as compared with 31 in 1897 and 33 in 1896. The chief causes were anæmia, dysentery, diarrhœa and pneumonia.

Vaccination—Is conducted by the public vaccinator under the directions of the Deputy Sanitary Commissioner, Sind Registration District; but he is paid by the municipality.

Medico-legal cases.—During the last three years 24 human bodies were examined at the request of the police authorities and several persons were brought for examination on account of hurt and grievous hurt.

Conduct of establishment.—Assistant Surgeons Jivatram Alimchand and R. S. Poredi performed their duties to my entire satisfaction. First Class Hospital Assistant E. Jacob (No. 16) has worked hard with zeal and has given me every satisfaction. In the beginning of December 1898 he was temporarily transferred to Jask (Telegraph Dispensary) in the Persian Gulf when Second Class Hospital Assistant Khiamal Hashmatrai (No. 122) from Tando Alahyar Dispensary was appointed to act for him during his absence.

Cost.—The total cost was Rs. 7,099-10-7 and the cost per patient Re. 0-14-9, as compared with Rs. 3,843-11-9 and Re. 0-8-7 in 1897 and Rs. 5,175-5-8 and Re. 0-6-10 in 1896, respectively.

MUNICIPAL DISPENSARIES.

Victoria Jubilee Dispensary, Hyderabad.—*In charge of* Mr. Tarachand Jeramdas, L.M. & S.

Conservancy is fairly well looked after by the sanitary committee under the chairmanship of the Civil Surgeon, Hyderabad. The dispensary buildings are in a good condition. Quarters for the compounder are badly needed. The general health was worse than in the previous years, as plague broke out in 1897. In 1898 only two imported cases from Karáchi were reported, out of which one proved fatal. The total number of cases in 1897 was 586 and deaths 451 (including 38 deaths in 42 imported cases). There were 16,896 out-door patients treated as compared with 13,176 in 1897 and 18,715 in 1896. The prevailing diseases were malarial fevers, conjunctivitis, bronchitis and ulcers. Surgical operations numbered 1,450 against 1,137 in 1897 and 1,733 in 1896. Vaccination is performed by the municipal vaccinator, from house to house, under the orders of the Deputy Sanitary Commissioner, Sind Registration District. The dispensary was inspected by the Principal Medical Officer, Sind District, and the Civil Surgeon of Hyderabad. The total cost was Rs. 4,616-14-6 and the cost per patient Re. 0-4-4 as compared with Rs. 4,420-9-10 and Re. 0-5-4 in 1897 and Rs. 5,788-11-5 and Re. 0-4-11 in 1896.

Empress Jubilee Dispensary, Gidu Bandar.—*In charge of* Mr. Dayaram Khemchand.

The dispensary building is well situated and in good condition. The municipality sanctioned the erection of quarters for the Hospital Assistant and compounder in April 1897, but the work has not yet been taken in hand. The dispensary committee, composed of three members, with the Civil Surgeon, Hyderabad, as their chairman, held three meetings in the municipal office during the year. The total treated was 3,754 out-door against 4,149 in 1897 and 5,579 in 1896. The prevailing diseases were dysentery, intermittent fever, conjunctivitis, rheumatism, inflammation external, chronic bronchitis, ulcers and local injuries. There were 259 surgical operations performed against 164 in 1897 and 212 in 1896. Vaccination is performed by the municipal vaccinator under the direction of the Deputy Sanitary Commissioner. The dispensary was inspected in 1898 and 1896 by the Principal Medical Officer Sind District, and once annually by the Civil Surgeon, Hyderabad. The sanitary condition of the village is fairly good. The water-supply from the river Indus is good and abundant, but requires to be treated with alum and filtered before using. The general health was good. The total cost was Rs. 1,651-6-7 against Rs. 1,350-1-1 in 1897 and Rs. 1,349-11-3 in 1896, the cost per patient being Re. 0-7-0, Re. 0-5-2 and Re. 0-3-10 respectively.

Tando Adam.—*In charge of* Second Class Hospital Assistant Parmanand Vishandas, No. 119.

The buildings have been kept in a good state of repair. Quarters for the compounder will shortly be constructed. A dead-house on the new standard plan is wanted. The dispensary committee visited the dispensary regularly monthly and quarterly. The most common diseases were malarial fevers, diseases of the eye, digestive system, skin diseases and local injuries. The total number of patients treated was 5,705 out-door and 68 in-door in 1896 against 4,710 out-door and 56 in-door in 1897 and 6,313 out-door and 44 in-door in 1898. A few cases of influenza, measles and small-pox occurred in 1896, and a few cases of measles in 1897. The dispen-

sary was inspected by the Civil Surgeon of Hyderabad, the Commissioner in Sind, the Collector of Hyderabad and the Assistant Collector of the Division. Conservancy is fairly well attended to by the municipality. Water-supply from wells is good and abundant. Surgical operations numbered 287 in 1898 against 265 in 1897 and 280 in 1896. Vaccination is carried on by the táluka vaccinator. Opinion was given in several medico-legal cases. The total cost was Rs. 1,729-7-3 and the cost per patient Re. 0-4-4 as compared with Rs. 1,829-13-0 and Re. 0-6-2 in 1897 and Rs. 1,765-8-10 and Re. 0-4-11 in 1896, respectively. The hospital stoppages rules are not enforced here, as the dispensary is a municipal one.

MORO.—*In charge of* MR. MANGHANMAL.

Conservancy is not very satisfactory owing to the paucity of sweepers. There is a sanitary committee. Water-supply from wells is always good and abundant. The dispensary buildings are in a good state of repair, but old and unsuitable. The committee visit the dispensary once every month. There were 14 in-door and 2,015 out-door patients treated as compared with 22 and 1,781 in 1897 and 18 and 2,934 in 1896, respectively. Intermittent fevers, diseases of the eye, respiratory and digestive system and ulcers were the most common complaints. There were 232 surgical operations performed as compared with 143 in 1897 and 300 in 1896. Vaccination is carried on by the táluka vaccinator. Opinion was given in several medico-legal cases. The total cost was Rs. 1,072-7-0 and the cost per patient Re. 0-8-5 as compared with Rs. 776-3-8 and Re. 0-6-11 in 1897 and Rs. 1,080-9-6 and Re. 0-5-10 in 1896, respectively.

KANDIA'RO.—*In charge of* MR. MENGHRAJ JIVANDAS

The building is in good order. Furniture and fittings are in a good state, but not ample. The committee visited the dispensary 8 times during the year. Water-supply from wells is good and abundant. Small-pox broke out in 1896 and 1897. Conservancy is fairly well attended to by the Sanitary Board. The most common diseases were malarial fevers, conjunctivitis, diseases of the digestive system and ulcers. The total number of patients treated was 3,506 out-door and 2 in-door against 3,114 and 3 in 1897 and 2,678 and 1 in 1896. The dispensary was inspected by the Civil Surgeon of Hyderabad and the District Revenue Officers. Vaccination is carried on by the táluka vaccinator. There were 286 surgical operations performed as compared with 288 in 1897 and 218 in 1896. The hospital stoppage rules are not adopted in this dispensary. The total cost was Rs. 729-1-2 and the cost per patient Re. 0-3-4 as compared with Rs. 557-8-9 and Re. 0-2-10 in 1897 and Rs. 581-4-9 and Re. 0-3-6 in 1896.

SAKRAND.—*In charge of* MR. R. H. KIRPALANI.

The dispensary building, though in fair condition, requires repair. A ward for in-patients and quarters for 1st and 2nd class servants are required. Furniture, &c., is in good order. The dispensary committee met twice during the year. Conservancy arrangements are fair. Water-supply from wells is good and sufficient. There were 13 in-door and 2,763 out-door patients treated as compared with 4 in-door and 1,538 out-door in 1897 and 3,716 out-door in 1896. The prevailing diseases were intermittent and simple continued fevers, dyspepsia, conjunctivitis, chronic bronchitis, eczema and ulcers. There were 13 surgical operations performed against 108 in 1897 and 241 in 1896. Vaccination is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon and by the Deputy Sanitary Commissioner, Sind Registration District. The total cost was Rs. 558-10-3 and the cost per patient Re. 0-3-3 as compared with Rs. 533-1-10 and Re. 0-5-6 in 1897 and Rs. 609-13-4 and Re. 0-2-8 in 1896, respectively.

GRANT-IN-AID DISPENSARIES.

TANDO ALAHYAR.—*In charge of* Third Class Hospital Assistant GANGARAM SAHEBSING, No. 259.

The dispensary building was thoroughly repaired during the year 1898 and is now in a good condition. Furniture and fittings are sufficient. The dispensary committee met 7 times in 1898, 6 times in 1897 and 9 times in 1896. Conservancy is fairly well attended to by the municipality. The water-supply from wells and canals is good and abundant. There were 13 in-door and 3,091 out-door patients treated against 27 in-door and 2,436 out-door in 1897 and 24 in-door and 3,633 out-door in 1896. The most common diseases were conjunctivitis catarrhal, intermittent fever, bowel complaints, ulcers and inflammation of external ear. Plague broke out in the year 1897. There were 122 surgical operations performed against 87 in 1897 and 120 in 1896. Two *post-mortem* examinations were held against 6 each in 1897 and 1896. The total number of medico-legal cases was 7 as compared with 29 in 1897 and 18 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,554-14-0 and the cost per patient Re. 0-8-0 against Rs. 1,573-10-6 and Re. 0-10-3 in 1897 and Rs. 1,777-12-0 and Re. 0-7-9 in 1896. Hospital stoppages amounted to Rs. 22-1-0 as compared with Rs. 13-15-0 in 1897 and Rs. 32-9-0 in 1896.

NAUSHAHRO.—*In charge of* Second Class Hospital Assistant VITHOBA MATHURAJI, No. 188.

The dispensary building is suitable, except that the female ward should be separate. Quarters for servants and a dead-house are needed. Furniture and fittings are sufficient. The dispensary committee met 12 times. The dispensary was inspected by the Civil Surgeon of Hyderabad. The most common diseases were intermittent fever, conjunctivitis catarrhal, rheumatism, eczema and ulcers. The total treated was 3,382 out-door and 31 in-door patients against 4,237 and 23 in 1897 and 3,229 and 17 in 1896, respectively. Six *post-mortem* examinations were performed at the request of the police and opinion was given in 11 medico-legal cases. There were 242 surgical operations performed against 186 in 1897 and 157 in 1896. The sanitary condition of the town is fairly good. Water-supply from wells is good and sufficient. Vaccination is performed by the táluka vaccinator. The total cost was Rs. 1,074-3-6 against Rs. 1,693-11-9 in 1897 and Rs. 849-1-6 in 1896, the cost per patient being Re. 0-4-6, Re. 0-6-4 and Re. 0-4-2 respectively. Hospital stoppages amounted to Re. 0-14-0 as compared with Rs. 5-3-0 in 1897 and Rs. 5-15-0 in 1896.

TANDO MAHOMED KHAN.—*In charge of* Second Class Hospital Assistant CHOITHRAM SHEWAKRAM, No. 169.

The buildings are under repair. Furniture and fittings are sufficient. The dispensary was visited 12 times by the committee against 11 in 1897 and 12 times in 1896. The prevailing diseases were malarial fevers, ulcers and diseases of the eye, ear, digestive system and skin. The total treated was 4,441 out-door and 42 in-door patients, as compared with 4,047 and 33 in 1897 and 6,422 and 63 in 1896, respectively. The conservancy of the town is fairly good. The water-supply is good and abundant. There were 272 surgical operations performed against 165 in 1897 and 247 in 1896. Vaccination is performed by the táluka vaccinator. *Post-mortem* examinations numbered 3 each in 1898 and 1896 and 2 in 1897. Opinion was given in several medico-legal cases at the request of the police. The dispensary was inspected once by the Civil Surgeon and the Collector of Hyderabad, and twice by the Assistant Collector, Tándo. The total cost was Rs. 1,876-13-0 and the cost per patient Re. 0-6-8 against Rs. 1,031-12-4 and Re. 0-4-1 in 1897 and Rs. 1,433-14-6 and Re. 0-3-6 in 1896, respectively. Rs. 12-11-0 were realized on account of hospital stoppages, as compared with Rs. 8-3-0 in 1897 and Rs. 7-6-0 in 1896.

HALA.—*In charge of* Second Class Hospital Assistant MULCHAND LALCHAND, No. 115.

The dispensary buildings are in good repair. An operating table is required. The committee visited the dispensary every month. Conservancy is well attended to. Water-supply from wells and canals is good and abundant. There were 27 in-door and 4,150 out-door patients treated as compared with 22 in-door and 3,658 out-door in 1897 and 4 in-door and 3,860 out-door in 1896. The prevailing diseases were malarial fevers, bowel complaints, ulcers and eye and respiratory affections. Small-pox was prevalent in the town and its vicinity during the year 1897. Surgical operations numbered 283 against 319 in 1897 and 477 in in 1896. There were six *post-mortem* examinations held in 1898, and 11 each in 1897 and 1896. Opinion was given in 25 medico-legal cases against 27 in 1897 and 13 in 1896. The Civil Surgeon of Hyderabad inspected the dispensary once in each year. Vaccination is carried out by the táluka vaccinator. The total cost was Rs. 1,053-0-7 and the cost per patient Re. 0-4-0, as compared with Rs. 1,286-12-8 and Re. 0-5-7 in 1897 and Rs. 1,461-6-6 and Re. 0-6-1 in 1896, respectively. Rs. 22-7-0 were hospital stoppages against Rs. 9-10-0 in 1897 and Rs. 15-8-0 in 1896.

THÁRU SHÁH.—*In charge of* Third Class Hospital Assistant BHAWANDAS HUSHMATRAI, No. 202.

The buildings have been repaired and are in good condition. Quarters for the compounder have been provided. Furniture and fittings are sufficient and in good order. The dispensary committee met regularly every month. Conservancy of the town is fairly good. Water-supply from wells is good and abundant. The total treated was 4,239 out-door and 34 in-door, as compared with 3,362 and 11 in 1897 and 3,232 and 33 in 1896. The prevailing diseases were intermittent fevers, conjunctivitis, ulcers and diseases of the digestive system and skin. Vaccination is carried on by the táluka vaccinator. There were 434 surgical operations performed as compared with 275 in 1897 and 400 in 1896. Eight *post-mortem* examinations were held, as compared with 4 each in 1897 and 1896. Opinion was given in 6 medico-legal cases as compared with *nil* in 1897 and 13 in 1896. The dispensary was inspected by the Civil Surgeon of Hyderabad. The total cost was Rs. 1,520-14-0 and the cost per patient Re. 0-5-8, as compared with Rs. 781-15-5 and Re. 0-3-9 in 1897 and Rs. 1,310-9-4 and Re. 0-6-5 in 1896, respectively. Rs. 7-4-0 were realized as hospital stoppages as compared with Rs. 8-13-0 in 1897 and Rs. 3-3-0 in 1896.

BOULTON DISPENSARY, TANDO BAGO.—*In charge of* Second Class Hospital Assistant HARUMAL MENGHRAJ, No. 204.

The dispensary buildings are in want of repair. An estimate for repairs and conversion of the west verandah into an operating room has been submitted. The quarters provided for

the compounder and the goorgah are badly attacked with "kallar," and therefore require under-pinning with burnt bricks, otherwise the whole building will collapse. A cook-room for in-door patients is needed. Furniture and fittings are in good order with the exception of an operating table which is required. The dispensary committee met six times. The prevailing diseases were malarial fevers, conjunctivitis, bronchitis and diseases of the digestive system and skin. The total treated were 2,923 out-door and 21 in-door patients as compared with 2,005 and 17 in 1897 and 3,884 and 35 in 1896, respectively. The dispensary was inspected by the Civil Surgeon of Hyderabad, Sind. The sanitary condition of the town is not satisfactory, there being no municipality. Water-supply is ample from canals and wells; that from the latter is liable to contamination. There were 266 surgical operations performed against 121 in 1897 and 436 in 1896. Vaccination is performed by the táluka vaccinator. Three *post-mortem* examinations were performed against 1 in 1897 and 4 in 1896 and opinion was given in 6 medico-legal cases against 2 in 1897 and 4 in 1896. The total cost was Rs. 1,291-7-8, and the cost per patient Re. 0-7-0, as compared with Rs. 1,010-13-6 and Re. 0-8-0 in 1897 and Rs. 1,235-11-4 and Re. 0-5-1 in 1896, respectively. Rs. 8-7-0 were collected under the hospital stoppage system against Rs. 7-14-0 in 1897 and Rs. 2-12-0 in 1896.

MIRPUR KHÁS.—*In charge of* First Class Hospital Assistant Khán Sáheb SHAIKH ABDUL RAYMON, No. 98.

The building and its out-houses are in good condition. The enlargement of the dispensary room and the erection of a verandah and a new cook-room for in-patients and quarters for the compounder have been completed. Sanction has been received to the construction of latrines for patients. A dead-house is needed. Furniture, fittings and instruments are in good order. The dispensary committee meet every month regularly, and individual members visit the dispensary frequently. The sanitary condition of the town is fair. The general health of the town has been good. The water-supply from wells and canals is good and abundant. The total treated was 4,357 out-door and 17 in-door patients, as compared with 3,768 and 22 in 1897 and 4,880 and 12 in 1896. The prevailing diseases were intermittent fever, conjunctivitis, ulcers, chronic bronchitis, skin diseases and bowel complaints. There were 3 imported plague cases from Karáchi and 2 from Hyderabad in the year 1897, and 6 cases of small-pox in the town and 15 in its vicinity in 1896. Vaccination is carried on by the Local Fund vaccinator, who performed 61 primary and 14 secondary vaccinations against 47 and 7 in 1897 and 65 and 15 in 1896. Surgical operations numbered 124 against 92 in 1897 and 90 in 1896. Four *post-mortem* examinations were performed at the request of the police, against 3 each in 1897 and 1896. Opinion was given in 4 medico-legal cases against 2 each in 1897 and 1896. The dispensary was inspected by the Civil Surgeon of Hyderabad, the Deputy Commissioner, Thar and Párkar, and the Deputy Collector, Nára Valley. The total amount realized from hospital stoppages was Rs. 9-5-0, as compared with Rs. 3-7-0 in 1897 and Rs. 14-5-0 in 1896. The total cost was Rs. 1,481-10-2 and the cost per patient Re. 0-5-5, as compared with Rs. 1,460-7-9 and Re. 0-6-2 in 1897 and Rs. 1,893-5-0 and Re. 0-6-2 in 1896, respectively.

BADIN.—*In charge of* Second Class Hospital Assistant CHANDUMAL KHANSING, No. 189.

The dispensary buildings are in a bad state of repair. Provision is being made for the construction of latrines, servants' quarters, a mortuary and a cookroom. The dispensary committee met 6 times against 9 times in 1897 and 12 times in 1896. The most common diseases were malarial fevers, diseases of the eye, skin, spleen and digestive system and ulcers. The dispensary was inspected by the Civil Surgeon and the Collector of Hyderabad, and by the Deputy Sanitary Commissioner, Sind Registration District, and the Assistant Collector, Tándo. The total number of patients treated was 43 in-door and 2,820 out-door against 46 and 2,480 in 1897 and 47 and 3,850 in 1896, respectively. There is no municipality. Conservancy is not well looked after; and the sanitary condition of the town, therefore, is not satisfactory. The water-supply from canals is ample and good; that from wells deficient and defective. There were 240 surgical operations performed, against 221 in 1897 and 367 in 1896. Vaccination is performed by the táluka vaccinator. Four *post-mortem* examinations were made at the request of the police as compared with 2 in 1897 and 4 in 1896. Opinion was given in 13 medico-legal cases against 10 in 1897 and 16 in 1896. The total cost was Rs. 1,312-0-0 and the cost per patient Re. 0-7-4, as compared with Rs. 941-13-8 and Re. 0-6-0 in 1897, and Rs. 1,348-7-7 and Re. 0-5-6 in 1896, respectively. Hospital stoppages amounted to Rs. 6-15-0 against Rs. 7-10-0 in 1897 and Rs. 9-12-0 in 1896.

MATARI.—*In charge of* Second Class Hospital Assistant MAHOMED RAHIMANKHAN, No. 190.

The dispensary building is in a bad state of repair; the *kalar* has spoiled the lower portion of the building about seven feet all around, the gurgah's house fell down from heavy rainfall in the year 1897, and the cooking room and walls of the Hospital Assistant's quarters and privy have been damaged to a great extent. No repairs were done to the building, as the dispensary remained closed from January to October 1898. The store-room has been converted into a male ward. There is neither a female ward, nor quarters for the 2nd class servants. Water-supply from canals is abundant but dirty. There are 20 wells in the town, which yield brackish water. The conservancy of the town is fairly well looked after by the municipality. The general health of the town and district is fair. There were 6 in-door and 1,072 out-door patients treated

against 4 in-door and 1,607 out-door in 1897 and 20 in-door and 3,982 out-door in 1896. The most common diseases were conjunctivitis, malarial fevers, diseases of the digestive system and skin and local injuries. Surgical operations numbered 78 against 166 in 1897 and 282 in 1896. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Hyderabad. The total cost was Rs. 384-13-11 and the cost per patient Re. 0-5-9 as compared with Rs. 639-1-4 and Re. 0-6-4 in 1897 and Rs. 1,590-15-1 and Re. 0-6-4 in 1896, respectively. Rs. 2-2-0 were realized under the hospital stoppage rules in 1897 and Rs. 4-2-0 in 1896.

SHA'HDA'DPUR.—*In charge of* Second Class Hospital Assistant ASUMAL ISARDAS, No. 208.

The dispensary was opened on 28th December 1897. The furniture, fittings, &c., which were supplied in the year 1898, are sufficient and in good order. The building requires repair. The dispensary committee met twice. The chairman visited the dispensary very often. The most common diseases were intermittent fever, conjunctivitis, bronchitis, dyspepsia and ulcer. There were 48 in-door and 3,450 out-door patients treated in 1898 and 19 out-door in 1897. Conservancy is looked after by the sanitary committee. Water-supply from wells is good and ample. There were 436 surgical operations and 8 *post-mortem* examinations performed during the year 1898. Vaccination is carried out by the táluka vaccinator. The total cost was Rs. 2,717-3-6 and the cost per patient Re. 0-12-5 during the year 1898.

THAR AND PA'RKAR COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

UMARKOT.—*In charge of* First Class Hospital Assistant BALAJI CUDDUM, No. 21.

The town has been kept clean and neat by the municipality, no filth or rubbish being allowed to accumulate. Water-supply from wells good and plentiful. The dispensary building is well situated and convenient to the people. There is no accommodation for female patients, while that for males is sufficient. There were 148 in-door and 4,248 out-door patients treated as compared with 153 and 4,213 in 1897 and 83 and 4,296 in 1896, respectively. The prevailing diseases were dysentery, malarial fevers, worms, rheumatic affections, diseases of the eye, respiratory and digestive system and skin. There were 4 deaths in hospital against 2 in 1897 and 3 in 1896. They were due to malarial fever, pneumonia and dropsy. A few cases of small-pox occurred during the year. Surgical operations numbered 81 against 142 in 1897 and 108 in 1896. Six medico-legal cases were certified against 8 in 1897 and 6 in 1896. Vaccination is carried on by the Local Fund vaccinator. The dispensary was visited by the Deputy Commissioner of Thar and Párkar and the Deputy Collectors of the Nára Valley and Thar Divisions. The total cost was Rs. 2,097-2-2 and the cost per patient Re. 0-7-8 as compared with Rs. 1,609-14-1 and Re. 0-5-11 in 1897 and Rs. 1,939-7-11 and Re. 0-7-1 in 1896, respectively. Rs. 5-9-0 were hospital stoppages against Rs. 3-9-0 in 1897 and Rs. 2-4-0 in 1896.

KHIPRA.—*In charge of* Third Class Hospital Assistant LAL MAHOMED FATTEH MAHOMED, No. 340.

The building has not been repaired. It is quite unsuitable for dispensary purposes. The wards are damp, dark and ill-ventilated, and the walls eaten up by *kalar*. There is no dead-house or servants' quarters. Furniture is in fair order. The dispensary committee met four times. The roads and streets are kept fairly clean. Water-supply from a well is good and sufficient. There were 62 in-door and 2,624 out-door patients treated against 44 in-door and 3,333 out-door in 1897 and 60 in-door and 3,425 out-door in 1896. The prevailing diseases were malarial fevers, conjunctivitis, respiratory and skin affections and ulcers. Surgical operations numbered 348 against 317 in 1897 and 252 in 1896. Four *post-mortem* examinations were held. Vaccination is conducted by the táluka vaccinator. The dispensary was visited by the Deputy Commissioner, Thar and Párkar, and the Deputy Collector, Nára Valley. The total cost was Rs. 1,343-15-0 and the cost per patient Re. 0-8-0 as compared with Rs. 1,181-2-2 and Re. 0-5-7 in 1897 and Rs. 1,394-12-2 and Re. 0-6-5 in 1896, respectively.

MITTI.—*In charge of* Third Class Hospital Assistant HAKUMATRAI ASSANAND, No. 301.

The dispensary building is in a good state of repair as well as the furniture. The committee visited the dispensary several times during the three years. The sanitary condition of the town is good. The water-supply from wells is brackish. The total treated was 1,669 out-door and 21 in-door patients against 1,722 out-door and 21 in-door in 1897 and 1,937 out-door and 23 in-door in 1896. The most common diseases were intermittent fever, conjunctivitis, bronchitis and ulcers. There were 130 surgical operations performed against 161 in 1897 and 156 in 1896. Small-pox, which broke out in the town of Mitti and its táluka, gave 249 cases against 273 in 1897 and 209 in 1896. Vaccination is carried on by the táluka vaccinator under the orders of the Sanitary Department. The dispensary was visited by the Deputy Commissioner, Thar and Párkar, and the Deputy Collectors of the district. The total cost was Rs. 906-2-11 and the cost per patient Re. 0-8-7 against Rs. 863-14-4 and Re. 0-7-11 in 1897 and Rs. 1,071-15-5 and Rs. 0-8-9 in 1896, respectively. Hospital stoppages amounted to Re. 0-12-0 against Re. 1-7-0 in 1897.

NAGAR PARKAR.—*In charge of* Third Class Hospital Assistant PARTÁBRAI TOPANDAS, No. 262.

The dispensary building is in good repair. Quarters for the bhisti and sweeper are needed. Furniture and fittings are sufficient and in good order. The want of a cupboard and an operating table is much felt. The dispensary committee met 8 times in 1898 and 1897 each and 11 times in 1896. Conservancy is well looked after. The water-supply from wells is good and sufficient. The total treated was 23 in-door and 1,271 out-door patients as compared with 43 and 1,477 in 1897 and 48 and 1,583 in 1896, respectively. The most common complaints were intermittent fever, conjunctivitis, bronchitis, indigestion and local injuries. There were 86 surgical operations performed against 137 in 1897 and 121 in 1896. Opinion was given in 23 medico-legal cases against 12 in 1897 and 15 in 1896. Three *post-mortem* examinations were held in 1898 and one in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Deputy Commissioner, Thar and Párkar, and the Deputy Collector, Nára Valley. The total cost was Rs. 938-7-0 as compared with Rs. 976-10-6 in 1897 and Rs. 1,105-14-11 in 1896, the cost per patient being Re. 0-11-7, Re. 0-10-3 and Re. 0-10-10 respectively.

CHACHRA.—*In charge of* Third Class Hospital Assistant LILARAM UTAMCHAND, No. 297.

The dispensary building is an old dharmshála. It is kept in a good state of repair. Furniture and fittings are sufficient and in good order. The dispensary committee met four times. Conservancy is well attended to and the town kept fairly clean. Water-supply from wells is sufficient. There were 8 in-door and 472 out-door patients treated against 12 in-door and 885 out-door in 1897 and 39 in-door and 1,527 out-door in 1896. Intermittent fever, conjunctivitis, bowel complaints, respiratory affections and ulcers were the prevailing diseases. There were 33 surgical operations performed against 127 in 1897 and 203 in 1896. One *post-mortem* examination was held. Vaccination is carried out by the táluka vaccinator. The total cost was Rs. 479-14-8 and the cost per patient Re. 1 against Rs. 764-7-1 and Re. 0-13-8 in 1897 and Rs. 1,334-9-6 and Re. 0-13-8 in 1896. The dispensary was closed from 8th November 1897 to 28th June 1898 and from 15th November to 22nd December 1898.

SANGHAR.—*In charge of* Third Class Hospital Assistant TIRITHDAS KHANCHAND, No. 238.

The dispensary building is built on the standard plan and is in an excellent state of repair. The furniture and fittings are sufficient and in good order. The roads and streets of the town are clean. Two public latrines have been constructed in the town. The general health of the people did not suffer much from malaria, owing to the Heran Canal, which is in close proximity to the town, having remained closed for some time. Water-supply from wells is good and sufficient. Vaccination is performed by the táluka vaccinator. Seven dead bodies were examined in 1898 and 1896 each and 3 in 1897. Opinion was given in 3 medico-legal cases against 6 in 1897 and 11 in 1896. The dispensary committee met 7 times against 6 times in 1897 and 10 times in 1896. The dispensary was visited by the Deputy Commissioner, Thar and Párkar, and by the Deputy Collector, Nára Valley, in 1898 and 1897, and inspected by the Civil Surgeon, Hyderabad, in 1896. The total number of patients treated was 48 in-door and 1,865 out-door against 47 in-door and 2,113 out-door in 1897 and 130 in-door and 3,372 out-door in 1896. The prevailing diseases were malarial fevers, conjunctivitis, bronchitis, ulcers and skin diseases. There were 258 surgical operations performed against 289 in 1897 and 436 in 1896. The total expenditure was Rs. 841-3-11 and the cost per patient Re. 0-7-0 against Rs. 1,194-14-9 and Re. 0-8-10 in 1897 and Rs. 1,196-15-0 and Re. 0-5-6 in 1896, respectively. Rs. 3-7-0 were hospital stoppages as compared with Rs. 3 in 1897 and Rs. 3-9-0 in 1896.

SHIKA'RPUR COLLECTORATE.

SHIKÁRPUR CIVIL HOSPITAL.—*In charge of* Assistant Surgeon MULCHAND GANGARAM.

Conservancy.—The conservancy of the town is fairly well looked after by the municipality, for which purpose a staff of 2 nuisance inspectors, 13 muccadams and 200 sweepers is employed. There is a separate establishment for the removal of filthy water in carts. The night-soil is taken away to a distance from the town and buried in trenches, and is subsequently, after thorough drying, sold to landowners for purposes of cultivation. The hospital latrines are cleaned by the hospital sweeper, the filth being regularly removed by the Municipal Health Department.

Water-supply—Is abundant and obtained from wells, the number of which has been gradually increasing during the past three years. At present 276 are in use; of these 207 are private and the rest are the property of the municipality. They are mostly situated in the heart of the town. Many of them are liable to soakage and to surface contamination and the water is consequently of questionable quality. Two of the municipal wells are worked by pumps, and the water obtained from them is reported to be of good quality.

Hospital buildings.—The Civil Hospital buildings were placed at the disposal of the municipality in April 1897 for use as a Plague Hospital, should occasion arise, and are still in

their charge. They are kept in a good state of repair. A new building intended for school purposes and situated opposite to the Post Office was given in exchange by the municipality for use as Civil Hospital. This building is close to the town, and the institution, in consequence, has increased in popularity considerably. The site is far preferable to the old one, and it would be a move in the right direction if the hospital could be permanently located there. It must be noted, however, that it is too close to the Victoria Dispensary, and in order that full advantage be taken by the public from both the institutions, it would be better to remove the dispensary to the other end of the town, *i.e.* towards the Municipal office.

General health—Has been generally good. Small-pox prevailed in an epidemic form in 1896. Altogether 508 cases were reported.

Thirty-two cases of plague came under observation in 1897; most of these (28) were imported, and only 4 were local. There were no epidemics in 1898.

Attendance of patients.—There were 530 in-door and 9,432 out-door patients treated as compared with 607 and 8,347 in 1897 and 605 and 3,207 in 1896, respectively.

Prevailing diseases.—Malarial fevers, rheumatic complaints, inflammation of external ear, conjunctivitis and diseases of the skin including ulcers.

Surgical operations.—855 against 836 and 679 in 1897 and 1896, respectively. The important operations performed in 1898 greatly exceeded in number those of 1897 and 1898.

Mortality.—There were 18 deaths in 1898 against 16 in 1897 and 18 in 1896. The chief causes were dysentery, pneumonia, asthma, phthisis and diarrhœa. Most of the deaths occurred amongst patients who were brought into the hospital in a moribund state.

Medico-legal cases.—14 *post-mortem* examinations were held against 13 in 1897 and 9 in 1896. Opinion was also given in 34 medico-legal cases against 56 in 1897 and 53 in 1896.

Vaccination—Is carried out by vaccinators, appointed by the municipality, under the orders of the Deputy Sanitary Commissioner, Sind District, and is fairly popular.

Cost.—The total cost in 1898 was Rs. 2,656-7-5 against Rs. 2,355-12-10 in 1897 and Rs. 2,871-15-9 in 1896. The cost per patient was Re. 0-4-3 in 1898 against Re. 0-4-3 and Re. 0-12-1, respectively, in 1897 and 1896.

Hospital stoppages.—Rs. 210-15-0 were realized against Rs. 110-13-0 in 1897 and Rs. 5-2-0 in 1896.

Conduct of establishment—Was good.

SUKKUR CIVIL HOSPITAL.—*In charge of* Major W. A. CORKERY, I.M.S., up to 25th July 1898, and Captain J. H. MCDONALD, I.M.S., up to 31st December 1898.

Conservancy.—General sanitary condition of the town above ground is good. Underground the sewers are flushed in connection with the drainage and flushing system adopted by the municipality, but owing to the inefficient flushing power they frequently get choked with filth. This will be remedied by the new drainage system which is to be adopted as soon as funds permit of its being constructed. The conservancy arrangements have remained practically unaltered during the last three years, except that in 1897, in consequence of the prevalence of plague, all the houses and godowns in New Sukkur and Gharibabad without exception were thoroughly cleaned, whitewashed and disinfected. In addition, several objectionable holes and dwelling houses, particularly those in Gharibabad, where cholera invariably first occurred and which were badly infected with plague, were dismantled and burnt down, and free ventilation was provided by knocking holes and windows in several houses. By these means the general sanitary condition of the town has greatly improved.

Water-supply.—Owing to the New Sukkur water-works, the supply of water is generally good and abundant. Occasionally when the river is very low, the supply is rather deficient, and then some of the wells have to be used. The public, as a rule, prefer the water supplied from the water-works for drinking purposes and use the well water for washing utensils, clothes, &c. The water-works supply is by gravitation on the constant service principle. The daily supply is 12 gallons per head, and the mains are large enough to distribute the whole of it in six hours.

Hospital buildings.—There are two main detached buildings—one for Europeans and one for natives. The former consists of 5 wards, all comfortably furnished and provided with additional comforts suitable for Europeans; four of these are reserved for Europeans, while the 5th is used by respectable natives, such as mukhtiárkars, clerks, overseers, &c. The second block is used entirely for natives, is in good condition, contains 4 wards—3 for males and 1 for females, and provides accommodation for 22 beds. The quarters for subordinate staff and menials are ample and in good repair, while the block in which the Civil Medical Pupils reside, unfavourably reported on in 1896, has been thoroughly repaired and new doors and windows supplied. The sum of Rs. 850, estimated by the Executive Engineer for a cook-room for self-supporting patients, has been sanctioned, and the work is now proceeding. The roads running in front of the two detachments are also in good condition. A wall runs round the front of the hospital, but there seems to be no necessity to enclose the grounds completely as reported in 1897.

General health.—The general health of the town and its neighbourhood was not good during the two previous years in consequence of small-pox (95 cases in 1896) and plague (537 cases in 1897) being prevalent, but in 1898 it has greatly improved with the disappearance of epidemic

disease. In consequence of the river Indus being very high in 1897, malarial fevers were very rife during that year as compared with 1896 and 1898, when the river was very low and no inundation of the surrounding district occurred. The hot months of 1897 were healthy (if the prevalence of plague be excluded), there being only 4 cases of heat apoplexy and sunstroke, while 27 and 52 cases of heat apoplexy and sunstroke occurred respectively in those of 1896 and 1898.

Attendance of Patients.—The total number of patients treated during 1898 was 3,982 out-door and 426 in-door against 3,661 and 707 in 1897 and 5,279 and 410 in 1896, respectively.

Prevailing diseases.—Malarial fevers, dysentery, plague, bronchitis catarrhal and conjunctivitis catarrhal.

Mortality and its causes.—There were 25 deaths in 1898 as compared with 255 (including 240 from plague) in 1897 and 21 in 1896. The principal causes were plague in 1897 only and pneumonia, bronchitis chronic, peritonitis, diarrhœa and phthisis pulmonalis.

Surgical Operations.—523 operations in 1898 against 426 in 1897 and 515 in 1896.

Vaccination—Is carried out efficiently by the municipal vaccinator under the supervision of the Deputy Sanitary Commissioner, and is satisfactory.

Conduct of establishment.—Satisfactory on the whole, except that of a Third Class Hospital Assistant, temporarily detailed for plague duty at the Old Sukkur Plague Hospital, who was sentenced to six months' rigorous imprisonment on the 21st August 1897 for extorting and receiving bribes from some of the patients.

Medico-Legal Cases.—129 medico-legal cases were examined and reported on in 1898 as against 87 and 82, respectively, in 1897 and 1896.

Hospital Stoppages.—The amount realized was Rs. 58-0-0 as compared with Rs. 56-6-0 in 1897 and Rs. 128-10-0 in 1896. The decrease in the collections of 1897 and 1898, as compared with 1896, is chiefly due to non-payment of stoppages at the Sukkur Municipal Dispensary, where for the most part all well-to-do people seek admission simply to avoid payment at this hospital.

Cost.—The total cost was Rs. 5,282-6-7 and the cost per patient Re. 1-3-2, as compared with Rs. 4,881-9-11 and Re. 1-1-11 in 1897 and Rs. 8,010-4-9 and Re. 1-6-6 in 1896, respectively.

MUNICIPAL DISPENSARIES.

VICTORIA DISPENSARY, SHIKA'RPUR.—*In charge of* Mr. CHAMRAI D. KALRO, L.M. & S.

The dispensary buildings are in good order. Furniture and fittings are sufficient and appropriate, except that no clothing is supplied for the in-patients. The dispensary committee met nine times. The sanitary condition of the town is well attended to by the municipality, but much might be done in the way of the extension of small surface drains to those parts of the town to which they have not been carried already. The water-supply from wells is abundant and of fairly good quality. The total number of patients treated was 17,657 out-door and 57 in-door against 16,705 out-door and 39 in-door in 1897 and 16,897 out-door and 27 in-door in 1896. The most common diseases were intermittent fever, conjunctivitis catarrhal, inflammation external ear, abscess and ulcers. There were 1,162 surgical operations performed against 1,216 in 1897 and 1,180 in 1896. Vaccination is carried on by the Sanitary Department. The dispensary was inspected twice by the Principal Medical Officer, Sind District, and once by the Deputy Sanitary Commissioner, Sind Registration District, and the Civil Surgeon, Shikárpur. The total cost was Rs. 2,486-10-3 as compared with 2,762-2-11 in 1897 and 2,128-13-1 in 1896, and the cost per patient was Re. 0-2-3 against Re. 0-2-8 in 1897 and Re. 0-2-0 in 1896. The hospital stoppage rules are not in force here.

SUKKUR.—*In charge of* First Class Hospital Assistant Khán Sáheb E. BENJAMIN, No. 28.

The buildings are in thorough repair, and furniture and fittings sufficient. The dispensary committee meet regularly every month. Water-supply from the river Indus is good and ample. The total number of patients treated was 77 in-door and 9,362 out-door against 89 and 7,152 in 1897 and 73 and 10,163 in 1896. The prevailing diseases were dysentery, intermittent fever, conjunctivitis, inflammation external ear and ulcers. There were 654 surgical operations performed against 397 in 1897 and 664 in 1896. Vaccination is carried out by the Sanitary Department. The dispensary was inspected by the Principal Medical Officer, Sind District, and the Civil Surgeon, Sukkur. The total cost was Rs. 2,970-5-2 and the cost per patient Re. 0-5-0 against Rs. 2,434-12-10 and Re. 0-5-5 in 1897 and Rs. 3,349-13-8 and Re. 0-5-3 in 1896, respectively. The hospital stoppage rules are not in force here.

LA'RKHA'NA.—*In charge of* First Class Hospital Assistant M. SHALOAMJI, No. 35.

The conservancy of the town is quite inadequate to the requirements of the place; the town is undrained, and hence there is a good deal of subsoil moisture. Water-supply from wells is fairly good and abundant. During summer, water from the Ghar canal is also availed of. The dispensary buildings are in a good state of repair. Two new latrines have been built

for patients. The general health has been fairly good. There were 20 cases of plague in the municipal limits imported from Sukkur during the year 1897. The total number of patients treated was 64 in-door and 5,695 out-door patients against 112 in-door and 6,321 out-door in 1897 and 124 in-door and 11,065 out-door in 1896. The most common diseases were intermittent fever, conjunctivitis, inflammation external ear, bronchitis and ulcers. Vaccination is performed from house to house by a municipal vaccinator. There were 523 surgical operations performed against 411 in 1897 and 1,194 in 1896. There were 11 *post-mortem* examinations held against 19 in 1897 and 9 in 1896. Opinion was given in 60 medico-legal cases as compared with 70 in 1897 and 46 in 1896. The total expenditure was Rs. 2,602-10-8 and the cost per patient Re. 0-7-3 against Rs. 2,615-6-7 and Re. 0-6-6 in 1897 and Rs. 3,980-9-3 and Re. 0-5-8 in 1896, respectively. Rs. 17-15-0 were hospital stoppages as compared with Rs. 9-15-0 in 1897 and Rs. 15-10-0 in 1896.

GRANT-IN-AID DISPENSARIES.

ROHRI.—*In charge of* Second Class Hospital Assistant TEKCHAND HAZÁRIMAL, No. 182.

The sanitary condition of the town is fairly satisfactory. Most of the private lanes are very dirty. They are in fact used as receptacles of filthy water, excreta, &c. Water-supply, mostly from the river Indus, is good and abundant. There are 9 private wells, of which one only was approved of by the Deputy Sanitary Commissioner, Sind Registration District. Water from these wells is generally used by the people for bathing and washing purposes. The dispensary buildings in their present state are in good order. Quarters for the goorgah are badly needed. Plague broke out in the town and táluka from 23rd February to 23rd June 1897, the total number of cases being 270 and deaths 174. Small-pox of a mild type prevailed in 1896. There were 61 in-door and 6,439 out-door patients treated as compared with 60 in-door and 5,623 out-door in 1897 and 83 in-door and 7,097 out-door in 1896. Surgical operations numbered 379 against 180 in 1897 and 371 in 1896. Vaccination is carried on by the municipal vaccinator. The dispensary committee meet regularly every month. The dispensary was inspected by the Principal Medical Officer, Sind District, the Civil Surgeon of Sukkur and the Deputy Sanitary Commissioner, Sind Registration District, and was visited by the Assistant Collector of Rohri. There were 3 *post-mortem* examinations held against 6 each in 1897 and 1896. Opinion was given in 22 medico-legal cases as compared with 20 in 1897 and 23 in 1896. The total cost was Rs. 1,637-1-5 and the cost per patient Re. 0-4-0 against Rs. 1,633-7-9 and Re. 0-4-7 in 1897 and Rs. 1,708-5-8 and Re. 0-3-10 in 1896, respectively. Rs. 48-13-0 were hospital stoppages as compared with Rs. 40-15-0 in 1897 and Rs. 62-4-0 in 1896.

MEHAR.—*In charge* of Second Class Hospital Assistant DAYA'RAM DANDUMAL, No. 195.

The buildings are in a good state of repair. Furniture and fittings are in good order and sufficient. The committee visits the dispensary every month. The sanitary condition of the town is fair. Water-supply from the Kákol canal is sufficient and of good quality. The total number of patients treated was 5,756 out-door and 88 in-door against 6,262 and 93 in 1897 and 7,617 and 87 in 1896. The prevailing diseases were malarial fevers, diseases of the eye, digestive system and skin and local injuries. There were 393 surgical operations performed against 364 in 1897 and 444 in 1896. Vaccination is performed by the táluka vaccinator. Three *post-mortem* examinations were held against 4 in 1897 and 9 in 1896. The dispensary was inspected by the Civil Surgeon of Shikárpur and the Deputy Sanitary Commissioner, Sind Registration District. The total cost was Rs. 1,563-10-4 and the cost per patient Re. 0-4-3 against Rs. 1,897-0-10 and Re. 0-4-9 in 1897 and Rs. 1,920-10-10 and Re. 0-4-0 in 1896. Hospital stoppages amounted to Rs. 17-7-0 as compared with Rs. 12-9-0 in 1897 and Rs. 9-2-0 in 1896. The dispensary was closed from 16th April to 5th August 1898.

KAMBAR.—*In charge* of Second Class Hospital Assistant SAVALSING MA'NIKRA'I, No. 121.

The town is kept clean by municipal sweepers. The sweepings of the houses are collected outside the town and burnt. The night-soil is buried one foot under ground at a mile's distance from the town. Water-supply from wells is ample, but brackish and of inferior quality. The dispensary buildings answer the purpose fairly well. The compounder's room is to be enlarged. Furniture and fittings are sufficient and in good order. The general health of the town is good. There were 61 in-door and 5,448 out-door patients treated against 64 in-door and 6,925 out-door in 1897 and 98 in-door and 9,254 out-door in 1896. The prevailing diseases were malarial fevers, eye, respiratory and skin affections and bowel complaints. Surgical operations numbered 358 against 368 in 1897 and 570 in 1896. There were 14 *post-mortem* examinations held and 25 medico-legal cases certified as compared with 8 and 20 in 1897 and 3 and 14 in 1896, respectively. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Shikárpur. The total cost was Rs. 1,755-12-2 as compared with Rs. 1,894-3-1 in 1897 and Rs. 2,307-15-3 in 1896; the cost per patient being Re. 0-5-1, Re. 0-4-4 and Re. 0-3-11, respectively. Rs. 12-0-0 were hospital stoppages as compared with Rs. 6-5-0 in 1897 and Rs. 6-12-0 in 1896.

GHOTKI.—*In charge of* Second Class Hospital Assistant KHUSHA'LDA'S KHEMCHAND, No. 150.

The dispensary was temporarily removed, owing to the old building being declared unsafe for use, to the native musáfarkhána in September 1896 until the completion of the new buildings, which were occupied on 28th April 1898. The latter are in every way suitable. Furniture and fittings are sufficient and in good order. The committee visited the dispensary regularly every month. The sanitary condition of the town was fair. The water-supply from wells is good and abundant. The total treated was 49 in-door and 4,746 out-door patients as compared with 32 in-door and 4,035 out-door in 1897 and 60 in-door and 4,516 out-door in 1896. The prevailing diseases were malarial fevers, conjunctivitis, diseases of the ear, digestive system and skin and local injuries. Small-pox prevailed in the town and its vicinity in 1897 and 1896. There were 338 surgical operations performed against 127 in 1897 and 201 in 1896. Eight *post-mortem* examinations were made and 15 medico-legal cases examined and reported upon, as compared with 10 and 13 in 1897 and 4 and 19 in 1896, respectively. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Sukkur once in each year and by the Deputy Sanitary Commissioner, Sind Registration District, in 1896. The total cost was Rs. 1,353-7-1 and the cost per patient Re. 0-4-6 against Rs. 5,827-7-4 and Re. 1-6-11 in 1897 and Rs. 1,509-8-7 and Re. 0-5-3 in 1896. Hospital stoppages amounted to Rs. 15-9-0 as compared with Rs. 11-7-0 in 1897 and Rs. 12-13-0 in 1896.

DOKRI.—*In charge of* Second Class Hospital Assistant TECKCHAND RACHUMAL, No. 166.

The dispensary buildings are in a good state of repair. Furniture and fittings are sufficient. Conservancy is fairly well attended to. Water-supply from wells and the Western Nára canal is good and sufficient. Vaccination is carried out by the táluka vaccinator. The dispensary committee met ten times in 1898 and 1897 each and twelve times in 1896. Small-pox prevailed in 1896. The dispensary was inspected by the Assistant Collector of Lárkhána, the Deputy Sanitary Commissioner, Sind Registration District, and the Civil Surgeon of Shikárpur. There were 23 in-door and 1,776 out-door patients treated against 21 in-door and 1,830 out-door in 1897, and 49 in-door and 3,240 out-door in 1896. Surgical operations numbered 238 against 134 in 1897 and 275 in 1896. Two dead bodies were examined against 1 in 1897 and 3 in 1896. Opinion was given in several medico-legal cases. Vaccination is carried out by the táluka vaccinator. The total cost was Rs. 1,327-2-7 and the cost per patient Re. 0-11-10, as compared with Rs. 848-14-3 and Re. 0-7-4 in 1897 and Rs. 1,505-6-9 and Re. 0-7-4 in 1896, respectively. Rs. 3-9-0 were hospital stoppages against Rs. 2-11-0 in 1897 and Rs. 2-4-0 in 1896.

RATO-DERO.—*In charge of* Second Class Hospital Assistant GANSHÁMDÁS GULUMAL, No. 201.

Conservancy is fairly attended to by the municipality. Water-supply from wells is good and abundant. The building is new and well suited for the purposes of a dispensary. The servants' quarters and the compound wall have not yet been built. There were 2,512 out-door and 44 in-door patients treated as compared with 1,684 and 21 in 1897 and 3,320 and 52 in 1896, respectively. The prevailing diseases were intermittent fever, conjunctivitis, inflammation of external ear, rheumatism, neuralgia, eczema and ulcers. There were 162 surgical operations performed as compared with 120 in 1897 and 298 in 1896. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Shikárpur. The total cost was Rs. 876-12-7 and the cost per patient Re. 0-5-6 as compared with Rs. 1,533-6-5 and Re. 0-14-5 in 1897 and Rs. 1,389-1-8 and Re. 0-6-7 in 1896, respectively. Hospital stoppages amounted to Re. 0-12-0 against Rs. 3-10-0 in 1897 and Rs. 10-11-0 in 1896. The dispensary was closed from 1st January to 28th July 1898.

UBAURO.—*In charge* of Third Class Hospital Assistant JETHA'NAND CHABILDA'S, No. 246.

The dispensary was temporarily closed in December 1897 on account of the Hospital Assistant being sent on plague duty, and was re-opened on 11th July 1898. The buildings and its out-houses are in a good state of repair. The furniture and fittings are sufficient for the present wants. The dispensary committee met five times. The sanitary condition of the town is good; there are no private latrines, and the inhabitants resort to the jungle for calls of nature. Water supply from wells is good and abundant; a few of the wells admit of soakage from being in close proximity to dwelling houses. There were 1,832 out-door and 11 in-door patients treated against 773 and 8 in 1897 and 2,136 and 14 in 1896, respectively. The prevailing diseases were malarial fevers, conjunctivitis and diseases of the digestive system and skin. There were 183 surgical operations performed against 73 in 1897 and 196 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Sukkur. The total cost was Rs. 725-9-0 and the cost per patient Re. 0-6-4 as compared with Rs. 475-6-7 and Re. 0-9-9 in 1897 and Rs. 1,348-6-2 and Re. 0-10-0 in 1896, respectively. The receipts on account of hospital stoppages were Rs. 4-13-0 in 1898 and Rs. 6-2-0 in 1896.

GARHI YA'SSIN.—*In charge of* Third Class Hospital Assistant CHELA'RA'M TILUMAL, No. 220.

The buildings are in good repair. The operating room is very small and low: furniture and fittings are sufficient. The dispensary committee meet every month regularly, and indivi-

dual members visit the dispensary frequently. The most common diseases were intermittent fever, conjunctivitis, inflammation external ear, skin diseases and ulcers. The dispensary was inspected by the Civil Surgeon, and visited by the Collector of Shikárpur and the Deputy Collector of Sukkur Division. The total number of patients treated was 3,223 out-door and 53 in-door against 2,468 out-door and 45 in-door in 1897 and 5,145 out-door and 141 in-door in 1896. The sanitary condition of the town is fair and is looked after by the municipality. Water-supply from wells is good and abundant. Surgical operations numbered 350 against 259 in 1897 and 459 in 1896. Vaccination is carried on by the táluka vaccinator. Four dead bodies were examined at the request of the police against 1 in 1897 and 3 in 1896. Opinion was given in 4 medico-legal cases against 1 in 1897 and 8 in 1896. The total cost was Rs. 1,417-11-3 and the cost per patient Re. 0-6-11 against Rs. 524-2-8 and Re. 0-3-4 in 1897 and Rs. 1,388-0-4 and Re. 0-4-2 in 1896, respectively. Rs. 1-10-0 were realized under the head of hospital stoppages in 1898 and Re. 0-15-0 in 1896. The dispensary was closed from 9th April to 5th July 1898.

UPPER SIND FRONTIER.

GOVERNMENT DISPENSARY.

JACOBABAD.—*In charge of* Captain T. W. IRVINE, I. M. S.

The dispensary building is in good repair. Furniture and fittings are sufficient and in good condition. Conservancy arrangements are well looked after. Water-supply is very indifferent; it is obtained from wells which, for a greater part of the year, are brackish. Samples of water from wells in the adjoining cantonment were analysed by the Chemical Analyser to Government, North-West Provinces, and reported unfit for drinking purposes. There were 215 in-door and 5,388 out-door patients treated against 327 in-door and 4,292 out-door in 1897 and 370 in-door and 5,616 out-door in 1896. The prevailing diseases were malárial fevers, respiratory, eye and skin affections, dysentery, diarrhœa and ulcers. Small-pox prevailed in the town and its vicinity to some extent during 1897, and two imported and one indigenous cases of plague occurred in March and April of the same year. There were 501 surgical operations performed against 596 in 1897 and 809 in 1896. Vaccination is carried on by the táluka vaccinator. *Post-mortem* examinations numbered 18 as compared with 13 in 1897 and 8 in 1896. The dispensary was inspected by the Principal Medical Officer, Sind District. The total cost was Rs. 3,363-5-0 and the cost per patient Re. 0-9-7 against Rs. 4,240-12-3 and Re. 0-14-8 in 1897 and Rs. 4,301-7-3 and Re. 0-11-6 in 1896, respectively. Rs. 35-3-0 were hospital stoppages as compared with Rs. 30-15-0 in 1897 and Rs. 22-13-0 in 1896.

GRANT-IN-AID DISPENSARIES.

KASHMORE.—*In charge of* Temporary Hospital Assistant KHALIKDADKHAN.

The dispensary building is in a good state of repair. Furniture and fittings are sufficient. There should be a wall built round the dispensary compound. The committee visited the dispensary three times against five times in 1897 and six times in 1896. The sanitary condition of the town is fair. The roads, streets, &c., are kept fairly clean. Water-supply from wells is liable to pollution. There were 48 in-door and 2,915 out-door patients treated, as compared with 45 and 2,341 in 1897 and 39 and 2,318 in 1896, respectively. Malarial fevers, bronchitis, conjunctivitis and skin affections were the most common complaints. Surgical operations numbered 262 against 245 in 1897 and 225 in 1896. There were 6 *post-mortem* examinations held and 13 medico-legal cases certified, as compared with 4 and 7 in 1897 and 2 and 5 in 1896, respectively. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind Registration District, and visited by the Commissioner in Sind, the Deputy Commissioner, Upper Sind Frontier, and the Deputy Collector of Jacobabad. The total cost was Rs. 1,248-3-2 against Rs. 1,083-9-11 in 1897 and Rs. 1,485-1-5 in 1896. The cost per patient averaged Re. 0-6-9 as compared with Re. 0-7-3 and Re. 0-10-1, respectively, in 1897 and 1896. Hospital stoppages amounted to Rs. 3-6-0 against Re. 0-15-0 in 1897 and Rs. 4-10-0 in 1896.

VICTORIA DISPENSARY, SHAHDADPUR.—*In charge of* Third Class Hospital Assistant MULCHAND JHAMATMAL, No. 281.

The dispensary buildings, with the exception of the servants' quarters which require new roofing, are in good repair. Furniture and fittings are sufficient and in good order. The committee visited the dispensary nine times. Conservancy is fair, considering that there is no municipality. Water-supply from wells is good and abundant. The total treated was 49 in-door and 2,752 out-door patients against 35 in-door and 2,703 out-door in 1897 and 66 in-door and 4,043 out-door in 1896. The prevailing diseases were malarial fevers, eye, ear, skin and respiratory affections and bowel complaints. There were 369 surgical operations performed against 261 in 1897 and 530 in 1896. *Post-mortem* examinations numbered 3 each in 1898 and 1896 and 1 in 1897. Opinion was given in 10 medico-legal cases against 2 in 1897 and 5 in 1896. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Shikárpur, and visited by the Deputy Sanitary Commissioner, Sind Registration District, and the Deputy Commissioner, Upper Sind Frontier. The total cost was Rs. 1,480-7-11, as compared with Rs. 922-8-0 in 1897 and Rs. 1,586-9-7 in 1896, the cost per patient being Re. 0-8-5, Re. 0-5-5 and Re. 0-6-2, respectively. Rs. 3-7-0 were hospital stoppages, against Rs. 8-4-0 in 1897 and Rs. 4-11-0 in 1896.

FOREIGN.

ADEN DISTRICT.

EUROPEAN GENERAL HOSPITAL, ADEN.—*In charge of* Captain J. LLOYD T. JONES, M.B., I.M.S.

General health—Has been good on the whole.

Conservancy and water-supply—Has been fairly well maintained, and the water-supply, which is chiefly condensed water, is good and abundant.

Hospital building—Is all that can be desired, and is found quite sufficient for all requirements. A storey has been added to the women's ward to provide quarters for two Nursing Sisters engaged since July 1898.

Attendance of patients.—178 in-door and 3,147 out-door, as compared with 210 and 3,064 in 1897 and 218 and 4,031 in 1896.

Surgical operations.—259 operations against 241 in 1897 and 235 in 1896.

Prevailing diseases.—Diseases of the digestive and respiratory systems, malarial fevers, dysentery and ulcers.

Mortality and its causes.—There were 14 deaths in hospital, or the same as in each of the two previous years. The causes of death were pneumonia, Bright's disease, enteric fever, acute yellow atrophy of liver, shark-bite, dysentery, compression of brain, phthisis, fracture pelvis, abscess of liver, strangulated hernia, burns, hemiplegia, fracture of femur, scarlet fever and adenoma.

Vaccination—Has been carried on more satisfactorily, a separate vaccinator being provided for the Steamer Point division.

Conduct of establishment—Has been good on the whole, except that of the sweepers who have given some trouble, several resigning on the plea of excessive work.

Stoppages.—Rs. 5,132-0-0 were receipts from paying patients as compared with Rs. 6,816-0-0 in 1897 and Rs. 5,591-8-0 in 1896.

Cost.—The total cost was Rs. 13,085-7-11 and the cost per patient was Rs. 3-15-0 against Rs. 13,394-13-2 and Rs. 4-1-6 in 1897 and Rs. 10,973-15-8 and Rs. 2-9-4 in 1896. The average cost of each diet was Re. 1-2-5, as compared with Re. 1-2-2 in 1897 and Re. 1-1-3 in 1896.

ADEN CIVIL HOSPITAL.—*In charge of* Major J. W. T. ANDERSON, I.M.S.

Conservancy—Is well looked after by the municipality. The night-soil is removed in covered carts and buried at fixed places outside each township, whilst the road sweepings and stable refuse are burnt. Considerable progress has been made during the past three years in closing cess-pits and opening up the crowded parts of the town by making sweeper-passages for the daily removal of night-soil from private houses.

Water-supply.—Owing to the very light rainfall during the past three years, the public have had to depend almost entirely on the condensers and Bunian well in the Crater. The latter has, however, failed to yield the usual supply during the year 1898, and the price of the former is prohibitive for the poorer classes. A limited supply is brought in barrels and mussacks from Shaik Othman, eight miles from the Settlement, and, though brackish, is potable.

Hospital buildings—Have been kept in excellent order by the municipality, who have expended large sums from time to time in renovating the main block and rebuilding the out-houses. During the year 1897 quarters for the second class servants were erected at a cost of Rs. 2,672-2-1. The Menahim Messa wards for Jews, in commemoration of Her Majesty's jubilee, were also completed and publicly opened by the Political Resident. The building provides accommodation for 6 males and 4 females and cost Rs. 10,000, the whole of which was defrayed by Messrs. Messa, the wealthy Jewish merchants. During the year 1898 the Municipality roofed, and made extensive alterations in, the dispensary, office and operating room.

General health.—There has been a gradual and progressive improvement in the public health during the past three years, owing to the steady decrease in cases of malarial fevers. Small-pox was epidemic during the past two years. There was also a mild epidemic of influenza in 1898.

Attendance of patients.—There were 1,423 in-door and 6,158 out-door patients treated, as compared with 1,096 in-door and 5,169 out-door in 1897 and 1,038 in-door and 4,694 out-door in 1896.

Prevailing diseases.—Ulcers, local injuries, malarial fevers and diseases of the digestive system, eye and skin.

Surgical operations.—4,469 were performed against 2,787 in 1897 and 1,033 in 1896. The principal operations were removal of tumours and vesical calculi, amputations, operations on bones and joints, extraction of lens and obstetric operations.

Mortality and its causes.—There were 176 deaths in hospital, as compared with 114 in 1897 and 131 in 1896. The chief causes were privation, diseases of the lung, diarrhœa and ulcers.

Vaccination—Is conducted by three vaccinators and a vaccinatrix at regular stations under the constant supervision of the Civil Surgeon. There were 6,258 vaccinations against 3,750 in 1897 and 2,876 in 1896.

Conduct of establishment—Has, on the whole, been good. Second Class Hospital Assistant Shaik Abdul Ruzak, No. 120, has as usual carried out his duties in a highly satisfactory manner, although constantly overworked, owing to the inefficiency of the other Assistant and want of adequate establishment.

Stoppages.—Rs. 531-10-0 were realized against Rs. 282-2-0 in 1897 and Rs. 147-0-0 in 1896.

Cost.—The total cost was Rs. 22,617-1-4 and the cost per patient Rs. 2-15-9, as compared with Rs. 19,028-3-0 and Rs. 3-0-7 in 1897 and Rs. 14,162-12-2 and Rs. 2-7-6 in 1896, respectively.

ALIA ISLAND QUARANTINE HOSPITAL, ADEN.—*In charge of* Captain J. LLOYD T. JONES, M.B., I.M.S.

Hospital building—Is found suitable for all the requirements up to the present time.

General remarks.—The hospital was open for 61 days in all during the year 1898 and for 56 days during the year 1897 on different occasions, whereas it was not open in 1896.

Details of treated.—In 1898 there were 2 cases of plague treated, of which one recovered and one died. Both were landed from the Peninsular and Oriental steamers. One was a postal packer from the steamer Clyde, and the other a stoker from the steamer Carthage. Of small-pox one case was landed ex P. & O. steamer Carthage, which had arrived in quarantine and could not therefore be admitted to the Maola Small-pox Hospital in the Settlement till the expiry of the period of observation.

In 1897 one case of plague was treated. The patient was a fireman from the P. & O. steamer Peninsular, which was undergoing quarantine at the time. The case recovered and was sent back to Bombay. For small-pox two cases were treated which were landed from ships arriving in quarantine.

Hospital Stoppages—Amounted to Rs. 20-8-0 in 1897 and Rs. 78-0-0 in 1898.

Cost.—The total cost during the year 1898 was Rs. 752-11-10 and the cost per patient Rs. 150-8-9, as compared with Rs. 582-11-5 and Rs. 194-3-10 in 1897.

MUNICIPAL DISPENSARIES.

PRINCE OF WALES DISPENSARY, ADEN.—*In charge of* Assistant Surgeon SHAPURJI M. MEHTA.

The roof of the Assistant Surgeon's quarters, which was in a dangerously dilapidated state, was entirely renewed in 1898. That over a large room in the centre of the building, formerly used as an in-patient ward, is in a very dilapidated state and requires renewal before the premises can be pronounced to be in an efficient state of repair. The sanitary condition of the town continues good. Disposal of night-soil is partly by removal by municipal agency to trenches at a place set apart for the purpose at some distance from the town, where it is allowed to dry and then burnt. The condensed water, which is used only by the better classes of people, is pure and wholesome, while well water and Shaikh Othman water, though slightly brackish, is used generally by the middle classes. The aqueduct water, which is very brackish and unwholesome, is used by the poor. Small-pox was epidemic in 1897 and 1898. The most common diseases among out-patients were diseases of the digestive system, eye and skin, malarial fevers and ulcers. There were 8,108 out-door patients treated as compared with 6,559 in 1897 and 7,719 in 1896; while the daily average attendance was 82·9, 67·0 and 55·8, respectively. The increase in 1898 over the two previous years was due chiefly to ulcers and diseases of the digestive system. Surgical operations numbered 579, as compared with 560 in 1897 and 733 in 1896. The total cost was Rs. 6,648-6-11 and the cost per patient Re. 0-13-1 against Rs. 3,874-1-2 and Re. 0-9-5 in 1897 and Rs. 4,975-8-10 and Re. 0-10-4 in 1896, respectively. The amount realized as hospital stoppages in 1898 was Rs. 89-4-0 as compared with Rs. 142-4-0 in 1896.

SHAIK OTHMAN DISPENSARY, ADEN.—*In charge of* Second Class Hospital Assistant HARGOVIND DHANESHWAR, No. 157.

The dispensary buildings are in an excellent state of repair. Furniture, fittings, &c., are sufficient and in good order A cutcha ward, accommodating 6 beds for patients suffering from infectious diseases, was erected within the hospital premises during the month of June 1898 by the municipality. There is no committee, but the dispensary is visited by the Political officers occasionally, and often by the officer in charge Shaikh Othman. The sanitary condition of the village is excellent and well looked after. The water-supply, chiefly from wells, is abundant but brackish. The total treated was 3,865 out-door and 588 in-door patients against 3,586 and 365 in 1897 and 4,187 and 279 in 1896, respectively. The prevailing diseases were malarial fevers, diseases of the digestive and respiratory systems, diarrhœa, rheumatism, ulcers and local injuries. Small-pox gave 191 cases with 73 deaths in 1898 against 109 cases with 37 deaths in 1897. There were 392 surgical operations performed against 400 in 1897 and 675 in 1896. Vaccination is carried on by the municipal vaccinator under the supervision of the Hospital Assistant in charge. The dispensary was inspected by the Principal Medical Officer, Bombay and Aden

Districts, and the Civil Surgeon of Aden. The total cost was Rs. 5,796-4-5 and the cost per patient Rs. 1-4-10 against Rs. 3,843-9-3 and Re. 0-15-7 in 1897 and Rs. 4,677-2-9 and Rs. 1-0-9 in 1896, respectively. The hospital stoppage rules are not in force here.

GOVERNMENT DISPENSARIES.

BERBERA.—*In charge of* Third Class Hospital Assistant SHANKARLAL NANALAL, No. 242.

The new dispensary building was built a year ago out of the poor funds. It has 3 wards holding 50 beds, but as the Military Hospital has been amalgamated with this dispensary since October 1898, there have been 5 beds reserved for military patients. Furniture and fittings are quite inadequate. The sanitary condition of the camp is excellent; that of the town fairly good. Water-supply from Dubar, about 7 miles off, from a hot spring through hills, is abundant. There were 300 in-door and 3,424 out-door patients against 186 in-door and 2,218 out-door in 1897 and 290 in-door and 3,622 out-door in 1896. The prevailing diseases were local injuries, ulcers, bowel complaints and eye affections. Chicken-pox prevailed in a mild form during the year 1898. There were 503 surgical operations performed against 265 in 1897 and 599 in 1896. Opinion was given in several medico-legal cases. Vaccination is carried out from house to house under the supervision of the Hospital Assistant in charge. The dispensary was inspected by the Civil Surgeon of Aden. The total cost during the year 1898 was Rs. 1,344-11-2 as compared with Rs. 1,294-12-11 in 1897, the cost per patient being Re. 0-5-9 and Re. 0-8-7 respectively.

ZAILA.—*In charge of* Assistant Surgeon D. W. A. GILLESPIE, I. S. M. D.

The building is kept in a good state of repair, and the fittings and furniture are in good condition. The floors of the dispensing and operating rooms have lately been renewed. Accommodation for a small number of in-door patients is much needed. There is no dispensary committee. The dispensary is maintained by the Political Department. Conservancy of the town, though indifferent, is improving gradually. There are a good many cess-pits. The greater part of the population have to make use of the plains at a small distance from the town. The water-supply is sufficient, but not very good, being muddy and slightly brackish. It is brought in mussucks on camels and donkeys from a place called Tokusha, distant about 4 miles from the town. The wells from which the water is obtained are only a few feet deep and in the bed of a dry river. The water is liable to contamination. There were 1,175 out-door patients treated against 1,200 out-door in 1897 and 1 in-door and 1,162 out-door in 1896. The most common diseases were ulcers and diseases of the digestive system and eye. An epidemic of small-pox broke out in the early part of the year. The total number of cases was 81, of which 3 proved fatal. There were 157 surgical operations performed as compared with 215 in 1897 and 190 in 1896.

The dispensary was inspected by the Civil Surgeon of Aden and Her Britannic Majesty's Consul-General, Somali Coast. The Vice-Consul, Zaila, visits the dispensary occasionally. Vaccination, which is gaining ground among the natives, is carried on by the Assistant Surgeon in charge. 975 cases have been vaccinated since December 1897. The number of medico-legal cases was 8 as compared with 3 in 1897 and 5 in 1896.

The total cost was Rs. 850 and the cost per patient Re. 0-11-7 as compared with Rs. 880 and Re. 0-11-9 in 1897 and Rs. 883-2-0 and Re. 0-12-2 in 1896. The hospital stoppage system is not in force here.

PERSIAN GULF.

MASKAT CIVIL HOSPITAL.—*In charge of* Lieutenant-Colonel A. S. G. JAYAKAR, I. M. S.

Conservancy.—Conservancy and sanitation generally neglected.

Water-supply—Good and abundant.

Hospital buildings.—Suitable and in a fair state of repair.

General health.—Small-pox, influenza and dengue prevailed in 1898, small-pox and influenza in 1897, and measles, influenza and small-pox in 1896.

Details of treated.—Sixty-eight in-door and 5,493 out-door patients against 72 and 4,496 in 1897 and 38 and 5,011 in 1896, respectively.

Prevailing diseases.—Malarial fevers, influenza, dengue, rheumatic, respiratory and skin affections and bowel complaints.

Surgical operations.—1,976 were performed against 1,347 in 1897 and 1,133 in 1896.

Mortality and its causes.—There were 6 deaths amongst in-door patients as compared with the same number in 1897 and 5 in 1896. The causes were influenza, dysentery, sloughing phagedæna, diarrhœa, Bright's disease and multiple injury.

Vaccination.—3,521 operations—3,290 being successful, 38 unsuccessful and 93 doubtful (result unknown).

Conduct of establishment.—Good. First Class Hospital Assistant Mahomed Hussein, No. 51, is commended for good work.

BUSHIRE RESIDENCY HOSPITAL.—*In charge of* Captain E. WICKHAM HORE, M.B., I. M. S.

Conservancy—Is neglected.

Water-supply.—From wells some miles from the town; is fairly good and abundant, but contains much saline matter, which renders it hard and has an aperient action.

Hospital buildings.—Consist of a dispensary with three rooms and are situated in the Residency. There is no accommodation for in-door patients, but there is an operating room, and thus cases can be operated on when accommodation for their convalescence is arranged for in houses near by.

General health.—Fairly good. There have at nearly all seasons been some cases of small-pox.

Details of treated.—6,418 out-door patients as compared with 4,557 in 1897 and 7,417 in 1896.

Most common diseases.—Malarial fevers, bowel complaints, worms, ulcers and eye, ear, respiratory and rheumatic affections.

Surgical operations.—395 against 300 in 1897 and 459 in 1896.

Vaccinations.—485 as compared with 166 in 1897.

Conduct of establishment.—Good.

APPENDIX II.

SUMMARIES OF THE ANNUAL REPORTS

ON THE

MEDICAL SCHOOLS.

BYRAMJI JIJIBHOY MEDICAL SCHOOL, POONA.

This school was under the superintendence of Lieutenant-Colonel W. McConaghy, M.D., I. M. S., from 1st January to 3rd June; of Captain J. B. Smith, M.B., I. M. S., from 4th to 31st June and from 19th November to 31st December; and of Lieutenant-Colonel J. P. Greany, M.D., I. M. S., from 1st July to 18th November 1898.

On 1st January 1898 there were 72 pupils on the roll—26 first year, 36 second year, and 24 third year pupils. Of these, 30 were civil medical, 12 native military, 12 stipendiary, 4 paying and 14 State pupils.

The following pupils, who had passed at the entrance examination in October 1897, only joined on the re-opening of the school on 20th June 1898:—6 native military, 3 stipendiary, 8 paying and 4 State pupils.

One native military pupil was transferred to the paying class, and one civil medical pupil was dismissed from the school for absenting himself without leave.

Several students were on plague duty during the year and rejoined the school in June, *viz.*, of the third year 6 civil medical pupils, 2 native military pupils and 5 stipendiary pupils; and of the second year 6 civil medical pupils and 1 native military pupil. There were 7 third year and 5 second year State pupils recalled by their respective States for plague duty.

On the opening of the school there were therefore 92 pupils on the roll classified as follows:—

	First Year.	Second Year.	Third Year.
Civil Medical Pupils	5	16	8
Native Military Pupils	9	5	4
Stipendiary "	4	6	5
Paying Pupils	9	2	1
State "	5	6	7
Total ...	32	35	25

There was no Winter Session for 1898, the school being closed owing to the pupils having been employed on plague duty.

The final examination, which should have been held in September 1898, was not held, owing to the third year pupils not having received a winter course of lectures, and therefore no students passed out during the year.

The first terminal examination of the Winter Session, which should have been held in March 1898, in Anatomy and Chemistry, was not held, as no lectures had been given.

The second terminal examination of the Summer Session in Physiology and Materia Medica was held in September 1898, at which 32 first year and 41 second year pupils appeared, with the following results:—Of the first year pupils, 26 passed and 6 failed. Of the latter, 1 was dismissed for copying and 5 were referred back for one year. Of the second year pupils, 39 passed, and 2 who failed were put back pupils of the first year and were allowed to appear for the second year's examination.

The prizes and scholarships for the year 1898 will be awarded for the second and third year pupils on their completing their winter courses of Anatomy and Chemistry and Medicine and Surgery, respectively.

The entrance examination for 1898 was held on 17th October and subsequent days. 105 new candidates, 18 civil medical pupils and 5 State pupils presented themselves for examination. Out of this number, 12 candidates, 18 civil medical pupils and 3 State pupils having passed, were admitted and classified as follows:—Civil medical pupils 18, native military and paying pupils 6 each, and State pupils 3.

The subjoined tables I and II show the number of pupils according to class and section in the school at the close of the year 1898 :—

TABLE I.

Class.	Civil Medical Pupils.	Native Military Pupils.	Stipendiary Pupils.	State Pupils.	Paying Pupils.	Total.
3rd year (old batch)	8	4	5	7	1	25
„ (new „)	16	6	7	7	3	39
2nd year	5	5	3	4	5	22
1st „	18	7	...	3	10	38
Total ...	47	22	15	21	19	124

Class.	Brahmin.	Mahrata.	Telagu.	Musalman.	Jew.	Parsi.	Goanese Christian.	Native Christian.	Total.
3rd year (old batch) ...	12	7	2	1	...	...	2	1	25
„ (new „) ...	26	7	...	2	1	...	...	3	39
2nd year	15	3	1	1	...	...	1	1	22
1st „	23	6	1	2	...	2	2	2	38
Total ...	76	23	4	6	1	2	5	7	124

The total amount of fees realized from paying pupils during the year was Rs. 246 as compared with Rs. 171 in 1897 and Rs. 258 in 1896. The cost of maintenance of the school was Rs. 14,495-10-2 against Rs. 15,108-0-11 in 1897 and Rs. 16,076-12-11 in 1896.

BYRAMJI JIJIBHOY MEDICAL SCHOOL, AHMEDABAD.

This school was under the superintendence of Lieutenant-Colonel M. L. Bartholomeusz, M.B., I. M. S., from 1st January to 4th August and from 5th November to 31st December, and of Lieutenant-Colonel K. S. Narimán from 5th August to 4th November 1898.

The Winter Session began on 1st November 1897, and with it the Nineteenth Annus Medicus of this school. There were 73 pupils on the roll at the commencement of the Session—25 first year, 24 second year and 24 third year pupils. But as the school was soon after closed owing to the students' services being required for plague duty, *viz.* from the 15th November 1897 to 19th June 1898, this term was completely lost to the students, and consequently the subjects of Anatomy and Chemistry to the first and second year pupils and Medicine and Surgery to the second and third year pupils were not taught until the following Winter Session.

When the school re-opened on 20th June 1898, the Summer term began with the usual course of lectures in Materia Medica and Physiology to first and second year pupils and Midwifery and Medical Jurisprudence to second and third year pupils.

The first and second year students were examined on 30th September at the close of the Summer Session. Of the 25 first year pupils 18 passed, and 13 who failed were referred back for one year. Of the 24 second year pupils 18 passed, 5 failed and were referred back for one year, and 1 died.

For the Entrance Examination which took place on 17th October, 174 candidates from various schools in the Bombay Presidency and from Native States and 4 civil medical pupils from different Civil Hospitals presented themselves. Of the 47 who passed the test, 15 were admitted into the school—6 as native military pupils, 6 as stipendiary pupils, 2 as civil medical pupils, and 1 as a paying pupil.

The twentieth year of the school commenced on 1st November 1898 with 86 pupils on the roll. The classes and castes of these pupils are summarized in the following table :—

Year of Pupils.	CLASS.							CASTE.					
	Stipendiary Pupils.	Civil Medical Pupils.	Native Military Pupils.	State Pupils.	Paying Pupils.	Free Pupils.	Total.	Hindus.	Musálmans.	Pársis.	Jews.	Native Christians.	Total.

The subjoined table gives the receipts realized from compounders and pupils and from other miscellaneous sources as compared with the two previous years :—

Nature of Receipts.	1898.	1897.	1896.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Fees from Paying Pupils	882 0 0	270 0 0	1,449 0 0
Do. Compounders	45 0 0	30 0 0	40 0 0
Entrance fees from candidates	348 0 0	386 0 0	266 0 0
Money refunded by Stipendiary and Native Medical Pupils on resignation...	.....	451 3 2	.....
Sale-proceeds of unserviceable articles, &c.	86 10 8	5 12 0	5 9 4
Fines and Savings	3 4 0	1 9 3	.....
Total ...	1,364 14 8	1,144 8 5	1,760 9 4

The total cost of maintaining the school was Rs. 16,458-4-1 as compared with Rs. 18,714-10-3 in 1897 and Rs. 17,584-8-0 in 1896.

There were no changes in the staff of the school during the year, except that during the absence on three months' privilege leave of the Superintendent, Lieutenant-Colonel K. S. Nariman, I. M. S., acted for him.

Hyderabad Medical School.

This school was under the superintendence of Lieutenant-Colonel W. G. H. Henderson, F.R.C.S.I., I.M.S., till 30th June; of Captain J. H. McDonald, M.B., C.M., I.M.S., up to 17th July; and of Captain A. Street, M.B., F.R.C.S., I.M.S., up to 31st December 1898.

The first Sessional examination was held in April 1898. All the 9 second year pupils who presented themselves for this examination passed. Of the 21 first year pupils, one paying pupil was exempted from appearing at the examination, as he had passed in the subjects at the last sessional (annual) examination. Of the remaining 20 pupils, 18 passed, and 2 having failed were permitted to continue their studies and re-examined at the second Sessional examination.

For the final examination of the third year pupils there were 13 candidates—10 stipendiary and 3 civil medical pupils, and they all passed. Of these, 3 civil medical and 5 stipendiary pupils were taken on in Government service as Civil Hospital Assistants, the latter with certain conditions as to requirements of the department. One stipendiary pupil was appointed in the Káthiáwár Agency and the remaining four remain unemployed.

The second Sessional examination was held in September. Of the 9 second year pupils, 2 (stipendiary pupils) failed but were permitted to continue their studies and be re-examined at the next Sessional examination. Out of the 21 first year pupils, 13 passed, and 8 (4 stipendiary and 4 paying pupils) having failed by a few marks in one subject only, were also granted a similar indulgence.

For the Entrance Examination 44 candidates presented themselves from various parts of the Bombay Presidency—40 Hindus, 3 Mahomedans, and 1 a Native Christian. Of the 33 who passed the examination, 21 were admitted as paying pupils and 9 as stipendiary pupils. There were two vacancies reserved for Mahomedans, but as only one was filled in by a pupil of this caste, a Hindu had to be admitted as a stipendiary pupil to fill up the other.

Two first year stipendiary pupils resigned and one stipendiary and two paying pupils were dismissed, the former for misconduct and the latter for not joining the school after the entrance examination.

There were 59 pupils on the school register on the 31st December 1898, classified as follows :—

Class of Pupils.	Year of Study.			Total.
	1st Year.	2nd Year.	3rd Year.	
Stipendiary Pupils	6	10	9	25
Civil Medical „	2	3	...	5
Paying „	1	9	19	29
Total ...	9	22	28	59

Of these, 54 were Hindus (Amils 40, Banias 9 and Brahmins 5), 3 Mahomedans and 2 Native Christians.

The total amount of fees from paying pupils was Rs. 558 as compared with Rs. 216 in 1897. The cost of maintaining the school was Rs. 8,372-12-9 against Rs. 10,007-0-8 in 1897.

The conduct and attendance of the pupils has been reported to be satisfactory, except in the case of a stipendiary pupil who was dismissed for misconduct. The progress of the school is also noteworthy, the chief feature being the increase in the number of paying pupils during the year under review.

Assistant Surgeons Jivatram Alimchand Lalvani and R. S. Poredi have performed their duties with their usual zeal and ability.

APPENDIX III.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

Annual Reports.—

Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1898.

General Department.
No. 5705

Bombay Castle,
11th December 1899.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—598, dated the 6th November 1899—

Submitting the Annual Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1898.

RESOLUTION.—Every third year the Surgeon General with the Government of Bombay submits to Government a full report on the Administration of Civil Hospitals and Dispensaries in the Mofussil, the reports for the two intermediate years being brief and for the most part merely statistical. The present is the first full report submitted since the outbreak of plague and the Governor in Council would have perused with considerable interest a comprehensive analysis by the Surgeon General of the effects of the plague epidemic on the administration of the Medical Institutions in the Mofussil. The institutions under report do not include the various temporary plague hospitals, and hence the statistics in the tables appended to the report can include but a small portion of even such plague cases as were treated in hospitals. The prevalence of plague, however, had an important indirect effect on the mofussil hospitals and dispensaries in diminishing the attendance of patients and incidentally decreasing the receipts on account of the fees known as Hospital Fees. This is attributed by the Surgeon General partly to the necessity for closing certain dispensaries temporarily owing to the withdrawal of their Hospital Assistants for plague duty—a step the importance of which it is not easy, in the absence of detailed information, to justly estimate—and partly to the "reluctance on the part of the people to seek medical treatment for fear of plague." To whatever cause this reluctance may be attributable, it is not the less a subject of disappointment and regret. His Excellency the Governor in Council observes that the statistics of total outdoor patients and of cases of skin disease under treatment at the mofussil hospitals and dispensaries show a very material decrease since the commencement of the plague epidemic, and that the figures for malarious fever cases for the last six years are still more remarkable. These statistics are quoted below:—

Out-door Patients.

Years.	Number of patients.
1893	2,132,409
1894	2,297,317
1895	2,351,221
1896	2,288,489
1897	1,710,219
1898	1,721,332

Skin disease.

Years.	Cases treated.
1896	416,410
1897	216,854
1898	186,501

Malarious fever.

Years.	Cases treated.
1893	434,113
1894	473,300
1895	430,383
1896	386,551
1897	281,641
1898	302,105

2. The Report should be published and copies of it forwarded to the Secretary of State for India, the Government of India, and the Officers concerned.

ADMINISTRATION AND PROGRESS REPORT

ON THE

MOFUSSIL

CIVIL HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY

FOR THE YEAR

1899.

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1900.

No. $\frac{S.B.}{651}$ OF 1900.

From

THE SURGEON-GENERAL WITH THE
GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 8th September 1900.

SIR,

I have the honour to submit my Annual Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1899, and to state that, in accordance with Government orders, the summaries of the annual reports of medical officers and subordinates and of those on Medical Schools have been omitted this year.

2. At the close of the year 1899 there were 222 pupils in the three Provincial Medical Schools, distributed as follows :—

Classes of Pupils.	Byramji Jijibhoy Medical School, Poona.				Byramji Jijibhoy Medical School, Ahmedabad.				Medical School, Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.

Free	...	...	...	...	1	1	...	2	...	...	...	...	1	1	...	2
Total ...	21	33	31	85	25	33	32	90	18	14	15	47	64	80	78	222

The following statement shows the extent to which Civil Hospital Assistants are required to be recruited on 31st March 1900 :—

Sanctioned strength		284
20 per cent. reserve		56
		340
Actual strength (on 31st March 1900)		334
Deficiency ...		6

The deficiency will be made up from the pupils who will pass their final examination in September this year.

At the Poona Medical School Captain J. B. Smith, M.B., I. M. S., acted as Superintendent and Teacher of Medicine and Clinical Medicine from 1st January to 19th February 1899 during the absence of Lieut.-Colonel J. P. Greany, M.D., I. M. S., on privilege leave, Captain A. Hooton, I. M. S., officiating as Assistant Civil Surgeon and Teacher of Surgery and Midwifery. Lieut.-Colonel Greany resumed his appointment as Superintendent on the 19th February 1899, and Captain Smith proceeded on furlough from the 25th February 1899. Assistant Surgeon Ráo Sáheb D. G. Sabnis, L. M., Assistant Surgeon E. S. Bharucha, L.M. & S., and Captain C. Easdon, I. S. M. D., were present throughout the year. The conduct of the pupils was satisfactory.

At the Ahmedabad and Hyderabad Schools there were no changes in the teaching staff.

3. On the statistical tables attached at the end of the report I beg to offer the following remarks.

Statement No. I gives the classification of hospitals and dispensaries for the year under review. On the 1st January 1899 there were 314 institutions open. During the year 30 dispensaries were opened and 1 was closed, leaving 343 open on the last day of the year.

Statement No. II is a return of patients treated, both in-door and out-door. The total number treated was 2,029,422, or 278,186 more than in the previous year. Of these, 32,831 were in-door and 1,996,591 out-door patients as compared with 29,904 in-door and 1,721,332 out-door in 1898.

The results in the case of in-door patients treated during 1899, as compared with 1898, were as follows:—

	1899.	1898.
Cured	23,300	21,834
Relieved	2,258	1,917
Discharged otherwise	1,894	1,891
Died	3,810	3,071
Ratio of deaths to treated	11·6	10·3

and the daily averages of sick were—

	1899.	1898.
Men...	1,129·7	1,088·0
Women	231·3	231·8
Children	72·7	83·2
Total ...	1,433·7	1,403·0

The number of beds available were—

	1899.	1898.
Male	2,214	2,196
Female	989	967
Total ...	3,203	3,163

Of the out-door patients, 1,802,213 attended personally and 194,378 were represented by friends, as compared with 1,552,596 and 168,736, respectively, in 1898. Their daily average attendance was 19,115·2 against 16,555·0 in the previous year. Of the total number of in-door and out-door patients, 299,312 were treated at the Civil Hospitals and 1,730,110 at the Dispensaries, as compared with 260,228 and 1,491,008, respectively, in 1898.

Statement No. III treats of the diseases for which the patients were treated. There were 194 cases of small-pox as compared with 438 in 1898. Of these, the Deccan returned 55, Konkan 32, Sind 21, Gujarát 17 and the foreign institutions 69 cases, the corresponding figures for the previous year being 147, 2, 1, 6 and 282. Cholera is credited with 630 cases against 606 in the previous year. Of these, 415 cases were treated in the Sind institutions, 200 in the Deccan, 12 in the Konkan, 2 in the Gujarát and 1 in the foreign institutions as compared with *nil*, 598, 7, 1 and *nil*, respectively, in 1898. Malarial fevers, as usual, gave the largest number of admissions, *viz.*, 347,747, or a percentage of 17·1 to the total treated, against 302,105 and 17·3 per cent. in 1898. Venereal diseases accounted for 32,801 cases (primary syphilis 6,416, secondary syphilis 12,275, gonorrhœa 11,436 and other venereal affections 2,674) as compared with 27,217 (primary syphilis 5,305, secondary syphilis 10,003, gonorrhœa 9,540 and other venereal affections 2,369) in 1898. The percentage to the total treated was 1·6, or the same as in the previous year. Intestinal worms caused 235,907 admissions, or 11·6 per cent. of the total treated, as compared with 211,318 or 12·1 per cent. in 1898. There were 33,774 cases of dysentery, or 1·7 per cent. of the total treated, against 26,768 or 1·5 in 1898. The admis-

sions from diarrhœa show an increase of 10,338 cases as compared with the previous year, *viz.*, 47,549 against 37,211 ; and the percentage to the total treated was 2·3 as compared with 2·1 in 1898. Rheumatic affections contributed 55,200 cases, or 2·7 per cent. to the total treated, against 46,809 or 2·7 per cent. in 1898. The cases of eye and ear affections numbered 202,046 and 77,675 as compared with 190,551 and 64,157, respectively, in the previous year ; the former giving a percentage of 10·0 to the total treated against 10·9, and the latter a percentage of 3·8 against 3·7, in 1898. Of skin diseases, including ulcers, 206,984 cases were treated against 186,501 in 1898, and the percentage to the total treated was 10·2 as compared with 10·6 in the previous year. Respiratory affections caused 135,925 admissions, or a percentage of 6·7 to the total treated, against 98,133 or 5·6 per cent. in 1898.

The subjoined table shows the number and ratio per cent. of malarial fevers treated in the various divisions during 1899 and 1898 :—

	1899.		1898.	
	Number.	Ratio per cent.	Number.	Ratio per cent.
Konkan	68,126	27·3	48,552	27·4
Deccan	139,568	15·2	114,527	13·6
Gujarát	95,433	17·1	84,607	19·2
Sind	38,330	14·1	47,992	19·2
Foreign	6,290	17·8	6,427	15·9
Total ...	347,747	17·1	302,105	17·3

The only divisions in which there was a decrease in the total cases of malarial fevers are Sind and Foreign Divisions. Except in the latter, the total increase in the fever cases is associated with that of the total treated, of which they formed 16 per cent. The percentage (17·1) of fevers to total treated, however, was 0·6 below the average of the previous five years. In the Konkan it remained unchanged, but was slightly raised in the Deccan; whilst in Gujarát and Sind the ratio was reduced. Considering the dryness of the latter half of the year, the smallness of the total reduction of the percentage is, perhaps, somewhat surprising. But it may be noted that in the five years before the plague began (1896) the ratio to total treated averaged 19·3 as compared with 16·8 since its appearance, so that it was still low during the year under report, and may have been partly maintained by returning confidence in hospital treatment.

The attendance of patients is rapidly returning to the normal ; for whereas the total treated in the year 1897 was 639,265 less than that of 1895, the figures for the year under report are only 352,647 short of those of the year 1895, which preceded the appearance of plague. Of the total increase (278,186) of patients treated, 41 per cent. were returned by Gujarát, 26 per cent. each by the Konkan and the Deccan and 7 per cent. by Sind. It therefore seems probable that the large attendance in Gujarát is due to the comparative freedom from plague and to the commencement of privation due to scarcity, whilst the relatively small increase of the totals in the Deccan may be attributable to the greater prevalence of plague. Each of the Konkan Collectorates shows a decided increase in the totals, this being associated with moderate or slight epidemics of plague. In the Deccan districts of Poona, Sátára and Kolhápur the increase was very small, whilst in Belgaum and Bijápur there was a decrease in the attendance ; and in four of these districts there was an increase of plague as compared with the preceding year. On the other hand, in Khándesh, Sholápur and Dhárwár, in which plague prevailed only to a moderate extent, the increase in attendance was very marked. In Gujarát, though the increase in total treated amounted to 115,998, there was a reduction in attendance in the Kaira, Panch Maháls, Mahi Kántha and Pálanpur districts, which were only to a small extent affected by plague.

In the City of Poona, which was so severely smitten by plague, the total attendance of patients showed a decrease of 3,858, which occurred entirely in the City Dispensaries and not at the Sassoon Hospital. The following statement shows the increase or decrease in total treated by collectorates and the number of plague cases as compared with 1898 :—

Division.	Name of District.	Total Number of Patients.				Total Number of Plague Cases.			
		1899.	1898.	Increase.	Decrease.	1899.	1898.	Increase.	Decrease.
Konkan ...	Thána	93,292	79,244	14,048	...	4,975	5,315	...	340

	Total ...	271,733	250,043	21,690	...	4,322	3,585	737	...
	Grand Total ...	1,994,208	1,710,886	283,322	...	134,234	116,524	17,710	...

The increase in total treated was mainly contributed by the following diseases :—

	Per cent.
Dysentery	2·5
Malarial fevers	16·4
Venereal diseases	2·0
Intestinal worms	8·8
All other general diseases	8·1
Diseases of the eye...	4·1
Do. ear...	4·8
Respiratory affections	13·5
Diarrhœa and dyspepsia	6·6
All other diseases of the digestive system	7·6
Diseases of the connective tissue and skin	9·6
Injuries...	2·2
	86·2

The number of plague cases reported to me by medical officers and subordinates in charge of Civil Hospitals and dispensaries during the year 1899 was 19,250 with 14,209 deaths (as compared with 12,560 cases and 6,977 deaths in the year 1898), whereas the total cases of plague reported to Government was as under :—

	Cases.	Deaths.
Konkan	7,629	6,104
Deccan	110,147	85,162
Gujarát	12,136	9,125
Sind	4,322	3,261
Total ...	134,234	103,652

The total number of recorded cases and deaths were therefore respectively 17,710 and 16,392 in excess of those registered by the Plague Department during the year 1898.

Statement No. III-A is a return of surgical operations performed with their results. On 1st January 1899 there remained 181 cases which had been operated on ; and these, with 72,337 (71,889 primary and 448 secondary) operations, make a total of 72,518 as compared with 83,255 in 1898. The large decrease in the number of operations during the year under report is owing to the omission of certain comparatively trivial procedures, as desired by the Government of India in their Home Department Medical No. 1443, dated 29th August 1899, embodied in the preamble of the Bombay Government Resolution No. 4087, dated 18th September 1899, General Department. On the whole, the more important operations equalled, or slightly exceeded in numbers, those done during the year 1898. There is no real falling off in the surgical work done in 1899, for, after making the deductions just referred to—about 12,300 cases—from the figures for the year 1898, the number of patients operated on was 70,047 whereas in 1899 it was 72,095. Of the latter, 62,243 were cured, 570 relieved, 266 discharged otherwise and 213 died, leaving 184 patients under treatment at the end of the year. The deaths after operations during the year 1898 were 105, after deducting 62 among cases hypodermically injected and 2 among cases of catheterism.

The results of the operations performed on 8,619 patients is not known and therefore unrecorded.

The total number of surgical operations performed in Civil Hospitals and dispensaries was:—

	1899.	1898.
Civil Hospitals	12,870	23,827
Dispensaries	59,648	59,428
Total ...	72,518	83,255

There were 1,021 tumours and cysts excised against 977 in 1898. Operations on bones and joints numbered 810 and 645, as compared with 967 (including 176 fractures set) and 600, respectively, in the previous year. The skull was trephined 6 times against 9 times in 1898. Of the 381 amputations, 245 were for injury as compared with 183 in 1898, 118 for diseases against 117 in 1898, and 18 for deformity as compared with 33 in 1898; and of the total, 23 ended fatally against 18 in the previous year. The 957 operations on the eye and its appendages include 24 iridectomies, 216 for extraction of lens, 2 for laceration and extraction of opaque capsule, and 21 for excision of the eyeball, as compared with 27, 200, 3 and 16, respectively, in 1898. Of the 68 operations on the Thorax and Breast, 8 were for excision of the breast, or the same as in the previous year. The operations on the abdomen included 40 operations for hernia, of which 25 were for radical cure and 15 for strangulation, against 45 and 15, respectively, in 1898. In 29 cases the liver was incised for abscess with 5 deaths, as compared with 30 cases and 6 deaths in 1898.

Of the operations on the Urinary Organs, 823 were for removal of vesical calculi and 471 for urethral stricture, against 926 and 151 in the previous year. Notwithstanding the considerable number of vesical calculi removed by litholapaxy, it is to be regretted that lithotomy was practised in about 150 cases, most of which could doubtless have been cured without cutting. This is probably due in part, though by no means wholly, to the difficulty in obtaining instruments for crushing and in keeping them in repair. I consider that the newer operation, which has now been established for about twenty years, ought to be more generally adopted.

Among operations on the Female Generative Organs, there were 5 ovariotomies with 3 deaths, as compared with 4 cases and 3 deaths in 1898. Of the obstetric operations, 76 were applications of the forceps (5 deaths), 46 versions (1 death), 9 podalic extractions (7 cured and 1 relieved) and 43 craniotomies (7 deaths).

The subjoined selected list of surgical operations gives the numbers performed by each medical officer during the year 1899, and the period during which he was present:—

Name of Operator.	Period on Duty.		Excision of Tumours (all kinds).	Excision of Joints (partial or complete).	Operations on Bones.	Amputations.		Extraction of Lens.	Abdominal section (for any purpose other than Obstetrical).	Abscess of Liver (any operation).	Removal of Vesical Calculus.		Obstetric operations.	Total.
	From	To				Through and above Metacarpus.	Through and above Metatarsus.				By incision.	By crushing.

Foreign	72·6	63·8	14·1	18·4	13·3	17·8

Statement No. V, Part I, treats of the current income and expenditure of the mofussil hospitals and dispensaries for the year under review.

The opening cash balance of the year under report does not correspond with the closing balance on 31st December 1898, there being a discrepancy of Rs. 877-7-3, which is to be explained as follows —

(I). There is a difference between the closing balance of 1898, as shown in the dispensary accounts and the opening balance for 1899, as verified by the Treasury Officer, in the case of the Belgaum and Khipra dispensaries, but the actual cause of the discrepancy could not be explained by the respective Hospital Assistants or Treasury Officers.

(II). The Pimpalgaon Basvant and Bágevádi dispensaries being wholly closed during the year 1899, no accounts are available from them, and an opening balance is, therefore, not shown.

(III). The explanation in the case of the dispensaries which follow is given opposite each :—

Name of Dispensary.	Balance on 31st December 1898.	Balance on 1st January 1899.	Explanation.
	Rs. a. p.	Rs. a. p.	
Honawar	107 13 2	109 8 2	Under the head of miscellaneous receipts, a sum of Re. 1-11-0, realized on account of hospital stoppages, was left uncredited in the accounts for the year 1898.
Lady Reay Dufferin Hospital, Sholápur.	.....	1,776 7 3	This hospital has been shown in the report for the first time.
Pátan	.....	25 6 9	The sum of Rs. 25-6-9, on account of Europe medicines, though not actually drawn until 1899, was erroneously debited by the Hospital Assistant in the accounts for the year 1898.
Ilkal	.....	25 0 9	As the dispensary was closed during the year 1898, no account was available for that year, and hence the discrepancy.
Guledgudd	417 13 1	.....	On the accounts of the dispensary being verified with those in the Treasury, it was found that certain transactions were effected direct by the Municipality; and accordingly an expenditure of Rs. 417-13-1 on account of pay and contingencies was made by that body without the Hospital Assistant's knowledge.
Sádra	842 12 7	.....	The Assistant Surgeon reports that the Political Agent does not think it necessary to give the balance, the Jubilee Pauper Patients' Endowment Fund being made an Excluded Trust Fund.

The total income, exclusive of the cash balance, was Rs. 7,29,510-12-1 against Rs. 6,95,472-9-2 in 1898. Of this sum, Rs. 3,32,208-11-5 were received from Government, as compared with Rs. 3,46,640-15-4 in the previous year. The Municipalities and Local Bodies contributed Rs. 1,53,862-2-8 and Rs. 1,25,837-4-7 against Rs. 1,52,202-11-2 and Rs. 1,23,032-6-10, respectively, in 1898. The interest on invested capital yielded Rs. 23,927-3-5 as compared with Rs. 24,171-5-4 in 1898. The sale of securities or withdrawal of deposits amounted to Rs. 7,000-0-0 against Rs. 3,700-0-0 in the previous year. Subscriptions from Europeans and Natives were Rs. 59,585-1-3, as compared with Rs. 13,938-4-9 in 1898. The increase under this head is due to the amounts of the unexpended balances (Rs. 40,000) of the donation by Mrs. Nassarvanji Jehangir Wadia for the erection and maintenance of the N. J. Wadia Dispensary at Andheri, and (Rs. 8,126-15-11) of the subscription fund raised for the erection of a dispensary for women and children in Karáchi. Receipts from paying patients amounted to Rs. 23,330-8-2 against Rs. 19,521-3-8 in the previous year. Rs. 3,759-12-7 were realized by the sale-proceeds of medicines not supplied by Government, and from other miscellaneous sources, such as sale of unserviceable articles, &c., &c., as compared with Rs. 4,794-0-0 in 1898.

The total expenditure was Rs. 7,02,831-15-2 as compared with Rs. 6,89,189-3-10 in 1898. Deducting from the expenditure Rs. 33,715-7-6, remitted into the Treasury on account of hospital stoppages, sale of unserviceable articles, &c., &c., Rs. 57,000-0-0 invested during the year and Rs. 382-5-10, the unexpended balance at the Becherdas Dispensary, Ahmedabad, which lapsed to the Ahmedabad Municipality, in all Rs. 91,097-13-4, the net expenditure was Rs. 6,11,734-1-10 against Rs. 6,35,276-15-4 in the previous year. The cost per patient was Re. 0-6-6 against Re. 0-7-8 in 1898. The cost of each diet averaged Re. 0-2-6, or the same as in the previous year. Government paid Rs. 2,98,214-10-2 or 48·7 per cent. of the actual expenditure as compared with Rs. 3,12,410-13-4 or 49·2 per cent. in 1898.

As ordered by this Government, I attach below Statements A and B showing the names of Hospitals and Dispensaries of the districts of each Division, with the amount realized on account of hospital fees in each institution separately, as compared with the previous year, and Statement C giving the total amount by Divisions of the Bombay Presidency. The total increase of income from this source was Rs. 3,809-4-6 which, considering the unprosperous season, may perhaps be regarded as fairly satisfactory. I am, however, of opinion that the receipts should be much larger, especially at Dispensaries. Whilst the collections at Civil Hospitals were more than four times those of 1895, those at Dispensaries have remained stationary.

At the Lady Dufferin Hospital, Karáchi, this source of income appears for the first time, with very promising results. At Matherán Major Collie's good management resulted in the collection of a sum nearly five times as large as the average of the previous three years. Of the other Dispensaries, those at Vengurla, Chiplun and Bulsár and the Parekh Dispensary at Surat are the only ones which show a decided increase. I have issued a Circular enjoining upon Medical Officers and Subordinates the necessity of charging patients who are liable to pay.

The total amount of hospital stoppages realized during the year 1899 was Rs. 22,608-9-1 as compared with Rs. 18,846-2-3 in 1898. By adding the amount received from paying patients for diet, which also forms a part of the hospital stoppage system, *viz.*, Rs. 721-15-1, the total receipts amounted to Rs. 23,330-8-2 against Rs. 19,521-3-8 in the previous year. The reports received from charges on the working of these rules are, for the most part, on the same lines as those previously furnished.

With reference to paragraph 3 of the Bombay Government Resolution No. 2129, dated 19th May 1899, General Department, I beg to attach the following statements of accounts A and B received through the Medical Officer from the Honorary Secretary to the European General Hospital Nursing Fund at Aden:—

A.

Abstract of Receipts and Disbursements on account of the European General Hospital Nursing Fund, Aden, from 1st July 1899 to 31st March 1900.

Statement No. V, Part II, gives the account of the invested capital. On the 1st January 1899 there was a balance in hand of Rs. 5,88,500, showing a discrepancy, as compared with the balance in hand on 31st December 1898, of Rs. 11,000, as explained below :—

(I) The invested capital of Rs. 15,000 hitherto shown against the Sadra Civil Hospital has been omitted. The Assistant Surgeon in charge reports that the Political Agent of Mahi Kántha considers that there is no Endowment Fund belonging to the Civil Hospital, and that the invested sum referred to properly belongs to the Victoria Jubilee Pauper Patients Fund raised by the Chiefs of Mahi Kántha for a special purpose.

(II) The actual amount of the invested capital at the Ghotki Dispensary was Rs. 4,800, and not Rs. 800 as was hitherto erroneously shown by the Hospital Assistant in charge.

These, with Rs. 57,000 invested during the year, bring the total to Rs. 6,45,500. Securities worth Rs. 6,000 were sold, and deposits amounting to Rs. 1,000 withdrawn, leaving a balance of Rs. 6,38,500 on 31st December 1899.

4. The undermentioned small works were executed and paid for from the discretionary grant placed for at my disposal during the year 1899 :—

(1) Civil Hospital, Thána :—

	Rs.
(1) Cement flooring to infectious diseases ward and to a latrine ; (2) Removing partition wall, &c., to improve the Dispensing room ; (3) Fixing iron bars and wire netting to window of store-room.	221

(2) Sir C. J. Civil Hospital, Surat :—

Providing water connections	257

(3) Civil Hospital, Ratnágiri :—

(1) Paving with trap-stone the verandah of the mortuary ...	70
(2) Providing perforated zinc shutters to three windows of the mortuary	100
(3) Making a drain from the Hospital Assistant's bath-room ...	50
(4) Additions and alterations to the Hospital Assistant's quarters ...	106

(4) Sassoon Hospital, Poona :—

		Rs.
(1)	Making cement floors to four outside wards for chronic cases;	386
(2)	Paving with stone the ground between the outside latrines and that beneath the dust-bin.	

(5) Harris Hospital, Násik :—

Providing gutters to the Hospital Assistant's quarters... ...		156

(6) Civil Hospital, Sholápur :—

Putting an iron-barred ventilator and window in the Hospital Assistant's quarters		50

(7) Civil Hospital, Bijápur :—

Adding an upper floor to the store-room		134

(8) West Hospital, Rájkot :—

Providing two stand-pipes with basements and kundies ...		200
	Total ...	1,730

5. The Civil Medical Institutions at Aden were not inspected by the Principal Medical Officer, Bombay and Aden Districts.

6. The Principal Medical Officer, Sind District, inspected all the Civil and Prison Hospitals and Dispensaries, and reported favourably upon them and on the Medical Officers in charge.

7. All the dispensaries, excepting those mentioned below, were inspected by the Civil Surgeons of the various districts :—

Jejuri	Poona District.
Pimpalgaon Basvant	Násik District.
Belgaum	Belgaum District.
Nipáni	
Ilkal	Bijápur District.
Muddebihál	
Bágevádi	
Sindgi	
Indi	
Guledgudd	

Of the above dispensaries, those at Jejuri, Pimpalgaon Basvant and Bágevádi were entirely closed during the year 1899 owing to the Hospital Assistants in charge being transferred on plague duty. The majority of the dispensaries in the Bijápur District were closed throughout the year except for intervals of a month or two. The Belgaum Dispensary was for a greater portion of the year turned into a plague hospital, and it was not found necessary to re-open it for general purposes up to the end of the year.

8. The following are the notes of my inspections which were somewhat delayed and curtailed, owing to my absence on privilege leave up to October 14th, 1899 :—

June 29th, 1899.—I inspected the David Sassoon General Hospital at Poona which was in most excellent order and efficiently worked. Certain rather extensive and very necessary improvements in the sanitary arrangements are under consideration. I again visited the hospital on October 28th in order to fix the site of the New Maternity Hospital in conference with the Civil Surgeon and Executive Engineer. This building being now nearly complete, the House Surgeon will soon be provided with more suitable quarters in the present Maternity Hospital. The new cells for European insane patients under observation were finished during the year.

I also inspected the premises of the B. J. Medical School and the students' quarters which were in a very satisfactory state; but the school is still in need of new and additional teaching appliances.

October 31st.—Inspected the hospital of the Central Prison at Yeraoda, where I found everything in excellent condition and the sick prisoners most carefully attended to.

November 3rd.—Inspected the Khán Bahádur P. Wádia Dispensary at Poona, which I found to be very well managed. The building is, however, by no means well adapted for a dispensary, and is unprovided with quarters for the Medical Officer and the Compounder.

November 7th.—Inspected the hospital of the Roman Catholic Orphanage at Poona, and was shown round the buildings. I found the hospital arrangements satisfactory and the stores and records well kept.

Travelled to Bombay.

December 9th.—Travelled to Poona.

December 12th.—Inspected the Civil Hospital at Ahmednagar, and was well pleased with its general condition; but certain improvements and alterations are desirable.

December 14th.—Inspected the Prison Hospital at Dhulia which was in a satisfactory state. The prison was greatly overcrowded; but the health of the prisoners seemed good.

December 15th.—Inspected the Civil Hospital at Dhulia, which was in good order. An operation room and improvements to the Dispensary are much needed, and minor alterations are desirable.

December 18th.—Inspected the Civil Hospital at Násik, where everything was in excellent order. Additional accommodation is, however, required for sick prisoners, insane patients and Hospital servants, together with a cook-room for patients who prepare their own food.

Returned to Bombay.

January 11th, 1900.—Travelled to Ahmedabad.

January 13th.—Inspected the Police Hospital at Ahmedabad, which seemed to be efficiently conducted; but enlargement of the Dispensary and other alterations have been suggested.

On the same date I visited the Leper Asylum, which is a most useful institution. It greatly needs improvement of the buildings and better supervision than is possible under present arrangements; and I found that, with accommodation for 50 inmates, 90 were then under care.

January 15th.—Inspected the Huttesing and Premabhai Hospital with the condition and management of which I was perfectly satisfied. An additional Hospital Assistant or a clerk is very necessary, in order to relieve the single medical subordinate, who is greatly overburdened with clinical and other work. The erection of the new Dispensary and Ophthalmic Wards had been commenced. I consider it most desirable that the Vaccination station should be removed outside the compound, so as to obviate crowding and noise and conduce to good order in the Hospital precincts. Cells for insane patients under observation and additional quarters for servants are very much wanted, together with certain minor improvements.

I at the same time inspected the premises and equipment of the B. J. Medical School at Ahmedabad and mustered the pupils. More teaching appliances are still wanted, but otherwise I was satisfied with the state of this institution. In the evening I visited the Bechardas Dispensary which was in excellent order.

January 16th.—I inspected the Hospital of the Central Prison, which was well managed. The strength of prisoners confined was 854 in excess of the accommodation, and whereas the sick in hospital numbered 26, the wards are intended for only 20. The Hospital store-room adjoins the contagious ward, and there is none within or near to the main building. On the same day I visited the Ranchodlal and Victoria Jubilee Dispensaries, where I found everything in very good order.

January 18th.—Inspected the West Hospital, Rájkot, which is one of the best of the mofussil hospitals and was in most excellent order. New latrines are very necessary, and minor improvements to the buildings are suggested. The addition of a female sweeper to the menial staff is very necessary, and the salary of the Lady Superintendent should certainly be raised.

January 22nd.—Inspected the Civil Hospital at Kaira which was, on the whole, in a satisfactory state. A cook-room and latrine for the Police patients are much wanted. It is also very desirable to improve the ventilation of the wards for prisoners and insanes, and to provide the infectious ward with an impermeable floor. Several sufferers from the famine were under treatment.

January 23rd.—Visited the Civil Hospital at Godhra where everything was in good order. There were decided evidences of the effects of privation in the condition of some of the patients and of the inhabitants in the streets. In the evening I visited the Jail, where, notwithstanding overcrowding, the inmates were healthy.

January 24th.—Inspected the Civil Hospital, Broach, which is a good building. I found the institution well managed, but the arrangements for seeing out-door patients require improvement.

January 25th.—Inspected the Cowasji Jehangir Hospital at Surat which was, on the whole, in a satisfactory state; but I found that, owing partly to the want of an enclosure, the out-door patients were permitted to crowd around the prescriber. I have sanctioned a railing to prevent this objectionable practice. During the year, water-pipes were laid down and several taps provided.

I also visited the Morarbhai Vrijbhukandas Dispensary, but the lady Doctor was absent on leave. The in-door patients treated during the year numbered only 24, and twelve of these were cases of diseases not peculiar to women. It seems to me that much more important work ought tobe done in this hospital.

January 27th.—Returned to Bombay.

February 5th.—Inspected the Civil Hospital at Sátára, which was in excellent order, but required several additions and improvements, the chief of which are the paving of floors of wards, additional servants' quarters, new latrines, and better lighting and ventilation of certain rooms.

February 19th.—Inspected the Sir D. M. Petit Dispensary at Bassein with the general state of which I was again dissatisfied. The buildings were in bad repair, the furniture poor, the stores and records ill-kept and the latter badly written. I found that during the year 1899, a sum of Rs. 61-6-0 only was paid into the Treasury on account of hospital fees. The rules of the institution do not permit medicines to be charged for, though they allow payment for advice given at the dispensary. But I found that the Medical Officer had received Rs. 934 in fees during the year for visiting 366 patients at their homes; and I can scarcely believe that the rules were intended to excuse private patients, or those not attending in person, from payment for medicines dispensed to them at the dispensary.

February 21st.—I visited the Prison Hospital at Thána, which I found in good order. I then inspected the Civil Hospital with the state of which I was quite satisfied, though the buildings still require minor improvements and the compound needs a railing for which funds have not yet been available.

I afterwards visited the C. R. Wadia Dispensary, where I found the attendance good, and the stores and records in good condition.

On the same day I inspected the Rukminibai Dispensary at Kalyán with the general state of which I was well satisfied, though the expenditure of certain drugs seemed excessive.

February 28th.—Inspected the dispensary at Mátherán, which I found in excellent order. But the new Hospital, for the building and equipment of which Mr. R. N. Byramji Jeejeebhoy has generously given Rs. 12,000 on behaf of the Trustees of "the Honourable Byramji Jijibhoy Trust Settlement," is very much needed.

March 12th.—Left Bombay for Kárwár by steamer.

March 14th.—Inspected the Prison Hospital at Kárwár, which seemed in fair order; but I noticed unnecessary liberality in the issue of medical comforts, which the Medical Officer ought to have checked.

March 15th.—Inspected the Civil Hospital, Kárwár, at which I found everything in good order. The buildings, however, require considerable improvements, the chief of which are the addition of an operation room, new latrines, paving of verandas, a bathing platform for servants' quarters for a Junior Hospital Assistant, and the removal of the mortuary, which is too near the Hospital Assistant's house. It is also necessary to add to the establishment a dresser, a matron and a female sweeper, and to appoint a permanent washerman, instead of paying for washing by the piece.

March 17th.—Travelled from Kárwár to Belgaum *vid* Marmagao.

March 19th.—Inspected the Civil Hospital at Belgaum, the management of which I found to be excellent. The buildings, however, are far from satisfactory, either structurally or as regards accommodation or convenience. Government are aware of the reasons which prevent re-building on extensive additions, but the institution may be considerably improved by a comparatively small outlay. The chief needs are additional quarters for the staff and servants, observation cells for insanes, a waiting-room for out-door patients, a better ward for women and more latrines.

March 21st.—Inspected the Prison Hospital at Dhárwár, which was in fair order, but the feeble health and general inefficiency of the Hospital Assistant necessitated his transfer. The Prison contained 500 more inmates than it is intended to accommodate.

March 22nd.—Inspected the Civil Hospital at Dhárwár, which was in excellent order. The building is a good one, but improvements in its ventilation and new latrines are very necessary, and the earthen floors must be paved.

March 24th.—Inspected the Prison Hospital at Bijápur, which was clean and well-kept, but, in my opinion, too small.

I then inspected the Civil Hospital, where everything was in good order; excepting that some of the records were spoiled by the bad writing of the Hospital Assistant. The inside of the mortuary was much exposed to public view, and the ventilation of the cells for insane patients was insufficient. I have arranged to have these defects remedied.

March 27th.—Inspected the Civil Hospital at Sholápur with the management and general condition of which I was quite satisfied. But the buildings need several improvements, mainly in respect of ventilation. New latrines, the paving of some of the floors, and better accommodation for out-patients, are also very necessary.

March 30th.—I inspected the G. I. P. Railway Dispensary at Lonávla, which I had not previouly seen, and found the instruments insufficient and badly cared for, and the records ill-arranged, inaccurately kept, badly written, and in several places not signed. The Medical Subordinate seemed to have been most inattentive and the state of the institution was so unsatisfactory that I specially reported it to Government.

I returned to Bombay on the same date.

April 10th.—Inspected the Civil Hospital at Mahábleshwar, which was in good order. But the building, as previously reported, is defective in many respects, and there is no space for the requisite additions. These are, better quarters for the Hospital Assistant, quarters for servants, a cook-room, an operation room, a waiting-room, an office, a store-room and a mortuary.

April 23rd.—Inspected the Pánchgani Dispensary, where I found the records well kept and the stores in good order.

9. The following is a list of Medical Officers who have performed more than fifty important surgical operations :—

Captain A. Street, M.B., F.R.C.S.	300
Assistant Surgeon D. E. Anklesaria	105
Captain A. Hooton	93
Major J. W. T. Anderson, F.R.C.S.E.	92
Assistant Surgeon B. H. Nanavaty, F.R.C.S.E.	75
Assistant Surgeon Mulchand Gangaram	65
Dr. B. J. Damania	58
Assistant Surgeon J. E. Bocarro	57
Assistant Surgeon Sorabji F. Ghandhi	56
Captain J. H. McDonald, M.B., C.M.	54
Lieutenant-Colonel K. A. Dalal, M.B.	53
Assistant Surgeon T. C. Khandvala	51

10. I am pleased to be able to report very favourably on the conduct and work of all Officers and Subordinates. For general good service in connection with Hospitals and Medical Schools I beg to commend to the favourable notice of Government the names of Lieutenant-Colonels Bartholomeusz, Greany and McCloghry, Majors J. W. T Anderson, W. H. Burke and M. A. T. Collie, and Captains C. T. Hudson, A. Street, A. Hooton and J. H. McDonald of the Indian Medical Service. I can also speak very favourably of almost all the Assistant Surgeons, some of whom have done most excellent work.

I have the honour to be,

Sir,

Your most obedient Servant,

G. BAINBRIDGE, M.D., Surgeon-General,

Surgeon-General with the Government of Bombay.

APPENDIX I.

ADMINISTRATION AND PROGRESS REPORT

ON THE

MOFUSSIL
CIVIL HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY

FOR THE YEAR

1900.

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1901.

No. S. B. / 2383 OF 1901.

FROM

THE SURGEON-GENERAL WITH THE
GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 19th October 1901.

SIR,

In submitting, for the information of Government, my Annual Administration and Progress Report on the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1900, I have the honour to state that, as far as seems possible, it has been condensed in accordance with the instructions of the Government of India, communicated by this Government's Resolutions Nos. 3305 and 3551, General Department, dated 10th and 21st June 1901, and by others therein quoted. In expressing my regret at the delay in its preparation, I beg respectfully to state that, though a further attempt will be made in future to submit this report by the prescribed date, it does not seem probable that, with the present amount of work, my office can always comply with orders on the subject. On this occasion, the above quoted instructions and the statistical changes ordered in Government Resolution, General Department, No. 2967, dated 29th June 1900, together with the fact that I have been fully occupied with other matters, have made its earlier submission quite impossible.

2. In preparing the statistics the new classification of dispensaries has been followed; and Statement No. I shows that, after this revision, the total number of Hospitals and Dispensaries open on the 31st December 1900 was 517, of which 232 were Government and Grant-in-aid Institutions. But, of these, nine belonging to Class I have, according to orders, been entered (Nos. 286—294) with the Private and Railway Dispensaries, leaving 223 as the total number of Institutions treated of in Statements Nos. II to V.

3. As regards the statistics of the diseases treated at private dispensaries, I would observe that their inclusion in the appendix has added very considerably to the clerical labour of this office; and that, although several of these institutions are no doubt reputable and well managed, I am not in a position to vouch for the approximate correctness of their returns as a whole. I also beg to note the fact that certain Government, Municipal and Local Fund Institutions which are wholly or partially under official control are now included in the same return as those which are under no such supervision. Statements Nos. II to V, Part I, therefore deal only with the statistics of those institutions included in Classes I and III-B.

4. Statement No. II shows that the total number of patients treated at these institutions was 1,416,517, and that, of these, 32,501 were in-door and 1,384,016 out-door patients. The daily average number of in-door patients was 1,407·3, and of out-door patients 17,346·1, total 18,753·4.

At the Civil Hospitals the combined total of in-door and out-door patients was 261,174, a diminution of 38,138 as compared with the figures shown in the report for the year 1899; but the number of in-patients at these hospitals was 1,187 in excess of those of the previous year, and, though the total daily average number treated was 349·2 less, that of the in-door patients was 1·2 greater than in 1899. The ratio of deaths among in-door patients treated at Civil Hospitals was 14·0 and at Dispensaries 11·8 per cent. as compared with 12·8 and 8·9 during the year 1899.

5. Owing, however, to the exclusion of certain Municipal, Local Fund and other institutions from the statistics under consideration, the figures therein comprised, excepting those of the Civil Hospitals, cannot be justly compared with those of the previous year; but by adding together the figures of those institutions transferred to the list of private dispensaries and of those retained in the statements, it is found that the number of patients treated at the hospitals and dispensaries formerly dealt with in this report was 2,420,026, exceeding that of the year 1899 by 390,604 (8,295 in-door and 382,309 out-door), and being the largest total yet recorded. Similarly, if there had been no change in the statements, the combined daily average of in-door and out-door cases would have been 28,618·8, an increase of 8,069·9 as compared with the preceding year.

6. Statement No. III records the diseases for which patients were treated; and an examination of the figures shows that under each of the headings malarial fevers, dysentery, diarrhœa, cholera, scurvy and small-pox, the totals are in actual excess over those of the year 1899, notwithstanding the omission of a number of non-aided institutions hitherto included in these returns. Even under venereal affections, the change of system only caused a reduction of 3,662 cases at the hospitals still included in these statements, whilst the ratio per cent. to total treated (2·1) was higher than any yet registered. The cases of cholera and small-pox numbered 11,952 and 1,072 respectively, as compared with 630 and 194 in the year 1899; whilst the total of malarial fevers was 349,684, and their percentage (24·7) to total treated the highest yet recorded in these reports.

7. But by adding to the figures of Statement No. III those of the non-aided dispensaries now transferred to the appendix, the increased sickness due to the causes above noted is further demonstrated; and, as the vital conditions of the year were exceptional, I think the following table is not out of place:—

Name of disease.	Government and Grant-in-aid Institutions included in Statement No. III.		Non-aided Institutions expunged from Statement No. III.		Total for 1900.		Ratios per cent. for 1899.
	Number treated.	Ratio per cent.	Number treated.	Ratio per cent.	Number treated.	Ratios per cent.	
Small-pox	1,072	·08	217	·02	1,289	·05	0·009
Cholera	11,952	0·8	8,050	0·8	20,002	0·8	0·03
Dysentery...	44,950	3·2	27,963	2·8	72,913	3·0	1·7
Malarial fevers	349,684	24·7	173,900	17·3	523,584	21·6	17·1
Venereal affections ...	29,139	2·1	16,947	1·7	46,086	1·9	1·6
Scurvy	2,487	0·2	1,296	0·1	3,783	0·2	0·1
Intestinal worms	105,332	7·4	117,259	11·7	222,591	9·2	11·6
Debility and anæmia ...	17,258	1·2	10,770	1·1	28,028	1·2	1·0
Rheumatic affections ...	34,120	2·4	24,036	2·4	58,156	2·4	2·7
Diseases of the eye ...	135,396	9·6	91,887	9·2	227,283	9·4	0·0
Do. ear ...	46,341	3·3	37,048	3·7	83,389	3·4	3·8
Respiratory affections ...	79,632	5·6	55,070	5·5	134,702	5·6	6·7
Diarrhœa	47,626	3·4	39,538	3·9	87,164	3·6	2·3

It will be seen from this that both in the totals and ratios per cent., all these important diseases except two show a large, or decided, increase, which was no doubt mainly caused by the climatic condition which produced the famine and by the privation consequent upon the latter. The considerable decrease of 13,316 in the total cases of intestinal worms seems contrary to what might have been expected, especially as dyspepsia and other diseases of the digestive system caused an increase of 24,273 admissions if the non-aided institutions be included. The decrease in respiratory affections may be attributed to a higher mean temperature with lessened humidity of the air.

8. Further, the adoption of the figures of the non-aided dispensaries, now excluded, gives totals which are in excess of those of 1899 by 17,367 cases of skin

diseases (including ulcers), 25,237 eye diseases and 5,714 ear diseases. In the same way the combined total of venereal affections is 46,086, and the ratio per cent. to total treated 1·9, as compared with 32,801 and 1·6 in 1899 and with the means of 32,865 and 1·4 of the three years 1893—1895 which preceded the plague. This sudden increase of 12,505 cases over the highest number yet recorded (1895) occurred almost entirely in the famine-stricken districts of Gujarát and the Deccan; and though perhaps, in some degree, attributable to a larger number of sufferers resorting to hospital, I believe, from what I was told by Civil Surgeons when on my tour, that the famine had caused a considerable increase of immorality.

9. As regards malarial fevers, the above table shows that, on the old system, 523,584 cases would have been recorded under this head in Statement No. III, an increase of 175,837 cases over those of 1899, of which 59 per cent. were in Gujarát, 20 per cent. in the Deccan, and 18 per cent. in Sind. As compared with the total of the year 1894, which was the highest previously recorded, the increase was 50,284. The ratio per cent. of malarial fevers to the total treated, if the non-aided dispensaries be included, was 21·6, as compared with 19·5, the mean of the three years 1893—1895. The question arises whether these figures indicate a real increase in the prevalence of malarial fevers, or result from a greater resort to hospitals due to lessened vital resistance against disease and to a condition of moral helplessness; or to what extent, if at all, they include diseases, other than malarial infection, having fever as one of their symptoms, and therefore point to defective registration. The large increase (10,000 cases) of malarial fevers registered at the Civil Hospitals, where the diagnosis may be assumed to be fairly accurate, supports the belief that the returns are not very erroneous, and that ailments which, whatever may have been their exact nature, are habitually classed as "malarial fevers," were very common; and I have been told by several medical officers that in Gujarát and the Deccan a severe fever of remittent type, attended with jaundice and often quickly fatal, was unusually prevalent during the dry season of 1899-1900.

10. There is no evidence that any fevers of a specific nature, other than malarial, were prevalent. Competent observers failed to discover the spirillum of relapsing fever among patients in Gujarát, and personal enquiries during my tour in February and March failed to elicit any information pointing to the existence in Gujarát or the Deccan of any disease of unusual character, except the above noted fever of remittent type and privation with its attendant gastro-intestinal disorders. No doubt, fever would be a symptom of many cases of starvation combined with the effects of exposure to the sun; and it is therefore not improbable that some of this description in which, apart from weakness and emaciation, fever was the prominent or only symptom apparent to medical subordinates, were registered by these officers as "remittent" or "intermittent" fever.

11. The following table, giving the numbers of malarial fevers treated in each division and their ratios to total treated, shows that, whilst the increase was general, it was much higher in Gujarát and Sind than in the other districts:—

	Government aided institutions included in Statement No. III.		Non-aided institutions expunged from Statement No. III.		Total for 1900.		Ratio per cent. for 1899.
	Number treated.	Ratio per cent.	Number treated.	Ratio per cent.	Number treated.	Ratio per cent.	
Konkan	62,410	29·4	8,250	16·9	70,660	27·1	27·3
Deccan	114,540	20·5	60,664	12·5	175,204	16·8	15·2
Gujarát	121,156	28·5	78,370	24·2	199,526	26 6	17·1
Sind	46,341	23·1	23,738	20·8	70,079	21·1	14·1
Foreign	5,237	23·8	2,878	21·7	8,115	23·0	17·8
Total ...	349,684	24·7	173,900	17·3	523,584	21·6	17·1

As regards the ratios, those of the Konkan and Gujarát were equalled by that of the Konkan (28·9) in 1895; whilst their mean of 21·6 (including those dispensaries now expunged) is not much higher than that of the three years 1892-1894, which give a mean percentage of 20·2 to total treated.

12. The Sanitary Commissioner's report for 1900 shows that the number of deaths from 'fever' registered during that year was the highest in the past decennium, and that, excepting in the Poona, Dhárwár, and Kánara Collectorates, the increased death ratio from fever was general, and that even in the Collectorates of Thána, Kolába, and Ratnágiri there was some rise; so that the figures in my report accord with the far larger and more telling numbers in the Sanitary Commissioner's returns.

Now the death-rate per mille of population, as recorded by the Sanitary Commissioner for the year 1900, was 28·87 for the Presidency, and 81·84 for Gujarát, as compared with the decennial means of 20·57 and 26·66, respectively. The mean recorded death ratio from fever in Gujarát is always high; and in 1894, a year of prosperity, when fever was unusually prevalent in this Presidency, the death ratio in that Registration District was 35 per mille, and in the Broach Collectorate 43 per mille, as compared with only 22·8 for the whole Presidency. So that, assuming the reality of a general increase of fevers for the year 1900, the ratio for Gujarát might be expected to reach a very high figure which may yet have been lower than that which has been recorded.

The Sanitary Commissioner says that the returns from Ahmedabad and the Panch Maháls for 1900 show serious defects in registration. And assuming their existence, and that the death-rates from fever in these two districts did not exceed that of Broach (89·66), which appears to be accepted as approximately correct—though it seems excessive—, then the ratios of deaths from fever in Gujarát for 1900 would be reduced from 81·84 to 68, and in the Presidency from 28·87 to 25 per mille which, allowing for the frequently high proportion in Gujarát, need not be regarded as erroneous when compared with those of previous years.

It therefore appears that though the registration at medical institutions may be imperfect, the number of cases of malarial fevers returned during the year 1900, when considered with those of the Sanitary Department, indicates, with a fair degree of correctness, the prevalence of these diseases or of those which are habitually registered as such.

13. The number of cases of plague reported to Government during the year exclusive of Bombay City but including Native States, was as under:—

	Cases.	Deaths.
Konkan	3,317	2,742
Deccan	20,587	16,054
Gujarát	4,260	3,250
Sind	3,292	2,588
Foreign	715	576
Total ...	32,171	25,210

14. Statement No. III-A shows that 52,123 surgical operations were performed at the Government and grant-in-aid institutions during the year 1900, as against 72,337 during the year 1899, when the return included the institutions now entered among the Private Dispensaries in Classes II. and III-A. Among 52,114 patients operated on, there were 187 deaths, a ratio of 0·35 per cent. as compared with 0·29 in the previous year.

The decrease of 20,214 in the operations done was mainly under those for abscesses (8,012) and those on the teeth (9,545); and whilst there was a decrease in the number of obstetric operations and in those on the eye, there was an increase in the operations for tumours and cysts, and of amputations, and in those on the lymphatic organs, on the abdomen, on the rectum and anus and for vesical calculus.

15. Statement No. IV shows that the ratios to the total treated of the various classes of patients scarcely differ from those of the year 1899; and I find that the addition of the 1,003,509 patients who attended the institutions now excluded from this statement makes no noteworthy difference in the proportions.

16. The total income, exclusive of the cash balance, of the institutions included in Statements Nos. I to V Part I, was Rs. 6,39,530-0-9, as compared with Rs. 6,40,306-15-10 for the same classes of institutions in 1899. Of this sum, Rs. 3,65,610-12-6 were received from Government against Rs. 3,30,937-12-6 in 1899. Municipalities and Local Bodies contributed Rs. 88,085-12-11 and Rs. 1,07,299-2-4 against Rs. 92,830-7-7 and Rs. 1,11,149-8-11 respectively in 1899. The interest on invested capital yielded Rs. 18,849-2-6 as compared with Rs. 17,307-6-11 in 1899. Securities worth Rs. 500 were sold against Rs. 6,500 in 1899. Subcriptions from Europeans and Natives amounted to Rs. 30,917-8-0 (including a sum of Rs. 23,000 being the unexpended balance of the building fund of the Bai Motlibai Wadia Dispensary at Karanj), against Rs. 55,697-1-5 in 1899. Rs. 23,828-9-4 (including Rs. 529-3-1 for diets) were realized as receipts from paying patients against Rs. 22,444-14-2 in 1899. Miscellaneous receipts amounted to Rs. 2,949-3-2 as compared with Rs. 3,439-12-4 in 1899.

17. I attach Statements A and B showing that the realizations in fees from paying patients at Civil Hospitals and Dispensaries amounted to Rs. 23,299-6-3, as compared with Rs. 22,608-9-1 in the year 1899. This increase would be larger by about Rs.900, if the collections at those institutions now placed under Class II had been included; and still greater if it had not been for the presence of famine. The system of composition fees introduced in the year 1899 has not yet had a full trial, but whilst its general effect is to enhance the total receipts, the smallness of the rates causes a disproportionate increase in the cost and trouble of treating paying out-door patients. The increased receipts at the David Sassoon Hospital, Poona, and at the European General Hospital, Aden, were very satisfactory; and the same remark applies to the Tatta Dispensary, and to that of Mátherán where the increase was Rs. 600-1-0 over the amount for the previous year:—

18. The total expenditure of the institutions included in Statements Nos. I to V was Rs. 6,50,601-5-10, as compared with Rs. 6,16,835-6-11 for the same classes of institutions in the year 1899. Deducting Rs. 34,140-5-0 on account of hospital stoppages, sale-proceeds of unserviceable articles, &c., &c., Rs. 36,700-0-0 invested during the year and Rs. 648-9-2, the unexpended balance at the Bechardas Dispensary, Ahmedabad, which lapsed to the Ahmedabad Municipality at the close of the official year, total Rs. 71,488-14-2, from the total expenditure, the net cost will be Rs. 5,79,112-7-8 and the cost per patient Re. 0-6-6 as compared with Rs. 5,25,802-2-6 and Re. 0-7-3, respectively, in 1899. Government paid Rs. 3,31,438-6-0 or 57·2 per cent. of the actual expenditure against Rs. 2,95,869-1-7 or 56·3 per cent. in 1899. The cost of each diet averaged Re. 0-2-5, or 1 pie less than in 1899. At the Civil Hospitals the cost per patient averaged Re. 0-15-4 as compared with Re. 1-0-11 in 1899. The reduction was chiefly attributable to the rise in the numbers of patients, and the increase, which occurred in a few instances, was due to larger expenditure on diets, European medicines and buildings.

19. The undermentioned small works were executed and paid for from the discretionary grant placed at my disposal during the year 1900 :—

	Rs.
Thána Civil Hospital :	
Improving the day latrines of lunatic cells	44
Alibág Dispensary :	
Providing a stand for records	65
Kárwár Civil Hospital :	
Fixing iron bars to windows of the office and dispensary ...	50
Providing and completing stone pavement of the verandah ...	252
David Sassoon Hospital :	
Improving the cells for lunatics	145
Ripon Hospital, Ahmednagar :	
Putting up a railing in the dispensary	15
Sholápur Civil Hospital :	
Providing ventilators to the servants' quarters	26
Paving three cells for insane patients	46
Dhárwár Civil Hospital :	
Additions and alterations to the cook-room	139
Providing ventilators to the wards	79
Bijápur Civil Hospital :	
Providing teakwood trellis screens round the mortuary... ...	117
Providing a glazed window on the north side of the operating room .	60
Sir Cowasji Jehangir Civil Hospital, Surat :	
Providing a railing in the waiting room for out-door patients ...	79
Broach Civil Hospital :	
Providing wooden railing in the out-patients' room	27
Total ...	1,144

20. I inspected all the Civil Hospitals during the touring season of 1900-1901 and found them well managed and in good order. Proposals have been submitted to Government for supplying the chief defects and deficiencies in the buildings; but I may mention the rebuilding of the Civil Hospital at Belgaum and extensive sanitary and other improvements at the Sassoon Hospital, Poona, as the most important of the works required. I also visited the Khandálla Convalescent Home, the dispensaries at Ahmedabad, Poona, Kalyán, Mátherán and Lonávla, the Scott Hospital at Pálanpur and the Leper Asylum at Ratnágiri, together with the hospitals at each District Prison and some of the sub-jails. The Principal Medical Officer, Sind District, inspected all the Civil and Prison Hospitals and several dispensaries, and reported favourably upon them and on the medical officers in charge. All the other dispensaries in the Presidency, excepting that of Sangola in the Sholápur Collectorate, were inspected by the Civil Surgeons.

21. Most of the medical officers did good service, but I beg to commend to the notice of Government the names of Lieutenant-Colonels J. P. Greany, J. McCloghry, W. P. Carson and H. W. Stevenson, and of Majors M. A. T. Collie, B. B. Grayfoot and J. G. Hojel.

Among the senior Civil Assistant Surgeons Mr. E. Mackenzie, Ráo Sáheb D. G. Sabnis, Khán Bahádur K. B. Cooper, Mr. M. G. Desai, Khán Bahádur Dadina, Ráo Bahádur Dalal, Mr. D. Cardoz, Khán Bahádurs Dadachanji and Moos and Mr. J. P. Wadia all proved themselves most capable and zealous. Of the Military Assistant Surgeons in Civil employ Messrs. G. C. McMullen, P. Dias and W. B. George are deserving of favourable notice.

22. The additional statement in the Appendix shows that the number of patients returned as having been treated during the year 1900 at dispensaries in Classes II and III-A was 2,029,892, and that 52,727 surgical operations were reported from them. The subjoined table gives the ratios per cent. of

the principal diseases to total treated at the same institutions, and it is interesting to note that they nearly correspond with those of the hospitals and dispensaries in Classes I and III-B :—

Dispensaries in Classes II and III-A—Appendix II.

Diseases.	Municipal and Local Fund.	Private.	Railway.	Police.	Miscellaneous.	Total.
	Ratios per cent. to total treated.

The following statement shows the extent to which Civil Hospital Assistants are required to be recruited on the 31st March 1901 :—

Sanctioned strength	286
20 per cent. Reserve	57
Total ...	343
Actual strength on the 31st March 1901	338
Deficiency ...	5

The deficiency will be made up from the pupils who will pass their final examination in September 1901.

I have the honor to be,
Sir,
Your most obedient Servant,
G. BAINBRIDGE, M.D., Surgeon-General,
Surgeon-General with the Government of Bombay

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. 1.

Showing the classification of the Mofussil Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1900.

No. S. B. / 2997 OF 1902.

OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

From

THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department, Bombay.

Bombay, 25th September 1902.

SIR,

I have the honour to submit, for the information of Government, my Annual Report on the Civil Hospitals and Dispensaries in the Bombay Presidency (including Bombay City) for the year 1901, prepared according to the instructions conveyed in paragraph 2 of Government Resolution, General Department, No. 2322, dated 25th April 1902; and to state that, so far as appears necessary, the figures are contrasted with those of the years 1899 and 1900. The preparation of this report has been delayed by the insufficiency of the clerical staff to collect and compile more quickly the numerous returns from Private Dispensaries, and also by the large amount of other work in my office.

2. During the past three years plague has persisted; and deficient or untimely rainfall, which is here contrasted with the means at the head-quarters of the affected districts, caused widely spread scarcity which was especially severe in Gujarát, and was naturally attended in varying degrees by high prices, serious failure and deterioration of drinking water, and great scantiness of the supply of milk, vegetables and fruits, conditions which caused most serious increase of sickness and mortality, and (in 1900 and 1901) a marked decline in the birth-rate. The registered deaths among the Native Civil population in the Presidency for the year 1901, as stated by the Sanitary Commissioner, were 686,134, or 632,649 fewer than in the year 1900 and 13,865 more than in 1899; and the death-rates per mille of population for the years 1899, 1900 and 1901 were 35·7, 70·1 and 37·1, respectively, as compared with a decennial mean of 30·8 recorded up to the year 1899. In the year 1900 there were 163,889 deaths from cholera, a ratio of 8·71 per mille of population, as against the quinquennial mean of 2·86; and in the same year the deaths from dysentery and diarrhœa gave a ratio of 11·59 as compared with a quinquennial mean of 5·01, whilst the death-rate from fevers rose in 1900 to 28·87 per mille. But during the year 1901, there was a greatly lessened mortality under each of the main headings except plague.

3. Statement No. I shows that the total number of institutions open increased during the year from 547 to 627, the latter figure including 379 of Classes II and III-A and 10 State institutions. On the 1st January 1899, the institutions now included in Statements Nos. I to V were 232 in number, as compared with 238 on the 31st December 1901; but 10 State dispensaries having been transferred to the Appendix, their true number is 248, and they have increased by 16 during the three years. Municipal and Local Fund dispensaries numbered 35 on the 1st January 1899, and 65 on the 31st December 1901.

4. The subjoined table shows the total numbers of patients treated during each of the past three years :—

	1901.			1900.			1899.		
	In-door.	Out-door.	Total.	In-door.	Out door.	Total.	In-door.	Out-door.	Total.
Bombay City Institutions	17,031	105,328	122,359	18,387	101,518	119,905	18,071	82,388	100,459
Mofussil Institutions ...	28,160	1,453,275	1,481,435	32,501	1,384,016	1,416,517	27,123	1,157,021	1,184,144
Total ...	45,191	1,558,603	1,603,794	50,888	1,485,534	15,36,422	45,194	1,239,409	1,284,603
Mofussil Institutions transferred to the list of private Institutions.	6,081	1,039,485	1,045,566	8,004	995,505	1,003,509	5,708	839,570	845,278
Grand Total ...	51,272	2,598,088	2,649,360	58,892	2,481,039	2,539,931	50,902	2,078,979	2,129,881

Excluding institutions of Classes II and III-A, the total number treated (1,603,794) during the year 1901 was greater by 67,372 and 319,191 than in the years 1900 and 1899, respectively. This increase was slight in the foreign institutions, but amounted to 23,303, 55,813 and 15,703 in the Konkan, Deccan and Sind, respectively; whilst in Gujarát there was a reduced attendance of 28,012 patients as compared with the year 1900. If the returns of the institutions formerly included in Statement No. III, but now classed as private, be reckoned, the total treated would be 2,649,360, as compared with 2,490,016 in the year 1895, that is before plague appeared; so that, excepting in Gujarát, the attendance at Hospitals now seems to have nearly returned to the normal.

5. The number of in-door patients was, however, 5,697 fewer than during the year 1900, owing probably to the lessening scarcity and to the diminished prevalence of cholera, small-pox and dysentery. This reduction was shared by 3 hospitals in Bombay, which had 1,644 fewer, and by 14 Mofussil Civil Hospitals which had between them 2,893 fewer, in-patients; and according to Divisions, this falling off was 1,922 in the Konkan, 1,361 in the Deccan, 2,095 in Gujarát and 469 in Sind. The daily average of in-door patients for the combined City and Mofussil Hospitals was 2,075, as compared with 2,064 and 1,860 in the two previous years; but at the Dispensaries this average was only 380·6, as compared with 470·8 in the year 1900, and 372·3 in the year 1899—a reduction due, no doubt, to diminished privation.

The daily average attendance of women during the past three years was as under:—

	1899.	1900.	1901.
Hospitals	902·3	1,064·5	1,128·1
Dispensaries	2,190·8	3,971·3	2,681·6
Total ...	3,093·1	5,035·8	3,809·7

6. The numbers of beds available during each of the three years 1899, 1900 and 1901 were 2,711, 2,825 and 2,839 at the Hospitals, and 1,196, 1,227 and 1,219 at the Dispensaries. The mean percentages for the three years of beds always occupied in the Bombay City Hospitals were 88·1 of those for men and 80·6 of those for women and children; whilst the ratios of those occupied at all Hospitals and at Dispensaries are here tabulated :—

	Year.	Percentage of beds always occupied.		
		Men.	Women and Children.	Totals.
Hospitals (including Bombay City).	1899	71	64	69
	1900	73	72	73
	1901	73	74	73
Dispensaries	1899	40	16	31
	1900	50	17	38
	1901	39	19	32

7. The number of out-door patients treated at the State and aided institutions was 1,558,603, an increase of 73,069 and 319,194 as compared with the years 1900 and 1899; but though their daily average at Civil Hospitals increased to 2,754, it fell in the case of Dispensaries to 11,440 as compared with 15,669 in 1900 and 9,623 in 1899.

8. There was a large decrease in the total mortality, and the death-rate fell from 15·6 and 13·5 per cent. during the years 1900 and 1899 to 10·6 per cent. during 1901; though this is still high as compared with the three years 1893—95, the mean death-rate of which was only 7·2 in all hospitals of the Presidency. The reduced mortality as compared with the year 1900, is mainly due to the large decrease in the admissions for small-pox, cholera, dysentery and diarrhœa.

9. For present and future comparison certain figures are here given relating to the combined City and Mofussil Institutions, exclusive of Private Dispensaries, during the past three years:—

	In-door.	Deaths among in-door cases.	Percentage of deaths.	Daily Averages.		
				In-door.	Out-door.	Total.
Bombay City... 1901 ...	17,031	2,196	12·9	1,121·8	883·5	2,005·3
Bombay City... 1900 ...	18,387	3,265	17·8	1,127·1	851·8	1,978·9
Bombay City... 1899 ...	18,071	2,335	12·9	1,048·9	762·5	1,811·4

„ „ ear ...	2,842	53,898	40,415	97,155	1,695	46,341	37 048	85,084	1,730	77,675	79,405
Respiratory affections	8,310	84,403	60,463	153,176	8,007	79,632	55,070	142,709	6,745	135,925	142,670
Diarrhœa	2,399	23,680	21,144	50,223	4,047	47,626	39,538	91,211	3,805	47,549	51,354

Malarial fevers caused an increase of 54,854 cases; and an aggregate increase of 72,100 in the total treated was contributed by intestinal worms (7,382), rheumatism (2,071), all other general diseases (12,215), affections of the eye and ear (15,387), respiratory diseases (5,760), diseases of the digestive system (6,234) and local injuries (3,619); whilst the combined admissions for cholera, dysentery, scurvy, debility and diarrhœa were fewer by 60,826 than in the year 1900. In Gujarát, dysentery and diarrhœa together caused 26,963 fewer admissions, intestinal worms 1,898 fewer, and dyspepsia and other diseases of the digestive system a reduction of 3,455 as compared with the year previous. The admissions for small-pox were about one-third of those in 1900, but twice as many as in 1899. Of venereal affections there was again a decided increase, the ratio per cent. of total treated being 2·2 in 1901 as against 2·0 and 1·7 per cent. in the two previous years; and on comparing the ratios of the past three years with the means of the five years 1894—98, that of the Bombay City Hospitals is found to have increased from 4·6 to 4·9, whilst that of all Mofussil institutions has risen from 1·4 to 2·2, and of those in Gujarát to 2·5 per cent. of total treated.

11. The total of malarial fevers entered in Statement No. III is 417,524, as against 362,670 for 1900; and the ratio per cent. of these cases to total treated rose to 26·0 in 1901 from 22·2 in the year 1900, and from 19·5 which was the mean of the three years 1893—95. Including the non-aided institutions, the cases of malarial fevers numbered 631,584, an increase of 95,014 over the previous year, and their ratio per cent. of total treated for 1901 was 23·8, as compared with 21·1 and 16·8 in 1900 and 1899, respectively.

12. The number of cases of malarial fevers treated during the year 1901 increased largely in the Deccan, considerably in Gujarát and moderately in the other Divisions. Of the increase of 54,854 fever cases registered at State and aided institutions, the Konkan, Deccan, Gujarát and Sind contributed 13, 46, 24 and 16 per cent., respectively; whilst the percentage of malarial fevers to total treated in Gujarát (34·0) remained very much higher than in the Deccan (22·9), and considerably in excess of that of the Konkan (30·0). In the Konkan and Deccan the changes in these ratios were unimportant, though they remained high as compared with former years; but in Gujarát the ratio rose to 34·0 per cent. as compared with 28·5 and 17·1 in 1900 and 1899 respectively. But although the increase of fever cases treated in Gujarát was not great, the large diminution in

that district of the patients treated for diseases of the digestive system helped to maintain a high ratio of fevers to the total treated. If the non-aided dispensaries be added, the Konkan contributed 8, the Deccan 39, Gujarát 33 and Sind 21 per cent. of the increase of 95,014 cases. The Hospital statistics, therefore, show a large aggregate increase in Malarial fevers and a moderate rise in their ratio to the total treated; and lead to the inference that febrile disorders were more prevalent than usual in the Presidency.

13. There was a marked increase in the admissions for tubercle from the year 1896 to the year 1899; and though the admissions during 1900 and 1901 fell somewhat in Bombay City, the total admissions from this cause during the years 1899, 1900 and 1901 were 3,600, 4,001 and 3,904, respectively. The admissions for lung diseases in 1901 were 6,600 as compared with 7,286 in 1900 and 5,891 in 1899, whilst those for other respiratory affections rose from 78,775 in 1899 to 86,113 during the year 1901.

14. With reference to paragraph 5 of Government Resolution No. 3543, dated 25th June 1902, I have to report that the Hospital returns in no way explain the increase of deaths from "all other causes" in Surat, Broach and Kaira which is recorded by the Sanitary Commissioner. As regards the Collectorates of the Southern Registration District (Bijápur, Dhárwár, Belgaum and Kánara), they contributed no less than 27,703 out of the increase of 64,918 in the total treated at the Mofussil institutions during 1901 as shown in Statement No. III. This figure is chiefly made up as noted in the margin; though, without very minute examination of the hospital returns, it is impossible to specify more exactly the particular diseases contributing to this increase, or to indicate the cause of the high death rate from "all other causes" which is noted by the Sanitary Commissioner. But I consider that the explanation will be found in the extensive advance of plague during the year, and in the fact that, of 182,619 reported indigenous cases outside the City of Bombay, 77,308, with 40,678 deaths, occurred in the four Collectorates of the Southern Registration District, of which only 785 cases were recorded in Kánara and Bijápur. The numbers of cases reported from these four Collectorates during the years 1900 and 1899 respectively were 9,287 and 35,438 respectively; and it is probable that in each of the three years many deaths due to plague were registered under other causes.

Southern Registration District.	Increase.
Malarial Fevers	7,048
Rheumatic affections	1,081
All other general diseases ...	10,544
Do. respiratory „ ...	1,720
Do. digestive „ ...	1,968
	22,361

15. The number of persons admitted into hospitals for plague was 104, of whom 24 died. The remainder were transferred to plague hospitals, as also were 342 others seen as out-door patients. The cases of plague and deaths therefrom reported to Government during the year, but not included in the attached statistics, are here shown in contrast with those of the two preceding years:—

Including Native States.		Plague cases.	Plague deaths.
Konkan ...	Bombay City ...	21,006	18,736
	Mofussil	6,630	5,405
Deccan		159,668	121,880
Gujarát		13,354	9,770
Sind		3,973	3,150
Foreign		...	...
Total for ...	1901 ...	204,631	158,941
	1900 ..	50,084	38,495
	1899 ...	153,685	119,448

16. The surgical operations performed during the year 1901 (Statement No. III-A) numbered 63,948, with a mortality of 0·54 per cent. as compared with 62,965 and a mortality of 0·62 per cent. in the previous year; and there was no considerable diminution in any of the more important operations. Those on tumours and cysts increased by 86, incisions and tappings of joints

by 20, major amputations by 36, extractions of the lens by 13, incisions of hepatic abscess by 27, lithotomies by 87 and operations for crushing vesical calculi by 128. There were 73 operations for hernia as compared with 66 in 1900, and 46 laparotomies—the same number as in the previous year—for other diseases than those peculiar to women. The abdomen was opened 31 times for uterine or ovarian operations as against 46 in the previous year; and the major obstetric operations numbered 194 as compared with 204 in the year 1900. Of 11 ovariotomies 8 recovered, and of 6 abdominal hysterectomies 3 were successful; death followed the application of forceps in 5 out of 69 cases, and resulted in 8 out of 44 cases of craniotomy and in 2 out of 3 Cæsarian sections.

The largest numbers of important operations in general surgery were performed by Lieutenant-Colonels Hatch, Carson, Corkery and Stevenson, Majors Quicke, Street and Hojel, and Captains Evans and Hooton. For crushing vesical stone Lieutenant-Colonel Hatch did 40, Lieutenant-Colonel Stevenson 215, Lieutenant-Colonel A. V. Anderson 88, Major Street 27, Captain Burnett 213, and Captain H. M. Moore 31 operations, out of a total of 837; and out of 370 lithotomies 27 were performed by Lieutenant-Colonel Dalal, 19 by Captain Burnett, and 53 by the late Assistant Surgeon Aquino. The majority of the abdominal sections and obstetric operations were done by Lieutenant-Colonel Dimmock and by Miss A. M. Benson, M.D.; and of 709 extractions of cataract 541 were done by Major Herbert. Assistant Surgeon Nanavati also did 74 extractions of the lens; and this Officer and Assistant Surgeons Anklesaria, Kallianwala and Ghandy each did numerous other operations.

17. Comparison of the figures of Statement No. IV with those of my two reports for the year 1900, shows that the attendance of men at the State and aided institutions improved by 54,659, and that of the women by 17,651, but that the number of children diminished by 4,938. The increase in male patients occurred mainly in the Deccan, but was also considerable in the Konkan and Sind; whilst that of the female adults was almost wholly contributed by the Konkan and the Deccan. In Gujarát* there was a small decrease in the attendance of both men and women, and that of children declined in this division by 17,175, and in Sind by 2,507; but in all the other divisions there was an increase in adult patients of both sexes and of juveniles, the attendance of the latter being higher by 3,585 in the Konkan and 11,106 in the Deccan than in year 1900. As regards classes, the number of Hindu patients increased by 27,432 and that of Musalmans by 40,831 as compared with the year 1900; whilst in the other races the variations were unimportant.

18. The total income, exclusive of the cash balance, was Rs. 10,95,528-10-6 against Rs. 11,25,484-12-7 in 1900, and Rs. 10,74,107-5-1 in 1899, for the same institutions, *viz.*, State and Aided. Of this sum, Rs. 7,01,579-15-5 were received from Government as compared with Rs. 7,23,045-8-5 and Rs. 6,43,720-4-3, respectively, in 1900 and 1899. Local Bodies and Municipalities contributed Rs. 1,29,011-4-11 and Rs. 1,47,272-4-1 against Rs. 1,20,822-2-4 and Rs. 1,45,062-7-9 in 1900, and Rs. 1,24,672-8-11 and Rs. 1,49,827-11-9 in 1899, respectively. The interest on invested capital yielded Rs. 22,337-8-0 as compared with Rs. 24,066-7-2 in 1900 and Rs. 18,230-0-8 in 1899. Securities worth Rs. 4,800 were sold against Rs. 500 in 1900 and Rs. 6,500 in 1899. Subscriptions and donations from Europeans and Natives amounted to Rs. 20,161-13-3, as compared with Rs. 32,524-13-0 and Rs. 55,697-1-5 respectively in 1900 and 1899. Rs. 58,670-11-8 (Hospital stoppages Rs. 57,935-14-10, and diets Rs. 734-12-10) were realized as receipts from paying patients against Rs. 68,462-8-0 in 1900 and Rs. 68,109-9-11 in 1899. Miscellaneous receipts amounted to Rs. 11,665-1-2 as compared with Rs. 11,000-13-11 and Rs. 7,350-0-2 respectively in 1900 and 1899.

19. The realizations from Hospital stoppages amounted to Rs. 57,935-14-10, as against Rs. 67,933-4-11 and Rs. 67,390-7-10 in the two previous years, the decrease of Rs. 9,997-6-1 as compared with the year 1900, having occurred

---

* Corresponding with the high death-rates and low birth-rates of the years 1900 and 1901.

mainly at St. George's Hospital, where the receipts diminished by the large sum of Rs. 8,048-14-0; but, excluding this institution, the reduction in fees at the State and Aided Hospitals and Dispensaries was only Rs. 1,948-8-1. The receipts at the Jaffer Sulleiman Dispensary increased from Rs. 227-10-0 in 1900 to Rs. 880-8-0 in the year under report; but at the Sassoon Hospital, Poona, the receipts fell by Rs. 1,232, and at the European General Hospital, Aden, by Rs. 912, without any explanation being given as to the causes of reduction; whilst at the Civil Hospitals of Kárwár, Sátára, Kaira, Ahmedabad and Sukkur, and at the Mahád, Málegaon, Chopda, Karád, Panchganni and Gokák Dispensaries, there was a moderate improvement, and at the Kumta, Kapadvanj and Tatta Dispensaries a very satisfactory increase in these fees.

20. The Physician, St. George's Hospital, omitted to report upon the cause of the diminution in receipts; but it is found on enquiry that the recoveries during the year 1901 include Rs. 1,152-8-0 on account of outstandings due on the 1st January 1901, and that on the 31st December of that year the amount unrecovered was Rs. 6,028-8-0, of which Rs. 3,421-8-0 had been received up to the 31st July 1902. And with regard to the balance due for previous years on that date, steps have been taken for its recovery.

21. The total expenditure was Rs. 10,85,038-4-6 against Rs. 11,39,095-4-2 in 1900 and Rs. 10,48,580-12-11 in 1899. Deducting Rs. 83,152-1-8 remitted into the Treasury on account of hospital stoppages and sales of unserviceable articles, &c., &c., Rs. 704-9-0 on account of loans returned to Municipalities, Rs. 3,900 invested during the year, and Rs. 244-10-4, the unexpended balance at the Becherdas Dispensary at Ahmedabad, which lapsed to the Municipality at the close of the official year—total Rs. 88,001-5-0—the net cost was Rs. 9,97,036-15-6 as compared with Rs. 1,003,499-2-6 in 1900 and Rs. 8,93,500-13-4 in 1899. The cost per patient was Re. 0-10-0 against Re. 0-10-6 in 1900 and Re. 0-11-2 in 1899. The cost of each diet averaged Re. 0-2-11, as compared with Re. 0-2-7 and Re. 0-2-9 in 1900 and 1899, respectively. At Saint George's Hospital the cost per diet was reduced by Re. 0-1-11; and there were noteworthy reductions in the rates at the Gokaldas Tejpal Hospital, the two Aden Hospitals, the West Hospital, Rajkot, and—as regards native patients—at the Sassoon Hospital, Poona. At the latter Hospital and at the Civil Hospital, Karáchi, the cost of Europeans' diets increased by Re. 0-0-9 and Re. 0-2-6, respectively; and at the Sir Jamsetji Jijibhoy, and the Cama and Allbless Hospitals, each diet cost 3 pies and 6 pies more than in 1900; whilst at other institutions there were no variations which need remark.

22. Government paid Rs. 6,18,399-7-9, or 62 per cent. of the actual expenditure against Rs. 6,27,765-14-5, or 62·6 per cent. in 1900, and Rs. 5,46,604-14-2 or 61·2 per cent. in the year 1899.

23. The expenditure on European Medical stores during the year under report was Rs. 1,07,977, or an average of Rs. 490 each for 42 hospitals and 178 dispensaries, as compared with Rs. 528 which was the average expenditure for 243 institutions (40·4 hospitals and 202·2 dispensaries) during the past ten years.

24. With reference to the remarks at page 5 of my Report on the Bombay City Hospitals for the year 1900, the following statement shows the expenditure on nursing (exclusive of menial attendants) during the year under report; and I beg to state that, owing to the difficulty in collecting exact figures and to the effect that their inclusion would have had on the comparative expenditure of the Hospitals concerned, the sums contributed for this object from other than Government sources are not shown in Statement No. V—Part I. But for the current year, during which the grants by Government to certain Hospitals will be liberally increased, the nursing developed and the system of accounts and control improved, the total income and expenditure will be shown in the statistics:—

Names of Hospitals.	Total cost of nursing during 1901.	Paid by Government.	Public subscriptions and interest on investments.
	Rs.	Rs.	Rs.
St. George's Hospital	28,398	16,569	11,829
Sir Jamsetji Jijibhoy Hospital	12,075	1,602	10,473
Motlibai and Petit Hospitals	8.904	5,114	3,790
Cama and Allbless Hospitals	12,341	7,776	*4,565
Gokaldas Tejpal Hospital	3,599	.....	† 3599
Sir D. Sassoon Hospital, Poona	12,610	5,028	7,582
West Hospital, Rajkote	1,320	480	840
Civil Hospital, Karáchi	1,680	560	1,120
Total ...	80,927	37,129	43,798

* From the Lady Dufferin Fund, and exclusive of Rs. 1,297 for training of pupils.

† Includes Rs. 1,027 from the Bombay Municipality.

25. For the support and treatment of lepers, there are four State-aided Institutions at which the numbers of inmates maintained during the three years 1899, 1900 and 1901 have averaged 711, 893, and 910, respectively. At Bombay the Matunga Asylum is well-built and efficiently managed under the Corporation, and now accommodates 350 persons and has a biological system of sewage disposal successfully and profitably established by Mr. C. C. James. At Trombay, a few miles up the harbour, is an Asylum which is located in a well situated building, with accommodation for about 35 Eurasians, and is now under improved management. And the Asylum for native lepers at Ratnágiri, which is in charge of the Civil Surgeon and a Committee, is well organized and much resorted to. But at Ahmedabad the Kagrapeith Asylum—an old serai—is in a somewhat unsuitable situation within the city, and is greatly in need of improvements. The institution is in charge of the Civil Surgeon, and is dieted and equipped from the Civil Hospital, in the returns of which its figures are included. I propose however that, from the current year, the statistics of the two Hospitals shall be shown separately. At Sholápur is a small Leper Asylum established by the "American Mission to Lepers in India and in the East," which has erected some good buildings and has recently received a grant-in-aid from Government, though the institution is not yet entered in the returns attached to this report.

At each of these Asylums many of the inmates stay permanently; and it seems most desirable that, even though compulsory segregation may not be authorized by Government, lepers should be induced to undergo voluntary isolation by the maintenance of as many suitable Asylums as may be requisite.

26. *Buildings.*—The most important new works carried out or begun during the past three years were as follows, *viz.*:—At the Sir Jamsetji Jijibhoy Hospital, quarters for the House Surgeon; at St. George's Hospital, a new laundry and a hydraulic lift; at the Cama Hospital, a laundry; at the Sir D. Sassoon Hospital, Poona, new maternity wards, and observation cells for European insane patients; at the Civil Hospitals, Kárwár, Násik and Karáchi, operation rooms; at the Civil Hospitals, Thána, Násik and Broach, cells for insane patients; at the West Hospital, Rájkot, an out-door Dispensary; at the Civil Hospital, Ahmedabad, the Naoroji Ophthalmic Hospital, and out-door Dispensary, and new quarters for servants; at the European General Hospital Aden, additional quarters for servants; and at the Civil Hospital, Sholápur, general improvements, including the substitution of Mangalore tiles for the thatched roof. The Naoroji Ophthalmic Hospital and out-door Dispensary at Ahmedabad were built at the expense of Khán Bahádur Naoroji P. Vakil, C.I.E. The maternity wards for Parsis at Poona were erected out of funds given by Mr. Sorabji Padamji, whilst at Mátherán the Byramjee Jeejeebhoy Hospital, and at Khandalla the Nowrosji N. Wadia Dispensary, have been built by the trustees of certain funds set apart in memory of those gentlemen, the last

named institution having been further endowed with a capital sum of Rs. 30,000 by Bai Jerbai N. Wadia.

Among new projects, Government have sanctioned extensive improvements at the Sir D. Sassoon Hospital, Poona; and have approved of the building of cells for insane patients, and of wards for infectious cases at the Civil Hospital, Ahmednagar. They have also granted funds for enlarging the compounds of the latter, and of the Civil Hospital at Sátára; and have provided a sum of Rs. 4,00,000 for the purchase of land to enlarge the enclosure of the Sir Jamsetji Jijibhoy Hospital and of the Grant Medical College,—a measure of the utmost value for the future extension of those institutions; whilst additions to several other hospitals have been sanctioned or approved. The preparation of plans and estimates for the enlargement of the Sir Cowasji Jehangir Ophthalmic Hospital, and for a new Civil Hospital at Belgaum, has been approved; and the questions of improving the Civil Hospital at Karáchi, and of building a hostel for pupils at the Medical School, Hyderabad (Sind), have been placed before Government for consideration.

Of important works previously recommended, I again beg to urge the necessity for new quarters for the Assistant Surgeons and Steward at St. George's Hospital, and the desirability of rebuilding the women's wards at the latter institution.

27. The following small works were sanctioned and paid for from my "Discretionary Grant" of Rs. 3,000, during the year 1901 :—

	Rs.
St. George's Hospital—	
1. Improving the drainage	209
2. Improvements in store-rooms and mortuary	154
B. E. Albless Hospital—	
Wash-hand basins on the 1st floor of the Hospital ...	192
Sir D. Sassoon General Hospital, Poona—	
Trellis work for verandah of the infectious wards ...	150
Room for the nurse on duty at the infectious wards ...	163
Civil Hospital, Násik—	
A marble-topped table with two copper basins in the operating room	173
A partition to shut off a small room near the operating room	120
Civil Hospital, Dhulia—	
Converting an old latrine into a sweeper's room ...	72
Civil Hospital, Sátára—	
Improving the lighting and ventilation of the 1st Class Hospital Assistant's quarters	130
Providing windows and verandah to the 2nd Class Hospital Assistant's quarters	220
Improving the lighting of the operating room ...	142
Improving the lighting and ventilation of the mortuary ...	66
Civil Hospital, Sholápur—	
Improving ventilation of the cook-room and covering its windows with wire netting	78
Store-room—Fixing iron bars and wire netting to windows.	54
Stand-pipe—Raising the platform of—	10
Glazed shutters provided to door...	10
Civil Hospital, Dhárwár—	
Improvements to cook-room	28
Improving windows of female ward and operating room ...	48
Civil Hospital, Godhra—	
Concrete-flooring to pauper patients' ward	13

Civil Hospital, Ahmedabad—

Providing shelves in store-room	100

West Hospital, Rájkot—

Providing perforated zinc shutters for the mortuary ...	57
Ditto ditto to the store-room ...	57
Improvement of the water pipes	84

Scott Hospital, Pálanpur—

Fixing iron bars and wire netting to the windows of the store-room	25
	2,355

28. I inspected all the Hospitals in Bombay City and those at Thána, Poona, Ahmednagar, Sholápur, Bijápur, Násik, Mátherán and Máhableshwár, and the G. I. P. Railway Dispensary at Igátpuri. As desired by Government, I also visited the Deccan Convict Gang at Visápur and the town of Pandharpur; but, owing to excessive office work, I found it quite impossible to do any further touring. The Dispensaries were all inspected by the Civil Surgeons, and the Principal Medical Officer in Sind reports that he and the Civil Surgeons inspected all the institutions in that province.

29. It gives me much satisfaction to state that the services rendered by Medical Officers, and especially their professional work, have, for the most part, been excellent. It seems unnecessary to submit a list of all those who deserve commendation; but I wish to bring to the special notice of Government the names of Lieut.-Colonels Greany, Henderson, Hatch, Carson, Willis, Dimmock, Stevenson and Lyons, of Majors Burke, Quicke, Meyer, Childe, Hojel and J. B. Smith, and of Captains Street and Burnett. And I also beg to mention for their good service and capabilities, the names of Senior Assistant Surgeon T. D. W. Gillespie, and Assistant Surgeons W. B. George, H. A. Lafond, H. W. de B. Prescott and A. V. M. King of the Indian Subordinate Medical Department, together with Ráo Sáheb D. G. Sabnis and Khán Bahádur K. B. Cooper, Civil Surgeons, and Mr. E. Mackenzie (V. H. A. S.), Khán Bahádur F. A. Moos, and Messrs. J. P. Wadia, B. H. Nanavati, N. K. Kalyanvala and M. J. Mistri, Civil Assistant Surgeons.

Captain J. H. McDonald, I. M. S., has worked hard, and with zeal, as my Personal Assistant.

30. At the close of the year 1901 there were, in the three Provincial Medical Schools for Hospital Assistants, 234 pupils distributed as under:—

Class of Pupils.	Byramji Jijibhoy Medical School, Poona.				Byramji Jijibhoy Medical School, Ahmedabad.				Medical School, Hyderadad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year	Total.
Native Military Pupils ...	9	13	13	35	7	14	15	36	...	...	1	1	16	27	29	72
Stipendiary	5	5	5	15	7	3	5	15	7	1	2	10	19	9	12	40
Native States...	3	4	3	10	...	...	1	1	...	...	...	...	3	4	4	11
Paying	2	3	5	10	6	8	13	27	6	11	9	26	14	22	27	63
Civil Medical...	12	8	12	32	3	3	2	8	5	1	1	7	20	12	15	47
Free	...	...	...	...	1	...	...	1	...	...	...	...	1	...	...	1
Total ...	31	33	38	102	24	28	36	88	18	13	13	44	73	74	87	234

The following statement shows the extent to which Civil Hospital Assistants are required to be recruited on the 31st March 1902 :—

Sanctioned strength		289
20 per cent. Reserve		58
Total ...		347
Actual strength on 31st March 1902		338
Deficiency ...		9

The deficiency will be made up from the pupils who will pass their final examination in September 1902. Very few Musalmans enter the Medical Schools, and the average number of Hospital Assistants of this class in the service was only 29 during the past three years.

31. The requirements of plague and famine have greatly strained the capacity of my office during the last six years to provide Hospital Assistants for special duties; and, in order to show the extent to which this Department has complied with requisitions, the numbers so employed are given in the attached table.

	Permanent Hospital Assistants.						Temporary Hospital Assistants.						Annual average employed.		
	1896.	1897.	1898.	1899.	1900.	1901.	1896.	1897.	1898.	1899.	1900.	1901.	Permanent.	Temporary	Total.
On Plague Duty	31	75	110	108	58	39	21	121	97	78	38	86	70	73	71
On Famine Duty	32	32	23	24	108	27	...	13	...	11	93	28	41	36	38
Number of Dispensaries temporarily closed...	...	23	35	...	...	...	...	...	...	...	...	...	...	...	...

Note.—Besides these, an annual average of about 25 Hospital Assistants did duty at poor-houses in addition to their Dispensary work and in 1900-1901 there were 125 compounders employed on Famine and Plague duties.

32. During the years 1897 and 1898 some of these subordinates were obtained for Plague duty by withdrawing them from their charges; but, owing to modifications in plague measures, and by means of the increased employment of temporary Hospital Assistants in connection with them, this inconvenient system has, since 1899, been given up. Yet although, during the serious scarcity of the past three years, a general increase of sickness, together with local famine conditions, have made it essential to avoid the temporary closing of dispensaries, and have enhanced the objections to depleting the staffs of Hospitals in order to supply Hospital Assistants for famine duty, this demand has nevertheless been met to a large extent from the permanent civil establishment; whilst during the year 1900, twenty-three Hospital Assistants were lent by other provinces, mainly from the Military Service.

I have the honour to be,

Sir,

Your most obedient Servant,

G. BAINBRIDGE, M.D., Surgeon-General,
Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. I.

Showing the Classification of the Civil Hospitals and Dispensaries of the Bombay Presidency during the year 1901.

1	2	3	4	5	6	7
Population of the Bombay Presidency.	Class.	Number open on 31st December 1900.	Number opened during the year 1901.	Number closed during the year 1901.	Number open on the last day of the year. 1901.	Remarks.
	Konkan.
